

ENCYCLOGPAEDIA METROPOLITANA OR SYSTEM OF UNIVERSAL KNOWLEGE

He decided to go up to Rockefeller's to see if any of his platoon were still around. On the way his pace slowed abruptly. Some time before, he had stumbled into a very personal and satisfying way of feeling that he was getting even with the system in a way that he didn't fully understand. Nobody else knew about it--not even Hanlon, but that didn't make any difference. He hadn't seen her for a while now, and he was in just the right mood. "I thought it would be at least one ninety," Micky replied. "They really do." "I better check those orders." The corporal turned to his screen while the other two SD's eyed the relief detail. After a few seconds the corporal raised his eyebrows. "You're right. Oh, well, I guess it's okay." The other two SD's relaxed a fraction. The corporal called up the duty 1-g4nd signed his team off. "They must be thinning things right down everywhere," he said as he watched Sirocco go through the routine of logging on. "Isn't that a Hawaiian name?" Micky asked. Compliment, speaking with sincerity and emotion that cannot be misconstrued as anything else: "You could be a cover for low self esteem. From childhood at least through adolescence, Micky herself had." Vice Admiral Crayford calling from Vandenberg now, sir," a voice called out. Toilet tissue, cleaning fluids, floor wax. The Angel Stanislau descended from the radiance and assumed Earthly form beside the cot. "Hanlon's got some. Pernak knotted his brow, pursed his lips, then stretched them back to reveal his teeth. "Then those people should look after their own future instead of waiting for someone else to work it out for them. That's the old way. They have to learn to think the Chironian way." After a second of hesitation he added, "That's what Eve and I are going to do. Exploits vicariously, through the pages of books. Young heroes of adventure stories, from Treasure Island. Howard Kalens simmered as he listened. Quatrety had changed her tune when the commercial lobby, whose interests she represented, panicked at the prospect of having to compete in the insane Chironian economic system. The signals coming down the line had told her that she'd better get something done about it and soon, if she wanted to see herself reinstated after the elections, which in turn meant that Kalens had better be seen to back her ease if he expected her support in his bid for the Directorship. After a hesitation, Micky put a consoling hand on her shoulder, but Mrs. Maddoc didn't respond to the. She sat without speaking, as she had throughout the flight down, and held a handkerchief to her face while she waited for the escort to disembark--a not unusual reaction from a recently widowed woman returning to her home. When she emerged, the escort formed around her and began moving with her toward the front entrance with the guard bringing up the rear carrying a suitcase in each hand. Besides a large topcoat, Celia was wearing dark glasses and a headscarf, and beneath the headscarf a wig that matched the color of her own hair. "I workout." "I don't know. It depends on the situation. Maybe. That's something else we'll have to leave to Sirocco to decide." and well. Direct him with subtle gestures toward what he assumes will be a rear exit. Nanook rubbed his chin and looked dubious. "That situation sounds very farfetched," he said after a few seconds. "I can't see how anyone else could walk in with the same experience. But if it did happen, and it was true... then I suppose Kath would have to agree with him. She'd be indebted by that amount. And -that would decide it for everyone else." Strangely, it was this very grasp that he was beginning to acquire of the Chironians' dedication to life that troubled Pernak. It troubled him because the more he discovered of their history and their ways, the more he came to understand how tenaciously and ferociously they would defend their freedom to express that dedication. They defended it individually, and he was unable to imagine that they would not defend it with just as much determination collectively. They had known for well over twenty years that the Mayflower II was coming, and beneath their casual geniality they were anything but a passive, submissive race who would trust their future to chance and the better nature of others. They were realists, and Pernak was convinced that they would have prepared themselves to meet the worst that the situation might entail. Although nobody had ever mentioned weapons to him, from what he was beginning to see of Chironian sciences, their means of meeting the worst could well be very potent indeed. "Fine." Bernard nodded but caught Jay's eye for a fraction of a second longer than he needed to, and with a trace more seriousness than his tone warranted. Dip. The process had been the same all through history, and it was happening again. The latest four-year-old news from Earth described the rapid escalation of the latest war against the New Israel of the South. Only this time the EAF was getting involved. The Western strategists had interpreted it as an EAF policy to provoke an all-out war all across Africa so they could move in afterward and dose up on Europe from the south. Apparently the idea was to try and take over the whole landmass of Asia, Africa, and Europe. Why did they want to take over the whole of Asia, Africa, and Europe? Colman didn't know. He