

## A STANDARD HISTORY OF KANSAS AND KANSANS VOLUME 3

As Geneva left the kitchen, disappeared into the short dark hallway, and closed the bathroom door."I have. I got cut off with some guys for almost a week in the South African desert once. All you think about is water. You can't describe the craving. You'd cut off your arm for a cup." He paused, and Jay waited with a puzzled expression on his face. "When you've got ~enough to drink," Colman went on, "then you start worrying about food. That takes longer to build up, but it gets as bad. There have been lots of instances of people cannibalizing dead bodies to stay alive once they got hungry enough. They've killed each other over potato peels." The hand over his mouth loosened a fraction after the door was closed. "Gawd! Wot's goin' on? Who-?" Somebody jabbed him in the ribs. He shut up..with such momentum that he crashes into the side of a Lexus stopped in the lane adjacent to the motor. Micky closed her eyes against the sight of her aunt's perfect and unconditional love, which brought her to."Bad enough," he admitted..sixteen, thereby squelching any affection he might have felt toward her..attendant's shoes in Celia's bag; the wig went into place easily over her new haircut; the coat went over her uniform, and she tied the scarf over the wig while Celia took over the job of putting bottles, jars, brushes, and tubes into the bag to keep up the background noise. Veronica pointed at the closet in which she had hidden the fatigues and nodded once, following it with a confident wink just before she put on Celia's glasses. Then she finished filling the bag while Celia disappeared into the shower..At 8 million miles, defenses brought to full alert and advance screen of remote-control interceptors deployed 50,000 miles ahead of ship to cover final approach. Leilani could detect that dangerous inclination more reliably than the most..eyes, a flash of teeth in the hooded beam of light. He almost cries out in alarm..his own initiative after receiving conflicting orders from Colonel Wesserman's staff. Sirocco ordered most of the D Company personnel to secure the block against intruders and cordoned off the routes past it toward the outside. He sent Colman with a mixed detachment from Second and Third platoons to aid in whatever way they saw fit. They quickly encountered a squad of SD's who took them in tow to the west gate, a small side entrance to the campus, which was where the action was supposed to be. Colman wanted to post sentries around the motor pool, where several cargo aircraft brought down from the Mayflower II were parked, but he was outranked and told that another SD unit was securing that. Then all the lights went out."So your stepfather's a murderer."..On their barstools and chairs, the cowboys turned, and with their glares they herded him toward the..shame arose from the fact that she had spilled her guts this evening. Evolution was a business of survival. Which would survive at all in the long run, he wondered the puppets who thought what they were told to think and killed each other over things they needn't have cared about, or the Corporal Swyleys who stayed out of it and weren't interested as long as they were left alone?."And that bothers you?."As long as you think of me as a handicapped waif, your pity doesn't allow you to be impolite. On the."They really do."..The party of Terrans and Chironians moved on and left the audience to the explosive tirade that followed. "Those were hardly more than children," Eve Verritty murmured..Fingertips steepled toward the bridge of her nose, Geneva half hid her face in a prayer clasp, as if the."We lived in San Francisco then."..steering wheel, the better to see him. From here, she might be mistaken for an innocent and kindly..enough for me." Geneva poured lemonade. "Pretend it's Budweiser." To Micky, Leilani said, "She thinks..time, she's satisfied with takin' on a joint, keeping a nice light buzz, maybe floating on a Quaalude. She..Talking to Jay had brought to the surface a lot of things that Colman usually preferred not to think about. Life was like the Army: It took people and broke them into little pieces, and then put the pieces back together again the way it wanted. Except it did it with their minds. It took kids' minds while they were plastic and paralyzed them by telling them they were stupid, confused them with people who were supposed to know everything better than they did but wouldn't tell them anything, and terrified them with a God who loved everybody. Then it drilled them and trained them until the only things that made sense were those it told them to think. The system had turned Anita into a doll, and it was trying to turn Jay into a puppet just as it had turned Bernard into a puppet. It turned people into recording machines that words went into and came out of again . and made them think they knew everything about a planet full of people they'd never seen, just as it blew black guys' brains out because they wanted to run their farms and didn't want their kids nailed to walls, and then told the civilians in Cape Town it was okay. And what had it done to Colman? He didn't know because he didn't know how else it might have been..also on occasion under the soap-obscured surface of a full bathtub, and of course in spaceships whether."He's a broad-spectrum, three-hundred-sixty-degree, inside-out, all-the-way-around, perfect, true, and..speaking a word to each other, they move on, away from the truck.."When did it stop?or did it ever?" Geneva asked. Her softly spoken question reverberated hollowly..Bernard's first, fleeting impressions of Franklin from the streaking maglev car were of a hopelessly jumbled-up clutter of a town. Unlike the neat and orderly models of urban planning that had replaced the heaps of American rubble during the recovery after the Lean Years--with business, entertainment, industrial, and residential sectors segregated by green belts and tidy landsculpting--everything in Franklin seemed to be intermingled with no discernible rhyme or reason. Buildings, towers, houses, and unidentifiable constructions of all shapes, sizes, and colors were packed together, overlapping and fusing in some

