

H GESTOORDE VERDACHTE IN HET STRAFPROCES REGELGEVING PRAKTIJK EN

"Maybe you should try looking at it their way," Colman said.. "The mediocre shall inherit the Earth," Kalens had told his wife, Celia, after returning to their Delaware mansion from a series of talks with European foreign ministers one day in 2055. "Or else, eventually, there will be another war." And so the Kalenses had departed to see the building of a new society far away that would be inspired by the lessons of the past without being hampered by any of its disruptive legacies. There would be no tradition of unrealistic expectations to contend with, no foreign rivalries to make concessions to, and no clamoring masses accumulated in their useless billions to be kept occupied. Chiron would be a clean' canvas, unspoiled and 'unsullied, awaiting, the fresh imprint of Kalens's design..still pursue him..This isn't the ideal ride, but Curtis isn't likely to luck into a cushy berth on another automobile transport.was an apothecary with a deep supply of this prescription.. Waving Leilani toward her, Sinsemilla said, "Come hither, dour peasant girl, and let thy queen acquaint." Then she sprints around the front of a nearby. The most interesting life-form was a species of apelike creature that possessed certain feline characteristics. They inhabited a region in the north of Occidenia and were known as "monkeats," a name that the infant Founders had coined when they saw the first views sent back by the Kuan-yin's reconnaissance probes many years ago. They were omnivores that had evolved from pure carnivores, possessed a highly developed social order, and were beginning to experiment with the manufacture of simple hand tools. The Chironians were interested observers of the monkeats, but for the most part tended not to interfere with them unless attacked, which was now rare since the monkeats invariably got the worst of it. Other notable dangerous life-forms include the daskrends, which Jay had already told Colman about, various poisonous reptiles and large insects that were concentrated mainly around southern Selene and the isthmus connecting it to Terranova, though some kinds did spread as far as the Medichironian, a flying mammal found in Artemia which possessed deadly talons and a ranged beak and would swoop down upon anything in sight, and a variety of catlike, doglike, and bearlike predators that roamed across parts of all four continents to a greater or lesser degree.. To the faithful canine, the boy says, "Stay here, girl. I'll be back soon.".. Stern nodded slowly in satisfaction. "Excellent. I think you would agree, gentlemen, that this puts us in an unassailable bargaining position.".. "Oh, Mother's far too terribly smart to put any faith in Western medicine. She relied on crystal." "Technically you're right," Kath agreed. She raised her head to look at the pictures of her children on the wall with a faraway look in her eyes. "They might be scattered all over the planet, and the way they live might be a little strange compared to what you're used to, but it's a happy family in its own way," she murmured. "But it's still not really the same. It doesn't really feel as if any part of it has any link to anything that happened before fifty years ago. Don't you think it's ... oh, I don't know, kind of a shame somehow?". Lechat told Fulmire that he no longer thought it advisable to attempt setting up a Terran community alongside the totally unfamiliar experience of Franklin--at least, not immediately. The Terrans would need time to readjust, and in the meantime they would cling to their Own familiar ways and customs. The proximity of Franklin would only cause tensions. Lechat believed, therefore, that the migration to the surface should be halted completely, the existing plans abandoned, and a new Terran settlement established elsewhere for the transition period. An area called Iberia, on the south coast of western Selene, would be a suitable place, he thought. Lechat didn't know what would happen after that and doubted very much if anything could be predicted with confidence, but for the nearer term it would be the answer both to giving the general population a chance to settle in without disruptive influences, and the extremists an opportunity to cool down and do some more thinking..back door. They grin at him, complete with pink gums, but purged of blood.. "Old Sinsemilla. Who else? She's psychotic. As they say when they commit people to the psychiatric.. Suddenly, Imm the outer entrance to the foyer behind Hanlon, a firm, authoritative voice ordered, "Stop that!" The sergeant looked up from the panel just as he was about to place the call, and his jaw dropped open in astonishment. Borftein was striding forward toward the desk with Wellesley on one side of him, Lechat on the other, and a squad of soldiers in tight formation bringing up the rear. Celia and Malloy were between them. The two SD guards glanced uncertainly at each other.. THE SD CAPTAIN commanding the defenses at Number 2 Aft Access Port inside the Battle Module pulled his forward section back from the lock as the inner doors started to glow cherry red at the center. The defenders had put on suits, depressurized the compartments adjoining the lock area, and closed the bulkheads connecting through to the inner parts of the module. From his position behind the armored glass partition overlooking the area from the lock control room, he could see the first of the remote-control automatic cannon rolling through from the rear. "Hurry up with those RCC's," he shouted into his helmet microphone. "Yellow section take up covering positions. Green and Red prepare to fall back to the longitudinal bulkhead locks,".. Kath closed her eyes gratefully for a moment,' and then turned to speak to Veronica, Adam, Casey, and Barbara, who were off-screen. "They've found Steve, He's all right.".. "I wish I'd heard them back when I could've helped you." "That was all a long time ago, Aunt Gen.".. Colman sighed. "So I kept running away and getting into

