"Waris and several other men. And they are men, and they make that important beyond anything else..For a long time nobody would touch him. He had fallen down in a fit in San's doorway. He lay there now like a dead man. But the curer from the south said he wasn't dead, and was as dangerous as an adder. San told how Otak had put a curse on Sunbright and said some awful words that made him get smaller and smaller and wail like a stick in the fire, and then all in a moment he was back in himself again, but sick as a dog, as who could blame him, and all the while there was this light around the other one, Otak, like a wavering fire, and shadows jumping, and his voice not like any human voice. "No harm will come to you." They came to the doorway of the roaster tower, a narrow passage in the three-foot-thick walls. He took Otter's arm, for the young man hesitated..that would have kept a far more experienced wizard captive. There were men of great skill and..small plate in front of each of us and with two lightning movements threw on each plate a portion."Not this. The Lords of Pendor are good men. When he had gone she turned to Otter..After Maharion's death in 452, several claimants contested the throne; none prevailed. Within a few years their struggles had destroyed all central governance. The Archipelago became a battleground of hereditary feudal princes, governments of small islands and city-states, and piratic warlords, all trying to increase their wealth and extend or defend their borders. Trade and ship traffic dwindled under piracy, cities and towns withdrew inside defensive walls; arts, fisheries, and agriculture suffered from constant raids and wars; slavery, which had not existed under the Kings, became common. Magic was the primary weapon in forays and battles. Wizards hired themselves out to warlords or sought power for themselves. Through the irresponsibility of these wizards and the perversion of their power, magic itself came into disrepute.."Why are we wasting time here?" he demanded, as Tern let the bucket down into the well. "Are you..She'd have thought being King in Havnor wasn't good enough for him..was hurt. In the year that followed, they built a.."I'm at the Cavuta, my second year. Her room was behind the chimney. Berry would come in, drunk, in a while, and she'd put down the pallet in the chimney corner for him. Let the traveler have a good bed for a night. Maybe he'd leave a copper or two with her when he went on. There was a terrible shortage of coppers in her household these days.."Why not? Why does it have to be a witch or a sorcerer? They were grateful to have work in a time when. The Hardic people of the Archipelago live by farming, herding, fishing, trading, and the usual crafts and arts of a nonindustrial society. Their population is stable and has never overcrowded the limited habitable land available to them. Famine is unknown and poverty seldom acute.. "Ah," said one of the women, the taller of the two, and she laughed. But she did not answer the gesture..frightened, and did not know what he was frightened of. The wizard, the power, the spell... Despite his ranting and scolding against dragon hunters, High-drake had been honored in his island, and his successor would have both honor and power. Perhaps tempted to think that he had come as near to Morred's Isle as he would ever come, Medra stayed a while longer on Pendor. He went out with the young lord in his ship, past the Toringates and far into the West Reach, to look for dragons. There was a great longing in his heart to see a dragon. But untimely storms, the evil weather of those years, drove their ship back to Ingat three times, and Medra refused to run her west again into those gales.
