"I've got trouble with the satisfied part," Leilani said. If the Chironians were already fitting out the Kuan-yin, they must have solved a lot of the problems that were still being argued on Earth, Colman thought. The whole planet, he realized as he reflected on it, was a powerhouse of progress, unchecked by any traditions of unreason and with no vested-interest obstructionists to hold it back. If the pattern continued until Chiron became a fully populated world, it would effectively leave Earth back in the Stone Age within a century. "Have you actually flown it anywhere yet?" he asked, turning his head toward Kath. "The Kuan-yin . Has it been anywhere since it arrived in orbit here?" "It's a pretty house," Hanlon said after another short silence. The owners of the Windchaser aren't in sight, but they must be nearby to be able to trigger the lock by to go upstairs to find those necessities. "An expert on ladies in need of stimulating entertainment, perhaps?" Without hesitation, Leilani said, "Four elderly women, three elderly men, a thirty-year-old mother of two. A month ago, she had read a magazine article about enlarging your breasts through the power of positive. "From a white back. But not anymore, I guess, by the look of it." Driscoll straightened up from the wall and grinned, not knowing what else to do. "Well... hi," he returned. to dart beneath the surface of their conversation, though it eluded her net. They entered the cafeteria, which was fairly busy since it was around midday, and sat by a window overlooking a parking area for flyers, beyond which lay a highway flanking the near bank of the river. A screen at one end of the table provided an illustrated menu and a recitation of the chefs recommendations for the day, and Juanita dictated their orders to it. At the next booth, a wheeled robot that had been delivering dishes from the heated compartment that formed its uppermost section closed its serving door and rolled away. immensity, can't restrain them by word alone. Sterm looked back at her and smiled humorlessly. "Hardly what I would call manipulating. I merely allowed them to continue along the paths they had already chosen, as you chose also." The suspicion he'd directed at Wendy Quail had been misplaced. Even as the last of the cracked plastic and the shattered glass from the headlamp rang and rattled against. Colman ignored the remark. "Just think about it," he muttered. "For your own sake." held fast to the idea that this service to Laura might eventually redeem him. The hope of atonement was. "I'm not sure," Kalens replied distantly. Trying to elucidate Sterm's motives is akin to peeling an onion. But when you think it through, if there's no resistance, we win automatically, and if there is, then the Chironians will be forced to make the first moves, which gives us both a free hand to respond and a clear-cut justification that will satisfy our own people . . . which' is doubly important with the elections coming up. So really you have to agree, John, the scheme does have considerable merit. "Cool? You idiot, I liked that car." "I see . . ." Lechat couldn't pretend to be as surprised as he would have been ten minutes earlier. "Jonathan likes walking the edge. Risk excites him." herself, and honest enough to admit to the shame, though dishonest enough to try to avoid facing up to. approach, however it came, would be a lot more discreet than this. Leilani appeared to be surprised. "Don't you read newspapers?" Reliably off-center, Aunt Gen waved gaily, as though the trailer were an ocean liner about to steam out. In the week following Lechat's brief term as Director, the laser link from Earth had brought news of the holocaust engulfing the whole planet. Then the signals had ceased, and for five years there had been nothing. No doubt many pockets of humanity had managed to survive, but mankind's first attempt to establish an advanced civilization had ended in failure - or almost in failure, for it had served its purpose; it had lifted humankind from its primitive, animal beginnings to a level where human, not animal, values could evolve, and it had hurled a seed of itself outward to take root, grow, and blossom at a distant star. And then it had died, as it had to. Gradually he finds strength not in the memory of her murder, not in a thirst for vengeance or justice, but. "Would you expect me to say so if it was?" Colman asked. -. "Everybody does." Lechat didn't want to see Celia dragged through an ordeal again. He raised his arms to attract attention back to himself. "But don't you see what it means," he said. The voices on the screen and inside the room died away. "If that information was made public, it might be enough to cause Sterm's remaining supporters to turn on him - apart from the few who were in on the sham. Surely if that happened he'd have to see that it was all over. He's hanging on by the thread of a lie, and we possess proof of the truth that cut that thread. That gives us an option to try resorting to less drastic measures. And after all, wouldn't that be in keeping with the entire Chironian strategy?" fearfully aware of ever-looming death as his master is, which would be sad. And the boy figures that. Brief trills of laughter escaped Sinsemilla. Not brittle and mad laughter, as Micky might have expected. In the dark, as the big Windchaser begins to move, Curtis sits on the bed and feels along the base of it. Remaining at the stricken woman's side, Micky looked across the fence and saw Geneva at the back. "Wanting to save your husband would be far from strange, and a noble sentiment indeed . . . if it were true. But is it true?" The muscles of Sterm's face tensed; he quivered visibly with the effort of suppressing his rage. "I was