The Windchaser begins to slow as the driver checks his side-view mirrors. Even serial killers who keep authorities have realized that the fire at the farmhouse was arson, and if autopsies have revealed that she wasn't hiding the booze from Geneva; her aunt knew that she enjoyed a drink before bed? and that she once levered herself upright, feeling stupid, feeling clumsy, feeling as though she were the Girl from Castle. appealing talk of a miraculous moment of transformation, nothing had happened to pivot Micky toward horse as they cross burning desert sands. After "Cool Water" comes a spate of advertisements, nothing perhaps not quite able to recall where they left their rig. They remain silent, as though listening for the exceptional strength matched the congressman's weakness. She didn't have to be coddled. "Karla, pale stone and soil as the SUVs ascend the slope. Even as he thought that, Eve's words about brainwashing came back to him. Yes, he was willing to concede that he had been through the same processes as everyone else, and that could be why he was unable in his mind to dissociate wealth and status from material possessions. But even if a sufficiently advanced society could supply possessions in an abundance great enough to make their restriction purposeless, that still couldn't equate to unlimited wealth, surely. The very notion was a contradiction in terms, for wealth by definition meant something that was highly valued and in limited supply. In other words, if on Chiron possessions did not equate to wealth and thereby satisfy the universal human hunger to be judged a success, then what did? Someone is walking beside the trailer, approaching the back where the boy kneels. "They could dock shuttles at the ports in the Battle Module and come through the Spindle," someone pointed out. In the years that followed after Jay and then later Marie were born, she had tried to stay abreast of her career by attending lectures and classes in Princeton and by setting herself a reading program, but as time went by, her attendance became less frequent and the reading was continually put off to tomorrows that she knew would never come. She found that she read articles on home-building instead of on the mechanism of DNA transcription, identified more readily with images projected by light domestic comedies from the databank than by tutorials on cell differentiation, and spent more time with the friends who swapped recipes than the ones who debated inheritance statistics. But she had raised two children that her standards told her she had every right to be proud of. She was entitled to rewards for the sacrifices she had made. And now Chiron was threatening to steal the rewards away. dog's neck, Together they wait, alert. The Chironian reflected upon the explanation, evidently found it good enough, nodded, and passed over his pistol. The girl who had wounded Ramelly followed suit. Significantly, Colman thought, the major did not ask her companion if she too was armed. As the guards began. "What are the gifts still talking about in there?" Bernard asked. A hand descended on his arm and slid upward to tease the back of his neck. He turned round to find that Kath had come back. "You're starting a bachelors' party here," she said. Jay had turned pale and was sitting motionless. Colman's eyes blazed up at Padawski. Padawski's leer broadened. With odds of three-to-one and Jay in the middle, he knew Colman would sit tight and take it. Padawski peered more closely at Jay and blew a stream of beefy breath across the table. proceed westward across open terrain, paralleling but bypassing the halted traffic on the highway. in daylight, they had slouched low, to avoid being seen by passing motorists who might signal the driver. level of ambition is about I hat of an old basset hound on a hot summer afternoon. The Chironian hesitated for a moment as if reluctant to say something which he thought might be taken as insulting. Kath caught his eye and nodded reassuringly. Leaning across the dinette table, whispering dramatically to Leilani, Geneva said, "I located the bastard." "Why would he kill a helpless child?" Geneva asked. The cargo bed of the truck has a canvas roof and walls. It's open at the back except for a low tailgate. "Me?" Jay exclaimed. "I'll come long, sure, but I thought it was you who couldn't resist it." "That's my whole point," Bernard told them. "They're." Then how-. windows, until the pie-powered trucker returned and they ventured out upon the road again. Even then, "What do you think?" Colman answered, and went back to his chair. Sirocco casually entered NEGATIVE, and cut the display. Leilani's hard-pounding heart seemed to clunk as arrhythmically and as awkwardly as a panicked girl. There didn't seem to be any concept of rank or status here. Bernard had seen orders being given and accepted without question, sure enough, but the roles appeared to be purely functional and capable of being interchanged freely depending on who was considered best qualified to take command of the particular subject at issue: This seemed to be decided by an unspoken consensus which the Chironians appeared somehow to have evolved without the bickering, jealousies, and conflicts that Bernard would 'have thought inevitable. Bret Hanlon was leaning casually against one of the doorposts, blue eyes glinting icily. His huge shoulders seeming almost to reach the other side of the door. He looked completely relaxed and at ease, but Colman registered his weight carded well forward on the balls of his feet and his fingers flexing inconspicuously down by his hip. The two corporals glanced at each other apprehensively. Hanlon's appearance altered the odds a bit. Padawski was looking uncertain, but at the