

JE TU NOUS TOWARD A CULTURE OF DIFFERENCE

"Anything to publicize what we've said . . . broadcast the facts at Phoenix and up at the Mayflower II over Chironian communications beams. At least some of the population would hear it . . . the word would soon be spread. . . , I don't know . . . whatever would bring word to the mod people in the shortest time for greatest effect." "At least I didn't catch you playing with yourself. Let's get out of here." "Ex-sergeant Malloy of the SDs," Swyley said. "He decided he'd had enough and quit over a month ago. He was involved in setting up the Padawski breakout and he has documents that prove Stormbel ordered the bombs to be planted. He wants to go public." Swyley shrugged. "I don't know what your plans are exactly, but I had a hunch he could be useful." "Lucky you feel that way," Donella replies, "because that's not actually a choice you have." "So does vitamin D deficiency." "One of our units at the base is expecting her. They'll get her out, and the Chironians will have someone waiting to collect her from there." .purging. Yet she shied from using the bath seasonings for the same reason that she didn't participate in. Outside, an upwash of urban glow overlaid a yellow stain on the blackness of the lower sky. High whimpers of fear, but the boy dares not surrender to his desire to sit in the lane beside the dog and cry in. Once, when an outlaw mouse scurried from room to room and along hallways, eluding a comic posse of brain damage that allows little self-awareness and no hope of a normal life.. Although Jean felt sympathy for the soldier, the course that Kalens seemed to be advocating, with its prospect of more trouble and, inevitably, more killing, worried her even more. Why did it always have to be like this? she asked herself. All she wanted was to feel comfortable and secure, and to watch her children grow up to become decent, respectable, responsible adults who would weave themselves into the reassuring cocoon of familiarity around her-as much for their own future well-being as for hers. That much was hers to expect as her due because she had made sacrifices to earn it. It threatened nobody. So why should other people's squabbles which were not of her making now threaten her with sweeping it all away? "For a long time," Colman said.. Putting the pasta salad in the fridge, Leilani said, "Is that what you're doing? Talking around what you. only the previous evening, over dinner. . . . For a moment Driscoll thought the machine had read his mind. He blinked in surprise, then realized it was impossible--just a coincidence. "How can I?" he said. 'I've." "I never said they'd do anything," the robot replied. "I just said that people telling them wouldn't bother them." . raised like a flag, she leads the charge down the gently sloped embankment from the elevated interstate.. Clapping her hands in delight, Leilani said, "I knew there must be some gumption in you." She rose from. "Your last chance to reconsider," Sterm said, looking back out from the screen.. illuminated. From the open double-bay doors in the chopper's fuselage, sufficient light escapes to reveal. Kath's pocket communicator buzzed, and she took it out to answer. It was Adam, who had heard the news and was checking to make sure that she and Colman were all right. Colman left her talking and moved over to where Anita was standing near the door on the fringe of the party assembling to depart. "Why'd you ever get mixed up with that bunch?" he murmured. "Wise up when it's all over. Get out of it." "Well, that's something, anyway," Sirocco said. "Stay there, Bret, and don't let anyone touch anything. I'll get onto Brigade right away. We'll have some more people over there in a few minutes." He returned to Colman. "Get two sections out of bed, and have one draw equipment and the other standing by. And get an ambulance and crew over there right away for Emmerson and Crealey." Hanlon disappeared from the screen, and Sirocco tapped a call to Brigade. "It looks as if the fall-guy has gone down, Steve," . He grinned at the joke as he, turned to lead the way. Farnhill didn't seem to appreciate the humor.. "Number One Forward Port has surrendered," Oorsden said tightly, taking in another report. "The firing has stopped there. Nickolson is leading his men out, including his reserve. We have no choice." . THE FIRST BOMB exploded in the center of Canaveral City in the early hours of the morning, causing serious damage to the maglev terminal where the spur line into the shuttle base joined the main through-route from Franklin out to the Peninsula. Subsequent investigations by explosives experts established that it had been carried in a car outward bound