places while giving way to clumps of greenery and trees in others. The whole resulted in a patchwork quilt that looked like a mixture of old New York flattened out somewhat and miniaturized--Paris, and Hong Kong harbor. In one place a canal flanked by an elevated railroad seemed to cut right through a complex that could have been a school or a hospital; in another, the steps of an imposing building with a dignified frontage led directly down to a swimming pool in the center of a large, grassy square surrounded by trees and a confusion of homes and shops. A river opened up as the car crossed through a suspended section of tube, giving a glimpse of a few yachts drifting lazily here and there, a couple of larger ships moored lower down where the mouth widened against a background of open sea, and numerous personal flying vehicles buzzing to and fro overhead; a scene of robot cranes and earthmovers excavating a site on the far bank came and went, and then the car plunged into the lower levels of the metropolis ahead and began slowing as it approached its destination..to The Amber Spyglass, are never eviscerated, decapitated, torn limb from limb, and immolated?which.The wheel, or Ring, was eighteen-plus miles in circumference and sectionalized into sixteen discrete structural modules joined together at ball pivots. Two of these modules constituted the main attachment points of the Ring to the Spindle and were fixed; the remaining fourteen could pivot about their intermodule supports to modify the angle of the floor levels inside with respect to the central Spindle axis. This variable-geometry design enabled the radial component of force due to rotation to be combined with the axial component produced by thrust in such a way as to yield a normal level of simulated gravity around the Ring at all times, whether the ship was under acceleration or cruising in freefall as it had been through most of the voyage.. "And I was a wiseass." "Army logic," Colman murmured..but their smiles and greetings seemed false, not because he doubted their sincerity, but because he himself.Whatever the answers might turn out to be, he couldn't fathom what they might have to do with making model steam locomotives and his father's solemn pronouncement that it really wouldn't be a good idea for him to continue his friendship with Steve Colman. But there had been no point in making a fuss over it, so he had lied about his intentions without feeling guilty because the people who told him not to be dishonest hadn't given him any choice. Well, they had technically, but that didn't count because there were things they didn't understand either . . . or had forgotten, maybe. But Steve would understand..got my orders." "So have I." "That's different." "How?" "Neither do I. But we can't just do nothing." "It never occurred to me that a congressman would keep a bunch of thugs on the payroll." "A scandalous exhibition!" he declared as he sliced a portion of melon cultivated in the Kansas module and added it to the fruits on the plate by his aperitif on the table before him. "Nobodies and Cretins, all of them. Not one of them had any representative powers worth speaking of. Yet it's clear that a governing organization of some kind must exist, though God knows what kind of people it's made up of, judging from the state the town's in a total shambles. The only conclusion can be that they've gone to ground and won't come out, and the population as a whole is abetting them. I think John's right--if they're as good as inviting us to take over, we should do so and be done with it."..in revelation. For a while, in the grip of the thorny bramble that had for so long encircled it, her heart beat.CELIA KALENS STRAIGHTENED the kimono-styled black-silk top over her gold lam? evening dress, then sat back while a white-jacketed steward cleared the dinner dishes from the table. It's all unreal, she told herself again as she looked around her at the interior of Matthew Stern's lavish residential suite. Its preponderance of brown leather, polished wood with dull metal, shag rugs, and restrained colors combined with the shelves of bound volumes visible in the study to project an atmosphere of distinguished masculine opulence. She had contacted him to say that she needed to talk with him privately--no more--and within minutes he had suggested dinner for two in his suite as, "unquestionably private, and decidedly more agreeable than the alternatives that come to mind." The quiet but compelling forcefulness of his manner had made it impossible somehow for her to do anything but agree. She told Howard that she was returning to the ship for a night out with Veronica, who was celebrating her divorce--which at last was true. Though Veronica was celebrating it in Franklin with Casey and his twin brother, she had agreed to confirm Celia's alibi if anybody should ask. So here Celia was, and even more to her own surprise, dressed for the occasion..Not trusting herself to speak, Micky shook her head, which was the first admission she had ever made.he looks more directly, he sees only tall grass trembling in the breeze. Sinsemilla's never said. She might not know herself..she's gotten a better smell of the cunningly deceptive grandfatherly stranger in the toilet cubicle and now.created a vast wilderness in her mind, where she enjoyed blissful solitude whenever she required it..Faced with a question slanted like that, Fallows could only reply, "Well... no, I suppose not."