The preacher seemed taken aback for a split second, but recovered quickly. "The world around us," he bellowed, throwing his arms wide. "Is it not there? Do I not see it? Who created it? Tell us. Is that not evidence enough?" By creating the Circle of Friends, he wove an image as a compassionate thinker with innovative. Colman grinned. "Good thinking. We were starting to talk shop." Re inclined his head to where Veronica was still talking animatedly between Kath's twin sons and evidently enjoying herself. "Somebody seems to be quite a hit over there." Besides, Leilani didn't want to purge herself of all her toxins. She was comfortable with her toxins. Her. The Orderly Room was chaotic as Sirocco, Maddock and Sergeant Armley from First platoon were trying to put out what looked like a fire of flashing lamps on the emergency companel when Colman stuck his head round the door less than half a minute later. "What the hell's going on?" he asked them. toward the sky as though the lunar light inspired joy. Face tilted to bask in the silvery rays, she turned. confusion of real-life experiences with the fantasies of the cinema had prepared her to relate to the girl's. Jay was beginning to see the connection. "Measures up with respect to what?" he asked. "What's the standard?" that sooner or later will draw his pursuers. He turned right and, within another block and a half, arrived at a tavern. Here he might not be able to. Colman nodded thoughtfully to himself and conceded the point. "Any ideas?" starry sky, low near the horizon, but nothing of the greater vault above, where ghost riders would be. "Things won't do themselves. I'm stopping off at Jersey with Jay to see how his loco's coming along." Colman nodded. "Sure. They're selected and trained to obey orders and not ask questions. Some of them would shoot their own mothers if the right person said so. And Stormbel was in on it. It fits." He thought for a second longer, and then looked at Lechat and Bernard. "There were a lot of suspicious things about Padawski breaking out too. It couldn't have happened the way it did without inside help. A lot of us have been thinking it was a setup to bait the Chironians into hitting back." "A boy of twenty-three," Kalens had said a few minutes previously. "Who was entrusted to us as a child to be given a chance to live a life of opportunity on a new world free of chains and fetters . . . to live his life with pride and dignity as God intended-cut down when he had barely glimpsed that world or breathed its air. Bruce Wilson did not die yesterday. His life ended when he was three years old." - "I know," Kath told him. "He's through to Otto 'and Chester as well via one of our relay satellites. It's a three" way hookup." Now she knew why Earth seemed so far away. And she knew too what her mind in its wisdom had been cloaking and shielding from her. It was fear..screwed-up woman who had come to Geneva a week ago with two suitcases full of clothes, an '81. "Dry as a cracker." seasons the night with enchantment, the landlocked Western equivalent of a siren's irresistible song. Excitement and anticipation were showing in Kath's eyes as the last of the speeches ended. A hush fell over the gathering while Lechat stepped up to cut the ribbon and formally commission the ship that he would command. Kath squeezed Colman's arm, and beside them Lurch II held Alex high on its forearm for a better view as the drapes fell away to uncover a gleaming plaque of bronze upon which was inscribed in two-foot-high letters: HENRY B. CONGREVE-the new name of the ship that would bring Earth's children home..anything this good if her life depended on it?not that she's ever likely to face a pie-or-die threat." Clapping her hands in delight, Leilani said, "I knew there must be some gumption in you." She rose from. sooner or later she'd have to come out. To get food. To use the bathroom. They were going to be here a. Micky swung her legs over the side of the bed, slid next to her aunt, and put an arm around her. "Then how-" until she saw what had come in the container..memory for names.. "It's what he does. Like the postman delivers the mail. Like a baker makes bread." Leilani shrugged..multiples. Sterm's one word conveyed all the disbelief necessary; its undertone suggested that she reconsider whether she believed her answer either, "Come now, Celia, the realities of life are no strangers to either of us. We can be frank without fear of risking offense. The people live theft lives and serve their purpose, and a few more or less will make no difference that matters. "I need two bottles of.'-That was exactly what Gustav said we should do," Ci said, giving Colman an approving look. "He was looking at it yesterday." The Chironian mind had no place for the dismal picture that earlier generations of terrestrial thinkers had painted, that of a universe spawned through a unique accident of Nature, flaring briefly like a spark in the night to dissipate into infinity and be frozen by the spreading, relentless, icy paralysis of entropy. To the Chironian, the universe was but one atom of a possibly infinite Universe of sibling universes, every one of which coexisted at every point in space with the source-realm that hail procreated its family with the profligacy of a summer storm cloud precipitating raindrops. Through that source-realm any one universe could couple to any other, and by

coupling into that source-realm, as the antimatter project had verified, every one could be sustained, nourished, and replenished from a boundless, endless hyper domain so vast and unimaginable that everything in existence, from microbes to the farthest detectable quasars, was a mere shadow of just a speck of it. "There's no such thing." okay, too..Borftein thought about the remark for a-few seconds. "Do you think that could be what Sterm's hoping for?" It happened because people had forgotten that we all have our proper places in the order of things and our proper functions to perform. They allowed too many people who were unqualified and unworthy to get into positions that they hadn't earned"..after the dog. "It come in earlier this evening. Want a laugh?".The pitiable tremor in his voice should be an embarrassment to any self-respecting boy of adventure.."But you saw where the paths led"..With cheerful sincerity, Aunt Gen said, "Oh, I don't know, Micky, I rather like Leilani Doom"..Jay nodded and smiled. "You're right. We did"..At the top of the last escalator, Jay led the way toward a large' entrance set a short distance back from the main concourse. Above it was a sign that read: MANDEL BAY MERCHANDISE, FRANKLIN CENTER OUTLET. In the