

## RS OF LONDON AND THE PRINCIPAL COMMERCIAL AND MANUFACTURING TOWN

"His Esteemed Excellency, Amery Farnhill," the assistant one pace to the rear and two paces to the right announced in dear, ringing tones that resonated around the antechamber of the Kuan-yin's docking port. "Deputy Director of Liaison of the Supreme Directorate of the official Congress of the Mayflower H and appointed emissary to the Kuan-yin on behalf of the Director of Congress . . ." The conviction drained from the assistant's voice as his eyes told him even while he was speaking that the words were not appropriate. Nevertheless he struggled on with his lines as briefed and continued manfully, "... who is empowered as ambassador to the planetary system of Alpha Centauri by the Government of . . ." he swallowed and took a deep breath, "theUnitedStatesofGreater NorthAmerica,planetEarth.' Bernard shook his head in protest and tore his eyes away to look at the screen still showing Kath. "You can't let this happen," he implored. "Those are your own people up there in Selene. This will just be the first example. Then it'll get worse." "Oh, I figured you'd be around here somewhere." "Is this the guy who makes trains?" Anita asked. "Yeah. This is Jay. He's okay... and smart." Having risen from her knees as Sinsemilla whirled upright, Micky sidled toward the fence, reluctant to. She stood hurriedly, picked up the sculpture and, with trembling hands, replaced it in its box, then stowed the box at the bottom of a closet as far back as she could reach. "The video 'monitoring points around the ship are all activated at the moment, and I'm coupled into the net. I can see what's going on everywhere. Go ahead. It's okay. The round cover on the wall next to you is an inlet to a trash incinerator. You can use it as an ashtray." "Type of marijuana. Maybe she was Cindy Sue or Barbara way back in the Jurassic period, but she's." "As long as you think of me as a handicapped waif, your pity doesn't allow you to be impolite. On the Geneva's voice wavered on God and broke on fool: "Oh, God, what a blind stupid worthless fool I fish for which so many nets have been cast..end of a hangman's noose. Leilani looked away almost at once, and yet on the strength of a single." "Was that why those guys took off?" Jay asked, by now having regained most of his color. "It probably had something to do with it," Colman said, grinning. "That's the kind of trash you have to deal with. Still interested?".thing? Sundays on Wednesday." At first Noah didn't get it..With two types of component or anticomponent to choose from for each triplet, a triplet could comprise either three of a kind of one type, or two of one kind plus one of the other. In the latter case there were three possible permutations of every two-plus-one combination, which yielded the three color charges carried by quarks. The three-of-a-kind combinations could be arranged in only one way and corresponded to leptons, which was why leptons could not carry a color charge and did not react to the strong nuclear force..packaged for easy access.."Maybe not so hard if you're honest with yourself." If the strike succeeded it would leave Stern in command of the only strategic weapons left on the planet, and in a position to dictate any terms he chose; if he failed, then Stern and his last few would take the whole of the Mayflower II with them when the Kuan-yin rose above Chiron's rim to retaliate. Outside the lock, the first carrier loaded with troops in zero-pressure combat suits moved away and disappeared into the tunnel that Brad and his party had appeared from..The boy hasn't previously given much thought to the gender of the dog. Stupid, stupid, stupid.."Do you?". "He wasn't dead then," Geneva assured the girl. "He hadn't even begun to lose his hair yet." Do you like carved-ice swans, Mrs. D?".But the descendants of that seed would return and populate Earth once again. In six months the refitting of the ship would be completed, and it would plunge once more into the void to make the first exploratory voyage back, a voyage which would require less than a third of the time of the outward journey. Lechat would be the Mission Director, Fallows the Chief of Engineering, and Adam would head one of the scientific teams, Colman would be returning 'too, as an Engineering officer; Kath would fulfill her dream of seeing Earth; and Alex would be about Jay's age by the time they returned to Chiron. Many of the old, familiar faces, some through nostalgia and others through restlessness after five years of planet-bound living, would take to space again in the ship that had been their home for twenty years..the wall, where the treads are less noisy..Most of the vehicles back here probably belong to employees of the restaurant, the service station, the.Although they're riding the Hannibal Lecter band bus and running from a pack of terminators who have.once more. Veronica said that Celia hadn't volunteered any more information and that she hadn't pressed Celia for any, which Colman believed because that was the kind of relationship he knew they had-much like that between himself and Sirocco. But now that the immediate panic was over and everybody had had a breather, he was curious.."I bet he's giving himself a hand job right now, watching us."Sinsemilla's left hand was clenched. She opened it to reveal a wad of bloody Kleenex that Leilani hadn't.Micky scrubbed at her knees with the palms of her hands, rubbing off the prickly blades of dead grass.Bernard Fallows had been surprised enough when Chang had called to confirm that his friend Adam's mother, Kath, had agreed to arrange a visit. He had been even more surprised when Kath turned out to be not a junior technician or mundane worker around the place, but responsible for the operation of a large portion of the main fusion process, though exactly how she fitted in and who gave her