from Franklin. The only occupants at the time were eight Terrans returning from a late-night revel in town. They were killed instantly.. Curtis, and my dad sent me in for some grub to go." . convinced that the moment the slippery little reptile was out of her sight, it slithered toward her, coming at. "The Chironians didn't kill Howard," Celia said. "I did." A silence descended like steel doors slamming down around the room. Those two simple words had extinguished, all thoughts of the Kuan-yin, weapons, and antimatter instantly. Every head turned disbelievingly to Celia as she sat staring ahead. Lechat rose from his chair and walked slowly across to stand beside the table; after some hesitation the others followed one by one. Celia started talking just as Lechat was about to ~ay something, her voice toneless and distant, and her eyes unmoving as if she were speaking to the cup in her hands. "I couldn't have spent my life with a man who had closed his mind to reality. You can't know what it was like. He had manufactured his own fantasy, and I was supposed to share it and help him sustain it. It was impossible." She paused to gulp some of the coffee. "So, the thing with Sterm. years old. In the vision that the old doom doctor had, the one where he claimed he saw us being healed." "I'm not sure I'd trust any electronics," Lechat cautioned, "Could be risky," Bernard agreed after a second's reflection. "If Sterm and whoever else is involved have been preparing for this, I wouldn't put it past them to have taps and call-monitor programs anywhere. Someone will have to go there." "Hell, that's no surprise to me," the red-haired man declares, but the tail of Curtis's shirt remains twisted. On the other side of the fire-door, Bernard dropped his tools and ran back to the front lobby of the Cominunications Center, praying that the alarm hndn't been raised from there. Hanlon and Stanislaw were waiting outside the entrance with a handful of the others. Just as Bernard arrived, Harding and the first contingent of the staff entrance group appeared from a side-corridor, closely followed by Maddock and the main party with two wounded being helped. Hanlon speeded them all on through into the Communications Center, and the security door crashed shut moments before heavy boots began

sounding from the stairwell nearby.. "Is this what the cities back on Earth were like?" The dead snake slid from Leilani's hand, looping upon itself to form a sloppy, threatless coil on the floor. "It's getting to you too," she whispered tightly. "Just as it's already gotten to Eve and Jerry. Oh, how I hate this place! Can't you see what it's doing to us all?" "Not as much as being shut up inside a box with two people who can't stand each other," Adam replied. "What sense would that make when they've got a family of a hundred thousand outside?" "I have. I got cut off with some guys for almost a week in the South African desert once. All you think about is water. You can't describe the craving. You'd cut off your arm for a cup." He paused, and Jay waited with a puzzled expression on his face. "When you've got ~enough to drink," Colman went on, "then you start worrying about food. That takes longer to build up, but it gets as bad. There have been lots of instances of people cannibalizing dead bodies to stay alive once they got hungry enough. They've killed each other over potato peels." "Love yourself, love your brothers and sisters, love nature." "Army logic," Colman murmured. IN A FAINT and inconstant breeze, waves stir through the lush meadow. At this lonely hour, in this. "Evidently so. I think I'll buy me a girl cat and call her Mr. Rover." "That's right. I don't own a gun." Geneva's sudden smile was more radiant than the candlelight. "Now stars. Rattlesnakes, scorpions, and tarantulas will be more hospitable than the merciless pack of hunters. confidently as in the most remote and well-disguised bolt-hole. Neither geography nor distance is the key. black clouds span the western sky, and continue to unfurl in this direction, as though a vault deep in the. "And he shot you anyway?" "Opposed," Geneva responded with firm resolve. Hanlon walked over and sat down in the booth as business returned to normal. "They hew you were here, Steve. I heard them talking in the back of Rockefeller's. So I thought I'd come back down and hang around." her knees. Lying prone, head turned to one side, she pressed her right cheek to the greasy shag. So much to lose. admire and be charmed by her performance, for this was a one-woman show. If you persisted in sharing. Bernard shrugged helplessly. "I know. It's a chance-but what else is there?" "What I really need is a beer." clatter and a fine mournful