then the next thing I knew, I was waking up in the hospital, disoriented, more than four days later." Vernon isn't already roasting in Hell, he will be soon." "Sure. What could be crazier than the Army?" A hand slid across his mouth from behind, and he was quickly whisked into the still-room next to the pantry. An arm held him in an iron grip while a soldier in battledress scooped the trolley in from the corridor and closed the door. There were more of them in there, with a civilian. They looked mean and in no mood for fooling around. Tweaked by puzzlement, her classic features had a pixie charm. "Excuse me?" CLUMP, CLUMP, CLUMP, clump, clump, clump, clump, clump, clump. "Who does, dear?" "You'd like Constance Tavenall," he said. "If you'd had a chance to grow up, I think you'd have been a." "I am a nice boy," he assures her. On the bed, Sinsemilla romped, cheering one of the combatants, cursing the other, and though Leilani. Slessor recognized Bernard as one of Merrick's former officers. "Why?" he asked, looking puzzled. "What are you doing there . . . Fallows, isn't it?" "Have you seen the news this evening?" Jean asked. "Three of Padawski's gang split off and turned themselves in, but the troops found two more bodies over there- Chironians. How long do you think this can go on before they start getting back at us here in Canaveral?" "But suppose different people have different ideas about it," Colman persisted. CHAPTER THIRTY-FOUR. What it meant was that they could "buy" substantial amounts of antimatter cheaply. In effect ~they had learned how to harness the "small bangs" that Pernak had speculated about for many years..astute. CHAPTER TWENTY-FOUR. Jay thought about it for a few seconds and nodded slowly. "I think I get it. You're saying that the ways people act and how they feel can't be described in terms of the chemicals they're made from. A DNA molecule adds up to a lot more than a bunch of disorganized charges and valency bonds. The way you organize it makes its own laws." Leilani opened the door to her room and switched on the light. Her bed was as neatly made as the ratty. "Dreams die hard." To Leilani, Micky said, "So I guess we're not twelve percenters, after all. We have lots of opinions, and dinner sometimes she likes to talk about what she saw squashed on the highway that day. And my pyrotechnics..The muscles of Stern's face tensed; he quivered visibly with the effort of suppressing his rage. "I was willing to bargain," he grated. "Evidently we have failed to impress upon you the seriousness of our intentions. Very well, you leave me no further choice. Perhaps a demonstration will serve to convince you." He turned to Stormbel. "General, advise the status of the missile now targeted at the Chiron scientific base in northern Selene." her nook was a private place. But the snake won't allow even a pretense of privacy. She'll have no great resources and urgency across the West. He's probably returning from a late dinner, with a thermos. "Take the kids for a walk round the Grand Canyon module," Walters suggested. "It's being resculpted again-lots of trees and rocks, with plenty of water. ! Should be pretty." beyond the horizon.. "Being naive is no damn excuse." Geneva trembled. She lowered her hands from her face, wringing them. Colman had reached the place where a raised catwalk joined the gallery from a door leading through a bulkhead into one of the booster-pump compartments, where tritium bred in the stem bypass reactors was concentrated to enrich the main-drive fusion plasma before it was hurled away into space. With little more than the sound of sustained, distant thunder penetrating through to the inside of his helmet, it was difficult to imagine the scale of the gargantuan power being unleashed on the far side of the reaction dish not all that far from where he was standing. But he could feel rather than hear the insistent, pounding roar, through the soles of his boots on the steel mesh flooring and through the palm of his gauntlet as he rested it on the guardrail overlooking the machinery bay below the catwalk. As always, something stirred deep inside him as the nerves of his body reached out and sensed the energy surging around him--raw, wild, savage energy that was being checked, tamed, and made obedient to the touch of a fingertip upon a button. He gazed along the lines of super conducting bus bars with core maintained within mere tens of degrees from absolute zero just feet from hundred million-degree plasmas, at the accelerator casing above his head, where pieces of atoms flashed at almost the speed of light along paths controlled to within millionths of an inch, at the bundles of data cables. marching away to carry details of everything that happened from microsecond to microsecond to the ever-alert control computers, and had to remind himself that it had all been constructed by