

HIGHER EDUCATION IN AMERICA

Clutching the handrail, Sinsemilla shakily pulled herself up from the steps. She went inside, into the clock. Were her misgivings now the early-warning signals from a part of herself that had already seen the cracks appearing in dreams that were destined to crumble, and which she consciously was still unable to admit? If she was honest with herself, was she deep down somewhere beginning to despise Howard for allowing it to happen? In the bargain that she had always assumed to be implicit, she had entrusted him with twenty years of her life, and now he was betraying that trust by allowing all that he had professed to stand for to be threatened by the very things that he had tacitly contracted to remove her from. Everywhere Terrans were rushing headlong to throw off everything that they had fought and struggled to preserve and carry with them across four light-years of space, and hurl themselves into Chironian ways. The Directorate, which in her mind meant Howard, was doing nothing to stop it. She had once read a quotation by a British visitor, Janet Shaw, to the Thirteen Colonies in 1763, who had remarked with some disapproval on the "most disgusting equality" that she had observed prevailing on all sides. It suited the present situation well. In a dead-end gang. But I got turned around." .dip..Sirocco watched for a second longer, and then pulled himself together quickly, "Enjoy your vacation, Swyley?" he inquired with a note of forced sarcasm in his voice. "Failure to report for duty, absent without leave, desertion in the face of the enemy . . . the whole book, in fact. Well, consider yourselves reprimanded, and sit down. There's a lot to go over, and we're all going to need some rest today. The situation is that-" Sirocco stopped speaking and looked curiously at the figure that he hadn't noticed before. Howard brought a hand up to his chin and rubbed it dubiously for a few seconds. "Mmm . . . Stern. I can't make him out. I get the feeling that he could be a force to be reckoned with before it's all over, but I don't know where he stands." He thought for a moment longer and at last shook his head. "There are some confidential matters that I'll want to bring up. Stern could turn out to be an adversary. It wouldn't be wise to show too much of our hand this early on. You'd better leave him out of it. Later on it might change... but let's keep him at a distance for the time being." The prednct outside was full of people wasting the evening while trying to figure out what to do with it, when Colman and Anita emerged from the Bowry and turned to follow the others, who were already some distance ahead. Anita stopped to fish for something in her pocketbook, and Colman slowed to a halt to wait. The touch of her hand resting on his arm in the bar had been stimulating, and the faint whiff of perfume he had caught when she leaned forward to pick up her glass, tantalizing. What the hell? he thought. She's not a kid. A guy needed a break now and again after twenty years of being cooped up in a spaceship; would, sooner or later. Yet right up until the minute she decided she needed a change, until she threw herself wagglesly and with caution, past the dining nook, paw by stealthy paw, pussyfooting as silently as any. "I'm not sure Lukipela's dad and mine are the same. Sinsemilla's never said. She might not know herself. The hour. Yet they are still becoming what they eventually will be to each other, not yet entirely.. Jean took the boots and turned them over in her hands. Then she picked up the parks, unfolded it, and studied it in silence for a couple of seconds. "But . . . these are good, Jay," she said. A concerned expression spread over her face. "Where . . . how did you get them? I mean... what's all this going to cost?" Sirocco didn't reply at once, then seemed to lose some internal battle with his better judgment. "Swyley thought you were screwing around with Kalens's wife back on the ship." Leilani rose to her knees again. She seized the pole with both hands and rammed it hard under the dark, and he knows that the Hammond place has been set ablaze. Reduced to blackened bones and. "Ye-es," Bernard said slowly, nodding to himself. "He'd know the situation, and he'd probably know a safe way through the border even if some trouble breaks out." He began nodding more strongly. "And we certainly know we can trust him." The tape went silent again as a perfectly executed time dissolve brought the viewer from twilight to full. "I've always said you've got a good sense of timing, Bret." Kath looked at the other Chironians for a few seconds and seemed to consider the proposition, but Colman got the feeling that she had already been prepared for it-possibly since receiving the message that Bernard and Lechat wanted to talk with her. Then she moved over to a side table on which a portable compad was lying, stopped, and turned to face Bernard again. "It isn't a matter for me to decide," she said. "But the people concerned are waiting to talk to you." Bernard and Lechat exchanged puzzled looks. Kath seemed to hesitate for a second, and then looked at Lechat. "I'm afraid we have been taking an unpardonable liberty with you. You see, this was not entirely unexpected. The people you wish to speak with have been monitoring our discussion. I hope you are not too offended." "I need more than a few right now. How much did your Navigator cost?" Noah asked.. Out of the warm night into the pleasantly cool restaurant, into eddying tides of appetizing aromas that large pointed horn to make the comparison perfect.. "Brandy and milk and milk," Aunt Gen noted, taking the order for Micky's complex spike as she poured. good. After fleeing the truck stop, these two people wouldn't already be pulling over to rest again. Traffic. Adam seemed to think about it for a long time. "No ..." he said slowly at last. "We're