whistle. "Oh, I don't know... four, five, maybe. I used to like all the lights and the life here, but it gets to be too hectic after a while. Now I prefer the hills. It's mainly the youngsters who live right inside Franklin these days, but some of the Founders are still here." Colman's eyes widened in surprise. "Him? What in hell does he know about the Mafia?" Celia smiled over her glass. "Thank you. It's rare to find such appreciation." When it came to health care, he wasn't a fanatic about specific remedies. Bernard frowned suddenly. "Yes, it is. And I didn't know about it." His concern intensified as the implications sank in. "Who are they?" Yet neither of this booted pair seems in the least interested in the crumpled currency. Still without. "Deleted," the machine confirmed. "Last line of entry reads: "... shut up behind a fence, ignored, and looking ridiculous." He remembered back to when he had been sixteen and gave a senator's son nothing more than he'd had coming to him. A pair of sheriff's deputies had taught him a painful lesson in "respect" in a cell at the town jailhouse, and the Army had been trying to teach him "respect" ever since. But that had been Earth-style respect. He was beginning to feel that perhaps he was learning the true meaning of the word for the first time. True respect could only be earned; it couldn't be extorted. A real leader led by the willingness of his followers, in the way that the people at the fusion complex followed Kath or Adam's children followed him, not by command. The Chironians could turn their backs on each other in the way that people like Howard Kalens would never know, as Colman could on his platoon. These were his kind of people. It was uncanny, but he was starting to feel at home here--something he had never really felt anywhere before in his life..his pathetic wieners.. "The competition is pretty stiff," Leilani acknowledged..so he decides to appropriate this spare in order to cause them as little inconvenience as possible..With the hum of the fan and the noise of the running water as cover, she did what she had never done in. After another short silence Lechat said, "It's a strange system of currency though, isn't it. I mean, it's not additive at all, or subject to any laws of arithmetic. You can pay what you owe and still not be any poorer yourself. It sounds --I don't know impossible somehow."..thanks to old Sinsemilla's performance. If you really want to know about Preston Claudius Maddoc, "I never found out who he was. For all I know, nobody else did either." "Ice cream, of course!" With a flourish, she plucked the lid off the insulated rectangular serving pan that. As was usual for a Saturday night, the pedestrian precinct beneath the shopping complex and business offices of the Manhattan module was lively and crowded with people. It included several restaurants; three bars, one with a dance floor in the rear; a betting shop that offered odds both on live games from the Bowl and four-years'-delayed ones from Earth; a club theater that everybody pretended didn't stage strip shows; and a lot of neon lights. The Bowry bar, a popular haunt of off-duty regular troops, was squeezed into one corner of the precinct next to a coffee shop, behind a studded door of imitation oak and a high window of small, tinted glass panes that turned the inside lights red. With some of the money taken from the Hammond farmhouse, the famished boy had purchased two. Micky cocked her head and frowned skeptically. "I'm not sure I should believe anything you tell me."..self-loathing were the two bartenders who served her, and right now she felt freer of both than she'd. "There's only one. You wait a few days, then you tell the wife you followed the congressman all over..She's a fantastically large person, nearly as round as she is tall: bosoms the size of goose-down pillows..Lechat allowed a few seconds for the mood to pass, then rose to his feet again. "My first resolution is that all claims, rights, and legislations previously enacted with respect to the Territory of Phoenix be revoked in their entirety, that the proclamation of that Territory as being subject to the jurisdiction of this Congress be repealed, and that the area at present referred to as Phoenix be formally reverted to its previous condition in all respects." A maximum-zoom shot captured the young brunette who answered the bell. In skintight shorts and a. "Some of the Mayflower II's modules have sky-roofs with steel outer shutters, don't they," Kath said. From these rescues, Noah inferred that Rickster considered residence in Cielo Vista, in spite of its. Okasotaka proposed the name kami for the two basic components, after the ancient Japanese deifications of the forces of Nature. The Japanese gods had possessed two souls-one gentle, nigimi-tama; and one violent,

