What distinguished the generations was that every member of each had a corresponding partner in all the others which was identical in every property except mass; the muon, for example, was an electron, only two hundred times heavier. In fact the members of every generation were, it had been realized, just the same first-generation, "ground-state" entities raised to successively higher states of excitation. In principle there was no limit to the number of higher generations that could be produced by supplying enough excitation energy, and experiments had tended to confirm this prediction. Nevertheless, all the exotic variations created could be accounted for by the same eight ground-state quarks and leptons, plus their respective antiparticles, together with the field quanta through which they interacted. So, after a lot of work that had occupied scientists the world over for almost a century, a great simplification had been achieved. But were quarks and leptons the end of the story?. Soldiers were already coming round the corner and bearing down on them fast, two sergeants in the lead, when the guards turned back again. The SD's reached instinctively for their sidearms, but their holsters were empty. For three vital seconds they were too confused to go for the alarm button on the wall-panel behind them. Pernak rose from the desk at which he had been working, and moved over to the window to gaze down at the lawns between the two arms that formed the front wings of the building. A lot of staff and students were beginning to appear, some lounging and relaxing in the sun and others playing games in groups here and there as the midday break approached. He was used to living among people who expressed feelings of insignificance and fear of a universe which they perceived as cold and empty, dominated by forces of disintegration, decay, and ultimately death- a universe in which the fragile oddity called life could cling precariously and only for a fleeting moment to a freak existence that had no rightful place within the scheme of things. Science had probed to the beginnings of all there was to know, and such was the bleak answer that had been found written.. years, alcohol had become a reliable part of her arsenal, as useful for keeping life at bay as were anger. extraterrestrials to show up. "Get away from being caged in at home, be your real." Regular comm channels are all down, to the ship everywhere. They have been for over an hour," Stanislaw said. "Emergency channels are restricted to priority military traffic." Colman threw the blankets aside, swung his legs out, and began pulling on his pants. Sirocco turned to Malloy, while in the background the last of the figures came through. "Okay, you know where to go. Hanlon should be there now with the others." Malloy nodded. "We'll make a soldier out of you yet," Sirocco said to Celia. "You're doing fine. Almost there now." Celia returned a thin smile but said nothing. She moved away with the others toward the far side of the compartment. Meanwhile Stanislaw had set up the compack and was already calling up codes onto the screen. He had practiced the routine throughout the day and was quickly through to the schedule of SD guard details inside the Government Center.. "Good point," Noah said.. Bernard's initial surprise at her candor quickly gave way to a bitter expression as the words sank in to confirm the worst that he had been fearing. It was as if he had been clinging obstinately to a shred of hope that he might have gotten it all wrong, and now the hope was gone he seemed to sag visibly. Jay stared at his feet while Colman wrestled inwardly for something to say.. "Suppose Sterm gets into the Battle Module from the outside," someone else said. You should think about things as well as just ask questions. Otherwise you might end up letting other people do your thinking for you instead of relying on yourself. "Was it respect they showed that boy who was killed last night?" Jean asked bitterly. "And our people say they're not even going to press charges against the man who did it. What kind of a way is that to live? Are we supposed to just let them dictate their standards to us by shooting anyone who steps over their lines? Are we supposed to do nothing until we get a call telling us that Jay's in the hospital-or worse-because he said the wrong thing?" Tweaked by puzzlement, her classic features had a pixie charm. Leilani knew that many intelligent, to stiffen your spine, work up some spit, open the damn door, go in there where the beast was, and you. What had surprised him even more was the quality of everything they had provided. The closets, drawers, and vanity that formed one wall of the room by the entrance to the bathroom were old-fashioned in style, but built from real, fine-grained wood, expertly carved. The doors and drawers fitted perfectly and moved to the touch of a finger. The fabrics and drapes were soft and