

# THE COUNTY OF WESTCHESTER FROM ITS FIRST SETTLEMENT TO THE PRESENT

Micky wished this would prove true; but she might be setting herself up for disappointment. Faith in the. "How about putting some people outside in suits to blow the tail section of the Battle Module?" Carson suggested from the second row back.. "I wish I'd heard them back when I could've helped you." "That was all a long time ago, Aunt Gen." it well and use a hair dryer on the joints, but an occasional drenching wouldn't hurt it.. A tense silence fell. Then Jay said, "I know at least one person in the Army who we can trust." The others looked at him in surprise.. The tailgate is hinged at the bottom. Two latch bolts fix it at the top.. At that moment the communications supervisor called out, "We have an incoming transmission from the Battle Module." At once the whole of the Communications Center fell silent, and the figures of Sterm and Stormbel, flanked by officers of their high command, appeared on one of the large mural displays high above the floor. Sterm was looking cool and composed, but there was a mocking, triumphant gleam in his eyes; Stormbel was standing with his feet astride and his arms folded across his chest, his head upright, and his face devoid of expression, while the other officers stared ahead woodenly. After a few seconds, Wellesley, Lechat, and Borftein moved to the center of the floor and stood looking up at the screen.. More than friends, the couple on the TV were as close as Siamese twins, joined at the tongue.. families. He'd been hoping for more kids, lots of kids, so he won't be so easy to spot if the wrong people.. had savored each of three additional tidbits that his young master was conned into sharing, instead of.. Film by Robert Zoon, and Bobby was crushed when Noah insisted that he remove his credit.. too, and lowers the barrier, which is well oiled and rattle-free. He could have stepped onto the bumper.. Meanwhile, Leilani did the best that she could with the skills she had and with the materials at her.. of the night. It takes refuge at the boy's side, pressing against his legs as it looks back toward the.. shame. And though she had never expected to speak to another human being about those years of ordeal.. jammies, they'll know I'm ready to go, I'm pumped, I'm psyched. Maybe they'll beam me up before my.. time, a boy who will find his way and come to terms with his losses, a boy who will not only live but also.. remains optimistic about his chances of escape. The sight of his canine companion, happily drinking.. vengeance.. away with the spring of pride in her step.. but fear for her one good hand caused her to choose the nether end.. Holding the pole in front of herself with both hands, Leilani wondered what maximum distance a snake.. to stiffen your spine, work up some spit, open the damn door, go in there where the beast was, and you.. A moment ago, he'd been eager to investigate this place. Now he wants only to move on?.. and quickly.. "That's so true," Eve agreed.. Driscoll grinned and began feeling more confident. '-You see, Wellington," he said. "They're not all as bad as you think.".. Anita's eyes blazed as her shock began wearing off and dissipated itself as anger. "Why should I? Bruce just got killed and Dave's got a hole in his leg, and you're telling me to see it their way? What kind of a man are you anyhow?" She sneered past Colman's shoulder at Kath, who was returning the communicator to her pocket. "I can see why. It didn't take you long, did it? Is she good?!" "The EAP is committed to a dogma of conquest," he said. "They understand no language apart from force. You cannot hope to deal with them by any other means.".. Colman found himself facing a big man wielding a baseball bat, his face twisted and ugly, mirroring the mindlessness that had taken possession of the rioters. The man swung the bat viciously but clumsily. Colman rode the blow easily with his shield and jabbed with the tip of his baton at the kidney area exposed below the ribcage. His assailant staggered back with a scream of pain. Shouts, profanities, and the sounds of bodies clashing rose all around Colman. Something hard bounced off his helmet. Two youths rushed him from different directions, one waving a stick, the other a chain. Colman jumped to the side to bring the two in line for a split second's cover, feinted with his baton, then sent the first cannoning into the second with a shove from his shield with the full weight of his shoulder behind it, and both rioters went down into a heap. Colman glimpsed something hitting Young in the side of the face, but two grappling figures momentarily obscured his view, and then Young was lying on the ground. As a fat youth swung his foot for a kick, Colman dropped him with a blow to the head. When bloodcurdling yells and the sound of running feet heralded the arrival of the SDs, the mob raggedly fled around the corner, and it was all over.. We emptied the register and all but thanked him for sparing us the trouble of paying.. gained only by respecting her, by accepting her highly ornamental eccentricities, which included playing.. Farnhill stopped him with a curt wave of his hand. "This spectacle has gone far enough," he said. He looked at Clem. "Perhaps we could continue this discussion in conditions of greater privacy. Is there somewhere suitable near here?".. "We all did. And it doesn't change when you get older. It gets worse. Guys still get into gangs and make rules to keep all the other guys out because it makes the guys who are in feel better than the ones they keep out.".. !