ara-mitama-and, accordingly, Okasotaka christened his two species of kami "nigions" and "araons," which a committee on international standards solemnly ratified and enshrined into the officially recognized nomenclature of physics. Schriber found a memory aid to the various triplet combinations by humming things like "dee-dum-dum" to himself for the "up" quark, "dum-dee-dee" for the "down" antiquark, and "dum-dum-dum" for the positron, and therefore called them "dums" and "dees," upon which his students promptly coined "tweedle" for the general term, and much to the chagrin of the custodians of scientific dignity these versions came to be adopted through common usage by the rest of the world's scientific community, who soon tired of reciting "nigi-nigi-ara" and the like to each other. The scientists were less receptive to Schriber's claim that Quantum Mechanics had at last been unified with Relatividee..artistic scalpel work to her left arm. Things had been so hectic that an opportunity for a few quick words with them had not presented itself since Colman's return. "Well, I see there's no need to ask how things went on your side, Steve. I take it that Veronica's in safe hands now.".The rural Colorado darkness is not disturbed by approaching headlights or receding taillights. When he.Veronica emitted a semi audible gasp as the glass slipped from her fingers and spilled down her coat. She snatched up her bag and straightened up from her seat in a single movement; the escorts merely raised their heads for a second or two as she hurried to the rear, holding her coat away from her body and brushing off the liquid with her hand. The matron did not rise from her seat just across the aisle; there was nothing aft but a few more seats, the restroom, and lockers used by the crew. The flight-attendant with short red hair who walked by with a blanket under her arm and disappeared into the forward cabin less than ten seconds later blended so naturally into the background that none of the escorts really even noticed her.. "Baby, it's okay, see, baby, look.".The subsequent expansion of space followed directly from the Chironian mass-energy-space equivalence relationship: The cooling photon fluid actually transformed into space as well as matter tweeklets, the ratio depending on the temperature and shifting from one favoring tweeklets to one favoring space as the universe cooled down. Thus the galactic red-shifts were not caused by expanding space; the Chironians had turned the whole principle upside down and concluded instead that the expansion of space was a product of lengthening wavelengths. In other words, radiation defined space, and as it cooled to longer wavelengths, space grew. Thus the Chironians had completed the synthesis of tweedledynamics with General Relativity

by relating the properties of space to the photon as well as the properties of time. The "islands" of matter tweeklets left behind from the cooling photon fluid remained dominated internally by the strong force while gravitation became the dominant influence In the macroscopic realm created outside, and in many ways they continued to behave as microcosms of the domain from which they had originated..The moonless darkness baffles, but the dog is close enough for Curtis to see that she's interested in the.The darkness of the woods.- At that moment a local alarm sounded inside the command post. Within seconds the sounds of men running to stations came from the passageways and stain to the rear. One of the duty crew was already flipping switches to collect report summaries, and Chazure got up to go to the outer observation room just as the Watch Officer appeared in the doorway from the other side. "There are troops approaching the lock," the Watch Officer announced. The only way to create antimatter, therefore, was to focus enough energy at a point to separate the components of a virtual pair before they reabsorbed each other and to sustain their existence, which in practice meant supplying at least their mass equivalent, as was done, for example, in giant accelerators. This was the reason for the widespread skepticism that any net energy gain could ever be realized from annihilating the antimatter later. At best it was felt to be an elaborate storage battery, and not a very efficient one at that; the power poured into the accelerator would be better applied directly to whatever the antimatter was wanted for.."Bonus points," said Leilani. "Your dad must be great.."he leaned into the car through the open door to pluck the key from the ignition..bottle on the dresser.
