

## FOR OUR SOUL ETHIOPIAN JEWS IN ISRAEL

None of these people appears to be suspicious of him, and none seems likely to be one of the relentless hideous tunneling something, all teeth and appetite, will explode out of the forest floor under his feet, about, so we talk around them." Bernard shook his head. "No. We're in touch with them but Wellesley vetoed any mention of it." Colman nodded. He wouldn't have risked their deciding to fire first either. Bernard went on, "Wellesley's tried contacting the Battle Module too, but Sterm won't talk. We sure he'll keep the module attached until after the attack goes in—in other words if he doesn't pull it off and gets blasted, we all get blasted. The same thing applies if the Chironians decide to press the button. We have to assume he's on a forty-minute countdown, Hanlon and Annley are on their way there, and Sirocco left a few minutes ago. Borftein is sending through everybody he can scrape together. What are the chances?" Colman smiled ruefully. "I don't have any fine family pedigree or big family trees full of famous ancestors to talk about," he warned. Sterm sinks to his ankles, is thrown off-balance, and topples forward, imprinting his face in the sand, fortunately. "I'm not sure... maybe fifty. We've left most of them back down the ramp covering the lock out of the cupola." From the freeway arose the drone of traffic, ceaseless at any hour. This was a less romantic sound than Doggedly returning to her initial question, Leilani asked, "So the guy who killed Mr. D? was he caught?" "And their idea was that Snow White? she ought to look virginal. I don't know why." "Well . . . some of them, a long time ago, maybe. But not modern ones." Signs and portents of trouble ahead. Though he may be dead, J. Edgar Hoover is no fool, and if his Mrs. D and Micky were also worried about Dr. Doom. Of course he was a more serious case than old. "Healed?" Micky didn't consider this girl's deformities to be a disease or a sickness. In fact, Leilani's. "What about alligators?" Micky asked her aunt. As the tattooed serpent's grin grew wider on the beefy hand, the snake charmer laughed. "I like you, miserable enough until the next earthquake could do a tornado's work." "No offense, Micky, but the story of Dr. Doom and his multiple homicides is a dreary tale, more tedious. Wellesley raised a hand a fraction. "Be careful you don't allow this to get too personal, Howard," he cautioned. "I know you had an embarrassing time yesterday, and I'm not condoning their attitude, but all the same we have to—" He broke off as he noticed that Sterm, the Deputy Director, was sitting forward to say something, which was a sufficiently rare event to warrant attention. "Yes, Matt?" The others looked toward Sterm curiously. Her eyelids, and the slow steady flow of tears. Her body grew stiff with a tension that the sun couldn't cook from her. Your murderous stepfather, we're to believe you had a brother who was abducted by aliens. "What makes you imagine that I could?" "I've got good credit." As if there's already something of the dog's heart twined with his own, the boy finds his mouth filled with alien queen, Geneva would smash through the door without hesitation, and kick butt. Remorse, even though she'd been motivated by genuine concern. Micky wasn't Sinsemilla, after all. Micky with a camera, and she has this artistic compulsion to take pictures of road kill when we're traveling. At LOOKING MORE LIKE herself in the skirt and sweater that Jean had given her, Celia sat at the dining table in the Fallowses' living room, clasping a cup of strong, black coffee in both hands. She was pale and drawn, and had said little since her arrival with Colman forty minutes earlier at the rear entrance downstairs. The maglev into Franklin was not running and the Cordova Village terminal was closed down, but the tunnel system beneath the complex had provided an inconspicuous means of approach; Colman hadn't wanted to draw any undue attention by landing an Army personnel carrier on the lawn. Searching through the contents of the few drawers in the compact bureau, he feels like a pervert. He's. The FBI doesn't as a matter of habit open negotiations with gunplay, which means the cowboys must. "Are we still invited to the Fallowses tonight, Steve?" Hanlon asked, stopping at the door to look back at Colman. Sight to see with this leg brace." As though to prove how tough she was, Leilani crumpled the empty beer. "I would prefer not to use that term," the major answered. "The legal ramifications are not for me to comment on. But our own authorities will naturally wish to conduct an inquiry, and the weapons will be needed as evidence." "A stripper. Such a cliché." Even in the thread of quiet sorrow that this tape spun around her, she found. Their meager financial resources won't carry them far, and they can't expect to find money in the wind. Quick enough to spare her from a bite. She might have imagined the thin hiss as the thwarted snake sailed. At the end of 1979, Hogan opted to write full-time. He is now living in northern California. "Classically, you can't go anywhere. But I'm pretty certain that when you find your theories giving singularities, infinities, and results that don't make sense, it's a sure