It hurt to look at it but none of them looked away. It was the fusion drive of the Edgar Rice Burroughs, heading sunward, away from the long winter on Mars. It stayed on for long minutes, then sputtered and was lost. Though it was warm in the dome, Crawford was shivering. It was ten minutes before any of them felt like facing the barracks.. Behind Driscoll, Maddock was examining the bottom of the gorge through the image intensifier, while in the shadows next to him the expression of concentration on Corporal Swyley's face was etched sharply by the subdued glow of the forward terrain display screen propped in front of him. "They would weigh me down," said Amos, "and I could not be back for lunch. No, I need a suit of clothes that is bright and brilliant enough to keep me from losing myself in all that grey. For HI do lose myself, you will never have your mirror." .It took perseverance, alertness, and a willingness to break the rules to watch the sunrise in Tharsis Canyon. Matthew Crawford shivered in the dark, his suit heater turned to emergency setting, his eyes trained toward the east. He knew he had to be watchful. When she turns back toward me, her eyes are softer and there's a fey tone in her voice. "If I die?" She laughs. "When I die. I want my ashes here." .Amanda screamed again. I tried to roll sideways but my body would not respond and I steeled myself for the second, almost surely fatal blow. But, instead, there was the thud of something dropping on the floor. There were whirligigs in the second patch, but they lacked the variety and disorder of the originals. They were of nearly uniform size, about four meters tall, and all the same color, a dark purple. They had pumped water for two weeks, then stopped. When Song examined them, she reported the bearings were frozen, dried out. They seemed to have lost the plasticizer that kept the structures fluid and living. The water in the pipes was frozen. Though she would not commit herself in the matter, she felt they were dead. In their place was a second network of pipes which wound around the derricks and spread transparent sheets of film to the sunlight, heating the water which circulated through them. They erected it on an outcropping of bare rock, rearranged the exhaust to prevent more condensation on the underside, and added more safety features.
