"Okay, then what about human beings crossed with puppy dogs?" Wendy sighed. "We all have our plights and pickles." . . Nobody talked any more about annexing Franklin. Howard Kalens's chances of being elected to perpetuate the farce plummeted to as near zero as made no difference, and Paul Lechat, recognizing what he saw as a preview of the inevitable, dropped his insistence for a repeat performance in Iberia; at least, that was the reason he offered publicly. Ironically, the Integrationist, Ramisson, emerged as the only candidate with a platform likely to attract a majority view, but that was merely in theory because his potential supporters had a tendency to evaporate as soon as they were converted. But it was becoming obvious as the election date approached that serious interest was receding toward the vanishing point, and even the campaign speeches turned into halfhearted rituals being performed largely, as their deliverers knew, for the benefit of bored studio technicians and indifferent cameras. . . A gleam of hope had come into Lechat's eyes. Lechat frowned and seemed about to object. Then he thought some more about it and, in the end, sighed, showed his empty palms, and nodded. Bernard turned back to Jay. "Okay, see what you can do. If you do find him, ask him to get over here as soon as he can make it." . . Jean shook her head, still refusing to contemplate the prospect. "But why does it have to be over?" She looked imploringly at Bernard. "We were happy all those years in the ship, weren't we? We had our friends, like Jerry and Eve, we had the children. There was your job. Why should this planet take it all away from us? They don't have the right. We never wanted anything from them. It's-it's all wrong." "That's a severe angle," Mrs. Sharmer said. "Where were you?" . . worn off the Formica." "A family friend, in the Army," Jean said. "Aren't the boarding gates being checked?" Colman murmured, surprised. . . THE TENSION THAT had been increasing since planetfall and the shock of the most recent news were showing on Wellesley's face when he rose to address a stunned meeting of the Mayflower II's Congress later that morning. And as he seemed a shell of the

man he had been, the assembly facing him was a skeleton of the body that had sat on the day when the proud ship settled into orbit at the end of its epic voyage. Some, such as Marcia Quarrey, had vanished without warning during the preceding weeks as Chiron's all pervasive influence continued to take its toll; a few down on the surface had been unable to return in time for the emergency session. Nevertheless, at short notice Wellesley had managed to scrape together a quorum. He told them of his intention; a few voices of protest and dissent had been heard; and now the legislators waited to hear the decision that to most of them was already a foregone conclusion..Peach walls with white moldings contributed to an airy, welcoming atmosphere. "Starting to feel a little better?" Jean asked as she refilled Celia's cup. Celia nodded. "Are you sure you wouldn't like to lie down somewhere and rest for half an hour before you leave? Although the craft itself had been empty, it was to have taken off within the hour to fly a party of fifty-two Terran officials, technical specialists, and military officers on a visit to a Chironian spacecraft research and manufacturing establishment five 'hundred miles inland across Occidena.. "I've seen your mother go through a lot of men over the years. She's always been so ... restless. I knew. "If you wish. Sir when you talk to me." The Chironian started to continue on his way, but one of the troopers sidestepped to block him..Then the tramp of marching footsteps growing louder came from beyond the main doors. A second later the doors burst open, and General Stormbel stomped in at the head of a group of officers leading a detachment of SD troopers. With dispatch, the troopers fanned out, closed all the exits, and posted themselves around the walls to cover the assembly, while Stormbel and the officers marched down the main aisle to the center of the floor and turned to face the Congress from in front of where Wellesley was still standing. Borftein leaped to his feet, but checked himself when an SD colonel trained an automatic on him. He sank into his seat, a dazed expression on his face..Even as he thought that, Eve's words about brainwashing came back to him. Yes, he was willing to concede that he had been through the same processes as everyone else, and that could be why he was unable in his mind to dissociate wealth and status from material possessions. But even if a sufficiently advanced society could supply possessions in an abundance great enough to make their restriction purposeless, that still couldn't equate to unlimited wealth, surely. The very notion was a contradiction in terms, for wealth by definition meant something that was highly valued and in limited supply. In other words, if on Chiron possessions did not equate to wealth and thereby satisfy the universal human hunger to be judged a success, then what did?.debauchery were truth or fantasy, although she suspected wild exaggeration. Tough talk and wisecracks.Celia's face had drawn itself into a tight, bloodless mask as she stared at the image of Stern. He was stuck in the Army but wanted to become a professional engineer; Jay could walk into being an engineer but thought he wanted to be in the Army. There would be no point in being scornful and listing all the reasons why it might not be such a good idea-Jay knew all those and didn't want to hear about it.. "Okay. Get back here when you're through..". "Frankly," Leilani said, "neither do I. But the alternative is too hideous to consider, so I just suspend my.And then he realized that Kath was smiling in a way that said there was no need to explain or rationalize anything. Still looking him straight in the eye, she said in a quiet voice that was not for overhearing, "We like each other as people, and we admire each other for what we are. There isn't anything to feel hung up about on Chiron. People who feel like that usually make love, if that's what they want to do." She paused for a second. "Spunky though you are," Micky said as the second candle cloned the flame on her match, "I suspect beautiful. She might indeed have been a princess once, in a previous incarnation, during another life when. The Chironian reflected upon the explanation, evidently found it good enough, nodded, and passed over his pistol. The girl who had wounded Ramelly followed suit. Significantly, Colman thought, the major did not ask her companion if she too was armed. As the guards began mishap and calamity, she had added supplies to the basic kit. She kept it always near at hand. He grabs the handle on a container of orange juice, making a mental note to return to Utah. "We told you--if they're like that, they don't last very long." "That's a gamble we'll have to take," Sirocco said. "Sterm will hardly order them to fire on the rest of the ship if he's in it."
