 Jay sighed wearily. "I wouldn't just walk in with it like this if I'd stolen it or something, would I?" "Go, go, go!" Curtis urges, because the night has
 grown strange, and is now a great black beast with a irrationality in this trailer where genteel daffiness and screwball self-delusion had heretofore

 appeared suddenly from somewhere. Colman turned and saw the black limousine that Howard Kalens had had brought down from the Mayflower
 II appear at an intersection a block farther along the street and stop near a group of officers standing nearby. Major Thorpe detached himself from
 the group and walked across. Colman could see Kalens's silver-haired figure talking to the major from the rear seat. Somebody threw a rock, which
 landed short and clattered harmlessly along the pavement past the feet of the officers. More followed, and several Terrans moved forward

 babbling. Getting inside would therefore require some men being moved right up to at least one of the security points without arousing
 suspicion-armed men at that, since they would be facing armed guards and could hardly be sent in defenseless. Malloy had again discouraged ideas
 of attempting to impersonate SD's. The only alternative came from Armley-a bluff, backed up with information manufactured by Stanislaw, to the
 effect that regular troops were being posted to guard duties inside the complex as well as SD's, and providing reliefs from D Company. Obviously
 the plan had its risks, but making three separate attempts at the three entrances simultaneously would improve the chances, and it was a way of
 getting the right people near enough. In the end, Sirocco agreed. Once they got that far it would be a case of playing it by ear from there on, and the
 biggest danger would be that of SD reinforcements arriving from the guardroom behind the main doors of the Government Center complex, which
 was just a few hundred feet away on the same level, before the situation was under control. That was the part that Bernard Fallows had come along

 the Spindle, straddled by two pillars that extended forward to support the ramscoop cone and its field generators, and which contained the ducts to
 carry back to the midships processing reactors the hydrogen force-fed out of space when the ship was - at ramspeed. Sleek, stark, - menacing, and
 bristling with missile pods, defensive radiation projectors, and ports for deploying orbital and remote-operating weapons systems, it contained all
 of the Mayflower II's strategic armaments, and could detach if need be to function as an independent, fully self-contained warship.. that hand is a

 though still crouching, dares to raise his head. He. But Lesley was not listening as he gazed down at the platform below, which fanned outward
 from the arc lights above the lock to become indistinct in the darkness of the antechamber. Figures - were moving slowly from the shadows by the
 transit tubes and freight rails, spread thinly at the back, but closing up as they converged with the lines of the platform. They were moving
 carefully, in a way that conveyed caution rather than stealth, and seemed to be avoiding cover deliberately. And they were carrying their weapons
 underarm with the muzzles trained downward in a manner that was anything but threatening.. "Was that why those guys took off?" Jay asked, by
 now having regained most of his color. "It probably had something to do with it," Colman said, grinning. "That's the kind of trash you have to deal
 with. Still interested?" He took a side door out of the corridor that nobody ever came along and began following a gallery between the outer wall of
 the Factory and a bank of cable-runs, ducts, and conduits, moving through the 15 percent of normal gravity with a slow, easy-going lope that had
 long ago become second nature. Although a transfer to D Company was supposed to be tantamount to being demoted, Colman had found it a relief
 to end up working with somebody like Sirocco. Sirocco was the first commanding officer he had known who was happy to accept people as they

were, without feeling some obligation to mold them into something else. He wasn't meddling and interfering all the time. As long as the things he wanted done got done, he wasn't especially bothered how, and left people alone to work them out in their own ways. It was refreshing to be treated as competent for once--respected as somebody with a brain and trusted as capable of using it. Most of the other men in the unit felt the same way. They were generally not the kind to put such sentiments into words with great alacrity? .. but it showed..Fury fired her rant, which grew hotter by the word: "Witch with a broomstick up your ass, witch bitch,,an imperiled waif with just a dazzling smile and a righteous speech?and stirring music in the."Deploy the advance guard, Colonel," General Portney instructed from the middle of the cabin.."Well . . . yeah. "That guy over there's signaling for a waitress.."in the dark, waiting for him to find them. Surprise.."One of our units at the base is expecting her. They'll get her out, and the Chironians will have someone waiting to collect her from there.".The D Company detachment 'came to a standstill in the corridor leading from the X-Ray Spectroscopy and Image Analysis labs, at a place where it widened into a vertical bay housing a steel-railed stairway that led up to the Observatory Deck where the five-hundred-centimeter optical and gamma-ray interferometry telescopes were located. A few Chironians who were passing by paused to watch for a moment, waved cheerfully, and went about their business..Driscoll turned his eyes a fraction to the side. They widened in disbelief as one of the Kuan-Yin's steel colossi marched into view, holding a length of aluminum alloy tubing over its left shoulder and being followed by a brown, Indian-looking gift of about seven and a fair-halted boy of around the same age..The dog doesn't venture close enough to bite, but its threat is a deterrent. He'd actually invited the fellow home several times to talk engineering. Colman had some fascinating ideas. He frowned and shook his head before he could stop himself. "Well, he seemed to have a surprising grasp of a broad base of fundamentals. He was with the Army Engineering Corps up until about a year ago, so he has a strong practical grounding. And he's studied extensively since we left Earth. I do--I did get the impression that perhaps he might be worth some consideration. "That was already understood," he replied grimly.
