Gelluk's white face had gone whiter; his jaw trembled a little. He stood up, suddenly, as he. He came back in the evening, later than ever, for of course San had walked him clear out into the Long Fields where most of his beeves were. Nobody had horses but Alder, and they were for his cowboys. She gave her guest a basin of hot water and a clean towel for his poor feet, and then thought to ask him if he might want a bath, which he did. They heated the water and filled the old tub, and she went into her room while he had his bath on the hearth. When she came out it was all cleared away and wiped up, the towels hung before the fire. She'd never known a man to look after things like that, and who would have expected it of a rich man? Wouldn't he have servants, where he came from? But he was no more trouble than the cat. He washed his own clothes, even his bedsheet, had it done and hung out one sunny day before she knew what he was doing. "You needn't do that, sir, I'll do your things with mine," she said. .him. Later when he tried to repeat the word, he stood dumb..when she came out of the shelter of the woods and saw the open sky..She pitied and honoured him. She wanted to warn him of the peril he was in. But no words came to. Weary, evil dreams of suffocation came to him, but took no hold on him. He breathed deep. He slept at last. He dreamed of long mountainsides veiled by rain, and the light shining through the rain. He dreamed of clouds passing over the shores of islands, and a high, round, green hill that stood in mist and sunlight at the end of the sea..At last she moved, and kissed his cheek, and whispered, "I missed you, I missed you, I missed you. How long can you stay?".did not like them. He did not like what Hound told him about this boy, Otter, and he remembered.thousand years ago..She said nothing, but breathed very warm in his ear, and he moaned. His hands clenched hers. He drew back a little. She drew back. They sat back on their ankles.."I'm Gift," she said, a bit flustered, but liking the fellow. "All right, then, Master Hawk. Put your horse up and see to him. There's the pump, there's plenty of hay. Come on in the house after. I can give you a bit of milk soup, and a penny will be more than enough, thank you." She didn't feel like calling him sir, as she always did the curer. This one had nothing of that lordly way about him. She hadn't seen a king when she first saw him, as with the other one..listened.."but a crafty man. Well, you're not the first."But seeing no slope or stair downward as he came to the lip of the broken roof of the cavern, he.The coppers weren't decently in a bag, even. Irioth had to hold out his hand, and the cattleman laid out six copper pennies in it, one by one. "Now then! That's fair and square!" he said, expansive. "And maybe you'll be looking at my yearlings over in the Long Pond pastures, in the next day or so."felt nothing, the fountain was without water. After a moment it seemed to me that I smelled."We couldn't hide the wrestle we'd had with him, though we said as little about it as we could..overlooked?". "Woven cloth we're looking for, and the undyed thread, and other things too-buttons we're short.courteously by their titles..When she woke, the Master Patterner was sitting nearby, and a basket was on the grass between."Avert!" "And you know.could be anything. Horses! Bears!".The deeds and lays that tell of raids by dragons and counterforays by wizards portray the dragons."All under here's worked out long since" Licky said. And Otter had begun to be aware of the.pungent, disorderly place thick with the mysteries of women and witchcraft, very different from.sun was in the windows, there was a knock at her open door. He slogged back up the path through the reeds till he reached dry ground and coarse grass, and heard the buzz of midges and crickets. He sat down then on the ground, rather hard, for his legs were shaking..The Patterner's voice had grown rougher, and he suddenly brushed the little design of pebbles apart with the palm of his hand..A millennium and a half ago or more, the runes of Hardic were developed so as to permit narrative writing. From that time on, The Creation of Ea, The Winter Carol, the Deeds, the Lays, and the Songs, all of which began as sung or spoken texts, were written down and preserved as texts. They continue to exist in both forms. The many written copies of the ancient texts serve to keep them from varying widely or from being lost altogether; but the songs and histories that are part of every child's education are taught and learned aloud, passed on down the years from living voice to living voice..the greater spell of hopelessness..out to be a thief. I lay down on the foamy carpet and."There," Anieb said. She pointed at the mountain and smiled. She looked at her companion, then slowly down at the ground. She sank down kneeling. He knelt with her, tried to support her, but she slid down in his arms. He tried to keep her head at least from the mud of the track. Her limbs and face twitched, her teeth chattered. Illusion came so easy.it. He went down to the stream in which he had been named. He drank, washed his hands and face..He had never told Ogion anything about his first teacher, a sorcerer of no fame, even in Gont, and perhaps of ill fame. There was some mystery or shame connected with Ard. Though he was talkative, for a wizard, Heleth was silent as a stone about some things. Ogion, who respected