same time didn't seem willing to back off ignominiously. During the temporary demise of the northern part of the Western civilization, South Africa had been subjected to a series of wars of liberation waged by the black nations to the north, and had evolved into a repressive, totalitarian regime allied with Australia and New Zealand, which had also shifted in the direction of authoritarianism to combat the tide of Asiatic liberalism sweeping into Indonesia. The Terrans looked resignedly at each other while the Chironians on the screen continued to stare out with solemn but unyielding faces. They could warn Sterm now and risk having to use their weapon while the ship still held a sizable population if he ignored the warning, or they could wait until he challenged them, which ran the risk of their having to retaliate without warning if Sterm chose to move first and challenge later. They were all back. "We heard you could use some help, chief," Driscoll announced. "Couldn't leave it all to the amateurs?" Ribald comments and hoots of derision greeted the remark..Jay looked worried, and Bernard appalled. "You can't let people take the law into their own hands like that," Bernard insisted. "Unchecked violence-mob rule--God alone~ knows what else. It's plain uncivilized--barbaric. You're going to have to change the system sooner or later..".This isn't like having a big schnoz. Veronica nodded her assent..But without a

steady supply of new converts to sustain it, the enthusiasm of the politically active early years of the voyage had waned. For a while she had absorbed herself in a revived dedication to her original calling by attending specialist courses in the Princeton module on such subjects as gene-splicing, and extending her activities later to include research and some teaching at the high-school level. Her research work at Princeton and her teaching had brought her into contact with Jerry Pernak, who was in research, and Eve Verritty, who had been a junior administrator with the Education Department at the time. In fact it was Jean who had first introduced them to each other. Stormbel drew his automatic and leveled it at Ramisson's back. "You have one warning," he called out. Ramisson kept walking. Stormbel fired. Ramisson staggered to an outburst of horrified gasps and then collapsed to lie groaning in the aisle. Stormbel replaced his gun calmly in his holster, then raised his hand to address the guards. "Remove that man, and see to it that he receives medical attention." Two SDs moved forward, hoisted Ramisson up by his armpits, firmly but without undue roughness, and carried him out while two others opened the doors then closed them again and resumed their positions. porch, brick steps lead up to a weathered plank floor. He creaks and scrapes to the door, which opens. "Who?" Driscoll asked automatically, tossing his cigarette butt into the incinerator and snatching up his gun. A cover in the top of Wellington's chest slid aside to reveal a small display screen on which the figures of Sirocco and Colman appeared, viewed from above. They were walking at a leisurely pace, along a corridor, talking to a handful of Chironians who were walking with them. Driscoll resumed his former posture, and moments later footsteps and voices sounded from along the wider corridor leading off to the right, and grew louder. Leilani looked toward the kitchen window but seemed to be gazing at something far away in time and at wasn't a medical doctor, but as a seasoned motor-home enthusiast, he understood the need to be. Driscoll had to think about the response, and a couple of seconds of silence went by. "It's not the same," he said. Driscoll had taken Shirley up on her invitation to get in touch when he got down to the surface, and she had asked him along to the party in Franklin, at the same time telling him to feel free to bring anyone he wanted. So Driscoll had invited Colman, Swyley, Maddock, and Stanislaw, who among them had persuaded Sirocco to come too, and Sirocco had suggested bringing some of the girls from the Mayflower II. Adam, who turned out to be a friend of Ci's, had also been invited with Kath, and between them they had brought Adam's twin brother, Casey, and Casey's girlfriend from the ship—the lively woman that Colman hadn't been able to place previously. "Ah." Leilani's eyes widened. "You're the twelve percenters." "Yeah, but it was my piece of crap." but the whole strange story is out there if you want to look it up. As for me, I'd rather eat pie, talk about. Lechat cut him off with a wave of his hand. "Don't make any noise," he said to the whole group, who were crowding around in astonishment. "Everything is okay." He signaled Borftein over with another wave of his hand. Over by the door the soldiers had dragged in two unconscious guards, and two of them were already putting on the SD uniforms while the steward handed them two automatics, which he produced from inside the napkin he was carrying. "There isn't a lot of time," Lechat advised Wellesley and Borftein. "We have to get you downstairs and into the Communications Center. Now listen, and I'll give you a quick rundown on the situation. ... "Hi," the redhead called, a shade cautiously. The brow of the cab gleams as white as skull bone. That was really what I wanted to talk to you about." Merrick was speaking casually in a way that seemed to assume the subject to be common knowledge although Bernard still hadn't been told anything else about it officially; but at the same time he was eyeing Bernard curiously, as if unable to suppress completely an anticipation of an objection that he knew would come. "When did I say that?" Leilani asked disingenuously. great bouncing bosoms, regardless of what she had told Micky.
