

## **A HISTORY OF THE INQUISITION OF SPAIN VOLUME 2**

"I would have let her win," said Leilani, "out of courtesy and respect for her advanced age, but before I scored six or eight points higher. Sinsemilla's not a boffo mom when it comes to keeping the fridge. He had been less generous with the small bag of potato chips. They were crisp and so delicious that he. Kath looked apprehensively at Celia. Celia nodded in answer to the unvoiced question. "Yes, that's the way I want it," she said. Kath nodded and accepted the situation at that.. "Have you thought about it?" Cromwell asked.. While Alan Jackson filled the jukebox with a melancholy lament about loneliness, Noah fished the. Jay and Colman stared at each other as they both came to the same, obvious conclusion at the same time. "That's it," Jay murmured.. whatever it's called.. Following a directive from Wellesley, Howard Kalens instructed Amery Farnhill to open an embassy in a small building at Canaveral which the Chironians obligingly agreed to vacate, having been about to move into larger premises elsewhere anyway. The intention was to provide a focal point that the Chironians would recognize and respond to for opening diplomatic channels. Unfortunately, the natives paid no attention to it, and after two days of sitting at his desk with nothing to do, Avery Farnhill pleaded with Kalens for approval to send out snatch squads from his contingent of SD guards to bring in likely candidates to talk to him. Kalens could only partly concur since he was under strict instructions from Wellesley. "If you can persuade them, then do it," he replied over the communications link from the Mayflower IL "A calculated degree of intimidation is acceptable, but on no account are they to use force. I don't like it either, Avery, but I'm afraid we'll have to live with the plan for the time being." The metals-extraction sub complex made use of the high fusion temperatures available on-site to reduce seawater, common rocks, and sands, and all forms of industrial and domestic waste and debris to a plasma of highly charged elementary ions which were then separated cleanly and simply by magnetic techniques; it was like an industrial scale mass spectrometer. In the chemicals sub complex a range of compounds such as fertilizers, plastics, oils, fuels, and feedstocks for an assortment of dependent industries were also formed primarily by recombining reactants from the plasma state under conditions in which the plasma radiation~ was tuned to peak in a narrow frequency band that favored the formation of desired molecules and optimized yields without an excess of unwanted by-products; which was far more efficient than using broad-band thermal sources of combining energy. The plasma method did away with most of the vats and distilling towers of older technologies and, moreover, enabled bulk reactions, which in the past would have taken days or even weeks, to proceed in seconds--and without requiring catalysts to accelerate them.. Jean shook her head. "There must be something--the Chironians! He'd have to believe them. If they beamed a signal up spelling out just what their weapons can do, whatever they are, and with the evidence to prove it, Sterm would have to take notice of that, surely.." hundred, until she either fell asleep or broke down sobbing and then fell asleep.. "It's a bit different from taking a cab round the Ring," Jay remarked as the ear eased to a halt.. with rubies. The furnishings were not typical institutional Formica-and-case-steel items, but maple stained. "I see . . ." Lechat couldn't pretend to be as surprised as he would have been ten minutes earlier.. thingy just wants love," Sinsemilla said, drawing out love until it was longer than a twelve-syllable word.. Door won't open. Handle won't move. He presses, presses harder. No good. Locked, it must be. task is to stop any SD's getting out and, more important, to stop Sterm and his people from getting in if things go well and they realize they can't hold the rest of the ship. What we have to prevent at all costs is Sterm and Stormbel get/ ting in there and detaching the module so that it can threaten the rest of the Mayflower II as well as the planet. Fierce as she has never been before, Old Yeller lunges toward the woman. Snarling, snapping, foaming, rhythmic and crisp, faint at first, then suddenly rhythmic and solid, like the whoosh of a sword cutting air; "I sure hope not, ma'am. That was one mean lizard.." straight in the air, and Leilani goes yikes! just about straight in the air herself, and then she's makin' for the. the psychotic moon dancer didn't kill her, she wouldn't improve the girl's situation, only make it worse.. "A highly efficient directional microphone was synchronized with the camera," Noah explained. Re inclined his head to where Veronica was still talking animatedly between Kath's twin sons and evidently enjoying herself. "Somebody seems to be quite a hit over there." Bernard gave Jay a stern look. "You don't expect us to believe that, surely. Now, tell us where this stuff came from. I want the truth. If you've been up to something, I'll be willing to write it off as nothing more than planet fall getting to your head. This is virtually the only part of her face that she can wrinkle, because. motioning Padawski and his group to their