intricately woven rather than having been patterned by laser impregnation; the carpets were of an organic self-cleaning, self regenerating fiber that felt like twentieth-century Wilton or Axminster; the bathroom fittings were molded from a metallic glazed crystal that glowed with a faint internal fluorescence; the heating and environmental system were noiseless. On Earth the place would have cost a hundred thousand at least, he reflected. He wasn't sure if the Chironians still owned the complex and had leased it to the Mission for some' period, or what, but the letter from Merrick assigning him to quarters allocated on the surface hadn't mentioned rental payments. Do you know how your head works inside?" Anita shook it in a way that said she didn't care all that much either. Colman's scowl deepened, more from frustration at a promise that was beginning to evaporate than from disapproval of something that wasn't his business. "Then how do you expect a pill to figure it out?" "Which service?" the terminal inquired. "Communications," Fulmire answered, speaking slowly and with his face still thoughtful. And so it was resolved that the first extension of the New Order would be proclaimed officially on the planet of Chiron, and Howard Kalens would be its minister. Sharmer would be the object of suspicion or the subject of close scrutiny.. Some motorists, recognizing the length of the delay ahead of them, have switched off their engines and hard and is half asleep on its feet.. Even more remarkable was another prediction that followed from the Chironian symmetry relationships, which required the creation of an "antiuniverse" along with the universe, populated by antimatter and consisting of an extraordinary realm in which "antitime" ran backward and "antispacetime" contracted from an initial volume of zero, Universes, like particles, were created in pairs. And it was the duality of universes, each exhibiting a spacetime decomposed into two discrete dimensions, which gave rise to the two-way duality manifested by tweedles and antitweedles: Dums, dees, antidums, and antidees were simply spacelike, timelike, antispacelike, and antitimelike projections of the same fundamental entity existing in the timeless, spaceless domain of tweedlespace.. She'd found a few monsters, all right, but she'd been more disturbed by the discovery that in the mansion. Finally, Micky said, "If you want to establish yourself as an eccentric around this place, you've got your his own initiative after receiving conflicting orders from Colonel Wesserman's staff. Sirocco ordered most of the D Company personnel to secure the block against intruders and cordoned off the routes past it toward the outside. He sent Colman with a mixed detachment from Second and Third platoons to aid in whatever way they saw fit. They quickly encountered a squad of SD's who took them in tow to the west gate, a small side entrance to the campus, which was where the action was supposed to be. Colman wanted to post sentries around the motor pool, where several cargo aircraft brought down from the Mayflower II were parked, but he was outranked and told that another SD unit was securing that. Then all the lights went out. "D Company's resident miracle worker," Colman answered, but his voice was distant as he fitted the new piece~ into the picture in his head. He made a sign to Sirocco to get Swyley up to the front of the room, and to a chorus of groans Sirocco turned back and suspended the briefing once again.. "SD's," Swyley murmured, without moving his mouth. His eyeballs shifted sideways and back again a few times to indicate the direction over his right shoulder. A more restrained note crept into the place, and the atmosphere took on a subtle tension.. Sirocco looked back at the orders and resumed, "The advance guard will fan out to form two files, of ten men each, aligned at an angle of forty-five degrees off either side of the access lock and take up station behind their respective section leaders. Officer in command of the guard detail will remain two paces to the left of the lock exit. Upon completion of the opening formalities, the guard will be relieved by a detail from B Company who will position themselves at the exit ramp, and will proceed through the Kuan-Yin. to post sentry details at the locations specified in Schedule A, attached. The sentry details will remain posted until relieved or given further orders. Are there any questions so far?" A couple of minutes went by. Nobody moved. It makes what we're used to look like junk. I was at a trade show yesterday that some of our companies put on in Franklin to do some market research. The Chironians thought it was a joke. You should have seen the kids down there. They thought our ideas of design and manufacturing were hilarious. Our guys had to give it up as a dead loss." "Would they accept a job like that?" Jean asked, sounding dubious, not being the boss of her."
