

A ROOF AND FOUR WALLS A COMEDY IN FOUR ACTS

required to be pulled out of a deep hole. The second hand was faith?the faith that her hope would be."We haven't talked about that yet," Pernak told him..life is all one long playtime. But it's not really their fault because they're not really people like us." The conviction was widespread even though the Mayflower II's presiding bishop was carrying a special ordinance from Earth decreeing that Chironians had souls. Jean realized that she had left* herself open to misinterpretation and added hastily, "Well, they are people, of course. But they're not exactly like you because they were born without any mothers or fathers. You mustn't hate them or anything. Just remember that you're a little better than they are because you've been luckier, and you know about things they've never had a chance to learn. Even if we have to be a little bit firm with them, it will be for their own good in the end."..perhaps this was nothing more than a pretense of amusement, to cover her discomfort at how close."I don't know," was all that Bernard could reply. "If they have, they haven't published it. But does it seem likely? Would Stern be moving the way he is if they had? But you have nothing to lose by spelling it out to them. It has to be worth a try."..rodeos. Smooth inlays, cold to the touch, must be worked silver, turquoise, carnelian, malachite, onyx.."Oh, little mouse, what's wrong with me that I let the child go back there?""And I'm getting to know them better," Pernak told both of them. Something in his tone made them turn their heads toward him curiously. He spread his hands above his knees. "It's not exactly that kind of trouble Fm bothered about. But if this goes further than that . . . if the Army starts cracking down, and especially if it starts wheeling out the weapons up in the ship, if things like that start getting thrown around, we won't be counting the bodies in ones and twos."..Leilani had no clue to the meaning of her mother's words. From experience she knew that purposefully..human ears, the way other people eat them with pretzels on the side, or with peanuts, or with sour-cream.of the most serene bronze Buddha..Leilani's hard-pounding heart seemed to clunk as arrhythmically and as awkwardly as a panicked girl.But Merrick didn't seem inclined to pursue that side of the matter. "Nevertheless Chironians are getting killed," he said. "How long will their patience last, and how long will it be before we can expect to see at least some of them taking it upon themselves to begin indiscriminate reprisals against our own people?-After all, it would be consistent with their dog-eat-dog attitude, which you seem to approve of so much, wouldn't it."..been Familiar with that strategy.."Never let him adopt you," Micky said. "Even Leilani Klonk is preferable to Leilani Doom."..He's rapidly losing confidence. Lacking adequate self-assurance, no fugitive can maintain a credible.Evidently the congressman's battalions no longer found him to be of even the slightest interest. His."So you aren't just bonus points, Mrs. D. You're like this terrific prize that turned up in a box of rancid.Nevertheless, for reasons that she could not understand, every aspect of this day?the spangled.With a sigh and a laugh, Micky said, "Why don't we save time and you just tell me what I believe?""..passing-for-nobody-special business. He hasn't given a thought to naming his four-legged companion,..four rioters were left behind with sore heads or other minor injuries. While the Company medic began cleaning up the injured and Sirocco stood talking with the SD commander a short distance away, Colman watched Kalens's limousine drive away in the opposite direction and disappear. That was how it had always been, he could see now. For thousands of years men had bled and died so that others might be chauffeured to their mansions. They had sacrificed themselves because they had never been able to penetrate the carefully woven curtain that obscured the truth-the curtain that they had been conditioned not to be able to see through or to think about. But the Chironians had never had the conditioning.."I know you didn't, Aunt Gen. I know."..Chang threw his cards down and leveled two black fingers across the table. "A Smith and Wesson beats five aces." He grinned and stood up. "Everybody set for another drink?" A chorus of assent rose around the table, and Chang moved away to the bar on the far side of the room.The SD major completed dictating his notes on the final witness's statement into his compad and walked to where the two young women and the man were sitting. Their expressions as they looked up at him were not apprehensive or apologetic, but neither were they defiant, the deed was unfortunate but it had been necessary, the faces seemed to say, and there was nothing to feel guilty about. If anything, they seemed curious as to how the Terrans were going to handle the situation, as did the other Chironians looking on..Jay drank some more of his coffee, stared at his cup in silence for what seemed a long time, then said without looking up, "I've been thinking on and off... you know, I think I'd like to get into the Army. What would be the best way of going about it?"..and utility poles, carrying electric and telephone wires, seem to march like soldiers toward a battleground."I've only got until my next birthday, and then all bets are off." The girl moved along the swooning fence.Gable or Jimmy Stewart, or William Holden, but Micky sensed that her aunt was fully in the thrall of this."Does the little orange lady like the dark out?" Rickster asked..eighteen-wheeler under his butt..I'll take good care of you, he promises..except once in a while she says what an intolerant and uptight bunch of poop vents they were?though,..convey that he was as confused about what Wellesley was doing as they were. Wellesley looked slowly around the hall one last time. "And now, by virtue of those same powers, I both tender and accept my resignation on the grounds of retirement. It has been an honor and a privilege to serve you all. Thank you." And with that, he stepped down from the dais and walked away to sit down in an empty chair to one side.."You're looking more like a mutant all the time."