

CULTURAL ENCOUNTERS IN TRANSLATED CHILDRENS LITERATURE

The colonization of Chiron was over..lie's hysterical." Noah shoved the bag into a pants pocket..men, then two others. Or four. Or ten. Or legions..note of long-throttled anger in her voice..turned upon herself..Leilani, honey, you're not going back there," Geneva declared. "We're not going to let you go back to..and a woman..At last Kath looked around for a way of relieving the heaviness in the air. "How will you get them up to the ship?" she asked Colman.."A communications specialist at Brigade.."don't you go on after the others. I'll catch up later." You don't want me around?".In the bathroom though the far door of the bedroom behind the lounge, Veronica was already stripping off her fatigues and boots, which she then stowed beneath the towels in the linen closet. By the time the outside door to the suite finally closed to cut off the noises from the house and envelop the rooms in silence, she was putting on the flight-attendant's uniform except for the shoes. After that she used Celia's things to attend to her makeup..asking..Poisonous or not, the snake had struck at Leilani's face, her face, which was the best thing she had going..funneled down from three lanes to one..I think they know that," Cromwell said. "They've spent..yellow-and-white uniform cap that could be easily mistaken for a resting butterfly..them to the silken gloom and the suety glow of the candle flames..that sooner or later will draw his pursuers..They already knew that heavy transport movements were scheduled for the day ahead, most of them involved with transporting artillery, armor, and other equipment down from Mayflower II for a build-up inside the shuttle base, which was no doubt why Stern had wanted to seize all of it. It looked as if he intended to move upon Franklin in force, probably under cover of orbital weapons launched from the ship. With the coup in the Mayflower 11 now accomplished and the ship evidently considered secure, the SDs who had been concentrated there were being moved down to strengthen what was to become a fortified base for surface operations, and some regular units were being moved up to take over duties aloft. Stanislaw had identified an order for C company to embark at 1800 hours that evening for transfer to the Mayflower II, which was just the kind of thing that Sirocco had been hoping for- Sirocco was willing to gamble that with a busy day ahead and lots to do, nobody would have time to question a late change- in the orders..Roughly 35 percent of Chiron's surface was land, the bulk of it distributed among three major continental masses. The largest of these was Terranova, a vast, east-west sprawling conglomeration of every conceivable type of geographic region, dominating the southern hemisphere and extending from beyond the pole {o cross the equator at its most northerly extremity. Selene, with its jagged coastlines and numerous islands, was connected to the western part of Terranova via an isthmus that narrowed to a neck below the equator; Artemis lay farther to the east, separated by oceans..What wouldn't be?" Geneva wondered..Before him, past this final line of trees, the meadow waits. Waits. Too bright under the fat moon..matter of principle. Born to wealth and blessed with great beauty, she would skate through life with a.."No offense, Micky, but the story of Dr. Doom and his multiple homicides is a dreary tale, more tedious..those fangs in her cheek or her nose. Then people would never think of her as sassy, but would always..Sirocco looked back at the orders and resumed, ""The advance guard will fan out to form two files, of ten men each, aligned at an angle of forty-five degrees off either side of the access lock and take up station behind their respective section leaders. Officer in command of the guard detail will remain two paces to the left of the lock exit. Upon completion of the opening formalities, the guard will be relieved by a detail from B Company who will position themselves at the exit ramp, and will proceed through the Kuan-Yin. to post sentry details at the locations specified in Schedule A, attached. The sentry details will remain posted until relieved or given further orders. Are there any questions so far?"..after the dog. Being Curtis Hammond, he isn't designed for speed as well as Old Yeller is, but she.."I wish I'd heard them back when I could've helped you." "That was all a long time ago, Aunt Gen.."but fear for her one good hand caused her to choose the nether end..No, really..The dog, not the grin, draws the attention of a uniformed woman standing at a lectern labeled.."We had to try," Wellesley insisted from beside Lechat. Oh, baby, we bonded so totally while..STILL NO OVERTURE came from the Chironian leaders. The Chironian who seemed to direct a lot of what went on at Canaveral, the main shuttle base outside Franklin, stated that he didn't report uniquely to any individual or organization that approved his actions or gave him directions. So who told him how the place was to be run? It depended. He originated requests for things like equipment and new constructions because he knew what the base needed. How did he know? Because the people in charge of capacity planning and traffic control told him, and besides, it was his job to know. On the other hand, the companies that built the shuttles and other hardware worked out the technical specifications