-...," "You think pretty smart.".. Bernard couldn't see why Pernak had changed his mind. "I thought you and Eve had things all figured out before you took off," he said as they continued talking over after dinner drinks around the sunken area of floor on one side of the lounge. "Look what's happening-you've left, other people are leaving all over. You were right. Just leave the situation alone and let it straighten itself out.".. table.. He smiled. "Lucky Mickey.".. or activities, even when some of them appeared to be fun. She.Micky wished, not for the first time, that she had been Geneva's daughter. How different her life would.Maddock picked himself up as the smoke began clearing to find that Merringer was dead and two others had been hit. The only hope for safety now was to make it to the front lobby before Hanlon was forced to close it, assuming Hanlon had got in. "Go first with four men," pictures this in his mind, envisions it vividly, and wishes, wishes, wishes..automatically lock, so the truck skates like a pig on ice, with a lot more squeal than grace, though the."Cool? You idiot, I liked that car." "Well, try not to make it half the night this time, won't you." And to Pernak: "Take care, Jerry. Thanks for dropping by. Give our regards to Eve and remind her it's about time we all had dinner together again. She said after church last Sunday that she'd call me about it, but I haven't heard anything."Bullock role." "For a long time," Colman said.."You really wanna know?" An intense note had come suddenly into Driscoll's voice.."Not in this case," said Geneva. "I saved him." "You did? How?".The Chevy-smashing shivaree continued unabated, but distance and intervening layers of laurel branches.her mother dissolved so often in tears, which was scary because it implied a degree of delusion that made.Pernak shrugged. "Just let the system die naturally." .task is to stop any SD's getting out and, more important, to stop Sterm and his people from getting in if things go well and they realize they can't hold the rest of the ship. What we have to prevent at all costs is Sterm and Stormbel get/ ting in there and detaching the module so that it can threaten the rest of the Mayflower II as well as the planet.electronic search-and-locate gear, the troops will. Darkness won't thwart them. They have special ways.defensive tactics might be employed. -.Celia was unable to reply. The answer lay behind a trapdoor in her mind that she had refused to open. She made a quick, shaking movement with her head and asked instead, "Why are you making it sound like a strange thing to want to do?".If the Chironians were already fitting out the Kuan-yin, they must have solved a lot of the problems that were still being argued on Earth, Colman thought. The whole planet, he realized as he reflected on it, was a powerhouse of progress, unchecked by any traditions of unreason and with no vested-interest obstructionists to hold it back. If the pattern continued until Chiron became a fully populated world, it would effectively leave Earth back in the Stone Age within a century. "Have you actually flown it anywhere yet?" he asked, turning his head toward Kath. "The Kuan-yin . Has it been anywhere since it arrived in orbit here?".When she rounded the end of the bed, she saw the pet-shop terror where she had left it, stacked in."I never said they'd do anything," the robot replied. "I just said that people telling them wouldn't bother them." .Leading with her good leg, dragging her left, long-practiced grace abandoned, hard-won dignity lost,.purging. Yet she shied from using the bath seasonings for the same reason that she didn't participate in."You bitch" Celia protested. "I want to hear about it now.'.the idea of getting up from the driver's seat. She shrinks away from them, and terror twists her face into.natural-foods phase that stretched the definition of natural to include things like chocolate-covered ants,.Reliably off-center, Aunt Gen waved gaily, as though the trailer were an ocean liner about to steam out."Girl, don't say such things!" Geneva admonished. "Someone will believe you. We were playing."I've served over seven years, which puts me on a quarter-to-quarter renewal option. Therefore I owe you a maximum of three months. Okay, I'm giving it. But I also have more than three months of accumulated leave from the voyage, which I'm commencing right now. You'll have that confirmed in writing within five minutes." He stood up and walked to the door. "And you can tell Accounting not to worry too much about the back pay," he said, looking back over his shoulder. "I won't be needing it".Chewing the final bite of her chicken sandwich, Geneva said, "The police were useless, dear. I had to."Very well," he said. "Stanislau has had his encore. Now let's get back to business..Otto seemed to be the spokesman. He seemed anxious to reassure them. "We would only destroy the ship without warning if it were to commence launching and deploying its strategic weapons without warning," he told the Terrans. "It is a difficult matter to exercise exact judgment upon, but we feel the most likely course would be for Sterm to issue an ultimatum before resorting to direct action. After all, he would hardly stand to profit from destroying the very resources that he hopes to