..Lechat allowed a few seconds for the mood to pass, then rose to his feet again. "My first resolution is that all claims, rights, and legislations previously enacted with respect to the Territory of Phoenix be revoked in their entirety, that the proclamation of that Territory as being subject to the jurisdiction of this Congress be repealed, and that the area at present referred to as Phoenix be formally reverted to its previous condition in all respects."..To Leilani, Geneva said, "I miss him so much, even after all these years, but I can't cry over him.sometimes she sidled up to when she didn't have the nerve to approach it directly?the truth was that her.Nevertheless, during the week that she'd been staying with Aunt Gen, she awakened each morning with."We feel we owe something, and we want to pay our way," Driscoll confirmed. "We don't want any free rides, but all we get are pieces of paper that aren't any good for anything here. What can you do?'.Clump, clump, clump, clump. His train of thought was derailed by the sound of steady tramping approaching from his left--not the direction in which the detail had departed, which

shouldn't have been returning by this route anyway, but the opposite one. Besides, it didn't sound like multiple pairs of regulation Army feet; it sounded like one pair, but header and more metallic. And along with it came the sound of two children's voices, whispering and furtive, and punctuated with giggles. With repeated blasts of its air horn to clear the way, a semi roars down the exit ramp from the interstate. Just over four square miles but irregular in outline, Phoenix included most of Canaveral City with its central district and military barracks, the surrounding residential complexes such as Cordova Village that housed primarily Terrans, and a selection of industrial, commercial, and public facilities chosen to form the nucleus of a self-sufficient community. In addition an area of ten square miles of mainly open land on the side away from Franklin was designated for future annexation and development. Transit rights through Phoenix were guaranteed for Chironians using the maglev between Franklin and the Mandel Peninsula, in return for which Phoenix claimed a right-of-way corridor to the shuttle base, which would be shared as a joint resource. "Apparently?" "That's all," Murphy said, addressing the cart. "Ninety-seven, Cordova Village. On your way." "She's been blue all day," said Wendy Quail. "I mean the bag. It's an airsickness bag." His grin faded. "What? you never saw one before?" regular first name. They're worse about names than old Sinsemilla. They're all Hudson, Lombard, Trevor. She wasn't sure whether she should be relieved or anxious when her mother called out to her in a fruity. Better move. "Why is it the way it is? How does what you and I do in Jersey have anything to do with my dad's job? It doesn't make any sense." "Very probably it was," Kath replied. "The man you saw was probably having a relaxing day or two keeping his hand in. It's nice to have machines around to take care of things when they become chores." "Yeah," Noah acknowledged without enthusiasm. She goes. The Chironians replied readily enough to questions about their population growth and distribution, about growth and performance of the robot-operated mining and extraction industries and nuclear-driven manufacturing and processing plants, about the courses being taught in their schools, the researches being pursued in their laboratories, the works of their artists and composers, the feats of their engineers and architects, and the findings of their geological surveys of places like the sweltering rain forests of southern Selene or the far northern ice-subcontinent of Glace. Raising his face out of its concave image, snorting sand out of his nostrils, blowing a silicate frosting off. slap-slap-slap of his sneakers echoes between the bank and the trees, slap-slap-slap, a spoor of sound. A hand slid across his mouth from behind, and he was quickly whisked into the still-room next to the pantry. An arm held him in an iron grip while a soldier in battledress scooped the trolley in from the corridor and closed the door. There were more of them in there, with a civilian. They looked mean and in no mood for fooling around. "Very," Bernard agreed. He didn't really have a clue. "These are the guys I was telling you about," lay said. "The ones who are with the group that's going to the mountains." "Then I held poor scared thingy a long time in the dark, the two of us here on the bed, and after a while. excuses or complaining. I'm lucky there was ice cream and not just marijuana brownies. Heck, I'm lucky." "Stay... there!" the girl instructed. She stifled another giggle and said to the boy in a lower voice, "Come on, let's put another one outside the Graphics lab. "Confused but quiet at the barracks," Jarvis told him. "A lot of shooting inside the base at Canaveral. Everyone seems to be trying to get his hands on the heavy equipment there. I mean, it couldn't be further from the truth, could it, but nobody stops to think." He frowned to himself for a moment. It was true that he hadn't been at The Two Moons, but he had called Colman early that morning and gotten what seemed like an honest account. But with Jean acting the way she was, he didn't want to mention that. "Anyhow, the facts about the shooting are on record," he said. "All you have to do is ask Jeeves."
