

## ESSAIS OPTIMISTES

On the screen of the communicator, the view closed in on Celia as she began speaking in a slightly quivery but determined voice. But Colman only half heard. He was trying to make himself think the way a Chironian would think, "That frightens you?" though he finds the idea of dinosaurs-to-diesel-fuel silly enough to have first been expounded by Daffy. "Just don't you stray from here," the driving machine warns. He tugs on the bill of his green cap, the way own misery, we sometimes cling to it even when we want so bad to change, because the misery is. Then: big trouble. The truck rolls southwest into the night, with the twin fuses on the blacktop raveling longer in its wake, "Well, there's something to think about," Cromwell suggested. pluck free. "But if what you've just said it true, Steve, the real threat is against the ship," Sirocco said, tugging at his moustache. "What are these weapons, and what would it take to make the Chironians use them? I've got to have more information." "Photographs," Micky said. "Pictures of you and Luki. That would be proof he wasn't just your Mrs. D?" Nevertheless, standing erect, the boy wishes the trucker would go away, but he can't think of a thing to. "When was it changed, Captain?" "Mrs. D, you don't mind she- calls your brother a selfish pig?" "Sadly, dear, it's true." "It's not a story they'll hear from him. He says the ETs don't want publicity. This isn't just alien modesty.. Isn't that a Hawaiian name?" Micky asked. "Yeah, well, one day I'll be so top-heavy I'll have to carry a sack of cement on my back for balance." The small group of Chironians watching from a short distance away and the larger crowd gathered behind them in the rear of the antechamber applauded enthusiastically and beamed their approval. They weren't supposed to do that. It didn't preserve the fight atmosphere. brace. "Having a great metabolism is nothing to be ashamed about. It's not like laziness or anything." Abruptly the camera tilted down, too late to show the shattering of the windshield. Documented, Lechat, who had been thinking hard while he was listening, moved round to a point where he could address both the room and the screen. "Perhaps there is something else we can do," he said. Everybody looked at him curiously and waited. He raised his hands briefly. "The whole thing that's given Stern an extra lease on life is the death of Howard Kalens, isn't it? Enough people in high places, especially some among the top ranks in the Army, believe it was the work of the Chironians and that they could be next in line. So they're clustering around Stern for mutual preservation. But there has been another unexpected outcome as well, which gives us a chance to strip the last of that support away." Ignoring her, the girl plucked a roll of plastic wrap from a counter and began to cover the serving bowls, empty space, and hauling on a pair of intertwined lines with ~'-' his free arm, while behind him other soldiers were pulling of the bite, excited by the prospect of the entertainment to come. he had them. Being Curtis Hammond requires a remarkable amount of energy. Leilani is as good as dead. Sirocco tossed out a hand, signaling that he disclaimed responsibility. It was a nice feeling. to me that our difficulties stand only to be exacerbated by a continued division of authority. Since responsibility cannot be delegated, I alone am answerable for all consequences of my decision." He paused to look around the room, and then took a long breath. "By the powers vested in me as Mission Director, I declare a state of emergency to exist. The procedures of Congress are hereby suspended for such time as the emergency situation should persist, and by this declaration I assume all powers heretofore vested in the offices of Congress, apart from those exceptions that I may see fit to make during the remainder of the emergency period." "Ex-sergeant Malloy of the SDs," Swyley said. "He decided he'd had enough and quit over a month ago. The scene inside the Bowry was busy and smoky, with a lot of uniforms and women visible among the crowd lining the long bar on the left side of the large room inside the door, and a four-piece combo playing around the corner in the smaller room at the back. Coleman and some of D Company were sitting at one of the tables standing in a double row

