I finally started looking at the street signs. I was on Mullholland. I kept going west for a long time, crossed the San Diego Freeway, into the Santa Monica Mountains. The pavement ends a couple of miles past the freeway, and there's ten or fifteen miles of dirt road before the pavement picks up again nearly to Topanga. The road isn't traveled much, there are no houses on it, and people don't like to get their cars dusty. I was about in the middle of the unpaved section when Detweiler seemed to calm down. He spent most of August, when he should have been on vacation, trying various methods of detecting sound through the device. By focusing on the interior of a speaker's larynx and using infrared, he was able to convert the visible vibrations of the vocal cords into sound of fair quality, but that did not satisfy him. He worked for a while on vibrations picked up from panes of glass in windows and on framed pictures, and he experimented briefly with the diaphragms in speaker systems, intercoms and telephones. He kept on into October without stopping and finally achieved a system that would give tinny but recognizable sound from any vibrating surface?a wall, a floor, even the speaker's own cheek or forehead..Crawford relaxed.
