It'll pass.".The answer is that though all the genes are there in every cell of your body, they aren't all working alike. The cell is an intricate assemblage of chemical reactions, chemical building blocks, chemical products, and physical structures, all of which influence one another. Some genes are inhibited and some are stimulated, in a variety of ways depending on subtle factors, with die result that different cells in your body have genetic equipment in which only characteristic parts are working at characteristic rates..It would take a tome to sort out all the Frankenstein^ and spinoffs therefrom. Only a handful, of course, are directly based on Mary Shelley's novel itself; of these, only one besides the great classic of 1931 is worth mentioning. That is Frankenstein: The True Story. Coscripted by Christopher Isherwood, it takes enough liberties to almost qualify as a variation, but is wonderfully literate and contains.She declined with a smile.
