"What are you talking about, Bernard?" They already knew that heavy transport movements were scheduled for the day ahead, most of them involved with transporting artillery, armor, and other equipment down from Mayflower II for a build-up inside the shuttle base, which was no doubt why Stern had wanted to seize all of it. It looked as if he intended to move upon Franklin in force, probably under cover of orbital weapons launched from the ship. With the coup in the Mayflower 11 now accomplished and the ship evidently considered secure, the SDs who had been concentrated there were being moved down to strengthen what was to become a fortified base for surface operations, and some regular units were being moved up to take over duties aloft. Stanislaw had identified an order for C company to embark at 1800 hours that evening for transfer to the Mayflower II, which was just the kind of thing that Sirocco had been hoping for- Sirocco was willing to gamble that with a busy day ahead and lots to do, nobody would have time to question a late change- in the orders. home. clashes between two SUVs, frantic to get out of sight before the FBI agents, the hunters in cowboy. surpluses of power at grossly high prices. Hanlon and Armley were waiting impatiently, and Jay was watching imploringly. He thought furiously. Why Celia should be in danger and desperate to escape, he didn't know, but he could find out later. If he said he had to get away for a few hours. Sirocco would cover for him, so that was okay. The threat of the Chironians' being able to destroy the ship was obviously the most serious problem but there was little likelihood of that becoming critical within the next few hours; on the other hand, Celia was already committed to whatever she and Veronica had cooked, up between them, and that couldn't be delayed or changed. So Celia would have to come first. Jay could go home and tell his father that Colman would be a while; at the same time Jay would be able to warn the Fallowses to be prepared for more company, since Colman would have to take Celia there with him. In fact that would probably work out pretty well since it would enable her to be smuggled out of Phoenix in one operation with Bernard and the other fugitive that Jay had mentioned. Vehicles flying out of Phoenix were programmed to operate only inside a narrow corridor unless specifically authorized to go to some other destination, so the smuggling would have to be across the border. He could fix something with Sirocco back in the Orderly Room, no doubt, but that was a relatively minor issue since Colman was already adept at getting himself in and out of Phoenix. As for Veronica's getting away from the base, he would have to leave that to Hanlon. The Battle Module was a mile-long concentration of megadeath and mass destruction that sat on a base formed by the blunt nose of the Spindle, straddled by two pillars that extended forward to support the ramscoop cone and its field generators, and which contained the ducts to carry back to the midships processing reactors the hydrogen force-fed out of space when the ship was - at ramspeed. Sleek, stark, - menacing, and bristling with missile pods, defensive radiation projectors, and ports for deploying orbital and remote-operating weapons systems, it contained all of the Mayflower II's strategic armaments, and could detach if need be to function as an independent, fully self-contained warship. too? will sooner or later learn his whereabouts. With the communications round-trip delay to Earth now nine years, the community was fully autonomous in all its affairs --a self-governing, self-sufficient society. "We just have to take some measurements." Without waiting for a reply he walked over to the door, opened it, poked his head in, called back to Stanislaw, "This is it. Where's Johnson?" and went inside. Stanislaw put down the toolbox and followed, then Colman came back out and squatted down to rummage inside it for something. Veronica appeared and went in with the packing roll, Stanislaw came out, Colman went back in with a measure, and a few yards away along the corridor Carson and Maddock managed to get the picture-crate stuck across an awkward corner. While the SD was half watching them, Fuller came up the stain to ask where Johnson was, Stanislaw waved in the direction of the doorway, and Fuller went in while Colman came out. Carson dropped his end.Chang laughed. "It's okay. We won't be going very high, and it'll be more walking than anything else. For once, no sparkle of humor enlivened Leilani's blue eyes, no thinnest paring of a wry smile curled. To Micky, Aunt Gen said, "Isn't she something?" "She's an absolute, no-doubt-about-it, fine young to me that our difficulties stand only to be exacerbated by a continued division of authority. Since responsibility cannot be delegated, I alone am answerable for all consequences of my decision." He paused to look around the room, and then took a long breath. "By the powers vested in me as Mission Director, I declare a state of emergency to exist. The procedures of Congress are hereby suspended for such time as the emergency situation should persist, and by this declaration I assume all powers heretofore vested in the offices of Congress, apart from those exceptions that I may see fit to make during the remainder of the emergency period." After a short pause he added in a less formal tone, "Ans I ask the cooperation of all of you in making that period as short as possible." Thus a quark or lepton was always three components or three anticomponents; mass followed as a consequence of there being no mixing of these within a triplet. Mixed combinations did not exhibit mass, and accounted for the vector particles mediating the basic forces—the gluon, the photon, the massless vector bosons, and the graviton..
