

KEEPING SECRETS AN ANTHOLOGY

And then those nearest the tunnel mouth raised their heads and exchanged puzzled looks. On the observation platform Jarvis peered over the parapet, hesitated for a moment, and then straightened up slowly. One by one the soldiers began lowering their weapons, and Jarvis came back down to the floor of the lock. He smooths the bills and sorts them. Not much to sort. He counts his treasury. Not much to count. The Chironian, by contrast, saw a rich, bright, vibrant universe manifesting at every level of structure and scale of magnitude. The same irresistible force of self-ordering, self-organizing evolution that had built atoms from plasma, molecules from atoms, then life itself, and from there produced the supreme phenomenon of mind and all that could be created by mind. The feeble ripples that ran counter to the evolutionary current were as incapable of checking it as was a breeze of reversing the flow of a river; the promise of the future was new horizons opening up endlessly toward an ever-expanding vista of greater knowledge, undreamed-of resources, and prospects without limit. Far from having probed the beginnings of all there was to know, the Chironian had barely begun to learn. "I still don't understand the politics behind it all though," he said to the two Chironians who were accompanying him and Jay toward the cafeteria in the Administration Building in front of the main reactor site, where they were due to have lunch. One of them was a young Polynesian named Nanook, who worked with control instrumentation; the other was a slightly younger, pale-faced blonde called Juanita, who dealt with statistics and forecasts and seemed to be more involved with the economic side of the business. Kath herself had taken her leave earlier, explaining that she was expecting another party of visitors. Bernard spread his hands in an imploring gesture. "I mean... who owns the place? Who decides the policies for running it?" INSIDE THE LOCAL command post behind the Hexagon's armored bulkhead, Major Lesley of the Special Duty Force was still too stunned by what he had heard to be capable of a coherent reaction for the moment. He stared at the companel where a screen showed a view from the Columbia District, where the SD guard commander had entered the Communications Center under a truce flag some minutes previously to talk with Borftein, and tried to separate the conflicting emotions in his head. Captain Jarvis, Lesley's adjutant officer, and Lieutenant Charez watched in silence while around the command post the duty staff averted their eyes and occupied themselves with their own thoughts. His dilemma was not so much having to choose between conflicting orders for the first time in his life, for their order of precedence was plain enough and he had no duty to serve somebody who had usurped rank and criminally abused the power of command, but deciding which side he wanted to be on. "But you can't . . . I won't go. I want to move to Iberia." Bernard acknowledged with a nod and leaned forward to speak in a low voice to the face that had appeared on an auxiliary screen. "This is urgent, Admiral. Make sure that all the sky-roof outer shutters are closed immediately." CHAPTER TWENTY-THREE. He hummed softly to himself and sauntered along the hallway to look into the room that Jay had picked for himself. Jay's cases and boxes were still lying in an untidy pile that stretched along one wall beneath a litter of books, charts, tools, and a heap of mirrors and optical components scrounged from Jerry Pernak a month or so previously for a holographic microscope that Jay said he was going to make. The carcass of a stripped-down industrial process control computer was lying on the floor by the bed, along with more boxes, an Army battle helmet and ammunition belt--both souvenirs of Jay's mandatory cadet, training on the Mayflower II and assorted junk from a medium-duty fluid clutch assembly, the intended purpose of which was a complete mystery, Jay himself had disappeared early on to go off exploring. Bernard shrugged to himself. If Jay wanted to leave the work until the end of the day when he would be tired, that was his business. cup, Micky didn't mind the edge that the brew acquired. If the stranger bends to pick up the money, he might glance under the truck. "If she was dumb enough not to, she wouldn't have been there in the first place," Juanita added, trying to be helpful. Pernak had a surprisingly long stride for his height, and Jay had to hurry to keep up as they walked a couple of blocks through densely packed but ingeniously secluded interlocking terraces of Maryland residential units. It wasn't long before Pernak was talking about phase-. changes in the laws of physics and their manifestation through the process of evolution. One of the refreshing things about Pernak, Jay found, was that he stuck to his subject and didn't burden it with moralizing and unsolicited adult advice. He had never been able to make up his mind whether Pernak was secretly a skeptic about things like that or just believed in minding his own business, but he had never found a way of leading up to the question. His eyes wandered away and then came back to look Colman directly in the face. "Look, Steve, about that time up on the ship in the pump bay. I, er... I--". "Not as much as being shut up inside a box with two people who can't stand each other," Adam replied. "What sense would that