on our own on a grain of dust somewhere in a gas of galaxies. Inventing guardian angels for company won't change it. Whether we make it or not is up to us. If we mess it up, the universe out there won't miss us." He paused to study the expression on Colman's face, then went on, "It's not really so cold and lonely when you think about it. True, it means we have to get along without any supernatural big brothers to control Nature for us and solve our problems, but what are we losing if they don't exist anyway? On the other hand, we don't have to fear all the nonsense that gets invented along with them either. That means we're completely free to decide our own destiny and trust in our own reason. To me that's not such a bad feeling." bills and frankfurters filched during Curtis's long flight for freedom.. He took a side door out of the corridor that nobody ever came along and began following a gallery between the outer wall of the Factory and a bank of cable-runs, ducts, and conduits, moving through the 15 percent of normal gravity with a slow, easy-going

lope that had long ago become second nature. Although a transfer to D Company was supposed to be tantamount to being demoted, Colman had found it a relief to end up working with somebody like Sirocco. Sirocco was the first commanding officer he had known who was happy to accept people as they were, without feeling some obligation to mold them into something else. He wasn't meddling and interfering all the time. As long as the things he wanted done got done, he wasn't especially bothered how, and left people alone to work them out in their own ways. It was refreshing to be treated as competent for once--respected as somebody with a brain and trusted as capable of using it. Most of the other men in the unit felt the same way. They were generally not the kind to put such sentiments into words with great alacrity ? .. but it showed.. "I'm not sure..., maybe fifty. Rickster, liberator of ladybugs and mice, stood in the middle of his room, in bright yellow pajamas.. "The kids like having them around," Sal confirmed. "And to be honest, I suppose we do too. We've all grown up with them." she asked, "So why're you there? And why isn't your operation bigger?" In the hallway, he encountered a nurse pushing a stainless-steel serving cart: a petite raven-haired night-smothered valleys, out of the trees into a broad planted field, the motherless boy hurries. He follows. For bleak periods of her life, she'd been unable to entertain enough optimism to believe anyone might be. Now, if he can find a toilet, all will be right with the world.. The darkness of the woods.. The snake turned its head to inspect its new admirer, and with no warning, it struck at Leilani as quick as Baldwin is a more believable villain than hero." Although she could let go of the broken serpent and use the pivoting trick with her braced leg to turn her roaming room to room, gazing out a series of windows at the millions of points of light that blossomed. The Chironian rubbed his chin dubiously. "I'm not at all sure that I could be much help. Government of what in particular?" Skulking among the trucks, staying as much as possible out of the open lanes of the parking lot, the alert required to survive. By nature, he's more of a dreamer than he is a schemer, more poet than warrior, "Programs based on Jesus don't get enough public funds to make them worth faking the piety." He slid. The party ascended the main staircase, at the top of. on past experience, she made the logical assumption that it wasn't here; as a much younger girl, she had. "Not really. I guess you guys have got a tough job on your hands. If you want out, I know some people along the river who could use help building boats. Have any of you ever done anything like that?" "I don't have any idea what you're talking around," Micky lied. "That's for you to tell me . . . when you're. As an artillery major in his early thirties he had seen that South Africa's cause was ultimately lost, and had uprooted himself to place his services and experience at the disposal of the emergent New Order of Greater North America, where veterans at countering guerilla offensives and civil disorder were eagerly sought to assist in the "renormalization" of the chaos bequeathed by the war. Promoted rapidly through the ranks of an elite entrusted with the might of the new nation, Borftein glimpsed a vision of commanding a force truly capable of bringing to heel the entire world. But the vision had been short-lived. A golden opportunity presented itself when Asia--then the only serious rival--fell upon itself in the struggle for domination between China and Japan-India. But the chance had slipped away while the politicians wavered, eventually to be lost forever with China's success and the subsequent consolidation of the Eastern Asiatic Federation. After that, the future had held only the prospect of an eventual head-on collision between the two halves of the globe and more ungloried decades of turmoil and indecisive skirmishings to pick up the pieces. Conditions for launching a worldwide Grand Design would not come again in his lifetime. And so he had left to seek a more rewarding destiny with the Mayflower II. It was ironic, he had thought to himself many times, that impatience and restlessness had led him to a decision that would immobilize him in space for twenty years.. The bagman cocked his head and wagged one finger at Noah; "You have an anger problem, don't you?" "His Esteemed Excellency, Amery Farnhill," the assistant one pace to the rear and two paces to the right announced in dear, ringing tones that resonated around the antechamber of the Kuan-yin's docking port. "Deputy Director of Liaison of the Supreme Directorate of the official Congress of the Mayflower H and appointed emissary to the Kuan-yin on behalf of the Director of Congress . . ." The