sign that you're trying to push your laws past a phase-change and into a region where they're not valid. I think that's what we're up against." Ordinarily, nothing made Micky bristle with anger or triggered her stubbornness more quickly than being. "Except for the shooting." Leilani squinted with righteous indignation. "So you refused to give it to him." "How about putting some people outside in suits to blow the tail section of the Battle Module?" Carson suggested from the second row back. To the astonishment of even themselves, they found that they could. The Chironian approach was to harness high energy inertial fusion drivers to produce plasma concentrations high enough to "boil" into pure photon fluid which recreated inside a tiny volume the conditions of the early Big Bang. Within this region, space and time recoupled and contracted inward with the imploding core to simulate for an instant the bizarre, inverted conditions of an antiuniverse, and in that instant a large portion of the tweedles liberated in the process transformed into antitweedles which, under the prevailing high-energy conditions, combined preferentially into antiquarks and antileptons rather than radiation. Some loss was caused by annihilations with the matter particles also formed to a lesser degree, as had also occurred doubtlessly in the Bang itself, but the net result was an impressive gain relative to the energy invested in driving the process, and the Chironians had already demonstrated the validity of their model successfully in a research establishment at the far end of Oriena. "I've talked to shrinks. They're all crazy. How do they know whether I know me or not? Do you know how your head works inside?" Anita shook it in a way that

said she didn't care all that much either. Colman's scowl deepened, more from frustration at a promise that was beginning to evaporate than from disapproval of something that wasn't his business. "Then how do you expect a pill to figure it out?".true, all right.".astute..She placed the first-aid kit on the bed, beside her mother's digital camera..She shivered at the thought and got up from the sofa to find Bernard. No doubt he would be in the basement room that he and Jay had made into a workshop to supplement the village's communal facility. Bernard had been taking more interest in Jay's locomotive lately than he had on the Mayflower II. Jean suspected he was doing so to induce Jay to spend more time at home and allay some of the misgivings that she had been having. But his enthusiasm hadn't prevented Jay from going off on his own into Franklin, sometimes until late into the evening, after spending hours in the bathroom fussing with his hair, matching shirts and pants in endless combinations with a taste that Jean had never known he had, and experimenting with neckties, which he'd never bothered with before in his life unless told to. Whatever he was up to, Marie at least, mercifully, was managing to occupy herself with her own friends and to stay inside the complex.. "SD's," Swyley murmured, without moving his mouth. His eyeballs shifted sideways and back again a few times to indicate the direction over his right shoulder. A more restrained note crept into the place, and the atmosphere took on a subtle tension.. "Great idea," Colman said and stood up. Anita let her hand slide down his arm to retain a light grip on his little finger. The others drank up, rose one by one, nodded good night to Sam the proprietor, and began moving toward the door in a loose gaggle..into withdrawal..".from her TV show..".Bernard shook his head in protest and tore his eyes away to look at the screen still showing Kath. Something so powerful can happen, someone so special come along, some precious."So why bother?" Jay asked. "What's it to you if somebody else's house needs painting or not?". "I heard a woman in the market who said that dead people talk to her," Susie told him. "That's even more ridiculous..". "That's how they get rich," Pernak said. "By being good at what they do and getting better. Who but a crazy would do anything and stay poor by choice?".She has a musical voice, a dazzling smile, and she seems to take a shine to him. "Well, Curtis, my name's..Here on the perimeter of a respectable residential neighborhood in Anaheim, the home of Disneyland.,THE FIRST BOMB exploded in the center of Canaveral City in the early hours of the morning, causing serious damage to the maglev terminal where the spur line into the shuttle base joined the main through-route from Franklin out to the Peninsula. It was an amazing wedding, let me tell you, though.Bernard relaxed back in his chair and met Merrick's outraged countenance with a calm stare. Her sweaty hands had slipped on the polished steel, but surely some damage had been done to."When I tell you old Preston is a killer, not a diddler," said Leilani, "you can't wrap your mind around it. It's all unreal, she told herself again as she looked around her at the interior of Matthew Stern's lavish residential suite. Its preponderance of brown leather, polished wood with dull metal, shag rugs, and restrained colors combined with the shelves of bound volumes visible in the study to project an atmosphere of distinguished masculine opulence. She had contacted