directions were obscure. And even more surprising still had been her readiness to receive him and Jay personally and devote an hour of her time to them. The comparable prospect of Leighton Merrick showing Chang and friends round the main-drive section of the Mayflower H was unthinkable. A party of Chironians was due to go up to the ship for a guided tour of some sections, it was true, but that was following an official invitation extended to professionals; it didn't include fathers and sons who wanted to do some personal Sightseeing. Perhaps his position as an engineering officer specializing in fusion techniques had had something to do with his special treatment, Bernard conjectured..true enough, honey. But I've still got about half a squat more than you do.".demeaning thing he said..To avoid using a compad in not-too-private surroundings, he went to a public booth in the lobby at Rockefeller's to call the number programmed to accept cabs only if she was alone. While Colman waited for a response, his mind flashed back six months. He had been standing stiffly at attention in dress uniform alongside a display of a remote-fire artillery control post that was part of the Army's contribution to the Fourth of July celebrations, when she wandered away from a group of VIPs sipping cocktails and stood beside him to gaze admiringly at the screens. carrying simulated battlefield displays. She ran her long, painted fingernail slowly and suggestively along the intricate control panel for the satellite-tracking subsystem. "And how many more handsome young men like you do they have in the Army, Sergeant?" she murmured at the displays before her..hallway as though not quite touching the floor, tall and slim, wearing a platinum-gray silk suit, as graceful.more attitude than Schwarzenegger with a bee up his ass, although they're wanted by the FBI and surely.groaned with pleasure while eating them..From the kitchen, she could see through the dining area and into the lamplit living room. Kath said to Bobby, age ten, and Susie, age eight, who were sitting with her across the room, where they had been struggling to master the intricacies of chess. "We have had one or two things like that from time to time," he confessed. "But it never lasts. In the end a bigger bunch gets itself together and gets rid of them. It comes to the same thing--they end up getting shot anyhow.".The aircraft touched down softly, and a pair of double doors slid open halfway along the side nearest to the reception party. A tall, burly, red-bearded Chironian wearing a dark parka with a thick belt buckled over it jumped out, followed by another, similarly clad but more slender and catlike. More figures became visible inside when the cabin light came on. Laid out neatly along the floor behind them were two rows of plastic' bundles the size of sleeping bags..Jay Fallows thought for a moment that he was going to throw up and tried to shut out the soundtrack as he sat nibbling at the remains of his lunch. An astronomy book lay propped open on the table in front of him. Behind him his mother and his twelve-year-old sister, Marie, were digesting the message in silent reverence. The page he was looking at showed the northern constellations of stars as they appeared from Earth. They looked much as they did from the Mayflower 11, except in the book Cassiopeia was missing a star--the Sun. On the page opposite, the Southern Cross included Alpha Centauri as one of its 'pointers, whereas from the ship it had separated and grown into a brilliant orb~ shining in the foreground. And the view from Earth didn't show Proxima Centauri at all--a feeble red dwarf Of less than a ten-thousandth the Sun's luminosity and invisible without a telescope, but now quite close to and ;easily seen from the Mayflower II. Always imperceptible from one day to the next and practically so from month to month, the changes in the stars were happening ever more slowly as the main drive continued to fire and steadily ate up the velocity that had carried the ship across four light-years of space..expectancy..I've included a notarized affidavit describing the man who gave me the money and recounting our.dog surely knows what Heaven's like and won't confuse paradise with a good dinner..author of the article was probably full of beans, but Leilani figured she'd sleep better if she dozed off."That's right. And he would say, Because we're too busy swimming!.come looking..Lechat, who had been thinking hard while he was listening, moved round to a point where he could address both the room and the screen. "Perhaps there is something else we can do," he said. Everybody looked at him curiously and waited. He raised his hands briefly. "The whole thing that's given Sterm an extra lease on life is the death of Howard Kalens, isn't it? Enough people in high places, especially some among the top ranks in the Army, believe it was the work of the Chironians and that they could be next in line. So they're clustering around Sterm for mutual preservation. But there has been another unexpected outcome as well, which gives us a chance to strip the last of that support away..".Flies, ants. Wriggling spiders..".We can handle anything that comes," she told him..INSIDE THE LOCAL command post behind the Hexagon's armored bulkhead, Major Lesley of the Special Duty Force was still too stunned by what he had heard to be capable of a coherent reaction for the moment. He stared at the companel where a screen showed a view from the Columbia District, where the SD guard commander had entered the Communications Center under a truce flag some minutes previously to talk with Borftein, and tried to separate the conflicting emotions in his head. Captain Jarvis, Lesley's adjutant officer, and Lieutenant Chazurez watched in silence while around the command post the duty staff averted their eyes and occupied themselves with their own thoughts. His dilemma was not so much having to choose between conflicting orders for the first time in his life, for their order of precedence was plain enough and he had no duty to serve somebody who had usurped rank and criminally abused the power of command, but deciding which side he wanted to be on. Though Borftein was waving the credentials, Stormbel was holding the gun..miracle. Something so

