"It is, isn't it," Colman agreed dismally..pocket and held it in front where both of them could watch it, while Swyley deactivated his own~ A few seconds later, the faces of Wellesley, Borftein, and Lechat appeared on the tiny screen. Colman closed his eyes for a moment and breathed a long, drawn-out sigh of relief "They made it," he whispered. "They're all in there."..normalcy.."For Christ's sake, that's TV fiction. She doesn't exist.."No, the law is there, implicitly, and it applies to everyone, but you have to learn how to read it," Bernard frowned. That hadn't come out the way he had intended. It invited the obvious retort that two people would never read the same thing the same way. The difference was that the Chironians could make it work. "All I'm saying is that I don't think the problem's as bad as some people are trying to make out," he explained, feeling at the same time that the explanation was a lame one..brain several times. "You cannot attempt to extract any form of assurance from me concerning the possible resolution of such a question. I repeat, I have no more to say."..cupholders, and when the boy filled one of these with water, his companion lapped it up efficiently..She wriggled closer and slid an arm across his chest. "How much of your Army is left?" he asked. "Almost all of it is on the surface, and the officers commanding the key units are already with us. Besides, we control the ship, which is the most important thing."..Oh, yes. I should have thought of that." Lurch about-faced and lurched back to the kitchen. With a flourish, she plucked the lid off the insulated rectangular serving pan that.."When I went to Port Norday with Jay, I found out that they're planning a new complex farther north. They're going to need engineers-fusion engineers. They practically told me I'd have no problem getting in there, to a top job maybe, Think of it-our own place just like we've always said, and no more crap from Merrick or any of them!" Bernard threw his hands high. "I could be me for the first time in my life. . . and so could you, all of us. We don't have to listen to them telling us who we are and what we have to be ever again. Doesn't that.." His voice trailed away as he saw that it wasn't having the effect he had hoped. Jean was backing away through the door, shaking her head in mute protest.."What kind of outcome?" Is it that obvious?"..Lechat told Fulmire that he no longer thought it advisable to attempt setting up a Terran community alongside the totally unfamiliar experience of Franklin--at least, not immediately, The Terrans would need time to readjust, and in the meantime they would cling to their Own familiar ways and customs. The proximity of Franklin would only

cause tensions. Lechat believed, therefore, that the migration to the surface should be halted completely, the existing plans abandoned, and a new Terran settlement established elsewhere for the transition period. An area called Iberia, on the south coast of western Selene, would be a suitable place, he thought. Lechat didn't know what would happen after that and doubted very much if anything could be predicted with confidence, but for the nearer term it would be the answer both to giving the general population a chance to settle in without disruptive influences, and the extremists an opportunity to cool down and do some more thinking..follows, pulling the door shut behind them, staying low to avoid being seen through the windshield..stands on the ridge line, the sky is too dark to reveal him in silhouette..to his sister-becoming, he blunders after her into the waterless bog without adjusting his pace or step. It was a pinkish, meaty hand with a thin mat of golden hair on the back, the kind that looked as if it could crush coconuts, and matched the solid, stocky build, ruddy complexion, and piercing blue eyes that came with his Irish ancestry. "Don't look at me," he said. "I'm contracted now, all nice and respectable. That's the fella you should be making eyes at." He nodded toward Colman and grinned mischievously..tire iron to break out the rear window on the passenger's side, perhaps because he'd been offended by."This zwieback crap.."He beams, for he and the waitress are clearly connecting now. An '81 Camaro that still somewhat resembled a.Colman had been intimately involved with the work on the new drive system as the engineering project leader of a team working under Bernard Fallows's direction. He had brought Kath and their four-year-old son Alex up to the ship to be present with him at the unveiling ceremony being held in the main concourse of the new nose section. Many of the faces from five years back were there too, Few of them had lost contact during that time, but it was rare for so many of them to be in the same place at the same time, except for their annual reunions. Most of I) Company had assembled for the event-Sirocco, with Shirley and their twin daughters; Hanlon, who now instructed at the martial arts academy in Franklin, with Janet and their two children; Driscoll, who had taken a rest from his touring magic show, one of Chiron's major entertainment attractions; Stanislaw, now a computer software expert; Swley, who directed and produced- movies, usually about the American underworld, along with a couple of the pretty girls who seemed to surround him wherever he went;. . and there were others. Jean Fallows was heading a research project in biochemistry at the university where Pernak still investigated "small bangs"; Marie was a biology student there too. Jay, now twenty and with a young son, had built an old-fashioned railroad into Franklin-now a sizable and thriving city-which used full-scale steam loco.Chapter 2.Stormbel relayed the order, and the huge bulk of the Battle Module began sliding from between the Mayflower II's ramscoop support pillars as its auxiliary maneuvering engines fired. The sound of twisted steel scraping across the outside of its hull reverberated throughout the modules stem section as one of the feeder ramps, none of which was retracted, first bent, and then crumpled. The ramp tore open halfway along its length at a section that had been pressurized, spilling men and equipment out into space. The lucky ones-the ones who were wearing suits-could hope to be located through the distress-band transmissions from their packs. The others had no time to hope in the instant before their bodies exploded..Pernak didn't seem overeager to accept the implied invitation. to agree. But a lot of birds go to roost at night and stay there till morning. Your little orange lady is."Come on, Stan. Give," Terry, Paula's companion, insisted. Colman gave Stanislaw 'a challenging look that left him no way out..Lechat picked up his fork again. "I never looked at it in quite that way. It's an interesting thought." He began eating again, then stopped and looked up. "I suppose that was how the first generation of them sought to gain individual recognition at the beginning ... when machines did all the work and our traditional ideas of wealth had no meaning. And it's become embedded in their basic thinking." He nodded slowly to himself and reflected further. "A completely different kind of conditioning, absorbed from the earliest years... based on recognizing individual attributes. That would explain the apparent absence of any

group prejudices too, wouldn't it? They've never had any reason to feel threatened by other groups." "Kind of." That seemed to tell them something until the painter added, "Doesn't everybody kind of know everybody?" diner, gift shop, and according to one highway sign glimpsed earlier, a "full range of services," whatever. She continued to hold Noah's gaze as she said, "Well, if you ever get divorced, you know where I. Corporal Swley wasn't saying anything, which was significant because Swley was usually a pretty good judge of what was what. His silence meant that he didn't agree with what was being said. When Swley agreed with something, he said he didn't agree. When he really didn't agree, he said nothing. He never said he agreed with anything. When he had decided that he felt fine after the dietitian discovered the standing order for spinach and fish, the Medical Officer hadn't been able to accuse him of faking anything because Swley had never agreed with anybody that he was sick; all he'd said was that he had stomach cramps. The M.O. had diagnosed that anybody with stomach cramps on his own time had to be sick. Swley hadn't. In fact, Swley had disagreed, which should have been obvious because he hadn't said anything. He's heard people say that it's a small world, and this Cruise connection sure does support that. "Sweetie, you're a victim, you've nothing to be ashamed about." "How do you mean?"