was pretty sure that most of the people killing each other back there didn't want the territory and didn't care all that much who had it. The Howard Kalenses were the ones who wanted it, just as they wanted everything else. Perhaps if they'd learn how to get along with people without being scared to turn their backs all the time and how to make love with their own wives in bed, they wouldn't need geographical conquests. And yet they could tell everybody it made them better than the people were, and the people believed it. It. They radiate the telltale intensity: in their stance, in their demeanor. In their eyes. Happened. Howard learned about it, Celia closed her eyes as if she were trying to shut out a memory that she was seeing again. "He lost control of himself completely there was a fight, and." She left the rest unsaid. After a few seconds she opened her eyes and stared blankly ahead again. "Maybe I wanted him to find out--provoked him to it. You see, after all that time, maybe I knew deep down that I couldn't just walk away and leave him like that either. What other way was there?" Her eyes brimmed with tears suddenly, and she brought her handkerchief to her face. Smuggling rocketed to epidemic proportions, and confiscation soon filled a warehouse with goods that officials dared not admit on to the market and didn't know what to do with after the Chironians declined a plea from a bemused excise official to take it all back. The Chironians outside Phoenix continued to satisfy every order or request for anything readily; Terran builders who had

commenced work on a new residential complex were found. Kath's eyebrows lifted approvingly. "Smart as well, eh?" Geneva set a platter of sliced chicken on the table. "Didn't you notice? we have three place settings this. pain by sharing it.. CHAPTER FOURTEEN. its nickel-iron core was somewhat smaller than Earth's, which gave it a comparable gravitational force at the surface. It turned in a thirty-one-hour day about an axis more tilted with respect to its orbital plane than Earth's, which in conjunction with its more elliptical orbit--a consequence of perturbations introduced by the nearness of Beta Centauri--produced greater climatic extremes across its latitudes, and highly variable seasons. Accompanied by two small, pockmarked moons, Romulus and Remus, Chiron completed one orbit of Alpha Centauri every 419.66 days.. moment and in the firm grip of the real.. wheelchair . . . "How far have they penetrated?" Colman asked. "Oh. Yeah. My dog," the boy says, feeling stupid and dismally incompetent at this. Leon nodded gravely from his section of the screen. . "That is a risk," he agreed. "As Otto said, it is difficult to judge exactly. However, we think that the policy we have outlined minimizes risks to the majority of people. Nothing will eliminate the risks completely." He drew a long, heavy breath before answering Bernard's question directly. "But there can be no alteration of our resolution." "No. It'd be your solution, not mine." "Then that's the answer." lay nodded, straightened his arms into his pockets with his shoulders bunched high near his ears, held the posture for a few seconds, and then relaxed abruptly with a know joy, to have faith that our lives have meaning . . . and to find The Way.. "How about putting some people outside in suits to blow the tail section of the Battle Module?" Carson suggested from the second row back.. turned upon herself.. Colman was nonplussed. He shook his head as if to clear ? it. "What--What exactly do you do around here?" Kath's smile became impish, as if she were amused by his confusion. "Oh, you'd be surprised." whole-of-limb, hard-bodied, martial arts wunderkind. The Klonk way wasn't the way of the Ninja. The. precise in their details and of such explicit depth that she turned away from them in revulsion or in anger,. inch or two from the ground and hidden by glossy cascades of hair that appeared to be white in the. and being rude to nuns.. and insanity. Regardless of who her father might have been, Klonk or not Klonk, she was undeniably her. With a sigh and a laugh, Micky said, "Why don't we save time and you just tell me what I believe?".. spell, it resists his muscle and his mind.. Big sky, black and wide. The brassy glare from sodium arc lamps under inverted-wok shades. Stars. Because of the problem of both words having the same initial letter, the dum came to be designated by U and the dee by E. The dum carried a one-third charge, and the dee carried none. Two dums and a dee made the up quark, its three possible color charges being represented by the three possible pennutations, UUE, UEU, and EUU. Similarly two dees and a dum yielded the down antiquark in its three possible colon as UEE, EUE, and EEU; in the same way two "antidums" and an "antidee" gave the up antiquark; and two antidees and an antidum, the down quark. Three dums together carried unit charge but no color and resulted in the positron, designated UUU, and three antidums, each one-third "anticharge," i.e., negative, made up the normal electron, UUU. Three dees together carried no charge and formed the electron-type neutrino, and three antidees in partnership completed the ground-state generation as the electron-type antineutrino. It followed that "antitweedles" didn't necessarily give an antiparticle, and tweedles didn't always make a particle. Tweedles predominated over antitweedles, however, in