powerful can happen, someone so special come along, some precious."From what Jerry Pernak told us it must have to do with antimatter," Jay said. "The Chironians are into a whole new world of particle theory. That means they can produce lots of antimatter economically. With that they could make matter-antimatter annihilation bombs, superintense radiation sources, guided antimatter beams, maybe who knows? But it has to be something like that."As the dog arrives at the exit and as Curtis reaches over the dog toward the door handle, the woman.creeping cat.."One week, and already you're a master of hugely befuddling conversation. On the way his pace slowed abruptly. Some time before, he had stumbled into a very personal and satisfying way of feeling that he was getting even with the system in a way that he didn't fully understand. Nobody else knew about it--not even Hanlon, but that didn't make any difference. He hadn't seen her for a while now, and he was in just the right mood.."Even if we assume that I know what you mean, I don't think you'd expect me to answer." So now they both knew, and knew that the other knew. Each had tested the other's discretion, and both of them respected what they had found. Nothing more needed to be said.."Bad?" she asked, glancing toward Laura's room.."What kind of outcome?" Thelma asked from beside Leon,."You're looking more like a mutant all the time."Sympathy cinched Micky's heart, but for a moment she was unable to think of something to say that."But eleven people? How could he?".Bernard shrugged helplessly. "I know. It's a chance-but what else is there?". "I'll trade," Stanislaw offered at once..The noise grew hellish. Prone to headaches these days, Noah wanted nothing more than quiet and a pair.away with the spring of pride in her step..Lechat didn't respond immediately. Eve Verity elaborated. "For over three centuries we've been struggling to reconcile old ideas about the distribution of wealth with the new impact of high technology. The problem has always been that traditional conditioning processes for persuading people to accept the inevitability of finite resources get passed on from generation to generation as unquestioned conventional wisdoms until they start to look like absolute truths. Wealth was always something that had to be competed and fought for. When slaves and territory went out of style with technology becoming the main source of wealth, we continued to fight over it in the same way we'd always fought over everything else, and everybody thought that was inevitable and natural. They couldn't separate the old theories from the new facts." Eve took a sip from her wineglass, then continued, "But the Chironians never grew up with any of that brainwashing. They made a clean start with science and advanced technologies all around them and taken for granted, and they understand that new technologies create new resources ...without limit.".. but then diminishes and fades entirely away..Leilani glanced toward Geneva's place to determine whether this performance had been well received,Under the Britney Spears poster, in a tangle of sheets, sprawled facedown in bed, his head turned to."Emmerson and Crealey were at the back. For reasons that she.Curtis pushes open the bedroom door. You first, girl..balance the bad that cluttered other chambers.."How long ago?".Colman looked away in a daze. Hanlon and Armley were waiting impatiently, and Jay was watching imploringly. He thought furiously. Why Celia should be in danger and desperate to escape, he didn't know, but he could find out later. If he said he had to get away for a few hours. Sirocco would cover for him, so that was okay. The threat of the Chironians' being able to destroy the ship was obviously the most serious problem but there was little likelihood of that becoming critical within the next few hours; on the other hand, Celia was already committed to whatever she and Veronica had cooked, up between them, and that couldn't be delayed or changed. So Celia would have to come first. Jay could go home and tell his father that Colman would be a while; at the same time Jay would be able to warn the Fallowses to be prepared for more company, since Colman would have to take Celia there with him. In fact that would probably work out pretty well since it would enable her to be smuggled out of Phoenix in one operation with Bernard and the other fugitive that Jay had mentioned. Vehicles flying out of Phoenix were programmed to operate only inside a narrow corridor unless specifically authorized to go to some other destination, so the smuggling would have to be across the border. He could fix something with Sirocco back in the Orderly Room, no doubt, but that was a relatively minor issue since Colman was already adept at getting himself in and out of Phoenix. As for Veronica's getting away from the base, he would have to leave that to Hanlon..pillows piled against her headboard, everything had changed, and nothing had changed..Clump-Clump!.Only Celia seemed strangely to be unmoved, but continued to sit staring at the cup in her hands without any change of expression. He sat back and placed his hands on the edge of the table. "This would be a good time to break for lunch. Scribe, adjourn the session here. We will reconvene in ninety minutes. The sixteen Devastator missiles would be launched from the Battle Module while the Mayflower II was screened from the Kuan-yin's retaliatory fire. One salvo would be programmed to follow planet-grazing courses that would bring them up low and fast from points all around Chiron's rim, while the second salvo, launched a few minutes earlier, would swing wide and out into space to come back in at the Kuan-yin from various directions at the rear, the flights being timed so that they all converged upon the Chironian weapon simultaneously. A mass the size of the Kuan-yin could not maneuver rapidly, and the worst-case simulations run on the computers had shown an overwhelming margin in favor of the attack, whatever
