He did not know himself why he tried to weaken her faith in wizardry; perhaps because any weakening of her strength, her wholeness, was a gain for him. He had begun merely by trying to get her into his bed, a game he loved to play. The game had turned to a kind of contest he had not expected but could not put an end to. He was determined now not to win her, but to defeat her. He could not let her defeat him. He must prove to her and himself that his dreams were meaningless..art, as he had taught it to her.."He's not too well," she said, speaking low. "He was curing the cattle away out east over the."If it's a real gift, an unusual capacity, that's even more true. A witch with her love potions.Tern left late that year on his journey. He had with him a boy of fifteen, Mote, a promising weatherworker who needed training at sea, and Sava, a woman of sixty who had come to Roke with him seven or eight years before. Sava had been one of the women of the Hand on the isle of Ark. Though she had no wizardly gifts at all, she knew so well how to get a group of people to trust one another and work together that she was honored as a wise woman on Ark, and now on Roke. She had asked Tern to take her to see her family, mother and sister and two sons; he would leave Mote with her and bring them back to Roke when he returned. So they set off northeast across the Inmost Sea in the summer weather, and Tern told Mote to put a bit of magewind into their sail, so that they would be sure to reach Ark before the Long Dance..The boy's drop-jawed stare irritated Hemlock, though he knew it shouldn't. And there.In about 650, the sisters Elehal and Yahan of Roke, Medra the Finder, and other people of the Hand founded a school on Roke as a center where they might gather and share knowledge, clarify the disciplines, and exert ethical control over the practices of wizardry. With the Hand as its agent on other islands, the school's reputation and influence grew rapidly. The mage Teriel of Havnor, perceiving the school as a threat to the uncontrolled individual power of the mages, came with a great fleet to destroy it. He was destroyed, and his fleet scattered..Gammer's ox-team; he laid the floor and polished it the next day, while the old wizard was up at."The Cavuta?" she corrected me. He did not go in, but spoke in the open door. "Master San, it's about the cattle you have there between the rivers. I can go to them today." He did not know why he said this. It was not what he had meant to say..rested. The mage was a quiet man. Though there was a hint of fierceness in him, he never showed it.he thought so, since beyond the grove he could see treeless heaths and pastures..So Diamond, instead of learning spells and illusions and transformations and all such gaudy tricks, as Hemlock called them, sat in a narrow room at the back of the wizard's narrow house on a narrow back street of the old city, memorizing long, long lists of words, words of power in the Language of the Making. Plants and parts of plants and animals and parts of animals and islands and parts of islands, parts of ships, parts of the human body. The words never made sense, never made sentences, only lists. Long, long lists..did not know what to say. Then seeking further he heard in his mind a name spoken; but he did not speak it.."Go on, Deyala. I'll stay here." The Herbal went off. Azver sat down on the rough bench Irian had made and put against the front wall of the house. He looked upstream at her, crouching motionless on the bank. Sheep in the field between them and the Great House blatted softly.
