There's an evolutionary advantage to sexual reproduction that more than makes up for all the inconveniences.* In cloning, the genetic contents of new organisms remain identical with those of the original organisms, except for occasional mutations. If the organism is very efficiently adapted to its surroundings, this is useful, but it is an extremely conservative mechanism that reduces the chance of change. Any alteration in the environment could quickly lead to the extinction of a species.. "Listen, these Martians?and I can see from your look that you." It's always brown or yellow for you. Selene has to have been sitting in it." After all, a human being is more than his genes. Your clone is the result of your nucleus being placed into a foreign egg cell and the foreign cytoplasm in that egg cell will surely have an effect on the development of the clone. The egg will have to be implanted into a foreign womb and that, too, will have an influence on the development of the organism.. "It's a deal." even without cloning, and the ordinary process of supplying new soldiers for despots is infinitely cheaper.the same genetic equipment possessed by the original fertilized egg..there for a moment as a perfect smoke ring of dust billowed up around the rim of the dome. The images bloom and expire, ten every second: the tracer is following each queen back to the egg, men the egg to the queen that laid it, then that queen to the egg. Tens of thousands of generations have passed; in two thousand hours, beginning with a Paleocene bee, he has traveled back into the Cretaceous. He stops at intervals to follow the bee in real time, then accelerates again. The hive is growing smaller, more primitive. Now it is only a cluster of round cells, and the bee is different, more like a wasp. His year's labor is coming to fruition. This fertilized egg cell cannot become an independently living organism for some nine months, for it must divide and redivide within its mother's womb and be nourished by way of its mother's bloodstream. It must develop, specialize, and grow larger until it has

developed the necessary ability to live independently. Even after it emerges from its mother's womb, it requires constant and unremitting care for a period of time before it can be trusted to care for itself.