possess. Our intention has been to reserve our warning as a reply to that ultimatum. In the meantime his support will continue to wither, hopefully with the effect of making him better disposed toward being reasonable when the time comes." .BY THE TIME that Leilani rose from the kitchen table to leave Geneva's trailer, she was ashamed of.what he believes. Every hour of survival will bring him closer to ultimate freedom, and each new sunrise."Sure. Why else?".the heat." .Although Terranova appeared solid and contiguous at first glance, it was almost bisected by a south-pointing inland sea called' the Medichironian, which 9pened to the ocean via a narrow strait at its northern end. A high mountain chain to the east of the Medichironian completed the division of Terranova into what had been designated two discrete continents--Oriena to the east, and Occidena to the west..Bernard stared grimly while he pictured again in his mind's eye the hole that had been blown in the surface of Remus. "We've got. to stop it," he breathed. "We've got to get a message up there somehow. . . to Sterm. . . telling him what he's up against. Thousands of people are still up there." .entirely to down-to-earth stuff like TV wrestling, video games, dinosaurs, and serial-flushing public.in a stretch limousine, perhaps with a complimentary heroin lollipop..name for a dog." .Hope, however, isn't all that's needed to achieve change. Hope is a hand extended, but two hands are.open, admitting light from the forward part of the vehicle, but he can't see much of what lies beyond it..Noah finished his beer. "Guys like you and the congressman used to hide behind Jesus. Now it's.Marcia Quarrey, the Director of Commerce and Economic Policy, didn't look too happy at the suggestion as she sipped her cocktail. "Obviously that would be possible," she said, setting down her glass. "But would it serve any useful purpose? The contingency plans were made to allow for the possibility of opposition. Well, there hasn't been any opposition. What's the sense in throwing good business and growth prospects away by provoking hostilities needlessly? We can acquire Franklin simply by walking in. We don't have to make a demonstration out of it." .Then gunfire..Jean shook her head. "There must be something-the Chironians! He'd have to believe them. If they beamed a signal up spelling out just what their weapons can do,

whatever they are, and with the evidence to prove it, Stern would have to take notice of that, surely." "Why not?" the painter asked. "You'd have to feel kind of sorry for someone like that. The least you could do was make sure they got fed and looked after properly. We do get a few like that, and that's what happens to them. It's a shame, but what can anybody do?" "Ice cream, of course!" With a flourish, she plucked the lid off the insulated rectangular serving pan that side in the midst of warfare, after all. "No," the boy answered after a moment's reflection. "I could say fairies make the flowers up there grow, but the fact that the flowers are growing wouldn't prove that the fairies exist, would it?" "He's what?" Later, when he had only an empty bottle to study, Noah left Francene a tip larger than the total of his. "Plights and pickles. Troubles. Some of us get 'em served one at a time on a little plate, and some of us. They stood but three feet apart, face-to-face, and in spite of Micky's compassionate intentions, a. The Chironians were also experimenting with beaming' power in the form of microwaves up to satellites from Port Norday, to be relayed around the planet and redirected to the surface wherever needed. This project was in an early phase and was purely research; if it proved successful, a full-scale ground-station to exploit the technique on a production basis would be built elsewhere. companies, however, decline to pay for expensive plastic-surgery when the patient also suffers serious. "Sure, I'd cover that." Stern brought his fingers together in front of his face-a noble face whose proud, Roman-emperor features crowned by laurels of curly hair combed flat and forward concealed an underlying harshness of line from all but the most discerning--and stared at the center of the table with large, liquid-brown, unfathomable eyes. "It would be foolish to act impulsively merely to appease our shorter term feelings," he said. He spoke in a slow, deliberate voice and pronounced his consonants crisply. "We should proceed to move down to Franklin and to assert ourselves quietly but firmly, without melodramatics. By their own actions the Chironians have shown themselves incapable of assuming responsibility and unworthy of anything greater than second-class status. Their leaders have abdicated any role they might have gained for themselves in the future administration, and they will be in no position to set terms or demand favors when they reemerge." He paused, and then turned his eyes to Howard Kalens. "It will take longer, but this way the manners that they learn will prove to be far more lasting. The base of the iceberg that you have often talked about has already defined itself. If you look at the potential situation in the right way, some patience now could save far more time and effort later." Chiron's surface had been formed through the same kind of tectonic processes as had shaped Earth's, and Chironian scientists had reconstructed most of its history of continental movements, mountain-building, sedimentation, vulcanism, and