

## **BROTHERS OF THE GUN A MEMOIR OF THE SYRIAN WAR**

"I didn't know you had a thing about little girls, Steve," Anita teased. "You don't look the type." Hanlon roared and slapped his thigh. Well, all right, the clown car is wishful thinking, as they only appear in circuses. In fact, it's certain to be. "I can live without power as long as I've got pie," Leilani said, but she still hadn't forked up a mouthful of. The dog sits up straighter and pricks her ears, as if to say that she, too, is well informed about such. Mother became interested in it. According to psychologists, most self-mutilators were teenage girls and. For a moment, Micky perceived in their young visitor a quality that chilled her because it was like a view. Jean shook her head, still refusing to contemplate the prospect. "But why does it have to be over?" She looked imploringly at Bernard. "We were happy all those years in the ship, weren't we? We had our friends, like Jerry and Eve, we had the children. There was your job. Why should this planet take it all away from us? They don't have the right. We never wanted anything from them. It's-it's all wrong." Getting inside would therefore require some men being moved right up to at least one of the security points without arousing suspicion-armed men at that, since they would be facing armed guards and could hardly be sent in defenseless. Malloy had again discouraged ideas of attempting to impersonate SD's. The only alternative came from Armley-a bluff, backed up with information manufactured by Stanislaw, to the effect that regular troops were being posted to guard duties inside the complex as well as SD's, and providing reliefs from D Company. Obviously the plan had its risks, but making three separate attempts at the three entrances simultaneously would improve the chances, and it was a way of getting the right people near enough. In the end, Sirocco agreed. Once they got that far it would be a case of playing it by ear from there on, and the biggest danger would be that of SD reinforcements arriving from the guardroom behind the main doors of the Government Center complex, which was just a few hundred feet away on the same level, before the situation was under control. That was the part that Bernard Fallows had come along to handle. Because for the first time ever, he had the feeling that he was somebody-- not just "Sergeant, U.S. Army, or "Serial Number 5648739210," or "White, Anglo-Saxon, Male," but "Steve Colman, Individual, Unique Product of the Universe." At that moment the communications supervisor called out, "We have an incoming transmission from the Battle Module." At once the whole of the Communications Center fell silent, and the figures of Stern and Stormbel, flanked by officers of their high command, appeared on one of the large mural displays high above the floor. Stern was looking cool and composed, but there was a mocking, triumphant gleam in his eyes; Stormbel was standing with his feet astride and his arms folded across his chest, his head upright, and his face devoid of expression, while the other officers stared ahead woodenly. After a few seconds, Wellesley, Lechat, and Borftein moved to the center of the floor and stood looking up at the screen. His in Congress, and that they might see more long-term profit in betraying her than in serving her honestly. Brunette with the pink complexion and the twinkling blue eyes of a Nordic blonde. In her crisp. EARLY THAT EVENING, Sirocco presented himself at the Transportation Controller's office in the Canaveral shuttle base to advise that D Company had arrived for embarkation as ordered. Capacity had been scheduled since morning, and the Controller did no more than raise his eyebrows and check the computer to verify the change; it didn't make any difference to him which company the Army decided to move up to the ship as long as their number was no more than he had been expecting. An hour later the company marched off the shuttle in smart order, and after clearing the docking-bay area in Vandenberg, dispersed inconspicuously to their various destinations around the Mayflower 11. Speed was now critical since only so much time could elapse before somebody realized a replacement unit from the surface hadn't shown up where it was supposed to. "Well, yes, except for that," Geneva agreed. "But he came up to the cash register with this lovely smile. Feet above Curtis, maybe less. This isn't a traffic-monitoring craft like the highway patrol would use, not a. "It seems irrational to me to argue one way or another about things there's no evidence for," a boy of about four' teen remarked. "You can make up anything you want if there's no way of testing whether it's true or not, so what's the point?" check. So instead of saying, " 'Tis I, Princess Leilani, inquiring after m'lady's welfare," she said, "It's me. You." "That's right." Bernard was surprised and felt a little flattered. "I help look after the main drive systems." happened, . Howard learned about it, Celia closed her eyes as if she were trying to shut out a memory that she was seeing again. "He lost control of himself completely there was a fight, and.." She left the rest unsaid. After a few seconds she opened her eyes and stared blankly ahead again. "Maybe I wanted him to find out-provoked him to it. You see, after all that time, maybe I knew deep down that I couldn't just walk away and leave him like that either. ' What other way was there?" Her eyes brimmed with tears suddenly, and she brought her handkerchief to her face. She was nearly befuddled into silence. "How would you know?" thoroughbred but performed like a worn-out plow horse. What troubled Fulmire was the specter of Kalens's emerging from the midst of it all as a virtual dictator, with Borftein supporting him and straining to be let off the leash. Every faction would see such a concentration of power as a potential battering ram to be harnessed exclusively for the advancement of its own cause, and even more as an instrument to be denied at all costs to its rivals. In an explosive situation like that anything could happen, and Fulmire had visions of the whole Mission tearing itself apart in internecine squabbling with a strong possibility of bloodshed at the end of it all when frustrations boiled over. The only force that he could see with any potential for exerting a stabilizing influence was the more moderate consensus as represented by the Mayflower 1's population as a whole; and Lechat, possibly, could provide a means of mobilizing it before things got out of hand. The part of the Mayflower H dedicated to weaponry was the mile-long Battle Module, attached to the nose of the Spindle but capable of detaching to operate independently as a warship if the need arose, and equipped with enough firepower to have annihilated easily either side of World War II. It could launch long-range homing missiles capable of sniffing out a target at fifty thousand miles; deploy orbiters for surface

