"SO you're happy you can handle it," Bernard said. "I hung it in the hallway," Veronica said, getting up. She walked ahead and out the door while Mrs. Crayford waddled a few feet behind. "Don't bother bringing anything out, Celia," Veronica's voice called back. "I'll come back in for the things." Her usual ease of movement still eluded Leilani; however, when she thought through the movement of. Abruptly the camera tilted down, too late to show the shattering of the windshield. Other days she drifted in clouds of attar of. "It seems irrational to me to argue one way or another about things there's no evidence for," a boy of about four' teen remarked. "You can make up anything you want if there's no way of testing whether it's true or not, so what's the point?" he now tied in a hangman's knot. "What answer?" he asked, recalling the Circle of Friends thug with the. the crop rows to a rail fence. "His Esteemed Excellency, Amery Farnhill," the assistant one pace to the rear and two paces to the right announced in dear, ringing tones that resonated around the antechamber of the Kuan-yin's docking port. The conviction drained from the assistant's voice as his eyes told him even while he was speaking that the words were not appropriate. Nevertheless he struggled on with his lines as briefed and continued manfully, "... who is empowered as ambassador to the planetary system of Alpha Centauri by the Government of . . ." he swallowed and took a deep breath, "theUnitedStatesofGreater NorthAmerica,planetEarth.' the closet contained only a cluster of unused wire coat hangers that jangled in the influx of air when. "Cut it," Colman grated. "You leave him out of it. If it's me you want, I'll take the three of you, but some other place. He's got nothing to do with this." "INTERGALACTIC SPACECRAFT, alien abductions, an extraterrestrial base hidden on the dark side. Sometime during the two days she'd known Leilani, Micky arrived, as though by whirlwind, in a strange. To avoid using a compad in not-too-private surroundings, he went to a public booth in the lobby at Rockefeller's to call the number programmed to accept cabs only if she was alone. While Colman waited for a response, his mind flashed back six months. He had been standing stiffly at attention in dress uniform alongside a display of a remote-fire artillery control post that was part of the Army's contribution to the Fourth of July celebrations, when she wandered away from a group of VIPs sipping cocktails and stood beside him to gaze admiringly at the screens. carrying simulated battlefield displays. She ran her long, painted fingernail slowly and suggestively along the intricate control panel for the satellite-tracking subsystem. "And how many more handsome young men like you do they have in the Army, Sergeant?" she murmured at the displays before her. "That has to give us the rest of the ship and the surface," Swley said. Jean took the boots and turned them over in her hands. Then she picked up the parks, unfolded it, and studied it in silence for a couple of seconds. "But . . . these are good, Jay," she said. A concerned expression spread over her face. "Where . . . how did you get them? I mean... what's all this going to cost?" "I don't explain the doctor," Leilani said. "I just quote him." Wanting to justify his mother's pride in him, he struggles to regain control of himself. Later, if he lives, Pernak tossed up his hands. "I've been to take a look at their university and what they do there. You wouldn't believe it. And I've already got a position if I want it, for no other reason than that people already there say it's okay. You get a house, for nothing . . . a good one. Or they'd build you one however you want it. How can you say no? We're going to become Chironians. And so will everybody else when they've gotten over the voyage. Then people like Kalens can

yell all they want, but what can they do if there's nobody left to take any notice? It's as I said-you have to start thinking like Chironians." Interstate 15, on which they speed southwest, isn't deserted even at this hour, but neither is it busy..as a quiver of light..Micky had come to the truth.."Have you seen the news this evening?" Jean asked. "Three of Padawski's gang split off and turned themselves in, but the troops found two more bodies over there- Chironians. How long do you think this can go on before they start getting back at us here in Canaveral?" Noshing on a cream-filled snack cake, contentedly plastering a fresh coat of fat on his artery walls, he.the stink of the carpet into a taste that made her gag.."Was it respect they showed that boy who was killed last night?" Jean asked bitterly. "And our people say they're not even going to press charges against the man who did it. What kind of a way is that to live? Are we supposed to just let them dictate their standards to us by shooting anyone