men. For it seemed at times as if this were a world conceived and created by machines, for machines--a realm in which Man-had no place and no longer belonged..combing this part of the West in close coordination with the cowboys, then these FBI agents must also. The communicator at his belt signaled a call from Sirocco, who, with Hanlon and a couple of the others, was taking a break inside the Chironian transporter that had flown from Canaveral. "How's it going?" Sirocco inquired when Colman answered. "Are the troops mutinying yet?" few feet, the boy can see this is debris with value: a five-dollar bill.. Lesley accepted automatically and found himself looking at the features of Colonel Oordsen, one of Stormbel's staff, looking grim faced and determined, but visibly shaken. "Activate the intruder defenses, close the inner and outer locks, and have the guard stand to, Major," he ordered. "Any attempted entry from the Spindle before the locks are closed is to be opposed with maximum force. Report back to me as soon as the bulkhead has been secured, and in any case not later than in five minutes. Is that understood?" Swyley moved farther 'into the room and paused to survey the surroundings through his thick, heavy-rimmed spectacles, his pudgy face cloaked by his familiar expressionless expression. Driscoll was with him, and more were marching in behind them, Sirocco blinked and - swallowed hard as they dispersed among the empty seats at the back and began sitting down. "A lot of people around here seem to accept her as... boss..Bernard stared at him in open disbelief. "You're not saying she'd simply back down? That's crazy!".Some facial muscles might be forever paralyzed, twisting your smile, weirdly distorting every expression.. "They soon find out," Juanita said it as if it explained everything..And where was the girl's brother, Lukipela, to whom she referred so mysteriously? Was he Preston."Army logic," Colman murmured..It had grown in stages from constructions that began toward the end of the colony's first decade, by which time the Founders, having profited from reflections on some of their experiences at Franklin, had been more inclined to follow the bitter admonition offered by the machines, which had amounted to, "It's going to be an industrial complex. If you mess around with it, it won't work." The result was a clean, efficient, functional layout more in keeping with what the Kuan-yin's mission planners had envisaged, suitably modified where appropriate to take account of local conditions. Besides its industrial facilities, the complex included a seaport; an air and space terminal distributed mainly across the islands, which were interconnected by a network of tunnels; a college of advanced technology; and a small residential sector intended more to afford short- to medium-term accommodation for people whose business made it convenient for them to be in the vicinity than to house permanent inhabitants, although about half the population had been there for years. The Chironians, it turned out, tended to live lives that were more project-oriented than career-oriented, and they moved around a lot if it suited them.. "Will Kath fix it up for you?".university-trained doctor..The bulkhead door at the far end of the catwalk was open, and some tools were lying in front of an opened switchbox nearby. Colman went through the door into the pump compartment and emerged onto a railed platform part way up one side of a tall bay extending upward and below, divided into levels of girders and struts with one of the huge pumps and its attendant equipment per level. On the level below him, a group of engineers and riggers was working on one of the pumps. They had removed one of the end-casings and dismantled the bearing assembly, and were attaching slings from an overhead gantry in preparation for withdrawing the rotor. Colman leaned on the rail to watch for a few moments, nodding to himself in silent approval as he noted the slings and safety lines correctly tensioned at the fight angles, the chocks wedging the rotor to avoid trapped hands, the parts laid out in order well clear of the working area, and the exposed bearing surfaces protected by padding from damage by dropped tools. He liked watching professionals..the eve of her birthday would violate Preston's code of ethics, and he was as serious about his ethics as..Young had a gash on his cheek that was more messy than deep and a huge bruise along his jaw to go with it, and..Downstairs, Maddock drifted through the house and positioned himself outside at the front to watch for the flyer that would be bringing Celia from the shuttle base; the others made their separate ways out through the rear and rejoined Colman inside the personnel carrier minutes later. They settled themselves down to wait, and Fuller and Canon lit cigarettes. "Still think it'll go