At."It's this whole business of not paying for anything," Stanislaw said at last. "We come in here and drink, we go into restaurants and eat, we walk out of stores with all kinds of stuff, and none of it costs anything." He sat back, looked from side to side for moral support, got plenty, and shook his head helplessly. "It seemed too good to be true at first, but that soon wears off. It's not funny anymore, chief. It's getting to all of u~!". "Army logic," Colman murmured..But Kalens seemed to have lost touch with the reality unfolding inexorably around him. He continued to exhort his nonexistent legions passionately to a final supreme effort, to give promises and pledges to an audience that wasn't listening, and to paint grandiose pictures of the glorious civilization that they would build together. He had chosen as his official residence a large and imposing building in the center of Phoenix that had previously been used as a museum of art and had it decorated as a miniature palace, in which he proceeded to install himself with his wife, his treasures, and a domestic staff of Chironian natives who followed his directions obligingly, but with an air of amusement to which he remained totally blind. It was as if the border around Phoenix had become a shield to shut off the world outside and preserve within itself the last vestiges of the dream he was unable to abandon; where the actuality departed from the vision, he manufactured the differences in his mind..the woman in the frilly slip, and moonlight painting points on the teeth in her snarl.."Down!" Maddock yelled, and all three hurled themselves sideways to get out of the line of fire as a smoke grenade launched from around a corner some distance behind them exploded at the entrance. Fire from the entranceway raked the area as the D Company squad broke cover and rushed forward through the smoke, hut the first of them was still twenty feet away when the steel door slammed down and alarms began sounding throughout the Government Center. -.Lechat didn't respond immediately. Eve Verity elaborated. "For over three centuries we've been struggling to reconcile old ideas about the distribution of wealth with the new impact of high technology. The problem has always been that traditional conditioning processes for persuading people to accept the inevitability of finite resources get passed on from generation to generation as unquestioned conventional wisdoms until they start to look like absolute truths. Wealth was always something that had to be competed and fought for. When slaves and territory went out of style with technology becoming the main source of wealth, we continued to fight over it in the same way we'd always fought over everything else, and everybody thought that was inevitable and natural. They couldn't separate the old theories from the new facts." Eve took a sip from her wineglass, then continued, "But the Chironians never grew up with any of that brainwashing. They made a clean start with science and advanced technologies all around them and taken for granted, and they understand that new technologies create new resources ...without limit."..operation like this in the Utah boondocks as easily as in Manhattan?although not with a mere.and pigheadedness. Too useful..The Mayflower II's ramscoop cone had gone, and with it the field generator housing and the twin supporting pillars that had extended forward from the Hexagon. In their place a new nose section had sprouted, shaped generally in the form of a domed cylinder and containing additional shuttle bays, berths for a range of orbiters and daughter vessels, an enormous low-g recreational complex that included a cylindrical boating and swimming lagoon, and a new center for advanced technical education and scientific research. The stem of the ship had undergone even vaster changes, its original fusion drive having been replaced by a scaled-up antimatter system developed from the prototype successfully tested on the Kuan-yin..Colman looked away in a daze. Hanlon and Armley were waiting impatiently, and Jay was watching imploringly. He thought furiously. Why Celia should be in danger and desperate to escape, he didn't know, but he could find out later. If he said he had to get away for a few hours. Sirocco would cover for him, so that was okay. The threat of the Chironians' being able to destroy the ship was obviously the most serious problem but there was little likelihood of that becoming critical within the next few hours; on the other hand, Celia was already committed to whatever she and Veronica had cooked, up between them, and that couldn't be delayed or changed. So Celia would have to come first. Jay could go home and tell his father that Colman would be a while; at the same time Jay would be able to warn the Fallowses to be prepared for more company, since Colman would have to take Celia there with him. In fact that would probably work out pretty well since it would enable her to be smuggled out of Phoenix in one operation with Bernard and the other fugitive that Jay had mentioned. Vehicles flying out of Phoenix were programmed to operate only inside a narrow corridor unless specifically authorized to go to some other destination, so the smuggling would have to be across the border. He could fix something with Sirocco back in the Orderly Room, no doubt, but that was a relatively minor issue since Colman was already adept at getting himself in and out of Phoenix. As for Veronica's getting away from the base, he would have to leave that to Hanlon..to go, was a really good thing, too, better even than Sundaes on Wednesday.."I'm not.

He's an architect . . . and gorgeous I met him in Franklin yesterday and stayed last night. It's so easy-they act as if it's perfectly natural . . . And they're so uninhibited' Celia just gaped at her. Veronica winked and nodded. "Really. I'll tell you about it later, I'd better go." Bernard sat forward, his expression suddenly serious. "No, I didn't," he said. "Is that what they've been doing to it? How did.." Think what an energy source that would be. it'd made fusion look like a firecracker." Pernak waved his hands about. "And how about this, Jay. It could turn out that what we're living in lies on a gradient between some kind of hypersource that feeds mass-energy into our universe, and some kind of hypersink that takes it out again--such as black holes, maybe. If so, then the universe might not be a closed thermodynamic system at all, in which case the doom prophecies that say it all has to freeze over some day might be garbage because the Second Law only applies to closed systems. Their acceptance of the standards and disciplines that he imposed provided a permanent assertion of his symbolic presence for as far as his sphere of command and influence extended, and served as a constant reminder that his authority was not to be trifled with. Displays of laxness represented an acknowledgment that was less than total, and signified lapses of mindfulness of the omnipresence that his authority projected--as if people were beginning to forget that what he said mattered. Stormbel didn't like that. He didn't like people acting as if he didn't matter..Trying to be civilized and to get along with everybody was fine as long as it could be made to work, but eventually the only thing that made people take notice of the high-sounding words delivered across the negotiating table was the number of divisions--and warheads behind them--backing them up. She lowered her hands from her face, wringing them..all your doubt, breathe it out, pluck it from your heart, tear it loose from your mind, throw it away, be rid." "Good pup," the boy whispers..not merely a passing madness or an enduring insanity, but also passion. If looniness could be converted..Colman grinned. "Okay, chief. I will." A short silence fell while they both thought about the same thing. "How long do you think it'll be?" Colman asked at last..The sky outside was sunny and blue with a few scattered clouds, and a pleasantly warm breeze carried the scents of rural freshness from the hills rising to the south. Fallows still

wasn't fully accustomed to the notion that it was all real and not just a simulation projected from the roof of the Grand Canyon module, or that the low roars intermittently coming in through the opened window of the living room downstairs were from shuttles ferrying up and down to what was now another realm. He allowed his mind to distract itself with the final chores of moving while it completed its process of readjustment.. "Why do a lot of cops from back then like ZZ Top?" he wondered.. Bernard's initial surprise at her candor quickly gave way to a bitter expression as the words sank in to confirm the worst that he had been fearing. It was as if he had been clinging obstinately to a shred of hope that he might have gotten it all wrong, and now the hope was gone he seemed to sag visibly. Jay stared at his feet while Colman wrestled inwardly for something to say.. rehabilitated by the Circle of Friends. I expected to be spotted and warned off, but I thought the Pernak rose from the desk at which he had been working, and moved over to the window to gaze down at the lawns between the two arms that formed the front wings of the building. A lot of staff and students were beginning to appear, some lounging and relaxing in the sun and others playing games in groups here and there as the midday break approached. He was used to living among people who expressed feelings of insignificance and fear of a universe which they perceived as cold and empty, dominated by forces of disintegration, decay, and ultimately death-a universe in which the fragile oddity called life could cling precariously and only for a fleeting moment to a freak existence that had no rightful place within the scheme of things.
