grassy scent overlays the more subtle smell of rich, raw soil. "But you are. What can you do to stop it?" mother for the survival training that so far has been an invaluable assist to God in this matter. KATH STOPPED TALKING and leaned away to pour a drink from the carafe of wine on the night table by the bed, and Colman lay back in the softness of the pillows to gaze contentedly round the room while he savored a warm, pleasant feeling of relaxation that he had not known for some time. It was a cosy, cheerfully feminine room, with lots of coverlets and satiny drapes, fluffy rugs, pastel color, and homey knickknacks arranged on the shelves and ledges. In many ways it reminded him of Veronica's apartment in the Baltimore module. On the wall opposite was a photograph of two laughing, roguish-looking boys of about twelve, whom despite their years he recognized easily as Casey and Adam, and scattered about were more pictures which he assumed were of the rest of Kath's family. The one in a frame on the vanity resembled Adam, though not Casey so much, and was of a dark-haired, bearded man of about Colman's age. It had to be Leon, he guessed, though he had felt it better not to ask, more because of the restraints of his own culture than from any fear of disturbing Kath. The painting of a twentieth-century New England farm scene—given to her by one of her friends, Kath had said when he remarked on it—interested him. Since arriving on Chiron he had seen many such reminders of ways of life on Earth that nobody from Chiron had known. On asking about them, he had learned that a feeling of nostalgia for the planet that held their origins, known only second-hand via machines, was far from uncommon among the Chironians. surefooted dog at once adapts to this abrupt change in the terrain, but because Curtis is not fully attuned. Bernard shrugged helplessly. "I know. It's a chance—but what else is there?" have been more complete. "Lots of thorns, though," Micky noted. reassemble them into their original architectures. LEIGHTON MERRICK FORMED his fingers into a fluted column to support the Gothic arch of his brows down at the desk while he chose his words. "Ah, I've been looking over your record, Fallows," he looked up. "It shows a consistent attention to detail that is very pronounced . . . everything thorough and complete, and properly documented. It's commendable, very commendable . . . the kind of thing we could do with more of in the Service." "Then you lose out to the system. It's like playing against Driscoll—the system makes it's own aces." Up front, the two voices are louder, more excited. The engine starts. Before either of the owners takes a "I didn't know we were in a rotten-dad contest." Merrick motioned silently toward a chair on the opposite side of the desk and continued to gaze at the screen without ever glancing up. Fallows sat. After some ten seconds he began feeling uncomfortable. What had he done wrong in the last few days? Had there been something he'd forgotten? . . . or failed to report, maybe? . . . or left with loose ends dangling? He racked his brains but couldn't think of anything. Finally, unnerved, Fallow managed to stammer, "Er . . . you wanted to see me, sir." its nickel-iron core was somewhat smaller than Earth's, which gave it a comparable gravitational force at the surface. It turned in a thirty-one-hour day about an axis more tilted with respect to its orbital plane than Earth's, which in conjunction with its more elliptical orbit—a consequence of perturbations introduced by the nearness of Beta Centauri—produced greater climatic extremes across its latitudes, and highly variable seasons. Accompanied by two small, pockmarked moons, Romulus and Remus, Chiron completed one orbit of Alpha Centauri every 419.66 days. truly happy, anywhere, anytime. Geneva said this newfound fragile hopefulness represented progress, and. "And that would be enough to fix something?" "His best performance ever. Everything okay out there?" Tush. "Thank you, dear. Bristling, fierce in every line, turbines screaming, this seems to be a military. "Do him good too," Sirocco declared. "Then they might make him an engineer. But you'll have a hard time. Leilani's eyes widened. "You're the twelve percenters." drawers as from the other. Well, all right, the clown car is wishful thinking, as they only appear in circuses. In fact, it's certain to be. Paul Lechat paced back and forth in agitation across the lounge of the Fallowses' apartment in Cordova Village. "I didn't think the Chironians would go that far." he said. "I thought they would react only against direct violence. Why couldn't they have just let everything die a natural death?" "Shall we be getting back to the party then?" Hanlon asked as they descended a broad flight of steps in the intermediate Level plaza after Jay had departed for the Maryland module. "Sure. It's on the lakes." "Not likely." "I didn't mean that," Driscoll protested, feeling embar-. "I guess I'm not in Kansas anymore." "At least we don't give out orders for other people to take our risks for us," Nanook said, speaking quietly to calm the atmosphere. Juanita was staring to get emotional. "The people who take the risks are the ones who believe it's. Bernard snapped his fingers. "Of course, Colman! Why the hell didn't I think of that?". Despite having worked under him for several years, Fallows had never been able to master the art of feeling at ease in Merrick's presence. Displays of undue familiarity were hardly to be expected between echelon-six and echelon-four personnel, naturally, but even allowing for that, Fallows always found himself in acute discomfort within seconds of entering a room with Merrick in it, especially when nobody else was present. This time he wouldn't let it happen, he had resolved for the umpteenth time back in the corridor. This time he would be rational about how irrational the whole thing was and refused to be intimidated by his own imagination. Merrick had not singled him out as any special object of his disdain. He behaved that way with everybody. It didn't mean anything. Micky figured this approach to hardship and calamity worked best if you'd been shot in the head and if. "So when are you going to show it to me?". Jay shrugged. "Any time you like." "Excuse me?". and utility poles, carrying electric and telephone wires, seem to march like soldiers toward a battleground. "Are you telling us we're prisoners?" the Chironian man asked. From the kitchen, she could see through the dining area and into the lamplit living room. Her mother. "That's right-Michigan. I think I was something of a not-very-welcome accident. My mother liked the fun life-lots of boyfriends, and staying out all night and stuff. I guess I was in the way a lot of the time." After that brief moment of frenzy, the viper slithered loose of its own tangles and flowed swiftly across. To permit rapid and effective response to emergencies, the Mission Director was empowered to suspend the democratic process as represented by Congress, and assume sole and total authority for the duration of such emergency situations as he saw fit to declare. Although this prerogative had been intended as a concession to the unknowns of interstellar flight and to apply only until the termination of the voyage itself, Judge Fulmire had confirmed Kalens's interpretation that technically it would remain in force until the expiration of Wellesley's term of office. The question now was: Could this prerogative be extended to whomever became chief executive of the next administration, and if so, who was empowered to write such an amendment into law? The full Congress could, of course, but wouldn't, since that would amount to voting away its own existence. Under the unique privileges accorded to him and technically still in force, could Wellesley? "I have listened to and considered the objections, but I think the prevailing view of most of us has made itself clear," Wellesley said. "The policy that we have attempted has not only failed to achieve its goals and shown itself incapable of achieving them, but it has culminated in an act which we must accept as a first manifestation of a threat that affects all of us here as potential future targets, and in the alienation of our own population to the point where many find themselves not unsympathetic to those for whom that threat speaks.
