Only those who have reviewed, year in and year out, know how truly abominable most fiction is. And we can't remove ourselves from the pain. Ordinary readers can skip, or read every third word, or quit in the middle. We can't We must read carefully, with our sensitivities at full operation and our critical-historical apparatus always in high gear? or we may miss that subtle satire which disguises itself as clich?, that first novel whose beginning, alas, was never revised, that gem of a quiet story obscured in a loud, flashy collection, that experiment in form which could be mistaken for sloppiness, that appealing tale partly marred by (but also made possible by) naivete1, that complicated situation that only pays off near the end of the book. Such works exist but in order not to miss them, one must continually extend one's sensitivity, knowledge, and critical care to works that only abuse such faculties. The mental sensation is that of eating garbage, I assure you, and if critics* accumulated suffering did not find an outlet in the vigor of our language, I don't know what we would do. The computers were unable to identify vibration patterns correlating with human activity in the data coming in from the sensing devices quietly scattered around the gorge by low-flying, remote piloted "bees" on and off throughout the night; the chemical sensors located to the leeward of the suspected decoys were detecting little of the odor molecules characteristic of human bodies; the microphones had yielded nothing in the way of coherent sound patterns, but this was doubtless because of the white-noise background being generated in the vicinity of the stream.