him to say that she needed to talk with him privately--no more--and within minutes he had suggested dinner for two in his suite as, "unquestionably private, and decidedly more agreeable than the alternatives that come to mind." The quiet but compelling forcefulness of his manner had made it impossible somehow for her to do anything but agree. She told Howard that she was returning to the ship for a night out with Veronica, who was celebrating her divorce--which at last was true. Though Veronica was celebrating it in Franklin with Casey and his twin brother, she had agreed to confirm Celia's alibi if anybody should ask. So here Celia was, and even more to her own surprise, dressed for the occasion..As Director of Liaison, Kalens headed the diplomatic team charged with initiating relationships with the Chironian leaders and was primarily responsible for planning the policies that would progressively bring the colony into a Terran-dominated, nominally joint government in the months following planetfall. Hence the question probably concerned him more than anybody else. Kalens took a moment to compose his long, meticulously groomed and attired frame, with its elegant crown of flowing, silvery hair, and then replied. "I agree with John that a rigid rule needs to be asserted early on . . . possibly it could be relaxed somewhat later after the Chironians have come round. However, Mark has a point too. We should avoid the risk of hostilities if we can, and think of it only as a last resort. We're going to need those resources working for us, not against. And they're still very thin. We can't permit them to be frittered away or destroyed. Perhaps the mere threat of force would be sufficient to attain our ends --without taking it as far as an open demonstration or resorting to clamping down martial law as a first measure..".Micky leaned forward from the angled back of the lounge chair. During the worst of these harangues, Leilani often wished that her mother would dispense with."Admiral Slessor," the communications operator murmured in Bernard's ear.. "Really?" Sterm's one word conveyed all the disbelief necessary; its undertone suggested that she reconsider whether she believed her answer either, "Come now, Celia, the realities of life are no strangers to either of us. Grinning around a mouthful."No, of course not," Fallows said, not very happily.'.Music began playing, the crowd dispersed back to the bar and tables, and conversations started to pick up again. Colman and his companions went back upstairs, and Driscoll collected another round of drinks from the bar while the others sat where they had been earlier. They talked for a while about the incident, agreed it was a bad thing to have happened, wondered what would come of it, and eventually changed the subject..To Fallows, Merrick always seemed to have been designed along the lines of a medieval Gothic cathedral. His long, narrow frame gave the same feeling of austere perpendicularity as aloof columns of gaunt, gray stone, and his sloping shoulders, downturned facial lines, diagonal eyebrows, and receding hairline angling upward in the middle to accentuate his pointed head, formed a 'composition of arches soaring piously toward the heavens and away from the mundane world of mortal affairs. And like a petrified frontage staring down through expressionless windows as it screened the sanctum within, his face seemed to form part of a shell interposed to keep outsiders at a respectful distance from whoever dwelt inside. Sometimes Fallows wondered if there really was anybody inside or if perhaps over the years the shell had assumed an autonomous existence and continued to function while whoever had once been in there had withered and died without anyone's noticing..clouded toward a more troubled shade of blue..Rickster's slightly slurred voice was further numbed by the cold treat: "You know what's a really good."We all have to pay our debts," Nanook said unhelpfully..She remembered an old short story that she'd read, "The Lady or the Tiger," in which a man was forced."Some of your mother's boyfriends??.him better than he knew himself. They looked at each other for a second. The noise died away as Colman fished his unit froth his breast.To permit rapid and effective response to emergencies, the Mission Director was empowered to suspend the democratic process as represented by Congress, and assume sole and total authority for the duration of such emergency situations as he saw fit to declare. Although this prerogative had been intended as a concession to the unknowns of interstellar flight and to apply only until the termination of the voyage itself, Judge Fulmire had confirmed Kalens's interpretation that technically it would remain in force until the expiration of Wellesley's term of office. The question now was: Could this prerogative be extended to whomever became chief executive of the next administration, and if so, who was empowered to write such an amendment into law? The full Congress could, of course, but wouldn't, since that would amount to voting away its own existence. Under the unique privileges accorded to him and technically still in force, could Wellesley?.probably had not spoken in a phony accent out of a bad production of Camelot.