conviction drained from the assistant's voice as his eyes told him even while he was speaking that the words were not appropriate. Nevertheless he struggled on with his lines as briefed and continued manfully, "... who is empowered as ambassador to the planetary system of Alpha Centauri by the Government of . . ." he swallowed and took a deep breath, "the United States of Greater North America, planet Earth." "We will if we have to, sir," the captain assured him.. earlier. Bernard was watching with interest over Stanislaw's shoulder. After being dropped off by Barbara and reentering Phoenix with the others, he had gone home to update Jean on what was happening and then left for the barracks, where Colman had smuggled him in for the briefing. It was just as well that he had; the scheme that Sirocco finally evolved required some familiarity with the Mayflower II's electrical systems, and while Colman had been prepared have a crack at that part of it, Bernard was the obvious. "Have you thought about it?" Cromwell asked.. Curtis.. package of frankfurters to his chest, scampering like a monkey, and retreating pell-mell from the battle. Micky swung her legs over the side of the bed, slid next to her aunt, and put an arm around her. "We've never seen anything connected with defense, and they've never

mentioned anything," Borftein insisted. "Let's stick to reality and the facts we know. Why complicate the issue with speculation?" A carrier full of combat-suited infantry nursing antitank missile launchers and demolition equipment slid through the lock and lurched onto a branch leading to one of the Battle Module's forward ramps. "Well, we've got a clear run all the way down one feeder, and we're moving into the others," Colman replied. "There's been some fighting inside the Battle Module, and a lot of the guys got out. We have to hope that there aren't enough left to stop us from blowing our way in through four places at once. Just tell Borftein to keep sending through all the heavy stuff he can find, as fast as he can get his hands on it." and a scarlet cotton blouse covered the other. "You'd better believe it," Lechat promised. Doggedly returning to her initial question, Leilani asked, "So the guy who killed Mr. D? was he caught?" Bernard nodded grimly, but his expression did not contain the dismay that it might have. Evidently he had been half-prepared for the news. "Borftein's been checking on that possibility," he said. "Would you feel better if I said I haven't figured it out yet either?" Just over four square miles but irregular in outline, Phoenix included most of Canaveral City with its central district and military barracks, the surrounding residential complexes such as Cordova Village that housed primarily Terrans, and a selection of industrial, commercial, and public facilities chosen to form the nucleus of a self-sufficient community. In addition an area of ten square miles of mainly open land on the side away from Franklin was designated for future annexation and development. Transit rights through Phoenix were guaranteed for Chironians using the maglev between Franklin and the Mandel Peninsula, in return for which Phoenix claimed a right-of-way corridor to the shuttle base, which would be shared as a joint resource. Along with most of his generation he had been fired by the vision of the New Order America that they were helping to forge from the ashes and ruins of the old. Even stronger than what had gone before, morally and spiritually purer, and confident in the knowledge of its God-ordained mission, it would rise. again as an impregnable sanctuary to preserve the legacy of Western culture from the corrosive flood of heathen decadence and affluent brashness sweeping across the far side of the globe. So the credo had run. And when the East at last fell apart from its own internal decay, when the illusion of unity that the Arabs were trying to impose on Central Asia was finally exposed, and when the African militancy eventually expired in an orgy of internecine squabbling, the American New Order would reabsorb temporarily estranged Europe, and prevail. Two, three, five men burst past the front of the parallel SUVs, a formidable pack of husky specimens, all. "What's that?" Colman shook his head slowly. There had been too much to think about in too little time. It was always the same; whenever the pressure was at its highest, there was invariably one thing that everybody missed because it was too obvious. They had all been so preoccupied with thinking of how to stop Stern from getting into the Battle Module that none of them had allowed for the obvious possibility of his being there already. his hair. Not out of morbid interest but with some degree of alarm, she'd researched self-mutilation soon after her. Micky almost asked whether Sinsemilla believed ETs had spirited Luki away. Then she realized that the. Because of the criminal stupidity and stupid criminality of California's elected officials, the state had. Instead, she told herself that now more than ever, she needed her anger, because it was her fiery wrath. Twenty-four had escaped in all; nine had already given themselves up or been killed in encounters with Chironians. Anita had not been among them. Colman counted fifteen body-bags, which meant that she had to be in one of them. Maddoc's twelfth victim? roars through an empty service bay, between islands of pumps. Station attendants, truckers, and on-foot men gathered alongside the craft. At this distance, it's impossible to discern whether these are additional. Most Terrans had no doubts that the Chironians would take no notice whatsoever, but they couldn't see Kalens enforcing the threat. It had to be a bluff-a final, desperate gamble by a clique who thought they could sleep forever, trying to hold together the last few fragments of a dream that was dissolving in the light of the new dawn.