silence, had never asked him about his teacher..Great House. I know it." Her father's ancestors had owned a wide, rich domain on the wide, rich island of Way. Claiming no league of mages. His voice was deep and soft, like the notes of miners forbade it, earnestly believing it was the worst of bad luck for a man to pick up a shovel. Orm, the Great Dragon, who had defeated Ath, led hosts of his kind to harry the western islands of. Hemlock was 10th to practice any of the lesser arts of magic. He did not put out a finding spell, as any sorcerer might have done. Nor did he call to Diamond in any way. He was angry; perhaps he was hurt. He had thought well of the boy, and offered to write the Summoner about him, and then at the first test of character Diamond had broken. "Glass," the wizard muttered. At least this weakness proved he was not dangerous. Some talents were best not left to run wild, but there was no harm in this fellow, no malice. No ambition. "No spine," said Hemlock to the silence of the house. "Let him crawl home to his mother..you!" She sprang up the bank, pulling herself up by the tough bunchgrass, and scrambled to her. "Ah," said the Patterner. "Hard for the housekeeper to give up the keys when the owner comes. He slept wherever he chose to, she imagined, in these warm summer nights, She asked him where the food they ate came from; what the School did not supply for itself, he said, the farmers round about provided, considering themselves well recompensed by the protections the Masters set on their flocks and fields and orchards. That made sense to her. On Way, "a wizard without his porridge" meant something unprecedented, unheard-of. But she was no wizard, and so, thinking to earn her porridge, she did her best to repair the Otter's House, borrowing tools from a farmer and buying nails and plaster in Thwil Town, for she still had half the cheese money..file:///D:/Documents%20and%20Settings/harry/D...20%20LeGuin%20-%20Tales%20From%20Earthsea.txt (7 of 111) [2/5/2004 12:33:30 AM].is it?".haste..Silence before. There was a very long pause..If Diamond had been born to that kind of power, if that was his gift, then all Golden's dreams and plans of training him in the business, and having him help in expanding the carting route to a regular trade with South Port, and buying up the chestnut forests above Reche -- all such plans dwindled into trifles. Might Diamond go (as his mother's uncle had gone) to the School of Wizards on Roke Island? Might he (as that uncle had done) gain glory for his family and dominion over lord and commoner, becoming a Mage in the Court of the Lords Regent in the Great Port of Havnor? Golden all but floated up the stairs himself, borne on such visions..wizards, advisers to the kings..incalculable. He was amazed when, not long after, she said to him, "I'll be going to the Grove. The Creation of Ea contains no clear references to an original unity and eventual separation of dragons and humans, but this may be because the poem in its presumed original form, in the Language of the Making, dated back to a time before the separation. The best evidence in the poem for the common origin of dragons and humans is the archaic Hardic word in it that is commonly understood as "people" or "human beings," alath. This word is by etymology (from the True Runes Atl and Htha) "word-beings," "those who say words," and therefore could mean, or include, dragons. Sometimes the word used is alherath, "true-word-beings," "those who say true words," speakers of the True Speech. This could mean human wizards, or dragons, or both. In the arcane Lore of Paln, it is said, that word is used to mean both wizard and dragon.. "Let me in, mother," he whispered in the tongue that was as old as the hill. The ground shivered a. "There was no place for him among the Masters, since

a new Master Summoner had been chosen, a strong man in his prime, not likely to retire or die. Among the scholars and other teachers he had a place of honor, but he wasn't one of the Nine. He'd been passed over. Maybe it wasn't a good thing for him to stay there, always among wizards and mages, among boys learning wizardry, all of them craving power and more power, striving to be strongest. At any rate, as the years went on he became more and more aloof, pursuing his studies in his tower cell apart from others, teaching few students, speaking little. The Summoner would send gifted students to him, but many of the boys there scarcely knew of him. In this isolation he began to practice certain arts that are not well to practice and lead to no good thing.. "You never saw a shirt? Sort of, well, clothing. Made of nylon." The Namer, the Doorkeeper, and the Herbal followed him with her into the Grove. There was a path. thinking by his height he was a child, and then saw the small breasts. It was a woman. She was. Diamond thought his father meant the business -- the loggers, the sawyers, the sawmill, the chestnut groves, the pickers, the carters, the carts -- all that work and talk and planning, complicated, adult matters. He never felt that it had much to do with him, so how was he to have as much to do with it as his father expected? Maybe he'd find out when he grew up.. There he was well received by King Thoreg, who, after the shattering loss of his fleet, was ready. and for the sake of the balance of all things, I bid you now leave this island. I nearly leapt, forgetting. Unfortunately the king's wizards, enraged at the attack on the heart of the kingdom and heartened by their victory in the Pelnish Sea, had taken the fleet on into the far West Reach and attacked the islets and rocks where the dragons raised their young, killing many broods, "crushing monstrous eggs with iron mauls." Hearing of this, Orm's dragon anger woke again, and he "leapt for Havnor like an arrow of fire." (Dragons are generally referred to both in Hardic and Kargish as male, though in fact the gender of all dragons is a matter of conjecture, and in the case of the oldest and greatest ones, a mystery.). So Diamond, instead of learning spells and illusions and transformations and all such gaudy. "So, to be blunt about it, if you have this gift, Diamond, it's of no use, directly, to our business. It has to be cultivated on its own terms, and kept under control -- learned and mastered. Only then, he said, can your teachers begin to tell you what to do with it, what good it will do you.
