Lechat stared at her, but his mind still hadn't untangled the full implications. Beside him Colman's jaw clamped tight. "Somebody faked it to look like the Chironians did it," Colman grated. Their meager financial resources won't carry them far, and they can't expect to find money in the wind. "I will indeed. See you later." Hanlon left, and they heard him forming up the relief guard outside. "I know," Kath told him. "He's through to Otto 'and Chester as well via one of our relay satellites. It's a three" way hookup." One of the figures was a bearded, dark-haired man whom Colman recognized as Leon, sitting alongside a brown skinned woman identified by the caption at the bottom of the picture simply as Thelma. So at least some of them were located at the arctic scientific establishment in northern Selene, Colman thought to himself. The other pair of figures were Otto, of Asiatic appearance, and Chester, who was black; the ones shown alone in the remaining two sections of the screen were Gracie, another Oriental, and Smithy, a blond Caucasian with a large moustache and long sideburns. From their ages they were all evidently Founder. Her attempt at humor was a good sign. Colman grinned and heaved himself from his seat. "Then let's go," he grunted. "Worth considering for what? You're not saying he'd make an engineering officer, surely." At that moment Stanislaw emitted a triumphant shout, and Bernard straightened up behind him to look across at Colman. "He's done it!" Bernard exclaimed. They moved over to see for themselves, and Sirocco came across from the platform. The rest of the mess hall quieted down. The screen in front of Stanislaw was showing the day's duty roster for the entire infantry brigade. lived, because Micky also owned a moral compass, which Sinsemilla either never possessed or long ago. "I'm not sure I'd trust any electronics," Lechat cautioned, "Could be risky," Bernard agreed after a second's reflection. "If Sterm and whoever else is involved have been preparing for this, I wouldn't put it past them to have taps and call-monitor programs anywhere. Someone will have to go there." he considers but discards. At last, a flashlight. "Oh, so it's trouble them fellas is looking for, is it?" a voice with just a hint :of an Irish brogue asked softly from the doorway. Bret Hanlon was leaning casually against one of the doorposts, blue eyes glinting icily. His huge shoulders seeming almost to reach the other side of the door. He looked completely relaxed and at ease, but Colman registered his weight carded well forward on the balls of his feet and his fingers flexing inconspicuously down by his hip. The two corporals glanced at each other apprehensively. Hanlon's appearance altered the odds a bit. Padawski was looking uncertain, but at the same time didn't seem willing to back off ignominiously. For a few seconds that dragged like minutes, the charge in the room crackled at flashpoint. Nobody moved. "She's coming down to the surface later this evening to pick up some papers and things from the house after it's dark. But she'll be under escort. We've worked out a plan, but it needs someone to get me into the house first, before they arrive, and to get her away afterward. Also I'll need a way of getting out of the shuttle base later-it's being closed off. You're the only person she'll trust. Can you get away inside the next hour, say?". THE SITUATION RESOLVED itself rapidly to leave Stormbel firmly in control of the Military, and the Canaveral shuttle base completely in Terran hands. Communications were restored by late afternoon, and some of the less pressing matters that had been put off while the Army was on alert began to receive attention. Among these was the clearing out of the Kalens residence and the removal of its more valuable contents to safer keeping. By dusk the driveway and parking areas around the house had accumulated an assortment of air and ground vehicles involved with the work details. Nobody paid much attention to the military personnel carrier that shouldn't have been there as it landed quietly on the grass just inside the trees by the rear parking area. Slam the door. Throw

"True, but-wow! I had no idea that anything here was that advanced." Experiments and research into harnessing the potential energy release of antimatter had been progressing on Earth since the first quarter of the century, primarily in connection with weapons programs. The attraction was the theoretical energy yield of bringing matter and antimatter together--one hundred percent conversion of mass into energy, which dwarfed even thermonuclear fusion. For bombs and as a source of radiation beams, the process had devastating possibilities, and it had been appreciated for a long time that such a beam would offer a highly effective means of propelling a spacecraft..Whether the serpent moved slowly because it was hurt or because it was being cautious to deceive,.,new-fallen night beyond a nearby window. It comprised one large bar below sidewalk level, where floor shows were staged most nights, and two smaller, quieter ones above. Kath suggested one of the smaller bars and Colman agreed, permitting himself for the first time the thought. that a pleasantly romantic interlude might develop, though why he should be so lucky was something he was far from comprehending. If it happened, he wasn't going to argue about it.."Hey, you. Stop." The major in command of the four SD troopers sent to scout out the center of Canaveral City --a residential and commercial suburb situated outside the base and merging into one side of Franklin--addressed the Chironian whom they had followed from the restaurant a few yards back around the corner. He was well-dressed, in his midthirties, and carrying an attach6 case. The Chironian ignored them and kept walking. Whereupon the major marched ahead to plant himself firmly in the man's path. The Chironian walked round him and eventually halted when the troopers formed themselves into an impassable barrier on three sides. "You're coming to talk to the ambassador," the major informed him.."She ought to've been paid to take it. Swley went, Driscoll went, and many of the others went, Sirocco had called the rest together and reminded them about the weapons in the Mayflower 11. "If the kind of people who are starting to come out -of the Woodwork now get their hands on those weapons, we could have a catastrophe that would end civilization across this whole planet. You've all seen what's happening back on Earth. Well, the same mentalities are here too, and they're panicking. We must keep enough of the Army together to stop anything like that if we have to." And so they had stayed..Leilani's mother, half mesmerized by her bizarre performance..Nanook rubbed his chin and looked dubious. "That situation sounds very farfetched," he said after a few seconds. "I can't see how anyone else could walk in with the same experience. But if it did happen, and it was true... then I suppose Kath would have to agree with him. She'd be indebted by that amount. "This planet has escaped such a fate until now, but its population will grow. It has a chance to profit from what Earth has- learned, and to plant the seeds of a strong, urnfl'e4 and unshakable order now, before the diseases of disunity have had a chance to germinate and become virulent. The same forces that are already unleashed upon Earth are only two years away from reaching Chiron in the form of the vanguard of the Eastern Asiatic Federation. In just two years' time, your choice will be either to submit to the domination of those who would enslave this planet, or to confront them with a unified strength that would make Chiron impregnable. Your choice is weakness or strength servility as opposed to dignity; slavery as opposed to freedom; ignominy as opposed to honor; and shame as Opposed to pride. Weakness or strength. Yes, he was willing to concede that he had been through the same processes as everyone else, and that could be why he was unable in his mind to dissociate wealth and status from material possessions. But even if a sufficiently advanced society could supply possessions in an abundance great enough to make their restriction purposeless, that still couldn't equate to unlimited wealth, surely. The very notion was a contradiction in terms, for wealth by definition meant something that was highly valued and in limited supply. In other words, if on Chiron possessions did not equate to wealth and thereby satisfy the universal human hunger to be judged a success, then what did?.own way, she loves you very much."
