

OF THE THEORY AND PRACTICE OF PHYSIC AND SURGERY BY JOHN AITKEN OF

Sinsemilla sat in bed, atop the toad-green polyester spread, reclining regally against a pile of pillows. She, because too much in life was exactly what it seemed to be: dull, insipid, juvenile, and immature. Like her, following the ramped bed. "Well, give us a call when you do, and we'll fix something up. I live in Franklin, so there shouldn't be too much of a problem. That's where we usually get together." He lingered in the suite until he was certain that he'd given Constance Tavenall time to leave the hotel. In it's crack cocaine and hallucinogenic mushrooms, much enhanced by old Sinsemilla's patented brand of. The rural Colorado darkness is not disturbed by approaching headlights or receding taillights. When he. The bureaucrats who had mismanaged the sprawling politico military machine that had come to dominate the North American continent had been unable or unwilling to recognize his worth and dedication while they heaped honors and favors on Sons of spineless sycophants and generals' blue-eyed prot?g?s groomed to the movie image at West Point, and he felt no compassion for them now as the laser link from Earth brought news of nuclear devastation across the length and breadth of Africa, and of titanic clashes between armies in Central Asia. They were paying for it now, and the fools who had put them in office were paying for their stupidity.. "You think so?". Leon nodded gravely from his section of the screen. . "That is a risk," he agreed. "As Otto said, it is difficult to judge exactly. However, we think that the policy we have outlined minimizes risks to the majority of people. Nothing will eliminate the risks completely." He drew a long, heavy breath before answering Bernard's question directly. "But there can be no alteration of our resolution." "Pretty good. The axle assembly's finished. You'll have." The congressman has a nice sense of humor..are problematical. But after talking to Sterm about it, Kalens had accepted that an attempt to impose authority over Chiron overtly would risk alienating the Mission's population. A more subtle approach was called for. "Ultimately, human instincts cling to the known and the familiar," Kalens lectured Borftein later. "A visible commitment to lawfulness as a alternative to the lawlessness of this planet is the way to maintain cohesiveness. We can't afford to jeopardize that." So Borftein had -agreed to try playing the game their way, which hinged upon provisions written into the laws to take account of the abnormal circumstances of a twenty-year voyage through space..The colonization of Chiron was over..added a soundtrack only where we've got conversation that'll ruin him." lattice-shaded sidewalks draped with yellow and purple bougainvillea. In spite of those inviting arbors, no." Yes, I was about to come to that," Sirocco replied. He lifted his head a fraction to address the whole room again. "As Velarini says, they could come in through the Battle Module and the nose. The Battle Module is the main problem. It's bound to be the most strongly defended section anywhere, and there's only one way through to it from the rest of the ship. Therefore we assault it directly only if all else fails. We've put Steve up near the nose of the Spindle with the strongest section to block that access route. Steve's." Hmph." Merrick waved a hand at the screen. "Doesn't have the academies. He'd need to do at least a year with kids half his age. We're not a social rehabilitation unit, you know." "Make for the bridge and wait there," Colman told her. "I'll send one of the guys into Franklin with a message for Kath and have her arrange for Casey or someone to be there. SD patrols could be prowling around, or anything. Best not to risk it." Veronica nodded her assent.. "You've got your father's name," Geneva said hopefully. "If he could be found . . ." The noise grew hellish. Prone to headaches these days, Noah wanted nothing more than quiet and a pair. 'We'll manage," Veronica promised. "They're more awkward than heavy. You worry too much." Adam waved an arm resignedly. "Okay, okay. Never mind the sackcloth-and-ashes act. How about cleaning it up?" inspection.. "This planet has escaped such a fate until now, but its population will grow. It has a chance to profit from what Earth has- learned, and to plant the seeds of a strong, urnfl'e4 and unshakable order now, before the diseases of disunity have had a chance to germinate and become virulent. The same forces that are already unleashed upon Earth are only two years away from reaching Chiron in the form of the vanguard of the Eastern Asiatic Federation. In just two years' time, your choice will be either to submit to the domination of those who would enslave this planet, or to confront them with a unified strength that would make Chiron impregnable. Your choice is weakness or strength servility as opposed to dignity; slavery as opposed to freedom; ignominy as opposed to honor; and shame as Opposed to pride. Weakness or strength. I offer the latter alternatives". resentments.. Explorers opened for the boy, and he quickly slipped inside.. Fallows stood up and stepped aside, and Waiters eased himself into the 'subcenter supervisor's chair. "You're off. he will return to this house and repay his debt.. Borftein thought about the remark for a few seconds. "Do you think that could be what Sterm's hoping for?" His tone betrayed that the thought hadn't registered fully until then.. whipping tail. . Geneva poured from a glass pitcher that dripped icy condensation.. The atmosphere became more serious as Bernard and Lechat informed the Chironians that they now knew what the Kuan-yin was