all kinds of stupid trouble, and in the end did most of my growing-up in centers for problem kids that the State ran. Sometimes they tried moving me in with families in different places, but it never worked out. The last ones tried pretty hard. They adopted me legally, and that's how I got my name. Later we moved to Pennsylvania . . . my stepfather was an MHD engineer, which was probably what, got me interested . . . but there was some trouble, and I wound up in the Army." members who had been absent had returned for the occasion, and the only seats left vacant were those of the Deputy Mission Director, the Director of Liaison, the Commanding General Special Duty Force, and two others who had chosen to throw in their lot with Sterm. Behind Sirocco and taking up almost half of the available floor space, the whole of D Company was present in dress uniform to represent the Army. Bernard Fallows was back in uniform as the new Engineering chief with the crew contingent, having agreed to Admiral Slessor's request for a six-month reinstatement to help organize a caretaker crew of trainee Terrans and Chironians who would use the Mayflower II as a university of advanced astroengineering. Jean Fallows, Jay, and Marie were present with Celia, Veronica, Jerry Pernak, and Eve Verritty in the front row of the guests included by special invitation, and with them were Kath and her family alongside Otto, Chester, Leon, and others from the base in Selene and elsewhere. As if to underline and reecho Wellesley's acknowledgment of how the future would be, there was no segregation of Terrans and Chironians into groups; and there were many children froth both worlds. The Windchaser begins to slow as the driver checks his side-view mirrors. Even serial killers who keep fifteen years, but her voice had no sentimental effect on him. Bernard looked out again and shook his head. "Not until that ship up there is disarmed somehow." After a pause he turned to face her again. "So it doesn't scare you anymore, huh?" He's rapidly losing confidence. Lacking adequate self-assurance, no fugitive can maintain a credible. "The woman is a menace." "Have you ever seen a really good dog act, Ms. Tavenall?" "That's a gamble we'll have to take," Sirocco said. "Sterm will hardly order them to fire on the rest of the ship if he's in it." undulant glow across her face, brightening her eyes but failing to dispel the shadow of confusion in which. Marcia Quarrey then raised the question of a separate governor, responsible to Wellesley, but physically based on the surface inside the enclave to administer its affairs. Perhaps the division of authority between the members of the Directorate sitting twenty thousand miles aw4 in the ship had contributed to the difficulties experienced since planetfall, she suggested, and delegating it to one person who had the advantages of being on the spot would remedy a lot of defects. Opinions were in favor, and Quarrey nominated Deputy Director Sterm for the new office. Sterm, however, declined on the grounds that a large part of the job would involve policymaking connected with Terran-Chironian relationships, and since a Liaison Director existed to whom that responsibility was already entrusted, the sensible way to avoid possible conflicts was to unify the two functions, lie therefore nominated Howard Kalens; Quarrey seconded, and the vote was carried by a wide margin. THE WORLD IS FULL of broken people. Splints, casts, miracle drugs, and time can't mend fractured. with them, eating it in the name of a boy with a wickedly malformed pelvis and Tinkertoy hips, a boy who. At least the Chironians were not acting standoffish, which eased the monotony. An hour or two earlier, Colman himself had enjoyed a long conversation with a ~couple of fusion engineers from the complex, who, to his surprise, had seemed happy to answer his questions about it. They had even offered him a quick tour. He found that strange, not because of the Chironians' readiness to accommodate anybody regardless of rank or station--he was getting used to that by now--but because he had no doubt at all that they had been as aware of the demands of military discipline as he. Yet they had deliberately acted as if they knew less than they did, even though they were far too smart to believe that he'd be taken in. The Chironians did it all the time. The man at Canaveral base had practically offered Sirocco a place with a geographical survey team even though he knew that Sirocco was in no position to accept. The more Colman thought about it, the more convinced he became that the Chironians' actions couldn't all be just a coincidence. "As long as you don't make it your business to go bothering people, you'll be okay," Nanook pointed out. "So it never affects most people. And when it happens . . . it happens." stars. "Lucky you feel that way," Donella replies, "because that's not actually a choice you have." Chang laughed. "It's okay. We won't be going very high, and it'll be more walking than anything else. There won't be anything more risky than maybe a few daskrends showing up." She worked slowly, methodically, taking satisfaction from the care that she provided. In spite of the rope, stretched long by centrifugal force that thwarted its inward-coiling efforts, the reptile parted the air. Clutching the handrail, Sinsemilla shakily pulled herself up from the steps. She went inside, into the clock. the slightly vacant look of a long-term Ecstasy user? was behind the steering wheel, picking his nose. "Where did you learn that, Stan?" Paula, one of the civilian girls, asked. She had a thin but attractive face made needlessly flashy by too much makeup. Her clothes were tight and provocative. "And you're Corporal Swley, who sees things that aren't there," Kath said, moving round a step. "Your Captain Sirocco told me about your ability. I like him. He told me about the way you ruined the exercise up on the ship too. I thought it was wonderful." "Why would he kill a helpless child?" Geneva asked. miles per hour. He's not concerned about being seen, only about losing the comforting music when the. are being held. They're in the Columbia District-not far from the Communications Center. If there was some way of getting Borftein out and taking him in on our plan, it would stand a much better chance of having the effect you want on the Army." Then as an afterthought she added, "And if Wellesley could be included as well as Borftein, it might help to make up for some of the things we can't prove." She shifted her gaze around the room and eventually allowed it to settle on Colman. "But I don't know if something like that would be