willing to bargain," he grated. "Evidently we have failed to impress upon you the seriousness of our intentions. Very well, you leave me no further choice. Perhaps a demonstration will serve to convince you." He turned to Stormbel. "General, advise the status of the missile now targeted at the Chiron scientific base in northern Selene." unreal as a funhouse, and yet repeatedly she had encountered reflections of herself so excruciatingly. A moment ago, he'd been eager to investigate this place. Now he wants only to move on? and quickly. The sight of Cliff Walters moving toward the monitor room on the other side of the glass partition interrupted his thoughts. A moment later the door to one side opened with a low whine and Walters walked in. Fallows swung his chair round to face him and looked up in surprise. "Hi. You're early. Still forty minutes to go." "When he has to explain where Luki's gone, what'll he say?" Geneva wondered. Leilani had no clue to the meaning of her mother's words. From experience she knew that purposefully. "Dry as a cracker." psychologically and physically? and yet she had survived. Leilani's situation was no better but no

"I know you had an embarrassing time yesterday, and I'm not condoning their attitude, but all the same we have to---" He broke off as he noticed that Stern, the Deputy Director, was sitting forward to say something, which was a sufficiently rare event to warrant attention. , "Yes, Matt?" Nothing like that had ever happened to him before, and he had to tell somebody, Colman saw; but Colman played along..halting again, and Curtis uses this distraction to open the bedroom door a crack. "Perhaps it would be of benefit if I were to summarize the situation that now exists," Stern suggested, "We come one kind or another, all the move-along type, because if they didn't move along, the local cops would've gloom untouched by the feeble light in the bathroom. To his left, two rectangular windows glimmer dimly.. Nanook rubbed his chin and looked dubious. "That situation sounds very farfetched," he said after a few seconds. "I can't see how anyone else could walk in with the same experience. But if it did happen, and it was true... then I suppose Kath would have to agree with him. She'd be indebted by that amount. And -that would decide it for everyone else." Ten minutes later, in the privacy of the small armory at the back of the Orderly Room, Colman had told Sirocco as much as he had learned from Jay, and as much as was necessary about Celia and Veronica. Sirocco had informed Colman and Hanlon that Stormbel had seized command of the Army and was backing Stern, and that Stern appeared to be holding together the bulk of what was left of the Army by appealing to fears among the senior officers that the assassination of Kalens might represent a new general threat from the Chironians.. Bernard nodded. "Okay. We'll see you later then. Maybe you'd better leave that stuff here for now, Jay. If things turn out to be not quite the way you said, it might be a good idea not to go carrying it around." Jay thought about it for a few seconds and nodded slowly. "I think I get it. You're saying that the ways people act and how they feel can't be described in terms of the chemicals they're made from. A DNA molecule adds up to a lot more than a bunch of disorganized charges and valency bonds. The way you organize it makes its own laws." "Why's it so important to be better than somebody?" "Whatever they get, they've got it coming," the fat man on the barstool next to him said. "Kids running around wild, breeding like rabbits--It's disgusting. And making bombs Savages is what they are--no better than the Chinese. Kalens has got the right idea. He'll teach 'era some decency and respect." Colman drank up and left.. "Then I guess the sooner we get moving, the more chance we'll have of figuring out all the angles." The others in the room got up by ones and twos from where they had been sitting. Colman, Lechat, Bernard, and Celia gathered by the door in preparation to leave, while the others moved across to see them on their way, with Veronica clinging to Celia's arm.. him better than he knew himself. This suspicion didn't inspire contemplation, and he busied himself. Geneva shook her miswired head. "I don't watch anything on TV except old movies." "Look, I think Jay probably wants to talk about things you wouldn't be interested in," Colman said to Anita. "Why.. Celia spoke for the first time since sitting down with Veronica and Casey. Until now they had not been fully aware of the reason for Bernard and Lechat's visit. "Either way a wanting won't do any good," she said. "Whether you issue one now or later is academic. He would defy it. You don't know him. The hard core of the Army is rallying round him, and it has reinforced his confidence. He thinks he is unbeatable." "We could probably arrange a visit for you too," Chang offered. "There's a large fusion complex along the coast that supplies power and all kinds of industrial materials for most~ of Franklin. Another one's due to be built soon, and they'll be needing people too. I could arrange for you to go and see it, ff you think you'd be interested." The party ascended the main staircase, at the top of.. "That's only the first door," Swley reminded him, lowering the instrument from his eyes. "There are two of them. Whatever we do to that one won't stop them from closing the second one." Curtis finds the window latch and slides one pane aside. He thrusts his head out of the window, cranes even any response whatsoever.. "That's a personal question, Jay," Bernard cautioned. "Anyhow, it's early yet." Leilani didn't glance back again. She made a point of crossing the rest of the yard and negotiating the..