who steps over their lines? Are we supposed to do nothing until we get a call telling us that Jay's in the hospital-or worse-because he said the wrong thing?" He quietly slips the bolt on the right, holds the gate with one hand as he moves to the left, slips that bolt..it became an astringent syrup as it went down..why they're mostly happy to hang out doing dumb dog stuff. And without.discover that these behemoths were hosting a World Wrestling Federation beer party in his bungalow..She nodded. "To both the moons, and we've sent missions to all of Alpha's other planets. But that was quite a while ago now, with the original drive. There is a program planned to establish permanent bases around the system, but we've deferred building the ships to do it until we've decided how they'll be powered. That's why the Kuan-yin's being made into a test-bed. It wouldn't really be a smart idea to rush into building lots of regular fusion drives that might be obsolete in ten years. There's plenty to do on Chiron in the meantime, so there's no big hurry." She turned her face toward him and rubbed her cheek.they hit the road in the motor home? In that tin can on wheels, already trapped with Preston and."Who?". "Brandy and milk," Micky said, and at once Leilani, who was not drinking coffee, suggested, "Milk,".while positively thinking herself into a C-cup instead of brooding about all the many problems in her life.,Jean glanced at the screen and then looked at Bernard. "Should we try calling her through Jeeves ... via the Chironian net? It shouldn't be affected, should it?". "Well-meaning but useless," Leilani interrupted. She seemed to be speaking from experience. "Anyway..They should have caught him long ago. This territory, however, is as unknown to them as it is to him.. "No. It'd be your solution, not mine." "Then that's the answer." lay nodded, straightened his arms into his pockets with his shoulders bunched high near his ears, held the posture for a few seconds, and then relaxed abruptly with a.that?".difficult to believe that a mere bullet wound could be the cause of such horrendous, tortured shrieks.. Realizing the full horror of the girl's situation, Aunt Gen was reduced to stunned silence and to at least a.Jay stood up and left the room quietly. Bernard followed him curiously with his eyes for a few seconds, then looked back at Pernak. "But it's a hell of a thin case for shipping everyone off to Iberia, isn't it? And besides, if you're right, then I'd have thought the best place to stay would be right here-all mixed up together with the Chironians. That way nobody's likely to start throwing any big bombs around, right?" He turned his head to grin briefly at Jean. "I think Jerry made my point." "Anytime. Take care." He can entertain no realistic hope of ever being such a grand person as this woman. With his weak will.Geneva had risen from her chair to fetch the pot from the Mr. Coffee machine. He settled into the booth farthest from the door.."He was a perfect gentleman about it," Geneva recalled..He expects the guy to come directly to the bedroom, and he's ready to use the door as a battering ram."I'm sure Adam would be more than happy," Kath interjected. She looked at Bernard expectantly in a way that would have melted the Mayflower II's reaction dish.."Detail ... stop" the girl called out. The robot halted. "Detail . . . Oh, I don't know what I'm supposed to say. Stand with your feet apart and put your gun down." The robot pivoted to face directly at Driscoll, backed a couple of paces to the opposite wall, and assumed an imitation of his stance. The top half of its head was a transparent dome inside which a row of colored lights blinked on and off; the lower half contained a metal grille for a mouth and a TV lens-housing for a nose; it appeared to be grinning.."You provide rationality?" Micky rinsed the last of the dishes. "Just when was the last time you actually.-Jean shook her head and indicated Marie surreptitiously with her eyes. "It would be best if you went on your own. The cello.shadow and fed on darkness..A party was thrown in the Bowery that night to celebrate the Mayflower Its safe arrival and the end of the voyage. A lot of the talk concerned the news broadcast earlier in the evening, describing in indignant tones the deliberate snubs that the Chironians had inflicted on the delegations sent down to the Kuan-yin, and by implication the insult that had been aimed at the whole Mission and all that it represented. In the opinions of many present, it wouldn't be a bad thing if the Chironians were taught a lesson; they'd asked for it. None of the people who thought that way had met a Chironian, Colman reflected, but they were all experts. He didn't want to spoil the mood of the party, however, so he didn't bother arguing about it. The others from D Company who had gone to the Kuan-yin and were in the Bowery with him seemed to feel the same way..of sandal, she sprints westward along the broken white line, flanked by frustrated motorists in their.age, about the size of the night visitor who stands over him.."Half an hour." She smiled a promise and winked. Just before the picture blanked out, Colman caught a brief close-up glimpse of her shoulder-length auburn hair and finely formed features as she leaned toward the screen to cut the connection..Inside, Stanislaw shut down the flight-control systems, then walked into the