the constitution of normal matter; the proton, for example, comprising two up quarks and a down quark, was represented by a trio of "tweeplets" such as UUE; UEU; UEU, depending on the color charges assigned to the three constituent quarks.. tightened so much that a swallow of lemony vodka seemed to thicken as she drank it. Crisp in her mouth,. for her, the best thing she might ever have going for her, because in truth she'd probably never develop. at the pump islands is a far away grumble. Muffled country music, oscillating between faint and fainter, "Don't I?" the robot replied.. "I didn't say that. But they're funny people . . . cagey. They're not exactly giving straight answers about everything.".. anger, Micky realized that only silence and retreat made sense. Rocking knee to knee in the prickly. Closing her eyes again, turning her face to the deadly blazing heavens, Micky said, "Well, I don't intend. lady here must get a mite confused from time to time, bein' called a male name and a color she isn't.".. The Chironians and Colman disappeared up the steel railed stairway, talking about differential transducers and inductive compensators, and Shirley and Ci went on their way after Wellington reminded them that they had less than fifteen minutes to board the shuttle for Franklin. Driscoll and Sirocco remained with Wellington in the corridor.. please don't forget the large bills under the drawer.' ". "How long before the Kuan-yin is eclipsed?" Stern asked, looking across at Stormbel, who was supervising the preparations to detach. He had intended taking advantage of the Mayflower II's cover until after the strike was launched, but the unexpected loss of the rest of the ship, coupled with Lesley's treacherous change of sides in the hexagon and the arrival of assault troops outside the Battle Module itself had forced him to revise his priorities. There would be lime point in destroying the Kuan-yin if he lost the Battle Module in the process.. Dark with clotted blood, the holes no longer oozed.. "No wonder you're suicidal.".. A groundcar passed by and several Chironians waved at them from the windows. "It can't be quite like that," Jay said. "That woman I was talking about told Jerry Pernak that a research job at the university would pay pretty well. That must have meant something.".. "Then invoke the security provisions," Borftein said, shifting in his chair from weariness with the whole business. "It's a security matter, isn't it? The Chironians have left it to us by default, and it's their security at stake as well as ours. The Pagoda's only two years away. Somebody's got to take the helm in all this.".. "Not fear anymore. But. . . most days I still don't feel clean.".. me on the cheek, he'd probably puke up his guts.".. Getting inside would therefore require some men being moved right up to at least one of the security points without arousing suspicion--armed men at that, since they would be facing armed guards and could hardly be sent in defenseless. Malloy had again discouraged ideas of attempting to impersonate SD's. The only alternative came from Armley--a bluff, backed up with information manufactured by Stanislaw, to the effect that regular troops were being posted to guard duties inside the complex as well as SD's, and providing reliefs from D Company. Obviously the plan had its risks, but making three separate attempts at

the three entrances simultaneously would improve the chances, and it was a way of getting the right people near enough. In the end, Sirocco agreed. Once they got that far it would be a case of playing it by ear from there on, and the biggest danger would be that of SD reinforcements arriving from the guardroom behind the main doors of the Government Center complex, which was just a few hundred feet away on the same level, before the situation was under control. That was the part that Bernard Fallows had come along to handle..Micky shook her head. "They wouldn't leave you in the care of your mother's boyfriend." "I don't like the idea of a limited military presence down there," Borftein said. "We're trusting the Chironians too much. I still say they could have strength that they're not showing yet. We could be exposing those civilians to all kinds of risks--terrorism, provocations. What if they get hit by surprise? I've seen it all before." "I guess so. So what was the rest of it?".conversation in detail.".identify a reason for this almost sweet anticipation. Defensively, she tempered it with wariness..Not every delicacy is prepared by the two short-order cooks out front. The kitchen staff is large and."Ooh... I wouldn't want to do that," Amy said. ..Pernak glanced at Eve for a moment. She slipped her hand through his arm, squeezed it reassuringly, and smiled. They both looked back at Lechat. "What everybody else will do when they've figured out how it is," Pernak said. He grinned, almost apologetically. "That's why we won't be able to help much, Paul. You see, we're leaving." .She continued on her rounds..Tweaked by puzzlement, her classic features had a pixie charm. "Excuse me?" .Jean brought a hand up to her brow and shook her head as if despairing at having to voice the obvious. 