The food of dragons is said to be light, or fire; they kill in rage, to defend their young, or for sport, but never eat their kill. Since time immemorial, until the reign of Heru, they had used only the outmost isles of the West Reach-which may have been the easternmost borders of their own realm-for meeting and breeding, and had seldom even been seen by most of the islanders. Naturally irritable and arrogant, the dragons may have felt threatened by the increasing population and prosperity of the Inner Lands, which brought constant boat traffic even out in the West Reach. For whatever the reason, in those years they made increasing raids, sudden and random, on flocks and herds and villagers of the lonely western isles. "Ged," he said. He bowed his head. After a while he looked up and asked, "Will you take my name from me?" After the first outcries and embraces, the servants and his mother sat him right down to breakfast. So it was with warm food in his belly and a certain chill courage in his heart that he faced his father, who had been out before breakfast seeing off a string of timber-carts to the Great Port. "Oh, sir," she said, and he knew he had done wrong. "To hell with the biologist. Does this mean that a man to whom you've given brit can't do. "I'm all right," she said.
