Then it stood erect. It was about the size of a cat It was pink and moist and hairless and naked. Its very human hands and feet and male genitals were too large for its tiny body. Its belly was swollen, turgid and distended like an obscene tick. Its head was flat Its jaw protruded like an ape's. It too had a scar, a big, white, puckered scar between its shoulder blades, at the top of its jutting backbone.. "Tell her IT! get on it Monday." She opened her mouth. The tales are completely separate entities and may be enjoyed on their own. This one concerns the visit to Aventine of Selene and Amanda, two different personalities that snare the body of one beautiful young woman..Then she was gone, gliding off into the night where the drums thudded in distant darkness..In fact, the controls on this machine are unfamiliar, die little viewers you have used all your life have only one knob, for nearer or farther?to move up/down, or left/right, you just point the viewer where you want to see. This machine has dials and little windows with numbers in them, and switches and pushbuttons, most of which you don't understand, but you know they are for special purposes and don't matter. The main control is a metal rod, right in front of you, with a gray plastic knob on the top. The knob is dull from years of handling; it feels warm and a little greasy in your hand. The console has a funny electric smell, but the big screen, taller than you are, is silent and dark. You can feel your heart beating against your breastbone. You grip the knob harder, push it forward just a little. The screen lights, and you are drifting across the next room as if on huge silent wheels, chairs and end tables turning into reddish silhouettes that shrink, twist and disappear as you pass through them, and for

a moment you feel dizzy because when you notice the red numbers jumping in the console to your left, it is as if the whole house were passing massively and vertiginously through itself; then you are floating out the window with the same slow and steady motion, on across the sunlit pasture where two saddle horses stand with their heads up, sniffing the wind; then a stubbled field, dropping away; and now, below you, the co-op road shines like a silver-gray stream. You press the knob down to get closer, and drop with a giddy swoop; now you are rushing along the road, overtaking and passing a yellow truck, turning the knob to steer. At first you blunder into the dark trees on either side, and once the earth surges up over you in a chaos of writhing red shapes, but now you are learning, and you soar down past the crossroads, up the farther hill, and now, now you are on the big road, flying eastward, passing all the cars, rushing toward the great world where you long to be. "Matthew? Matthew, I'm sorry. I didn't mean to hurt you." Her hand stroked my forehead. "It was. Half an hour later the curtains over the barred open window moved. I had squatted down in the closet and wasn't looking in that direction, but the movement caught my eye. Something hopped in the window and scooted across the floor and went behind the couch. I. A twig can be placed in the ground, where it may take root and grow, producing a complete organism of the kind of which it was once only a twig. Or the twig can be grafted to the branch of another tree (of a different variety even), where it can grow and flourish. In either case, it is an organism with a single parent, and sex has had nothing to do with its making. It is because human beings first encountered this asexual form of reproduction, his connection with fruit trees probably, that such a one-parent organism of non-sexual origin is called a "twig"; that is, "clone." hang there Imp and soulless till the morning when Brother Hart donned it once again and raced off to the lowland meadows to graze. inevitable. The stories in this book cover the period from our November 1976 issue through the middle of 1979, a period of great growth in the science fiction field, at least in terms of numbers. It was a hopeless task to choose which two or three to save in the time she had. She might have done better but for the freakish nature of her struggle to reach them; she was in shock and half believed it was only a nightmare. So she grabbed the nearest, who happened to be Doctor Ralston. He had nearly finished donning his suit; so she slapped his helmet on him and moved to the next one. It was Luther Nakamura, and he was not moving. Worse, he was only half suited. Pragmatically she should have left him and moved on to save the ones who still had a chance. She knew it now, but didn't like it any better than she had liked it then. "These 'fruit' are full of compressed gas," he told them. "We have to open up another, carefully this time.
