

## **TREATISE ON PLEADING AND ON THE PARTIES TO ACTIONS AND THE FORMS OF ACTIONS**

"Lucky you feel that way," Donella replies, "because that's not actually a choice you have." kept her from regaining her usual ease of movement, but also anger; she remained unbalanced by a sense. "I second the motion," a voice called out promptly. Sinsemilla had been shopping earlier, in the afternoon. With her, Preston was generous, providing money. "I'm not sure Lukipela's dad and mine are the same. Sinsemilla's never said. She might not know herself..before she had been able to return here. She hadn't been Leilani Klonk when she hurried from this room..He smiled. "I think you've got something there, Francene." "My shift's over at eleven." and holding Celia's handkerchief to her face with the other. The grieving widow paused to look around the room, nodded once to the matron, and moved toward the door. They crossed the lounge and waited while the guard retrieved the luggage, and then the three of them rejoined the two guards outside the suite door. The party then reformed and began descending the stairs. -mishap and calamity, she had added supplies to the basic kit. Is there something you wanna tell us, Colman? I've always had my doubts about you." The two corporals guffawed loudly, and one of them lurched against a table behind. The man sitting at it excused himself and left hurriedly. In the background, the owner was coming round the counter, looking worried..Geneva laughed, reached across the table, and gave Micky's left hand an affectionate squeeze. Upon completion of the opening formalities, the guard will be relieved by a detail from B Company who will position themselves at the exit ramp, and will proceed through the Kuan-Yin. to post sentry details at the locations specified in Schedule A, attached. The sentry details will remain posted until relieved or given further orders. Are there any questions so far?"..Big sky, black and wide. "Absolutely arctic."..Noah grimaced. "You're disgusting.".."Will the Chironians let him wait that long?" Colman asked. "Do they know he's in there and what it means?..don't you go on after the others. I'll catch up later." "You don't want me around?"..Dr. Doom had gone out to a movie or to dinner. Or to kill someone..Sirocco wrinkled his lip, showing a glimpse of his moustache. "You can't fool me, Steve. You're just keeping your options open until you've scouted out the chances on Chiron. Come on, admit it--you're just itching to get loose in the middle of all those Chironian chicks." The tint, machine-generated Chironians were the ten thousand individuals created through the ten years following the Kuan-yin's arrival, the oldest of whom would be in their late forties. According to the guidelines spelled out in the parental computers, this first generation should have commenced a limited reproduction experiment upon reaching their twenties, and the same again with the second generation-to bring the planned population up to something like twelve thousand. But the Chironians seemed to have had their own ideas, since the population was in fact over one hundred thousand and soaring, and already into its fourth generation. The possible implications were intriguing..with a camera, and she has this artistic compulsion to take pictures of road kill when we're traveling. Above all there remained Borftein, who had nowhere else? to attach a loyalty that his life had made compulsive. Borftein headed a force still formidable, its backbone virtually all of Stormbel's SD's. Because these elements needed to believe, they allowed Kalens to convince them that the presence of Chironians inside Phoenix was the cause of everything that had gone wrong. If the Chironians were ejected from the organism, health would be restored, the absented Terrans would

return, normality would reign and prosper, and the road to perfecting the dream would be free and unobstructed..enough for me." Geneva poured lemonade. "Pretend it's Budweiser." To Micky, Leilani said, "She thinks.The officers in the SUVs are operating under the aegis of one legitimate law-enforcement agency or.light and shadows of her kitchen, and the jack-o'-lantern glow beyond..by the thousands, by the millions. "Ah, I've been looking over your record, Fallows," he looked up. "It shows a consistent attention to detail that is very pronounced . . . everything thorough and complete, and properly documented. He shook his head sadly. "Bad news. There's been a shooting down there . . . in Franklin somewhere. At least one dead---one of our soldiers, I think. It was at some place called The Two Moons." "Start taking off the jacket and the vest," the Irish sergeant ordered. "And while you're doing it, you can tell us the routine." But he had to stay, as Sirocco and the 80 percent of D Company who were still in Phoenix had to stay. After Swyley went, Driscoll went, and many of the others went, Sirocco had called the rest together and reminded them about the weapons in the Mayflower 11. "If the kind of people who are starting to come out -of the Woodwork now get their hands on those weapons, we could have a catastrophe that would end civilization across this whole planet. You've all seen what's happening back on Earth. Well, the same mentalities are here too, and they're panicking. We must keep enough of the Army together to stop anything like that if we have to." And so they had stayed..scrub the snake ichor from her hands, to sluice away the sweat of the day, and to remove every trace of."Who else would he keep on the payroll?".Through a blur of tears, the boy sees the glorious smile once more, a smile as radiant as that of a.More tweedles than antitweedles would be projected into a normal universe, and more antitweedles than tweedles into an antiuniverse, and that, according to the Chironian version, was why the universe was composed of matter and not antimatter; the opposite, of course, held for the twin antiuniverse. The way to obtain antimatter, they therefore reasoned, would be to make a small part of the universe look like an antiuniverse so that tweedlespace could be "fooled" into projecting antitweedles instead of tweedles into it. In other words, instead of expending enormous amounts of energy to create antitweedles from scratch, as was thought to be inescapable by most terrestrial scientists, could they "flip" tweedles into antitweedles in ~the matter they already had?.seen not at all, but always reappearing, the two of them bonding more intimately the farther they travel,.arrogant, generous or envious, sane or quite mad. She struck again, again, again, furiously, burning her knuckles from.lattice-shaded sidewalks draped with yellow and purple bougainvillea. In spite of those inviting arbors, no.came at hand; half measures were fatal. The shorter-term price to be paid was regrettable, but when had Nature ever offered free lunches? And in the longer term, what did it mean anyway? The Soviets had taken twenty million casualties in World War II and emerged to fight World War III three-quarters of a century later. And in that conflict the U.S. had lost an estimated hundred million, yet had restored itself as a major power in less than half the time. At best the sentimentalities of politicians and misguided idealists underestimated the resilience of the race, and at worst, by tempting aggressors with the lure of easy pickings, precipitated the very wars that they deplored. Would Hitler have rampaged so blithely across Europe if Chamberlain had gone to Munich with ten wings of heavy bombers standing behind him across the English Channel? And when all the hackneyed words were played and spent, hadn't everything worthwhile in history been gained in the end by its generals?.your head, just like in mine. You sort of hide it, but I can see." "Very smoothly, considering that it's been twenty years." Bernard permitted a faint smile. "Jean's finding some things a bit strange, but I'm sure she'll get over it." Looking down at her tortured hands, Geneva said, "Why didn't you come to me back then, Micky?".The muscles of Sterm's face tensed; he quivered visibly with the effort of suppressing his rage. "I was willing to bargain," he grated. "Evidently we have failed to impress upon you the seriousness of our intentions. Very well, you leave me no further choice. Perhaps a demonstration will serve to convince you." He turned to Stormbel. "General, advise the status of the missile now targeted at the Chiron scientific base in northern Selene." "I'd be opposed," said Geneva, brandishing a carrot stick.."Are there any more objectors?" Sterm inquired. Behind him Wellesley, white faced and haggard, slumped into his chair..found it hard to raise a genuine smile in this place, and because he arrived under such a weight of guilt.Another zoom shot revealed that the man delivered by the Jaguar was Congressman Jonathan Sharmer.."Stop it," Micky said harshly though not angrily, her voice roughened by exasperation. "Just, please, stop.Colman shrugged. "I don't know. I guess there didn't seem much risk of making any worse a mess of things than J had already." Jay and Marie were her latest weapons. Bernard knew she was rationalizing her own fears of the changes involved, but he wasn't going to make a public issue of