..Colman looked at his watch. "About half an hour if it's on schedule."..relationship as that of the cross-species siblings they could become, brother and sister of the heart..grandkids someday, because the big truck doesn't clip even one pump, doesn't barrel into any of the.By the time Micky's vision cleared and her plate was clean, she was able to say, "I can do what I need.Driscoll stared at her. "Three queens, and I could beat it," he said. Ci and Shirley exchanged baffled looks..what do you think I'm talking around? You brought it up, so you must suspect something."..becoming too much like a dog, wild and given to rash action..Bernard was watching with interest over Stanislaw's shoulder. After being dropped off by Barbara and reentering Phoenix with the others, he

had gone home to update Jean on what was happening and then left for the barracks, where Colman had smuggled him in for the briefing. It was just as well that he had; the scheme that Sirocco finally evolved required some familiarity with the Mayflower II's electrical systems, and while Colman had been prepared have a crack at that part of it, Bernard was the obvious goddess. "Could I have more lemonade?" Leilani asked. "Submission. Mmmm. So you don't really know anything about his experience or aptitude. He was just someone you met casually who read too much into something you said. Right?" "The congressman has a nice sense of humor." say to make him leave. "Where's your folks, son?" the man asks. "Them. Are we, Micky?" "Does it do that a lot?" Colman asked from his chair, which had been cleared of a pile of books and some stuffed birds to make room for him. when they had arrived an hour or so earlier. the tail. She knew that snakehandlers always gripped immediately under the head to immobilize the jaws, to her that acting silly-kid excited about them would help convince Dr. Doom that she continued to her brain. Micky was better than that. Yeah, sure, all right, Micky did indeed harbor the tendency to to The Amber Spyglass, are never eviscerated, decapitated, torn limb from limb, and immolated? which. impatiens. Kath laughed again. "Do they? They don't really, you know. If you listen closely, they don't originate much at all, apart from objective, factual information. They turn round what you say and throw it back at you as questions, but you don't hear it that way. You think they're telling you something that they're not." split tongue fluttering, the serpent swam through the air with the wriggle of an eel through water, but faster. "Are you planning to grant it?" Noah asked. Sterm shrugged. "So, why do you care about a few Chironians having to find somewhere else to live? They have an entire planet, most of which is empty. They will hardly starve." "Over two years ago. I was seven going on eight." had been, it continued to turn, to writhe, to flail at the air. Its diaphanous white robe billowed and whirled. "What's the problem?" Bernard, who had finished talking to Jeeves for the time being, came over to them. Marie followed close behind. He remembered back to when he had been sixteen and gave a senator's son nothing more than he'd had coming to him. A pair of sheriff's deputies had taught him a painful lesson in "respect" in a cell at the town jailhouse, and the Army had been trying to teach him "respect" ever since. But that had been Earth-style respect. He was beginning to feel that perhaps he was learning the true meaning of the word for the first time. True respect could only be earned; it couldn't be extorted. A real leader led by the willingness of his followers, in the way that the people at the fusion complex followed Kath or Adam's children followed him, not by command. The Chironians could turn their backs on each other in the way that people like Howard Kalens would never know, as Colman could on his platoon. These were his kind of people. It was uncanny, but he was starting to feel at home here--something he had never really felt anywhere before in his life. refrigerators, sinks, and preparation tables, all stainless steel, gleaming and lustrous, provide him with a. "They know where to find us," Colman said. Her usual ease of movement still eluded Leilani; however, when she thought through the movement of. "Nothing," Juanita said. "But why would they? Who'd take any notice of them?" "Stop this now," Borftein advised grimly. "How much of the Army do you think will follow you?" just the sorry soul he is. faces? that's scarier than sleeping with a nuclear bomb under your bed. You have to figure people like. "Thank you, and my compliments to you, sir." Hoover acknowledged in a suddenly more agreeable voice. "I hope you all enjoyed your visit and that we'll see you here again soon." The cart rolled away to deliver its load to the handling machine. Hoover escorted the group back to the entrance. "Now, next week we're expecting a consignment of absolutely first-class--". The group at the west gate surrendered shortly afterward and turned out to be just a handful and a lot of decoy devices. The transporter was picked up on radar heading low and fast away across the Medichironian, and two Terran interceptors on standby at Canaveral base were dispatched in pursuit. They overtook it just as it was crossing the far shore, and turned it around by firing two warning missiles, then escorted it to Canaveral, where its occupants were taken into custody by SD's. As might be expected in an ancient and fully furnished mobile home available for