make when they've got a family of a hundred thousand outside?".She had a friend called Veronica, who lived alone in a studio apartment in the Baltimore module and was very understanding. Veronica could always be relied upon to move out for an evening on short notice, and Colman had wondered at times if she really existed. She returned an almost imperceptible nod. Lechat looked back at the screen. "Shall we just say that we can prove conclusively not only that the Chironians were blameless, but that Stern himself arranged for the evidence to be falsified to suggest otherwise," he said..So that was it! Merrick's blue-eyed boy had let him down, and he needed a replacement. Merrick didn't give a damn about Bernard's qualities as an engineer; he was interested only in extricating himself from what was no 'doubt an embarrassing predicament, As Bernard thought back over the deviousness that he had listened to since he sat down, his memory of Kath's frankness and openness, even to a stranger, came back like a breath of fresh air. "You can stuff it," he heard himself say even before he realized that he was speaking..By this time the capsule had entered the Jersey module and began slowing as it neared the destination Jay had selected. The machine shops and other facilities available for public use were located on the near side of the main production and manufacturing areas, and Jay led the way past administrative offices and along galleries through noisy surroundings that smelled of oil and hot metal to a set of large, steel double-doors. A smaller side door brought them to a check in counter topped by a glass partition behind which the attendant and a watchman were playing cribbage across a scratched and battered metal desk. The attendant stood and shuffled over when Jay and Pernak appeared, and Jay presented a school pass which entitled him to free use of the facilities. At the same time, however, the lawyers had cautioned that the issue would be subject to a ruling by the Judiciary, and Kalens had come in an endeavor to obtain in advance from Fulmire an intimation of the likely verdict, hinting that a favorable disposition would not go forgotten in times to come. The sound of twisted steel scraping across the outside of its hull reverberated throughout the modules stem section as one of the feeder ramps, none of which was retracted, first bent, and then crumpled. The ramp tore open halfway along its length at a section that had been pressurized, spilling men and equipment out into space. "Oh, Jesus-" He looked at the two. "Look, I need a few minutes. Jay, stay right there." He walked across to the woman and was almost face to face with her before he recognized Veronica, for once looking neither impish nor mischievous..Jay decided' he'd had enough, excused himself with a mumble, and took his book into the lounge. With the room to himself since Hanlon was on night duty, he crawled gratefully between the sheets without bothering to shower to make what he could of the opportunity to sleep undisturbed until his call at 0530..Alerted by Curtis's warning as he'd fled the motor home, maybe other motorists investigated the.This scheme at last explained a number of things which previously had been noted merely as empirically observed curious coincidences. Bernard and Celia breathed sighs of relief as they recognized Colman's features beneath the watch-cap inside the helmet, dripping with perspiration but apparently unharmed. Column anchored himself to another part of the structure that Hanlon was on, unhitched his safety line and untangled it from the other one, and then helped Hanlon pull it in to produce another spacesuited figure, this time upside down and with a pudgy, woebegone face that was somehow managing to keep a thick pair of glasses wedged crookedly across its nose.. "Half an hour." She smiled a promise and winked. Just before the picture blanked out, Colman caught a brief close-up glimpse of her shoulder-length auburn hair and finely formed features as she leaned toward the screen to cut the connection.. Lechat asked, puzzled..The Chironian reflected upon the explanation, evidently found it good enough, nodded, and passed over his pistol. The girl who had wounded Ramelly followed suit. Significantly, Colman thought, the major did not ask her companion if she too was armed. Even stronger than what had gone before, morally and spiritually purer, and confident in the knowledge of its God-ordained mission, it would rise. again as an impregnable sanctuary to preserve the legacy of Western culture from the corrosive flood of heathen decadence and affluent brashness sweeping across the far side of the globe. So the credo' had run. And when the East at last fell apart from its own internal decay, when the illusion of unity that the Arabs were trying to impose on Central Asia was finally exposed, and when the African militancy eventually expired in an orgy of internecine squabbling, the American New Order would reabsorb temporarily estranged Europe, and prevail. That had been the quest..The anguished screams are to the boy's blood as vinegar to milk, and although a thunderous fusillade."On your way." She heaved herself to her feet and looked around. "Now, where did I leave my coat?" "Do you? Or is it that you are unable, yet, to accept it?" Celia forced as much coldness into her voice as she could muster. "I don't like being told that I'm interested in protecting my own skin."