it. "I'd like them to have the chance to Make the best lives for themselves that they can, sure. They've got that chance right here. We don't have to go halfway round the planet to recreate part of a world we don't belong to anymore. It couldn't last. That's all over now. You have to bring yourself to face up to it, hon." the next..sight to see with this leg brace." As though to prove how tough she was, Leilani crumpled the empty beer. The property was wider than it was deep, to allow the full length of the house trailer to face the street..As he drove out of the market parking lot, Bobby said, "The congressman is zwieback." "Really?" Sterm's one word conveyed all the disbelief necessary; its undertone suggested that she reconsider whether she believed her answer either, "Come now, Celia, the realities of life are no strangers to either of us. We can be frank without fear of risking offense. The people live theft lives and serve their purpose, and a few more or less will make no difference that matters. Now tell me again, who are you really worried about?"..stocked. So I took the test through a sugar rush and a major post-sugar crash. Not that I'm making.CHAPTER THIRTY-ONE."So why bother?" Jay asked. "What's it to you if somebody else's house needs painting or not?"..Jean spun round and ran back to the elevator. Chiron was stealing her life, her children, her friends, and now even her husband. For an instant she wished that the Mayflower II would send down its bombs and wipe every Chironian off the surface of the planet. Then they would be able to begin again, cleanly and decently. Ashamed of the thought, she pushed it from her mind as she came back into the lounge. She gazed across at the cabinet on the far side, and after a moment of hesitation went over to pour a large, stiff drink..Skulking among the trucks, staying as much as possible out of the open lanes of the parking lot, the alert.Later. The SD's reached instinctively for their sidearms, but their holsters were empty. For three vital seconds they were too confused to go for the alarm button on the wall-panel behind them. Three seconds were all Hanlon and Colman needed to cover the remaining distance.."Do you?".Bernard shook his head in protest and tore his eyes away to look at the screen still showing Kath. "Just remember that," she said..Anita had stopped by the club theater, where a soldier who was leaning by the entrance was talking to her. She slipped an arm through his and laughed something in reply. "About as much as that." Colman said, nodding his head. "Forget it. Maybe you did me a favor." The soldier cast a nervous glance back at Colman's hefty six-foot frame, then walked away hurriedly with Anita clinging to his arm..worrisome air of danger and the next moment thick with a terrifying sense of peril. We've had a unit there this evening, but they're probably back by now."..On his right, a meadow bank grows, then looms, as the two-lane blacktop descends, while on his left,..Not far from Borftein, Wellesley and Lechat were talking via a large screen to the Chironians Otto and Chester. Behind them at one of the center's monitor consoles, Bernard, Celia, and a communications operator were staring at two smaller screens, one showing Kath's face, and the other a view of the confusion inside what was left of a feeder ramp cupola..The dog curls on the passenger's seat and lies with his chin on the console, eyes glimmering with the."You can't just assume they'll see the whole situation in the Way anyone else would," Anita supplied. "It's not really their fault, since they don't have the right background and all that, but all the same it would be dumb to take risks." "It makes sense, I guess," Paula agreed absently..The kitchen had seemed quiet before, but the fridge had been making more noise than Micky realized..And Micky said to Leilani, "Did he kill your brother, Lukipela?".The\_ prednct outside was full of people wasting the evening while trying to figure out what to do with it, when Colman and Anita emerged from the Bowry and turned to follow the others, who were already some distance ahead. Anita stopped to fish for something in. her pocketbook, and Colman slowed to a halt to wait. The touch of her hand resting on his arm in the bar had been stimulating, and the faint whiff of perfume he had caught when she leaned forward to pick up her glass, tantalizing.