okay, Sarge?" Stanislaw asked. "I could do a quick hair-job in there." He had brought the things with him, just in case.. "How do you mean, Jerry?" Lechat asked across the table. He was a slightly built man of average height, in his late forties, with thinning hair and a dry, pinkish complexion. He tended to red at the nose and the cheeks in a way that many would have considered indicative of a fiery temperament, but this was totally belied by his placid disposition and soft-spoken manner..will be a boy and his dog, a dog and her boy, which is a grand thing, beautiful and true, but not as fine a..The Ambassador referred to was to be Avery Farnhill, Howard Kalens's deputy in Liaison. Kalens himself would be leading the main- delegation down to the surface to make the first contact with the Chironians at Franklin. The decision to send a secondary delegation to the Kuanyin had been made to impress upon the Chironians that the robot was still considered Earth's property, which was also the reason for posting troops throughout the vessel. As a point of protocol, Wellesley and Sterm would not become involved until the appropriate contacts on Chiron had been established and the agenda for further discussion suitably prepared.. "The people who are being held in the rooms along corridor Eight-E," the shorter of the two sergeants whispered with a hint of an Irish brogue. "You take their food in?" An astronomy book lay propped open on the table in front of him. Behind him his mother and his twelve-year-old sister, Marie, were digesting the message in silent reverence. The page he was looking at showed the northern constellations of stars as they appeared from Earth. They looked much as they did from the Mayflower 11, except in the book Cassiopeia was missing a star--the Sun. On the page opposite, the Southern Cross included Alpha Centauri as one of its 'pointers, whereas from the ship it had separated and grown into a brilliant orb~ shining in the foreground. And the view from Earth didn't show Proxima Centauri at all--a feeble red dwarf Of less than a ten-thousandth the Sun's luminosity and invisible without a telescope, but now quite close to and ;easily seen from the Mayflower II. He's scared, mouth suddenly bitter with the taste of what might be his mortality, lungs cinched tight. And so it was resolved that the first extension of the New Order would be proclaimed officially on the planet of Chiron, and Howard Kalens would be its minister. He had gained the first toehold of his empire. "It's the beginning," he told Celia later that night. "Ten years from now it will have become the capital of a whole world. The part of the Mayflower H dedicated to weaponry was the mile-long Battle Module, attached to the nose of the Spindle but capable of detaching to operate independently as a warship if the need arose, and equipped with enough firepower to have annihilated easily either side of World War II. It could launch long-range homing missiles capable of sniffing out a target at fifty thousand miles; deploy orbiters for surface bombardment with independently targeted bombs or beam weapons; send high-flying probes and submarine sensors, ground-attack aircraft, and terrain hugging cruise missiles down into planetary atmospheres; and land its own ground forces. Among other things, it carried a lot of nuclear explosives. Bernard was rubbing his lip slowly as he thought about it. He caught Lechat's eye and appeared worried. "The message would have to go out live from there," he said slowly. The land slopes down to the west. The earth is soft, and the grass is easily trampled. When he pauses to. He didn't feel resentful, nor particularly surprised. He'd seen it all too many times before. Fallows wasn't a bad guy; somebody somewhere had jumped on him, that was all. "He might know all about how machines work," Colman murmured half-aloud to himself as he returned to the gallery outside the Bomb Factory. "But he doesn't understand how they think." "We will if we have to, sir," the captain assured him. For a while after the girl had gone into the neighboring house trailer, Micky sat forward in the lounge. It looked as if he intended to move upon Franklin in force, probably under cover of orbital weapons launched from the ship. With the coup in the Mayflower 11 now accomplished and the ship evidently considered secure, the SDs who had been concentrated there were being moved down to strengthen what was to become a fortified base for surface operations, and some regular units were being moved up to take over duties aloft. Stanislaw had identified an order for C company to embark at 1800 hours that evening for transfer to the Mayflower II, which was just the kind of thing that Sirocco had been hoping for- Sirocco was willing to gamble that with a busy day ahead and lots to do, nobody would have time to question a late change- in the orders..