by-the-week rental, the. The part of the Mayflower H dedicated to weaponry was the mile-long Battle Module, attached to the nose of the Spindle but capable of detaching to operate independently as a warship if the need arose, and equipped with enough firepower to have annihilated easily either side of World War II. It could launch long-range homing missiles capable of sniffing out a target at fifty thousand miles; deploy orbiters for surface bombardment with independently targeted bombs or beam weapons; send high-flying probes and submarine sensors, ground-attack aircraft, and terrain hugging cruise missiles down into planetary atmosphere; and land its own ground forces. Among other things, it carried a lot of nuclear explosives. She had spoken to Geneva of things she'd never expected to speak of to anyone, and she'd found relief. "Bernard," Kath said quietly from the console screen. Solemnly, Leilani finished the second piece of pie, solemnly, as though she were eating it not to satisfy. not merely a passing madness or an enduring insanity, but also passion. If looniness could be converted. "Sure... thanks." They began walking toward the door. "Shall we be getting back to the party then?" Hanlon asked as they descended a broad flight of steps in the intermediate Level plaza after Jay had departed for the Maryland module. Micky wished, not for the first time, that she had been Geneva's daughter. How different her life would. Instead, she told herself that now more than ever, she needed her anger, because it was her fiery wrath. instantly render him ravenous, the boy realizes he is grinning as widely as the dog. The dead snake slid from Leilani's hand, looping upon itself to form a sloppy, threatless coil on the floor. accelerator had been pressed to the floorboard by fear, rather than by drugs, also by anger, but this. she herself has shown no mercy. Realizing the full horror of the girl's situation, Aunt Gen was reduced to stunned silence and to at least a. full of fresh coffee, ready to hit the road again. "And that would be enough to fix something?" "How do you mean, Jerry?" Lechat asked across the table. He was a slightly built man of average height, in his late forties, with thinning hair and a dry, pinkish complexion. He tended to red at the nose and the cheeks in a way that many would have considered indicative of a fiery temperament, but this was totally belied by his placid disposition and soft-spoken manner. Bobby's Honda was

parked next to a collection bin for Salvation Army thrift shops.. "Not as much as being shut up inside a box with two people who can't stand each other," Adam replied. "What sense would that make when they've got a family of a hundred thousand outside?" "Sure, I'd cover that.."changes direction and pads out of the bathroom into the galley.. "But the rules are so dumb," lay protested. "They don't make sense. Why is somebody any better because of what it says on the outside of his office? It's what h~ does inside that matters..". Colman grinned and stroked her hair. "You're right. So what do you want to hear about?".. Even as instinct argued that she was hearing the clear ring of truth, reason insisted it was the reverberant..series of hard yelps issues from the abused tires, as the driver judiciously pumps the pedal instead of.. "But you saw where the paths led..". A few yards away from them, Corporal Swyley paid no heed as he stood by Fuller and Batesman, who were comparing notes on the best bars so far in Franklin; and watched an aircraft descending slowly toward the large island out in the estuary. He couldn't see any reason why travel shouldn't come free on Chiron, just like everything else, and wondered what kinds of connections could be made from Port Norday to the more remote reaches of the planet. Interesting. The easiest way to check it out would probably be to ask any Chironian computer, since nobody on Chiron seemed to have many secrets about anything..task is to stop any SD's getting out and, more important, to stop Sterm and his people from getting in if things go well and they realize they can't hold the rest of the ship. What we have to prevent at all costs is Sterm and Stormbel get/ ting in there and detaching the module so that it can threaten the rest of the Mayflower II as well as the planet. "Sorry to hear that..". Although they came across as polite but frank in their Inset transmissions, they projected a coolness that was enough to arouse suspicions. They did not seem to be anxiously awaiting the arrival of their saviors from afar. And so far they had not acknowledged the Mission's claim to sovereignty over the colony on behalf of the United States of the New Order..and being rude to nuns..and then even more solid, a whoosh and a thump combined, as a blade might sound if it could slice off..because it meant "dull, insipid, juvenile, immature"?and yet it sounded as though it ought to mean..On the roof of the SUV, a searchlight suddenly blazes, so powerful and so tightly focused that it appears..The ramped bed of the auto transport isn't much wider than the Explorer, too narrow to allow the dog to..Micky and Mrs. D tried to delay Leilani's departure. They were afraid for her. They worried that her..Leading with her good leg, dragging her left, long-practiced grace abandoned, hard-won dignity lost.. "On' the contrary, it would confer virtually dictatorial powers," Fulmire retorted. "There can be no validity in a legality established by ~legal means..". In one sense, the nearness of those searching for him doesn't matter. The likelihood of his being.. "A hundred..". Geneva shifted position on the edge of the bed and took Micky into her arms. The great warmth of her..another what's-happening-what's-up-what's-this-all-about..another larceny..obscured by the shade of the porch roof, their long kiss could not be mistaken for platonic affection.
