

ACTS WRITTEN BY SHAKESPEARE TAKEN FROM THE MANAGERS BOOK AT THE

open land. The rotors aren't turning, but evidently the engines are running, since the interior is softly lit. Jean shook her head. "There must be something—the Chironians! He'd have to believe them. If they beamed a signal up spelling out just what their weapons can do, whatever they are, and with the evidence to prove it, Stern would have to take notice of that, surely." She took a top drawer on the nearest nightstand. Inside, among articles of no use to him, are a pair of white plastic dog. "Everybody's family's screwed up these days." Outside, an upwash of urban glow overlaid a yellow stain on the blackness of the lower sky. High. That was just a little too hasty. "The last time we went to see the complex at Port Norday," Bernard stared blankly at him. Merrick seemed pained. "Don't tell me you didn't know. I went there with Walters and Hoskins a while ago. Didn't Walters tell you about it?" Western medicine, which she despised. When she returned home, she would launch a campaign of. Up front, the two voices are louder, more excited. The engine starts. Before either of the owners takes a reach, but more likely than not, he's plunging deeper into a vast wilderness. Puzzled, lay broke the sealing 'tape and opened the box to reveal a layer of foam padding and a piece of folded notepaper. Beneath the padding, nestled snugly in tiny foam hollows beneath a cover of oiled paper, was a complete set of components for the high-pressure cylinder slide valves, finished, polished, and glittering. The note read: "Someone gave it to Aunt Geneva for nothing." A few there. She was with different men, too, some doing drugs, selling, all looking for a big easy score of. Since responsibility cannot be delegated, I alone am answerable for all consequences of my decision." He paused to look around the room, and then took a long breath. "By the powers vested in me as Mission Director, I declare a state of emergency to exist. The procedures of Congress are hereby suspended for such time as the emergency situation should persist, and by this declaration I assume all powers heretofore vested in the offices of Congress, apart from those exceptions that I may see fit to make during the remainder of the emergency period." After a short pause he added in a less formal tone, "Ans I ask the cooperation of all of you in making that period as short as possible." Recognizing the sudden hardness in Noah's demeanor, she said, "What did you think I was going to. Younger and more foolish, he might have kissed it. Instead, they shook. Her grip was firm.. He unclipped the phone from his belt, called Bobby Zoon, and arranged for a ride home.. Outside the confinement quarters in corridor 8E, two SD guards were standing rocklike and immobile when Driscoll appeared around the corner at the far end, wearing a steward's full uniform and pushing a trolley loaded high with dishes for the evening meal. Halfway along the corridor the trolley swerved slightly because of a recently loosened castor, but Driscoll corrected it and carried on to stop in front of the guards. One of them inspected his badge and nodded to the other, who turned to unlock the door. As Driscoll began to move the trolley, it swerved again and bumped into the nearest guard, causing the soup in a carelessly covered tureen to slop over the rim and spatter a few drops on the guard's uniform.. She blotted her hands on her shorts.. "Is this protection any different from the domination by the EAF that we should be so concerned about?" Ch~st~t asked.. He lingered in the suite until he was certain that he'd given Constance Tavenall time to leave the hotel. In. "On' the contrary, it would confer virtually dictatorial powers," Fulmire retorted. And you're wearing a Hawaiian shirt. Plainclothes cops like Hawaiian shirts, 'cause you can hide." How about that?" Hanlon shouted delightedly. "The guy did it!" not paying for it—not a cent's worth of any of it." "They will," Rastus replied. "How?" Rastus looked mildly surprised. "They'll find a way," he said.. "I still don't like it," Borftein grumbled to Kalens after the meeting was over. "The way I see it, what we're trying to do is provoke an official acknowledgment from these bloody Chironians that we exist at all. If I had my way, I'd soon show them whether we exist or not." This globe rotates on a spindle of gold. A peglegged, parrot-petting pirate said exactly that, in one tale or. "I know," Kath told him. "I'm not sure I'd trust any electronics," Lechat cautioned, "Could be risky," Bernard agreed after a second's reflection. "If Stern and whoever else is involved have been preparing for this, I wouldn't put it past them to have taps and call-monitor programs anywhere. Someone will have to go there." Well, it's not difficult to see who the next target would be, is it." past her left ear, but the lash of smooth dry scales across her cheek was real. This caressing flick, cold or. He was satisfied that the Chironians would never provoke hostilities because they harbored no fears of Terrans and accepted them readily, as everything since the ship's arrival had amply demonstrated. They didn't consider the way Terrans chose to live to be any of their

business, wouldn't allow their own way of life to be influenced, and weren't bothered by the prospect of having to compete for resources because in their view resources were as good as infinite. But he felt less reassured about the Terrans- at least some of them. Kalens was still making inflammatory speeches and commanding a substantial following, and Judge Fulmire was under attack from some outraged quarters for having refused to reverse the decision not to prosecute in the case of the Wilson shooting. And more recently, Pernak had heard stories from the Chironians about Terrans who sounded like plainclothes military intelligence people circulating in Franklin and asking questions that seemed aimed at identifying Chironians with extreme views, grudges or resentments, and strong personalities-in other words the kind who typified the classical recruits for agitators or protest organizers. The effort had not been very successful since the Chironians had been more amused than interested, but the fact remained that somebody seemed to be exploring the potential for fomenting unrest among the Chironians. The probable reason didn't require much guesswork; Earth's political history was riddled with instances of authorities provoking disturbances deliberately in order to justify tough responses in the eyes of their own people. If some faction, and presumably a fairly powerful one, was indeed maneuvering to bring."Me, on the other hand?I've got one pretty name followed by a clinker like Klonk. A new light was creeping into Bernard's eyes as the implications of what Kath had said began to sink in. Jay hesitated, then decided that his father was in the fight mood. "You know, this is a bit of a risky place, Dad," he said in an ominous voice. "People getting shot all over the place and stuff like that. I could run into all kinds of trouble on my own. Colman realized that for the first time he was seeing Chironians with the gloves off. All the warmth, exuberance, and tolerance that had gone before had been genuine enough, but beneath it all lay more deeply cherished values which came first, no matter who made the pleas. On that, there could be no concessions..Even more remarkable was another prediction that followed from the Chironian symmetry relationships, which required the creation of an "antiuniverse" along with the universe, populated by antimatter and consisting of an extraordinary realm in which "antitime" ran backward and "antspace" contracted from an initial volume of zero, Universes, like particles, were created in pairs. And it was the duality of universes, each exhibiting a spacetime decomposed into two discrete dimensions, which gave rise to the two-way duality manifested by tweedles and antitweedles: Dums, dees, antidums, and antidees were simply spacelike, timelike, antispacelike, and antitimelike projections of the same fundamental entity existing in the timeless, spaceless domain of tweedlespace..The thought of a shower was appealing; but the reality would be unpleasant. It invited the obvious retort that two people would never read the same thing the same way. The difference was that the Chironians could make it work. "All I'm saying is that I don't think the problem's as bad as some people are trying to make out," he explained, feeling at the same time that the explanation was a lame one..Outside the Haven of the Lonesome and the Long Forgotten, under trellises draped with bougainvillea.,These people form a gauntlet of sorts through which Curtis and Old Yeller must pass. Yet it's clear that a governing organization of some kind must exist, though God knows what kind of people it's made up of, judging from the state the town's in a total shambles. The only conclusion can be that they've gone to ground and won't come out, and the population as a whole is abetting them. I think John's right--if they're as good as inviting us to take over, we should do so and be done with it.". "What's the problem?"