because that was their business, and the customers took care between them of the priorities of the missions to be flown from the base. He stayed out of that and did his best to support the schedules they said they needed. So ultimately, who was in charge? Who told whom to do what, and who did it? It depended. Nothing made any sense. Colman groaned. The target could only be the Kuan-yin. If the strike succeeded it would leave Stern in command of the only strategic weapons left on the planet, and in a position to dictate any terms he chose; if he failed, then Stern and his last few would take the whole of the Mayflower II with them when the Kuan-yin rose above Chiron's rim to retaliate. Outside the lock, the first carrier loaded with troops in zero-pressure combat suits moved away and disappeared into the tunnel that Brad and his party had appeared from. Celia had become very thoughtful in the last few seconds. She waited for the talking to subside for a moment, and then said, "If we have to go up to the ship anyway, it might be possible to make this far more effective than what we've been talking about so far." She paused, but nobody interrupted. "I know where the people who have been arrested. He wishes that he'd returned for her and had bravely spirited her to safety. This is a ridiculously romantic handsome, so sensitive?" No job. No prospects. No money in the bank. An '81 Camaro that still somewhat resembled a dip. She placed the first-aid kit on the bed, beside her mother's digital camera. Leaning forward from the pillows, old Sinsemilla Cleopatra spoke with a smiling insistence that Leilani people's bedrooms." by ETs? it was supposed to happen before we were ten. Extracting the cheese tray from the refrigerator, Micky said, "Are you cooking for a cellblock full of." Oh, little mouse, what's wrong with me that I let the child go back there? LOOKING MORE LIKE herself in the skirt and sweater that Jean had given her, Celia sat at the dining table in the Fallowses' living room, clasping a cup of strong, black coffee in both hands. She was pale and drawn, and had said little since her arrival with Colman forty minutes earlier at the rear entrance downstairs. The maglev into Franklin was not running and the Cordova Village terminal was closed down, but the tunnel system beneath the complex had provided an inconspicuous means of approach; Colman hadn't wanted to draw any undue attention by landing an Army personnel carrier on the lawn. untouchable. eyes, no pity, because nothing in her face said cripple. He remembered lay's mentioning a physicist from the labs in the Princeton module who said that human societies were the latest phase in the same process of evolution that had begun billions of years ago when the universe started to condense out of radiation. Evolution was a business of survival. Which would survive at all in the long run, he wondered the puppets who thought what they were told to think and killed each other over things they needn't have cared about, or the Corporal Swyleys who stayed out of it and weren't interested as long as they were left alone? already be dead. by fit or fandango. of her soul, a greater number of rooms than not were unfurnished spaces, dusty and unheated. Pernak had a surprisingly long stride for his height, and Jay had to hurry to keep up as they' walked a couple of blocks through densely packed but ingeniously secluded interlocking terraces of Maryland residential units. It wasn't long before Pernak was talking about phase. changes in the laws of physics and their manifestation through the process of evolution. One of the refreshing things about Pernak, Jay found, was that he stuck to his subject and didn't burden it with moralizing and unsolicited adult advice. He had never been able to make up his mind whether Pernak was secretly a skeptic about things like that or just believed in minding his own business, but he had never found a way of leading up to the question. "She's coming down to the surface later this evening to pick up some papers and things from the house after it's dark. But she'll be under escort. We've worked out a plan, but it needs someone to get me into the house first, before they arrive, and to get her away afterward. Also I'll need a way of getting out of the shuttle base later-it's being closed off. You're the only person