The captain's voice is going up the scale, becoming a shriek, and filled though I am with terror of the Sreen, I am also caught up in fierce admiration for my superior officer. The lamps were low, the jailor was huddled asleep in a comer on a piece of grey canvas, but Amos went immediately to the bars and looked through..I stood outside number seven suddenly feeling like a teen-ager about to pick up his first date. This one you call Nina?this girl?is not a ghi. She is of the ancient race from the high peaks, where the great serpents dwell.

Your workers here, even Moises, know only the jungle, but I come from the great valley beneath the mountains, and as a child I learned to fear those who lurk above. We do not go there, but sometimes the snake-people come to us. In the spring when they awaken, they shed their skins, and for a time they are fresh and clean before the scales grow again. It is then that they come, to mate with men." "I can understand the drink," he said, carefully. "Ethanol is a simple compound and could fit into many different chemistries. But it's hard to believe that you've survived eating the food these plants produced for you." Evidently no one could. But likewise, Crawford could see no reason why it should have happened the way it did. So she went instead to the clearing's edge and cried: "Can you really?" asked the grey man. He pulled a piece of green silk from his pocket, went to the something else, something that could be important but kept eluding him. But this evening as Amos came into the tavern, Billy was quiet, and so was everyone else. Even the left hand dodged. "You don't seem to understand, Mandy? I can't. We're joined indissolubly, till death us do part," Selene said. down the mountain for several minutes. "This is what would kill us, Crawford. What's your first name? Matt. Matt, this baby is a flyer for the first forty thousand meters. It doesn't have the juice to orbit on the jets alone. The wings are folded up now. You probably didn't see them on the way in, but you saw the models. They're very light, supercritical, and designed for this atmosphere. Lou said it was like flying a bathtub, but it flew. And it's a skQI, almost an art. Lou practiced for three years on the best simulators we could build and still had to rely on things you can't learn in a simulator. And he barely got us down in one piece. We didn't noise it around, but it was a damn close thing. Lou was young; so was Cantrell. They were both fresh from flying. They flew every day, they had the feel for it. They were tops." She slumped back into her chair. "I haven't flown anything but trainers for eight years." good my criticism is; if enough readers think it's bad, and the editor thinks so too, presumably hell stop. "We've recalculated everything based on the lower mass without the twenty of you and the six tons of samples we were allowing for. By using the fuel we would have ferried down to you for takeoff, we can make a faster orbit down toward Venus. The departure date for that orbit is seven days away. We'll rendezvous with a drone capsule full of supplies we hadn't counted on." And besides, Lang thought to herself, it's much more dramatic. Plunging sunward on the chancy cometary orbit, their pantries stripped bare, heading for the fateful rendezvous . . . the entire mission on a configuration the people back on Earth wouldn't certify." His eyes clouded. "Then she . . . died. I was fifteen, so I left I did odd jobs and kept reading. Then I just completed. Up until now, play-of-Zorphwar has been possible only against a set of Zorph warships. does get a little involved, doesn't it?" "If we don't make it home from this," I say at length, "if they never hear from us back on Earth, never know what became of their starship?" I looked at him, at his face, at his eyes, at his soul. "There's a gun in the glove compartment," I said. "Hold it," Crawford said. "I just wanted to know if you had any ideas." He was secretly pleased at all her released emotion and Selene's sinewy gymnastic strength behind that swing. What probably saved. "Today the sustenance that our industries crave is not oil, but minerals. Fifty years from now our understanding of controlled-fusion processes will probably have eliminated that source of shortages too, but in the meantime shorter sighted political considerations are recreating the climate of tension and rivalry that hinged around the oil issue at the close of the last century. Obviously, South Africa's importance in this context is shaping the current pattern of power maneuvering, and the probable flashpoint for another East-West collision will again be the Iran-Palestine border region, which our strategists expect the Soviets to contest to gain access to the Indian Ocean in preparation for the support of a war of so-called black African liberation against the South." "Very well then, I have a plan." Again Amos began to whisper through the bars, and Jack smiled and stretched out upon the bed. Ought to undress, but he was too tired. The throbbing in his head was worse, pulsing to the beat of the drums. And the hate was in his head, too. God, that ugly face! Like the thing in mythology? what was it? the Medusa. It's a cliché of the American entertainment industry that if it works (i.e., if it makes money), do it. Thomas Disch is one of the handful of writers whose work is as much admired by critics (and readers) of mainstream as well as science fiction. He wrote six fine stories for F&SF in the 1960s. Since then he has published poetry (The Right Way to Figure Plumbing), an anthology, Bad Moon Rising, and three remarkable novels, The Genocides (1964), Camp Concentration (1968) and 334. He has just completed a new sf novel, On Wings of Song. Genetic manipulation, especially cloning, has been much in the news recently, and in the essay below, Dr. Asimov takes up the subject with his customary energy and intelligence. Imagine, if you will, one hundred Isaac Asimov clones. But for those with conventional pets we should mention, It took perseverance, alertness, and a willingness to break the rules to watch the

sunrise in Tharsis Canyon. Matthew Crawford shivered in the dark, his suit heater turned to emergency setting, his eyes trained toward the east. He knew he had to be watchful. Yesterday he had missed it entirely, snatched away from him in the middle of a long, unavoidable yawn. His jaw muscles stretched, but he controlled it and kept his eyes firmly open. After a while Jain rescues me, "It isn't your hassle, and it isn't mine anymore." out of them. Amanda's wrist bent back farther. Her fingers fought to hold on to the knife, but with each moment they loosed more. You are watching an old movie, Bob and Ted and Carol and Alice. The humor seems infantile and unimaginative to you; you are not interested in the actresses' occasional seminudity. What strikes you as hilarious is the coyness, the sidelong glances, smiles, grimaces hinting at things that will never be shown on the screen. You realize that these people have never seen anyone but then\* most intimate friends without clothing, have never seen any adult shit or piss, and would be embarrassed or disgusted if they did. Why did children say "pee-pee" and "poo-poo," and then giggle? You have read scholarly books about taboos on "bodily functions," but why was shitting worse than sneezing? I called Amanda later. I expected to find her herself, yesterday already forgotten, but she still. Detweiler moaned and came to. He rose from the couch, still groggy. He saw the thing, and a look of absolute grief appeared on his face. "Of course not." But I couldn't figure out a pattern for the victims: male, female, little kids, old aunties, married, like you, and we have enjoyed your company. If we didn't, we would certainly not be offering this. garden, he put all his reward in the wheelbarrow, went back to the small door and knocked. THE COMPANY REPRESENTATIVE: I will be brief. Common people, even uncommon ones, tend to romanticize reality, often to fantastic extremes, and invariably in these days romanticism acquires religious overtones. In the present instance a perfectly practical undertaking has been interpreted, on the one hand, as an attempt on the part of the King to get high enough above the ground so he can shoot an arrow into Heaven and, on the other hand, as an attempt on the part of the local citizens, especially the rich ones, to provide themselves with an avenue into Heaven. The two interpretations have somehow intermingled and become one. The absurdity of the second is self-evident and unworthy of closer scrutiny. The absurdity of the first is also self-evident, but for the record I'd like to cite a few pertinent facts. "Well, to be completely candid, Columbine, it's hard for me to imagine your feeling anything but terrific. To be Miss Georgia and have such a lot of talent? isn't that enough? I would have thought you'd be very happy." Q: What happens when there's No Blade of Grass? make a faster orbit down toward Venus. The departure date for that orbit is seven days away. We'll. 225.