erosion. Like Earth, it possessed a magnetic field which reversed itself periodically and which had written a coherent story onto the moving seafloors as they spread outward and cooled from uplifts along oceanic ridges; the complicated tidal cycle induced by Chiron's twin satellites had been unraveled to yield the story of previous epochs of periodic inundation by the oceans; and analysis of the planet's seismic patterns had mapped its network of active transform faults and subduction zones, along which most of its volcanoes and earthquake belts were located. Flushed with embarrassment, unable to look at Old Yeller, the boy turns from the bureau and tries the one of them echoed back in memory. The girl had asked if Micky believed in life after death, and when Jean was seeing things differently now, especially after Pernak described the opportunities at the university for her to take up biochemistry again-something that Bernard had long ago thought he had heard the last of. He turned his head to look into the room at where she was sitting on the Sofa below the wail screen, introducing Marie to the mysteries of protein transcription-diagrams courtesy of Jeeves-and grinned to himself; she was becoming even more impatient than he was. Some days had passed since he told her he was in touch with Colman again and that before the travel restrictions were tightened, Colman had often accompanied Jay on visits to their friends among the Chironians in Franklin, to which Jean had replied that it would do Jay good, and she wanted to meet the Chironians herself. Maybe there would even be a nice boyfriend there for Marie, she had suggested jokingly. "A nice one," she had added in response to Bernard's astonished look. "Not one of those teenage Casanovas they've got running around. The line stays right there." Responding in Vietnamese, Curtis passes along some of his mom's wisdom, which he hopes will give. Bleeding, of course, is a quiet process. Colman nodded tightly. "A while back now, but..." hauling ice cream or meat, cheese or frozen dinners, flatbeds laden with concrete pipe and construction. Sirocco turned to Malloy, while in the background the last of the figures came through. "Okay, you know where to go. Hanlon should be there now with the others." Malloy nodded. "We'll make a soldier out of you yet," Sirocco said to Celia. "You're doing fine. Almost there now." Celia returned a thin smile but said nothing. She moved away with the others toward the far side of the compartment. Meanwhile Stanislaw had set up the compact and was already calling up codes onto the screen. He had practiced the routine throughout the day and was quickly through to the schedule of SD guard details inside the Government Center. "Ah, why don't we wrap it up and have the next one up in Rockefeller's," Hanlon suggested. "That was where Sirocco said he was going." in the backyard. Maybe she was sleeping peacefully and ought to lie left to enjoy her dreams of better. off your ears with an electric carving knife just to change the subject. self, break out of the straitjacket, and all the rest, huh?" "Maybe." Ford Explorer, while the harlequin dog sits erect beside him in the passenger's seat, listening to a radio. A currency was introduced and declared the only recognized form of tender. All goods brought into Phoenix were subjected to a customs tariff equal to the difference between their purchase cost and the prevailing price of Terran equivalents plus an import surcharge, which meant that what anybody saved in Franklin they paid to the government on the way home. Terran manufacturers thus lost the advantage of free Chironian materials but gained a captive market, which they needed desperately since their wares hadn't been selling well; and the market could be expected to grow substantially when the whole of Franklin came to be annexed, which required no great perspicacity to see had to be not very much further down Kalens's list of things to bring about. The Terran contractors and professionals were less fortunate and raised a howl of protest as Chironians continued cheerfully to fix showers, teach classes, and polish teeth for

nothing, and an additional bill had to be rushed through making it illegal for anyone to give his services away. In response to this absurdity the skeptical Terran public became cynical and proceeded to deluge the courts, already brought to their knees by Chironians queuing up in grinning lines of hundreds to be arrested, with a flood of lawsuits against anyone who gave anyone a helping hand with anything, and a group of lawyers' wives staged their own protest by drawing up a list of fees for conjugal favors..Lechat nodded and seemed satisfied. "That gets us up there," he said. "Now what about getting into the Communications Center?" "But who decides who works here? Who appoints them to their jobs?" .in revelation. For a while, in the grip of the thorny bramble that had for so long encircled it, her heart beat.The transport swings into a wide space between two huge trucks.."I didn't say that. But they're funny people . . . cagey. They're not exactly giving straight answers about everything.".Sterm looked back at her and smiled humorlessly. "Hardly what I would call manipulating. I merely allowed them to continue along the paths they had already chosen, as you chose also.".tells him that he has nothing to fear other than getting caught by the people who live here.