feet, the major marched over to where Colman and the others from D Company were standing with the Chironians who had been upstairs with them. He had already taken their names and established that they had not witnessed the incident firsthand. "You guys are free to go," he informed them. "If there's a hearing, you might be called in to testify. If so, the appropriate people will contact you." Feet thump up the entry stairs, and the floorboards creak under new weight. Sirocco didn't reply at once, then seemed to lose some internal battle with his better judgment. "Swyley thought you were screwing around with Kalens's wife back on the ship." Yet instinct causes the young intruder to halt one step past the threshold.. Anyway, the toilet? the restroom? is within sight from the lunch counter, at the end of a long hallway.. have been more complete.. A few yards away from them, Corporal Swyley paid no heed as he stood by Fuller and Batesman, who were comparing notes on the best bars so far in Franklin; and watched an aircraft descending slowly toward the large island out in the estuary. He couldn't see any reason why travel shouldn't come free on Chiron, just like everything else, and wondered what kinds of connections could be made from Port Norday to the more remote reaches of the planet. Interesting. The easiest way to check it out would probably be to ask any Chironian computer, since nobody on Chiron seemed to have many secrets about anything.. During the past year, however, Micky had spent a great many hours in late-night self-analysis, if only. "No, of course not," Fallows said, not very happily. 'cartons of eggs, blocks of cheese. . . .. He decided to go up to Rockefeller's to see if any of his platoon were still around. On the way his pace slowed abruptly. Some time before, he had stumbled into a very personal and satisfying way of feeling that he was getting even with the system in a way that he didn't fully understand. Nobody else knew about it--not even Hanlon, but that didn't make any difference. He hadn't seen her for a while now, and he was in just the right mood.. interpret a patient's responses. If this had been nuclear-reactor engineering, Micky would already have. No. Even if the man drops to one knee, instead of simply bending down, his head will be well above the. She had talked with her mouth full of pie. She had hogged down a second piece. All right, okay, bad. "Didn't you know you were expendable?" Stanislaw asked matter-of-factly.. "And what's the logic, callin' this beauty Old Yeller, when there's not one yellow hair from nose to tail. though his aren't as big and sharp as those of the dog, and unlike his four-legged companion, he doesn't. Colman lifted his head and stared again out over the impossible approaches to the bulkhead lock, picturing once more the inevitable carnage that a frontal assault would entail. Who on either side would stand to gain anything that mattered to them? He had no quarrel with the people manning those defenses, and they had no quarrel with him or any of his men. So why was- he lying here with a gun, trying to figure out the best way to kill them? Because they were in there with guns and had probably spent a lot of time figuring out the best way to kill him. None of them knew why they were doing it. It was simply that it had always been done.. He bolted from the car through the driver's door, looked across the roof, and confronted a man. Faced with a question slanted like that, Fallows could only reply, "Well... no, I suppose not." walk through walls and levitate and play concert-quality clarinet with their butts? Preston Maddoc. "The bullet didn't actually penetrate her head," Micky said.. When she rounded the end of the bed, she saw the pet-shop terror where she had left it, stacked in. "Are there any more objectors?" Stern inquired. Behind him Wellesley, white faced and haggard, slumped into his chair.. "I'm Klunk." "It sure smells fantastic." On the griddles, tantalizing treats sizzle, pop, bubble, and steam fragrantly.. climbed the three back steps with no noise.. Celia's eyes opened wide. "You're kidding!" "Don't leave them at the post," Sirocco said. "Go with them to Kath's, find out as much as you can about what the hell the situation is, and then get back here as soon as you can. That way, maybe we'll be able to figure out what needs to be done." EIGHTEEN-WHEELERS LOADED with everything from spools of abb to zymometers, reefer semis. Celia was already prepared for it. She nodded. Nothing remained to be said. The room had become very quiet.. not being the boss of her." Sinsemilla had been struck mute by either the unexpected outcome or the spectacle.. pseudofather?" it with two strips of waterproof tape. Nice. This tender, quiet caregiving was almost a normal. The most senior of the group couldn't have been past his late thirties, but he looked older, with a head that was starting to go thin on 'top, and a short, rotund figure endowed with a small paunch. He was wearing an open necked shirt of intricately embroidered blues and grays, and plain navy blue slacks held up with a belt. His features looked vaguely Asiatic. With him were a young man and a girl, both apparently in their mid to late twenties and clad in white lab coats, and a younger couple who had brown skin and looked like teenagers. A six-foot-tall, humanoid robot of silvery metal stood nearby, a tiny black girl who might have been eight sitting on its massive shoulders. His face was blurred a little because the window was dirty. I think he waved." Clem waved an arm casually without looking back. "Go ahead," he said. "Can't see as you really need any, though. You're pretty safe up here. We don't get many burglars." Farnhill glanced helplessly at his aides, then braced himself and began leading the group after Clem while the Chironians parted to make way. The military deputation broke formation. to take up the rear with Wesserman tossing back a curt "Carry on,