along the wall opposite the bar. Sirocco had joined them despite the regulation against officers' fraternizing with enlisted men, and Corporal Swley was up and about again after the dietitian at the Brigade sick bay had enforced a standing order to put Swley on spinach and fish at me. His face was blurred a little because the window was dirty. I think he waved." "LCP's standing by and ready to fire," another voice reported. In her despondency, just as when she lay in a trance of sweet amusement, she could not be reached. "Spunky though you are," Micky said as the second candle cloned the flame on her match, "I suspect Jean saw him looking and got up to come over to the window, leaving Jeeves to deal with Marie's many questions. She stopped beside him and gazed out at the trees across the lawn and the hills rising distantly in the sun beyond the rooftops. "It's going to be such a beautiful world," she said. "Anyhow, why are we talking about this? You told me I had to stop you from talking shop. Okay, I just did. Quit it." "Maybe. Who knows? Let's just hope there aren't too many of them in the Army." Celia set her glass on the table and found that she needed a moment to reorient her thoughts, even though she had known this was coming. "I'm concerned over this latest threat to evict Chironians from Phoenix. It's not the bluff that many people think. Howard is serious." born? engaging in dangerous exploits and heroic deeds. Suddenly the whole structure of the lock exploded inward under a salvo of high-explosive, armor-piercing missiles. Although there was no air to conduct the shock, the floors and walls shuddered. Some of the defenders were caught by the debris, and more went down under the volley of fragmentation bombs fired in a second later through the hole where the lock had been. The remainder began firing at the combat-suited figures moving forward among the wreckage of the cupola outside. One of the RCC's was upended and tangled up with a part of the lock door, and the other was trying to maneuver around it. "Red section, move to fallback positions," the captain yelled. "Covering-" "I agree," Marcia Quarrey said. She looked at Borftein. "If that's the case, then sending in the SD's would only confirm their fears. It would be the worst thing we could do." "It's wiodiflcations aren't completed yet We've already toli-4ou that" he leaned into the car through the open door to pluck the key from the ignition. By the time the flyer touched down at the front of the house, Celia's earlier nervousness had given way to a stoic resignation to the fact that she was now committed. She had gambled that Stern would accept her desire to return to her home as normal feminine behavior and that because he believed her to be helpless and without anyone else to run to anyway, the thought of her trying to escape would not enter his mind seriously. That - was just how it had worked out; her three SD guards and a matron had orders to keep her under observation and from talking to anybody, but she was not considered to be a prisoner. Her only worry now was that Veronica might have failed to contact Colman or that for some reason he might have been unable to do anything. Half the Army seemed to have converged on the west gate, where a group of escapees had been run to ground and were shooting it out. When the confusion was at its peak, a series of thunderous explosions blanketed the Detention Wing and the depot with smoke. When the smoke cleared, one of the transporters was gone. Colman asked again. "Missiles wouldn't be any use to them, and they know it. The Mayflower II could stop missiles before they got within ten thousand miles. And beam weapons on the surface wouldn't be effective firing up through the atmosphere." He spread his hands imploringly. "All they've got in orbit are pretty standard communications relays and observation satellites. The moons are both out of range of

Howard had come home enough times angry and embittered after pressing for measures to halt the decay and being overruled. He was doing what he could~ but the influence of the planet was all pervasive. She was merely projecting into him and personifying something else--something that stemmed from deep inside her. Even as she felt the first stirring of something deep within her mind, the vision came of herself and Howard, alone and unbending, left isolated in their backwater while the river flowed on its way, unheeding and uncaring. An intense note had come suddenly into Driscoll's voice..motioning Padawski and his group to their feet, the major marched over to where Colman and the others from D Company were standing with the Chironians who had been upstairs with them. The calamity of 2021 had been the capsizing of an iceberg that had become top-heavy when too much~ of the stabilizing mass that belonged at its base had tried to climb above its center of gravity. The war had been the price of allowing shopkeepers to posture as statesmen, factory foremen as industrialists, and diploma-waving bohemians as thinkers, of equating rudimentary literacy with education and simpleminded daydreaming with proof of spiritual worth. Beneath the main diagram were pictures of the spectra of the Sunlike Alpha G2v primary with numerous metallic lines; the cooler, K type-orange Beta Centauri secondary with the blue end of its continuum weakened and absorption bands of molecular radicals beginning to appear; and MSe, orange-red Proxima Centauri with heavy absorption in the violet and prominent CO, CH, and TiO bands..Even as the troops are pouring out of the trailer, a helmetless man throws open the passenger's-side..His mother has often told him that if you're clever, cunning, and bold, you can hide in plain sight as..CHAPTER THIRTY..The driver pops the hand brake.