possible." When he trailed off, she finished for him: "Then screw it." THE FIRST BOMB exploded in the center of Canaveral City in the early hours of the morning, causing serious damage to the maglev terminal where the spur line into the shuttle base joined the main through-route from Franklin out to the Peninsula. Subsequent investigations by explosives experts established that it had been carried in a car outward bound from Franklin. The only occupants at the time were eight Terrans returning from a late-night revel in town. He could hold the lock open against the SD's coming from the Battle Module until the rest of the Army arrived. It was time for him to decide his answer..Standing a short distance apart from the group in the opposite direction, Colman was becoming as fed up as the rest of them. It was midafternoon, and Farnhill's party was still inside with no sign yet that whatever was going on was anywhere near ending. The squad's orders were to stand easy, which helped a bit, but all the same, things were starting to drag. He heaved a sigh and for the umpteenth time paced slowly across to the corner of the building to stand gazing past it at the above-surface portion of the complex. Behind him, Driscoll and Stanislaw stopped talking about Carson's sex lie abruptly as two Chironians stopped by on their way to the main entrance..congressman as they enjoyed the spectacle in the street below.."If you wish. If you stick close to Steve and Bret and do what they tell you, you'll come through okay." Although they couldn't claim to be campaign veterans, Colman and Hanlon were among the few of the Mission's regulars who had seen combat, having served together as rookie privates with an American expeditionary unit that had fought alongside the South Africans in the Transvaal in 2059, the year before they had volunteered for the Mayflower II. The experience gave them a certain mystique-especially among the younger troops who had matured-in some cases been born and enlisted--in the course of the voyage.."Because of you, I knew there were decent people in the world, not just the garbage my mother hung." "A scandalous exhibition!" he declared as he sliced a portion of melon cultivated in the Kansas module and added it to the fruits on the plate by his aperitif on the table before him. "Nobodies and Cretins, all of them. Not one of them had any representative powers worth speaking of. Yet it's clear that a governing organization of some kind must exist, though God knows what kind of people it's made up of, judging from the state the town's in a total shambles. The only conclusion can be that they've gone to ground and won't come out, and the population as a whole is abetting them. I think John's right--if they're as good as inviting us to take over, we should do so and be done with it."..LOOKING MORE LIKE herself in the skirt and sweater that Jean had given her, Celia sat at the dining table in the Fallowses' living room, clasping a cup of strong, black coffee in both hands. She was pale and drawn, and had said little since her arrival with Colman forty minutes earlier at the rear entrance downstairs. The maglev into Franklin was not running and the Cordova Village terminal was closed down, but the tunnel system beneath the complex had provided an inconspicuous means of approach; Colman hadn't wanted to draw any undue attention by landing an

The signal had announced that the Kuan-yin had identified a suitable planet in orbit around Alpha Centauri and was commencing its experiment. The planet was named Chiron, after one of the centaurs; three other significant planets also discovered by the Kuan-yin in the system of Alpha Centauri were named Pholus, Nessus, and Eurytion..With no pie left on her plate, Leilani put down her fork.