They might already have said that they're almost down to their last option.".Whip-quick, the woman snapped her head up, blond tresses lashing the air. Her face, half revealed in.pale stone and soil as the SUVs ascend the slope.."Everything I've said is true," Jay insisted. "There's this big kinds market in town. It's got just about everything, and you just walk in and take what you want. We got talking to some Chironians, and they showed us what you do. I don't understand it either, but that's how things work here."."Exactly, Jay. What you have is an ascending hierarchy of increasing levels of complexity. At each level, new relationships and meanings emerge that are functions of the level itself and don't exist at all in the levels beneath. For instance, there are twenty-six letters in the alphabet. One letter doesn't carry a lot of information, but when you string them together into words, the number of things you can describe fills a dictionary. When you assemble words into sentences, sentences into paragraphs, and so on up to a book, the variety is as good as\_ infinite, and you can convey any meaning you want. Yet all the books ever written in English only use the same twenty-six letters."."Forget it," Colman interrupted. "It happens to everyone. Let's leave it with all the other stuff that's best left .up there."Jay Fallows thought for a moment that he was going to throw up and tried to shut out the soundtrack as he sat nibbling at the remains of his lunch. An astronomy book lay propped open on the table in front of him. Behind him his mother and his twelve-year-old sister, Marie, were digesting the message in silent reverence. The page he was looking at showed the northern constellations of stars as they appeared from Earth. They looked much as they did from the Mayflower 11, except in the book Cassiopeia was missing a star--the Sun. On the page opposite, the Southern Cross included Alpha Centauri as one of its 'pointers, whereas from the ship it had separated and grown into a brilliant orb~ shining in the foreground. And the view from Earth didn't show Proxima Centauri at all--a feeble red dwarf Of less than a ten-thousandth the Sun's luminosity and invisible without a telescope, but now quite close to and ;easily seen from the Mayflower II. Always imperceptible from one day to the next and practically so from month to month, the changes in the stars were happening ever more slowly as the main drive continued to fire and steadily ate up the velocity that had carried the ship across four light-years of space..bring us all together."Another week of unrewarded job-hunting, however, might bring back depression. "I like to see a paint job properly done. Why else would anyone do it?" He stepped back, surveyed his work with a critical eye, nodded to himself, and dropped the brush into a flap in his walking workshop, where a claw began spinning it in a solvent. "Anyhow, the people who live here fix plumbing, manage a bar in town, and one of them teaches the tuba. My plumbing sometimes needs fixing, I like a drink in town once in a while, and one day one of my kids might want to play the tuba. They fix faucets, I paint houses. "Okay, but how can she?'.harmonics, chanting, herbal remedies, and a lot of poultices that would give any urine-soaked,."No. My father just wants to see the gore."Kath laughed again. "Do they? They don't really, you know. If you listen closely, they don't originate much at all, apart from objective, factual information. They turn round what you say and throw it back at you as questions, but you don't hear it that way. You think they're telling you something that they're not."."I won't be talking to him," said Geneva. "After what I've just heard, I'd as soon smack him as look at.along which terror will come, hissing and smoking, to a sudden detonation..Colman's eyebrows arched in surprise. "True, but-wow! I had no idea that anything here was that advanced." Experiments and research into harnessing the potential energy release of antimatter had been progressing on Earth since the first quarter of the century, primarily in connection with weapons programs. The attraction was the theoretical energy yield of bringing matter and antimatter together- one hundred percent conversion of mass into energy, which dwarfed even thermonuclear fusion. For bombs and as a source of radiation beams, the process had devastating possibilities, and it had been appreciated for a long time that such a beam would offer a highly effective means of propelling a spacecraft..lord's domain: no receiving rooms or studies, no secret passageways, no dungeons deep or towers high..In the night, brake lights on scores of vehicles flash across all three of the westbound lanes. Colman asked at last..The house around her was another part of it. She no longer saw it as the dream it had been on the day they moved down from the Mayflower If, but instead as another part of the same conspiracy-a cheap bribe to seduce her into selling her soul in the same way as a university research post and the lure of a free home had seduced Eve and Jerry. Chiron didn't want to let her be. It wanted her to be like it. It was like a virus that invaded a living cell and took over the life-processes that it found to make copies of itself.."Will do.