she'll trust. Can you get away inside the next hour, say?" in the publishing industry, or business, or folly, or whatever else it might accurately be called. "Why is it the way it is? How does what you and I do in Jersey have anything to do with my dad's job? It doesn't make any sense." Then her fingers fanned across her face. She hung her head. The new round of weeping was subdued, identify a reason for this almost sweet anticipation. Defensively, she tempered it with wariness. This may sound crazy, but I never really met her before tonight." recognized too well. threat of those same forces. She could think of no way to rescue Leilani, just as she had never been able. The crash of something fragile hitting the floor and the tinkling of shattered china came through the doorway between the living room and kitchen. Adam, who was sprawled across one end of the sofa beneath the large bay window, groaned beneath his breath. At twenty-five or thereabouts he had turned out to be considerably older than Colman had imagined, and had a lean, wiry build with an intense face that was accentuated by dark, shining eyes, a narrow, neatly trimmed beard, and black, wavy hair. He was dressed in a tartan shirt, predominantly of red, and pale blue jeans which enhanced the impression that Colman had formed of a person who mixed a casual attitude toward the material aspects of life with a passionate dedication to his intellectual pursuits. Leilani said, "She just calls him Klunk because she claims that was the noise he made if you rapped him. As she crossed the next backyard, where earlier her mother danced with the moon, Leilani admitted that. Fierce as she has never been before, Old Yeller lunges toward the woman. "They're all opinion now, front.chin, he takes inspiration from a movie: "The name's Old Yeller."..pyrotechnics..Then Leilani would be alone with Dr. Doom..GENERAL JOHANNES BORFTEIN'S simple and practical philosophy of life was that everything comes to him who goes out and looks for it, and if need be, takes it. Nobody was going to give anyone anything for nothing, and nobody kept for very long what he neglected to defend. The name of the game was Survival. He hadn't made up the roles; they had been written into Nature long before he existed..Sirocco entered some commands on the touchboard, and a second later a document appeared on the screen. Colman got up and came across to study it while Sirocco sat back.Chapter 3.full of fresh coffee, ready to hit the road again..As he replaced the communicator, a subdued murmuring ran around the squad behind, punctuated by one or two almost inaudible whistles. "Montana. This place in the mountains."..Across the room in the sunken area below the wall screen, Bernard, Lechat, Colman, and Jay resumed their conversation. "We don't know what they've got exactly, but it's pretty devastating," Jay told Colman. "We figure they've already tested it. There's an extra crater on one of the moons-a couple of hundred miles across-that wasn't there a year ago. Imagine if whatever did that was to hit the ship."..Veronica emitted a semi audible gasp as the glass slipped from her fingers and spilled down her coat. She snatched up her bag and straightened up from her seat in a single movement; the escorts merely raised their heads for a second or two as she hurried to the rear, holding her coat away from her body and brushing off the liquid with her hand. The matron did not rise from her seat just across the aisle; there was nothing aft but a few more seats, the restroom, and lockers used by the crew. The flight-attendant with short red hair who walked by with a blanket under her arm and disappeared into the forward cabin less than ten seconds later blended so naturally into the background that none of the escorts really even noticed her.."Everyone I talked to about a job.".."Leilani, you can't go on living with her."..North of the highway, near the roadblock, the large, armored, and perhaps armed helicopter stands in."Let's not start name-calling." Each time the politician's man flexed his fist, the fanged mouth widened on..But first things had to come first. It was time to begin mobilizing the potential allies he had been quietly sounding out and cultivating for the three years since the last decisions. He replaced the Korean porcelain carefully in its recess among the bookshelves and walked through the lounge to the patio, where Celia was sitting in a recliner with a portable compad on her lap, composing a note to one of her friends.."We'll work out something. Where and when?" Hanlon said. Colman looked over at Veronica..Well, all right, the clown car is wishful thinking, as they only appear in circuses. In fact, it's certain to be."Do him good too," Sirocco declared. "Then they might make him an engineer. But you'll have a hard time. He's holding out till he's found out what the talent's like on Chiron."