'When I first knew you, you wouldn't have sat down here playing with trains while all this was going on outside," she replied at last. "Don't you understand? What's happening out there, right now, is important. It affects you, me, Jay, Marie, and how we're all going to live - probably for the rest of our lives. Twenty years ago you-both of us-we'd have done something. Why are we sitting here shut up in this place and letting other people-vain, arrogant, greedy, unscrupulous people-decide our lives? Why aren't we doing something? It's that. I can't stand it." .Sirocco looked worried. "Look, there is a force on its way forward to occupy the nose. We want to avoid any senseless bloodshed. Those locks must be kept open. I have General Borftein, who wishes to speak directly to whoever is in charge there." .The silk-textured light, as red as Sinsemilla's favorite party blouse, barely brightened the nest of shadows.Bernard was nodding but with evident reservations. "True," he agreed. "But it's up in the ship, not down here. And it must be strongly protected. It's a vicious circle- you'd have to get in there to turn the Army around, but they're going to be outside and stopping your getting in until you've done it. 110w can you break out of it?" .you, ma'am. My mother always said it's best to speak your heart, which is the only thing I did." .Lechat shook his head. "It wasn't necessary. In a few more days Ramisson would have been elected, almost certainly. Then everything would have worked itself out smoothly and tidily. This action complicates everything again. Wellesley is probably declaring an emergency right now, in which case the election will automatically be suspended. It puts everything back weeks, maybe months." ."What does that mean?" Driscoll asked, looking at the Chironian who had spoken..Colman had begun to see parts of such a pattern, although not with the simple completeness that Swyley had described. What Swyley was saying might be true as far as it went, but Colman was certain that in Kath's case Swyley had, for once, missed something, something more personal than just political motivation..The small group of Chironians watching from a short distance away and the larger crowd gathered behind them in the rear of the antechamber applauded enthusiastically and beamed their approval. They weren't supposed to do that. It didn't preserve the fight atmosphere.."If I were you, I wouldn't invite him to dinner. By the way, he doesn't know I'm here. He wouldn't allow.Colman grinned faintly and gestured across the room. "The same one that brought you Veronica and Celia." .Jay was beginning to see the connection. "Measures up with respect to what?" he asked. "What's the standard?" .hand-brake release worked smoothly, the gear shift didn't stick much, and the clatter-creak of the aged.folks, but it's a warm bath for others. You'll find work, sweetie." .IN THE ARMCHAIR, Noah Farrel talked past the point where he bothered to listen to himself.on the same guiding principle: Do the opposite of what Sinsemilla would do, and there is a better chance."But doesn't this kind of thing upset the kids when it happens?" Hanlon had asked uneasily..Toward Sterm he felt neither animosity nor affection, which suited him because he functioned more efficiently in relationships that were uncomplicated by personal or emotional considerations. He had no illusions that either of them was motivated by anything but expediency. Stormbel derived some satisfaction and a certain sense of stature from the knowledge that they complemented and had use for each other, with no conflict of basic interests, like the interlocking but independent parts of a well-balanced machine. Sterm wanted the planet but needed a strong-arm man to take it, while Stormbel relished the strong-arm role but had no ambitions of ownership or taste for any of the complexities that came with it..so resourceful and cunning that they are likely to track down their quarry no matter how successful the.Although trembling with the pressure of his misplaced rage, he doesn't vent it, but leaves Curtis.expectancy..of port on a long holiday.."What I really need is a beer." ."Close up ranks," Sirocco said, and the guard detail shuffled forward to crush up close behind Sirocco, Colman, and Hanlon to make room for the officers and the diplomats to move up behind. Sirocco looked at the Dispatching Officer and nodded. "Open outer hatch." The Dispatching Officer keyed a command into a panel beside him, and the outer door of the shuttle swung slowly aside..Lechat cut him off with a wave of his hand. "Don't make any noise," he said to the whole group, who were crowding around in astonishment. "Everything is okay:' He signaled Borftein over with another wave of his hand. Over by the door the soldiers had dragged in two unconscious guards, and two of them were already putting on the SD uniforms while the steward handed them two automatics, which he produced from inside the napkin he was carrying. "There isn't a lot of time," Lechat advised Wellesley and Borftein. "We have-to get you downstairs and into the Communications Center. Now listen, and I'll give you a quick rundown on the situation. ..Francisco, Monterey, Telluride, Taos, Las Vegas, Lake Tahoe, Tucson, and Coeur d'Alene before Dr..style and sexy allure of a robot hunter who had been constructed in a laboratory in the future and

sent."Most of the day, yeah. Mrs. D is teaching me all about sex."withered beyond recovery. The raging tornadoes that routinely sought vulnerable trailer parks across the.between jamb and door. He hears her sniffing. Her exceptional sense of smell brings to her more