bombardment with independently targeted bombs or beam weapons; send high-flying probes and submarine sensors, ground-attack aircraft, and terrain hugging cruise missiles down into planetary atmosphere; and land its own ground forces. Among other things, it carried a lot of nuclear explosives.. "I guess I'll have to think about it," Jay conceded. Hanlon ordered three hamburger dinners, and the two sergeants spent a half hour talking with Jay about Army life, football, and how Stanislaw could crash the protected sector of the public databank. Without waiting for a reply he walked over to the door, opened it, poked his head in, called back to Stanislaw, "This is it. Where's Johnson?" and went inside. Stanislaw put down the toolbox and followed, then Colman came back out and squatted down to rummage inside it for something. Veronica appeared and went in with the packing roll, Stanislaw came out, Colman went back in with a measure, and a few yards away along the corridor Carson and Maddock managed to get the picture-crate stuck across an awkward corner. While the SD was half watching them, Fuller came up the stair to ask where Johnson was, Stanislaw waved in the direction of the doorway, and Fuller went in while Colman came out. Carson dropped his end. Adam excused himself from going out because he had some work to do, and Bobby and Susie had been looking forward to a musical comedy that was being given not far away that evening. Colman assumed that Kath would want to go with them, which would leave him flipping a coin over which show to see; but to his surprise she suggested a drink somewhere for the two of them instead. She explained, whispering, "Anyway, I've already seen it more times than I can count." So who was he to turn it down? Colman asked himself. But at the same time he couldn't avoid the sneaking feeling that it was all just a little bit strange.. "I still don't understand the politics behind it all though," he said to the two Chironians who were accompanying him and Jay toward the cafeteria in the Administration Building in front of the main reactor site, where they were due to have lunch. One of them was a young Polynesian named Nanook, who worked with control instrumentation; the other was a slightly younger, pale-faced blonde called Juanita, who dealt with statistics and forecasts and seemed to be more involved with the economic side of the business. Kath herself had taken her leave earlier, explaining that she was expecting another party of visitors. Bernard spread his hands in an imploring gesture. "I mean... who owns the place? Colman realized that for the first time he was seeing Chironians with the gloves off. Hanlon had taken up a position to one side of the entrance, watching the sentries who were checking incoming and outgoing traffic. Jay Fallows was standing just outside, by the wall of the sentry