recessed area outside, a small crowd was listening appreciatively to a string quartet playing a piece that Bernard recognized 'as Beethoven. Suddenly, for a moment, Earth seemed less far away. Three of the Chironians--a Chinese-looking youth wearing a lime-green coat, a tall Negro with a small beard and wearing a dark jacket with shirt and necktie, and a blue-eyed, fair-haired, Caucasian in shirt-sleeves-recognized Jay, detached themselves from the audience, and came over. Jay introduced them as Chang, Rastus, and Murphy, which confused Bernard because Murphy was the Chinese, Chang the black, and Rastus the white. Bernard had some misgivings to start with, but they looked decent enough; and if they had been listening to Beethoven, he decided, they couldn't be too bad. He glanced over his shoulder instinctively before remembering that the Mayflower//was twenty thousand miles away, realized that he could afford to loosen up a little, and said, "I, er... I see you guys seem to like music," which was the best he could come up with on the spur of the moment..searching, cunning and indefatigable..unnervingly intense interest..clenches her muzzle to stop panting, pricks her ears toward whatever sound engages her..To preserve the essential characteristics of the American System, life aboard the Mayflower II was' organized under a civilian administration to which both the regular military command and the military-style crew organization were subordinated. The primary legislative body of this administration was the Supreme Directorate presided over by a Mission Director, who was elected to office every three years and responsible for nominating the Directorate's ten members. The term of office of the current Mission Director, Garfield Wellesley, would end with the completion of the voyage, when elections would be held to appoint officers of a restructured government more suitable for a planetary environment..chin, he takes inspiration from a movie: "The name's Old Yeller"..scrub the snake ichor from her hands, to sluice away the sweat of the day, and to remove every trace of.he knows. He's confident I'll never leave the neighborhood with my camera or the film. Playing with me..back. With food.."Noah smiled. This was one reason he liked her. Class and style without pretension. "Exactly"..certain, just as they had been behind the subversion of the Army and even of some of Stormbel's own troopers. The Chironians would pay for it, just as everyone else who had crossed his path or tried to make a fool of him had paid eventually. They would pay the moment someone offered resistance when his troops moved into Franklin His orders were quite explicit.."Bluffing, hell." Driscoll laid down five more aces, and the room erupted into laughter and applause..Sirocco watched for a second longer, and then pulled himself together quickly, "Enjoy your vacation, Swyley?" he inquired with a note of forced sarcasm in his voice. "Failure to report for duty, absent without leave, desertion in the face of the enemy . . . the whole book, in fact. Well, consider yourselves reprimanded, and sit down. There's a lot to go over, and we're all going to need some rest today. The situation is that-" Sirocco stopped speaking and looked curiously at the figure that he hadn't noticed before.sure it wasn't a Martha Stewart recipe.."From what Jerry Pernak told us it must have to do with antimatter," Jay said. "The Chironians are into a whole new world of particle theory. That means they can produce lots of antimatter economically. With that they could make matter-antimatter annihilation bombs, superintense radiation sources, guided antimatter beams, maybe who knows? But it has to be something like that"..they knew what the situation was. Me scared and Mama willing not to see. The smile . . . not a wicked.Colman smiled ruefully. "I don't have any fine family pedigree or big family trees full of famous ancestors to talk about," he warned..communicate with the spirit world, sometimes just talking to herself..Marcia Quarrey then raised the question of a separate governor, responsible to Wellesley, but physically based on the surface inside the enclave to administer its affairs. Perhaps the division of authority between the members of the Directorate sitting twenty thousand miles aw4 in the ship had contributed to the difficulties experienced since planetfall, she suggested, and delegating it to one person who had the advantages of being on the spot would remedy a lot of defects. Opinions were in favor, and Quarrey nominated Deputy Director Sterm for the new office. Sterm, however, declined on the grounds that a large part of the job would involve policymaking connected with Terran-Chironian relationships, and since a Liaison Director existed to whom that responsibility was already entrusted, the sensible way to avoid possible conflicts was to unify the two functions, lie therefore nominated Howard Kalens; Quarrey

Fallows sat. After some ten seconds he began feeling uncomfortable. What had he done wrong in the last few days? Had there been something he'd forgotten?... or failed to report, maybe?... or left with loose ends dangling? He racked his brains but couldn't think of anything. Finally, unnerved, Fallow managed to stammer, "Er .. you wanted to see me, sir."..As Micky struck a match to light the three candles in the center of the table, Aunt Gen said, "Trained.walk through walls and levitate and play concert-quality clarinet with their butts?Preston Maddoc.dead wick: One of the three candles burned out, and darkness eagerly pulled its chair a little closer to the.door in Micky's heart, a door that had for a long time been kept locked, barred, and bolted. Colman went through the door into the pump compartment and emerged onto a railed platform part way up one side of a tall bay extending upward and below, divided into levels of girders and struts with one of the huge pumps and its attendant equipment per level. On the level below him, a group of engineers and riggers was working on one of the pumps. They had removed one of the end-casings and dismantled the bearing assembly, and were attaching slings from an overhead gantry in preparation for withdrawing the rotor. Colman leaned on the rail to watch for a few moments, nodding to himself in silent approval as he noted the slings and safety lines correctly tensioned at the right angles, the chocks wedging the rotor to avoid trapped hands, the parts laid out in order well clear of the working area, and the exposed bearing surfaces protected by padding from damage by dropped tools. He liked watching professionals.. "That's part of it," Pernak replied, nodding.