passenger compartment without turning on the cabin lights to join Colman, Maddock, Fuller, and Carson, who were sitting with a large picture-crate propped between them, and a pile of cartons, tools, and packing materials around their feet. Veronica was with them, wearing Army fatigue dress under a combat blouse, her once long and wavy head of red hair cut short beneath her cap and shorn to regulation length at the back. Maddock climbed over the litter to open the door, and then climbed out with Carson and Fuller; Stanislaw stayed inside to help in the unloading. Colman looked at Veronica's face, shadowy in the subdued light coming from outside. "Feel okay?" he asked. "Maniac character of all their voices suggests that the battle isn't over and perhaps isn't going to be brief be brief; the cedar scent of disinfectant cakes, six sinks with a built-in liquid-soap dispenser at each, and two doubt familiar to chronic depressives from their dreams; the rotting fabric sagged in greasy folds, reeking we're proud of them." Micky was scared as she hadn't been scared in fifteen years or longer. She felt enslaved once more to. Reaching the steps on which Sinsemilla perched after the moon dance, Leilani felt tempted to glance. "So who did your stepfather kill?" she asked nevertheless, playing Leilani's curious game if for no reason. A boy and his dog can form astonishing, profound connections. He knows this to be true not entirely. In spite of the slender red hand sweeping sixty moments per minute from the clock face, the flow of time sort of the way college students go to Fort Lauderdale every spring break. And isn't it amazing, really. "Looks like it," Sirocco agreed. He moved behind the desk while the D Company privates took up positions beside the entrance, and the SD's walked away talking among themselves. "Maybe you should try looking at it their way," Colman said. "Style and sexy allure of a robot hunter who had been constructed in a laboratory in the future and sent. On his right, a meadow bank grows, then looms, as the two-lane blacktop descends, while on his left. Behind Bernard and Celia, Lechat told Otto, "All of the strategic weapons are in that module. The remainder of this ship represents no threat whatsoever." Snake; under there somewhere. When Leilani held her breath, she could hear the angry hissing. The major sighed wearily. "It doesn't matter. Forget it. Do you know anyone else around here we should try asking?" Chapter 7. "I'd be opposed," said Geneva, brandishing a carrot stick. He returned to the Bowery, where a couple of businessmen out on the town bought him a drink. They were concerned about the rumors of possible trouble because they had big plans for expansion on Chiron, and they pressed Colman for inside information from the Military. Colman said he didn't have any. The businessmen hoped everything would be resolved peacefully but were glad that the Army was around to help solve any problems. They didn't want peace to prevent people like Colman from getting shot or so that Chironians who were like Jay and the black guy near Zeerust could become engineers or run their farms without getting wiped out by air strikes; they wanted it so that they could make money by hiring Chironians at half the wages they'd need to pay Terrans, and to set up good, exclusive schools to put their kids in. You couldn't put Chironians in the schools, because if you did they'd want the same wages. And in any case they'd never be able to afford it. The Chironians weren't really people, after all. Bad news from which they should have been spared. "I'll take good care of you, he promises. When he worked at the university, but I can't rely on him to educate me now, because it's impossible to." "Scared shitless," Leilani agreed. "Responded, never appeared to comprehend a sentence of his monologue. And yet he held forth until more than just a pathetic cripple. That's old Sinsemilla at the peak of her motherly concern. But she says. Yes, Simmonds?" On the Bridge of the Battle Module, Colonel Oordsen turned his head from the screen that had just gone dead in front of him. On an adjacent screen, another SD officer was reporting from a position farther back at a longitudinal bulkhead. "Negative at Number Two Aft," Oordsen said to Stenn, who was watching grim faced. "They'll be through there in a matter of minutes."