post. Hanlon saw Colman approaching and sauntered across to meet him. "I'm sorry to be interrupting the beauty sleep you're so much in need of, but you've this young gentleman here asking to talk to you." Colman walked over to where Jay was waiting, and Hanlon resumed watching the entrance. He's at too great a distance for those beams to expose him. And in the absence of a moon, although he. "And that goes for all of you," he warned in a louder voice. "We won't forget. You'll see." The tape went silent again as a perfectly executed time dissolve brought the viewer from twilight to full. ON THIS, THE eve of the last Christmas that we shall be celebrating together before our journey ends, I have chosen as the subject of my seasonal message to you the passage which begins, 'Suffer little children to come unto me' The voice of the Mission's presiding bishop floated serenely down from the loudspeakers around the Texas Bowl to the congregation of ten thousand listening solemnly from the terraces. The green' rectangle of the arena below was filled by contingents from the crew and the military units standing resplendent and unmoving in full dress uniform at one end; schoolchildren in neat, orderly blocks of freshly laundered and pressed jackets of brown and blue in the center; and, facing them from the far end on the other side of the raised platform from which the bishop was speaking, the ascending tiers of benches that held the VIPs in their dark suits, pastel coats, and bemedaled tunics. The voice continued. 'The words are appropriate, for we are indeed about to meet ones whom we must recognize and accept as children in spirit, if not in all cases in body and mind ..' Two hundred thousand miles away on the rugged, pockmarked surface of Chiron's other moon, Romulus, two enormous covers, whose outer surfaces matched the surrounding terrain, swung slowly aside to uncover the mouth of a two-hundred-foot-diameter shaft extending two miles vertically through the solid rock. The battery of accelerator rings in the chambers surrounding the base of the shaft was already charged with dense antimatter streams circulating at almost the speed of light. she'd been through, she wasn't screwed up yet; she was tough, smart; she had a chance, a future, even if. The girl forked up another mouthful of pie, and again she chewed with a stoic expression that suggested. Colman stared at Celia for a few seconds longer. He still didn't know why Celia should have been so anxious to get away from Stern or why she should have been in any danger. Life couldn't have been much fun with somebody like Howard, he could see, so the thought of her gravitating toward a strong, protective figure like Stern wasn't so strange. And it didn't seem so unnatural that she should have stayed near Stern after Howard was killed. In such circumstances it would have been normal to provide her with an escort down to the surface too, for her own security; but having her watched all the time and not allowing. "Stay off the streets and keep out of sight," Fulmire said. "Stern and Stormbel have pulled a coup. They've got the SDs and at least some of the regular units-I'm not sure how many. They're arresting all the members of Congress up here, and squads are out at this moment to round up the rest. I'm probably on the list too, so this will have to be quick. They're taking over the Communications Center, and they've made a deal with Slessor to leave him and his crew alone if he sticks to worrying about the safety of the ship. Get out of Phoenix if you can. I don't know if-" The picture and the voice cut out suddenly. "He wouldn't get away with it, surely," Jay said incredulously. "I mean, you wouldn't still let him walk in and out of places and help himself to anything he wanted, would you?" boy feels deep sympathy for this truck-driving Gump, and he regrets being so insensitive as to have. "I

don't think it could work," Pernak said, shaking his head after Lechat had finished. "None of the things everybody else is yelling about up here can work either. They haven't gotten it into their heads yet that nothing they've had any experience with applies to Chiron. This is a whole new phenomenon with its own new rules." He might have delayed his departure a few minutes more if he'd not had an engagement to keep. Visiting embarrassment at his own shortcomings. "You help me? How?" "On your way." Pernak had short, jet-black hair, a broad, solid frame, and rubbery features that always fascinated lay with their seemingly endless variety of expressions. He had lectured on physics topics several times at lay's school and had proved popular as much for his entertainment value as for 'his grasp of the subject matter, which he always managed to make exciting with tantalizing glimpses inside black holes, mind-bending accounts of the first few minutes of the universe, and fantastic speculation about living in twisted spacetimes with unusual geometries. On one occasion he had introduced Feynman diagrams, which represented particles as "world lines" traversing a two-dimensional domain, one axis representing space and the other time. Mathematically and theoretically a particle going forward in time was indistinguishable from its antiparticle going backward in time, and Pernak had offered the staggering conjecture that there might be just one electron in the entire universe--repeating itself over and over by going forward as an electron and backward as a positron. At least, Pernak had pointed out, it would explain why they all had exactly the same charge and mass, which was something that nobody had ever been able to come up with a better reason for..campground.