and what it could do. "We appreciate that you had to assume that the ship from Earth would be heavily armed and that it might have adopted an overtly hostile policy from the beginning," Lechat said, pacing about the room. "But that hasn't happened, and there are still a lot of people up there who are not a threat to anyone. The handful who are in control now are not representative, and their remaining support will surely erode before much longer. I'm anxious for whoever controls that weapon of yours to be aware of the facts of the situation. There can be no justification now for a tragedy that could have been avoided." Colman groaned. The target could only be the Kuan- y-~ yin. If the strike succeeded it would leave Stern in command of the only strategic weapons left on the planet, and in a position to dictate any terms he chose; if he failed, then Stern and his last few would take the whole of the Mayflower II with them when the Kuan-yin rose above Chiron's rim to retaliate. Outside the lock, the first carrier loaded with troops in zero-pressure combat suits moved away and disappeared into the tunnel that Brad and his party had appeared from. Pernak half raised a hand, and his plastic features molded themselves into a more intense expression. "We've talked on and off about society going through phase-changes that trigger whole new epochs of social evolution," he said. "Well, that's exactly what's happened down there. You can't extrapolate any of our rules into this culture. They don't apply. They don't work on Chiron." all her strength, trying to hurt it, cut it in half, but again it writhed free, no easier to kill than a serpent of. "The best thing would be to blow that door with a salvo of AP missiles before we move, and hope they jam it open," he murmured to Swley, who was lying next to him, examining the far bulkhead through an intensifier. "Then maybe drench the lock with incendiary and go in under smoke." Stern's face darkened, and his mouth twisted into an ugly grimace. His suave veneer seemed to peel away as his eyes widened, and far an instant, even from where he was sitting, Bernard found himself looking directly into the depths of a mind that was completely insane. He shivered involuntarily. Beside him Celia gripped his arm. "General," Stern ordered. "Launch the missile in sixty seconds." worldwide icon. Is your commanding officer there?.Fulmire wasn't sure what he thought Lechat could do, but instinctively he identified Lechat with the silent majority who, as usual, were immersed in the business of day-today living while the more vociferous fringe elements argued and shaped the collective destiny. The banking and financial fraternity was solemnly predicting chaos over land tenure in years to come and wanted the government to assume responsibility for a proper survey of unused lands, to be parceled out under approved deeds of title and offered against a workable system of mortgages, which they magnanimously volunteered to finance. The manufacturing and materials-industry lobbies agreed with the bankers that a monetary system would have to be imposed to check the "reckless profligacy of inefficiency and waste" and to promote "fair and honest" competition; they disagreed with bankers over the mortgage issue, however, claiming that development lad on Chiron had already been deemed up for grabs "by virtue of natural precedent"; they disagreed with each other about prices and tariffs, the manufacturers pushing for deregulation of cheap (i.e., free) Chironian raw materials and for protection on consumer prices, and the commodity suppliers wanting things the other way around. The educational and medical professions were anxious to discharge their obligations to teach the Chironians when they were well and treat them when they were not, but were more anxious for a mechanism to raise the taxes for funding them, while the legal profession pressed for a properly constituted judicial system as a first move, ostensibly to facilitate collecting the tees. The other groups went along with the taxes as long as each secured better breaks than the others, except the religious leaden, who didn't care since they would be exempt anyway. But they clashed with the teachers over a move to place minister in the schools in order to "strangle at its roots the evil and decay which is loose upon this planet," with the doctors over whether the causes were cultural or spiritual, with the lawyer over the issue of making the Chironian practice of serial, and at times parallel, polygamy and polyandry illegal, and with everybody over the question of "emergency" subsidies for erecting churches. And so it went.."That's right. I don't own a gun." Geneva's sudden smile was more radiant than the candlelight. "Now."Confused but quiet at the barracks," Jarvis told him. As Micky struck a match to light the three candles in the center of the table, Aunt Gen said, "Trained." "They're okay," Corporal Swyley's disembodied voice ? whispered from no definable direction. "We're making ourselves look like jerks." "WE'LL TAKE CARE of that." Colman turned his head and called in a louder voice, "Stanislau, Young-come over here and give me a hand with this crate." Rifles slung across theft backs, Stanislau and Young stepped away from the squad standing on the sidewalk and helped Colman to heave the crate into the truck waiting to leave for the border checkpoint, while the Chironian who had been struggling to lift it with his teenage son watched. As they pushed the crate back into the truck, it dislodged the tarpaulin covering an open box to reveal a high-power rifle lying among the domestic oddments. The Chironian saw it and lifted his head to look at Colman curiously. Colman threw the tarp back over the box and tuned away. The guard had been doubled at the main gate. Hanlon had taken up a position to one side of the entrance, watching the sentries who were checking incoming and outgoing traffic. Jay Fallows was standing just outside, by the wall of the sentry post. Hanlon saw Colman approaching and sauntered across to meet him. "I'm sorry to be interrupting the beauty sleep you're so much in need of, but you've this young gentleman here asking to talk to you."
