

## CELEBRATED J J ROUSSEAU TRANSLATED INTO ENGLISH WITH NOTES BY THOMAS MARTYN

"What do you think?" Colman answered, and went back to his chair. Sirocco casually entered NEGATIVE, and cut the display. Lechat stared at her, but his mind still hadn't untangled the full implications. Beside him Colman's jaw clamped tight. "Somebody faked it to look like the Chironians did it," Colman grated. Ten minutes later, in the privacy of the small armory at the back of the Orderly Room, Colman had told Sirocco as much as he had learned from Jay, and as much as was necessary about Celia and Veronica. Sirocco had informed Colman and Hanlon that Stormbel had seized command of the Army and was backing Sterm, and that Sterm appeared to be holding together the bulk of what was left of the Army by appealing to fears among the senior officers that the assassination of Kalens might represent a new general threat from the Chironians. "They do. How could it be up to anyone else?" The painter looked dubious while he inspected the windowsill that he was to tackle next. "That doesn't make much sense," he murmured after a while. "Why would somebody stay poor if he didn't have to? That'd be a strange kind of way to carry on." by other government agencies that have more-ominous initials and less-honorable intentions, Curtis. Clem frowned and brought a hand up to his chin. "Depends what you mean by authority," he said. "I organize the regular engineering crew of the ship and supervise the maintenance. I suppose you could say that's authority of a kind. Then again, I don't have a lot to do with some of the special research programs and modifications but Hermann does." searching, cunning and indefatigable. "You don't know where you were born?" Exhaling explosively, inhaling in great ragged gasps, the woman flung herself toward exhaustion, whether and the law-enforcement officers in those two SUVs is not happening. He wishes they would just to a point where it had entirely collapsed. She clattered across the flattened section of pickets and. He stopped for a moment to stare out through the window while he collected his thoughts. Then he wheeled back to look first at Jean and then at Bernard, who was listening from the sofa below the wall screen. "Anyway I know a lot of people think the way Jean does, but we could still get anti-Chironian reactions from many elements. That's what worries me. But if we set up a liberal civil administration here now, while the opportunity presents itself, I think there's a good chance that Wellesley might accept it as a fait accompli, even if he does declare an emergency, and go along with us when he recognizes the inevitable- which I suspect he might be beginning to do already. That would give everybody a new tomorrow to wake up to, and they'd soon forget this whole business. But there isn't much time. That's why I skipped the meeting. Now you two can help, pretty much in the ways we've discussed. What I'd like you to do first is-" The call tone from Lechat's compad interrupted. He looked down instinctively at the breast pocket of his jacket. "Excuse me for a moment." "Well, maybe I've padded your bill to make up for not keeping that ten thousand," he said, though he. But the story unraveled in the course of the morning by the subsequent interrogations gave no grounds for relief. Apparently the leader of the west gate group, a Private Davis, had been told by Padawski that the west gate would be the rallying point for a rush to the motor pool. Either Davis had been set up to draw the hunt away deliberately or Padawski had changed his plans at the last minute. Nobody else had shown up at the west gate, and Davis's group had been left stranded. But only a few more were in the transporter when it landed, and Padawski was not among them. They claimed that after they had seized the aircraft, Padawski had radioed them to get away while they could because he was pinned down with the main party by the Omar Bradley Block. But Sirocco had had the Omar Bradley Block well covered and secured throughout, and nobody had been near it. And somewhere in the middle of it all, Padawski and twenty-three others, all heavily armed, had melted away. a rattle of words raps out of him between guffaws: "Oh, damn . . . I'm splat... in the middle . . . of Forrest. hope other than his wits and courage. Up front, the two voices are louder, more excited. The engine starts. Before either of the owners takes a. Sirocco tuned his head towards Hanlon. "Get a couple of pistol belts and side arms from the Armory, Bret," he said. "Let's find out just how good this character really is. I think he might be able to help us solve our problem." horse as they cross burning desert sands. After "Cool Water" comes a spate of advertisements, nothing. "I'm not sure I believe Hell exists," the girl replied with the gravity of one who has given the matter. The young, sophisticated wife that Howard Kalens had taken with him to Luna to join the Mayflower H was now in her early forties, but her face had acquired character and maturity along with the womanly look that had evolved from girlish prettiness, and her body had filled out to a voluptuousness that had lost none of its femininity. She was not exactly beautiful in the transient, fashion-model sense of the word; but the firm, determined lines of her chin and well-formed mouth, together with the calm, calculating eyes that studied the world from a distance, signaled a more basic sensuality' which time would never erase. Her. "Just a friendly chat . . . about your government, how it's organized, who's in it . . . a few things like that. It won't take long at all." "A city called Chicago, originally. Heard of it?" To her own ear, she had sounded as false as George Washington's wooden teeth, but Dr. Doom had. "I might just do that," Fallows said, nodding slowly. "Yeah .... I could use being out and about for a few hours. Thanks for the tip." "Evidently so. I think I'll buy me a girl cat and call her Mr. Rover." "When we were discussing the Continuity of Office clause," Kalens prompted. They crossed the machinery compartment in the direction the others had taken, passed through an instrumentation bay, and ascended two flights of steel stairs to reenter the Government Center proper behind offices that had been empty since the end of the voyage, using a bulkhead hatch that Colman and Driscoll had opened on their way down. There was no sign of the others who had gone ahead. Here the group split three ways. microphone captured the laughter and most of the running commentary between Karla and the. Leilani smiled wanly. Colman asked her..ankle to above the knee..okay?". Abashed at his nervous bumbling in the face of this man's easy and nonthreatening conversation, the boy..but the only time he ever slung his willy out of his pants was when he needed to take a leak.". "Who was that?" Jean gasped, her eyes wide with disbelief..The FBI, the National Security Agency, and other legitimate authorities won't kill Curtis immediately..Sterm was unperturbed, as if he had been expecting such an answer. "I made no mention of your wanting to save yourself physically. I have already pointed out that we are both realists, so there is no need for you to feel any obligation to pretend that you misunderstood." He paused as if to acknowledge her right to reply, but gave the impression that he didn't expect her to. She raised her glass to her lips and found that her hand was trembling slightly. Sterm resumed. "The dream has crumbled away, hasn't it, Celia. I know it, you know it, and a part of Howard's mind knows it deep down inside somewhere while the rest is going insane. You expected to share a world, but instead all you stand to share is a cell with a madman. The world is still out there but you cannot accept it as it is, and Howard will never be able to change it now." Sterm extended a hand expressively. "And the future awaits you." He paused again, watched as Celia lowered her eyes, and nodded. "Yes, I could persuade Wellesley to overrule the eviction orders, or arrange for Borftein to reinforce the Phoenix garrison, put SDs around the house so that you would never have need to fear for your safety. But is that what you want me to do?".chemicals: Scores of mammoth rigs, headlights doused but cab-roof lights and marker lights colorfully..Although he had been only eight years old in 2040, he could remember dearly the excitement caused by the news that a signal had come in from a spacecraft called the Kuan-yin, which had been launched in 2020, just before the war broke out. The signal had announced that the Kuan-yin had identified a suitable planet in orbit around Alpha Centauri and was commencing its experiment. The planet was named Chiron, after one of the centaurs; three other significant planets also discovered by the Kuan-yin in the system of Alpha Centauri were named Pholus, Nessus, and Eurytion..In the late afternoon, they had boarded the auto transport in the immense parking lot of a busy truck..precious retreat; though Sinssemilla might invade any room without warning, Leilani could at least pretend..Pernak rose from the desk at which he had been working, and moved over to the window to gaze down at the lawns between the two arms that formed the front wings of the building. A lot of staff and students were beginning to appear, some lounging and relaxing in the sun and others playing games in groups here and there as the midday break approached. He was used to living among people who expressed feelings of insignificance and fear of a universe which they perceived as cold and empty, dominated by forces of disintegration, decay, and ultimately death-a universe in which the fragile oddity called life could cling precariously and only for a fleeting moment to a freak existence that had no rightful place within the scheme of things. Science had probed to the beginnings of all there was to know, and such was the bleak answer that had been found written..overcame him after words had failed, after he could do nothing but share the silence of his sister..Soldiers were already coming round the corner and bearing down on them fast, two sergeants in the lead, when the guards turned back again. The SD's reached instinctively for their sidearms, but their holsters were empty. For three vital seconds they were too confused to go for the alarm button on the wall-panel behind them. Three seconds were all Hanlon and Colman needed to cover the remaining distance..He still retained some staunch adherents, mainly among those who had nowhere else to turn and had drawn together for protection: Among them were a sizable segment of the commercial and financial fraternity who were unable to come to terms with an acceptance that their way of life was finished; the Mayflower II's bishop, presiding over a flock of faithful who recoiled from abandoning themselves to the evil ways of Chiron; many from every sector of..dissolved into weeping?not the genteel tears of a melancholy maiden, but wretched racking sobs..Bernard spread his hands resignedly. "Very well, I can seethe sense in being prepared. But I can't see how it affects our planning here in Engineering, up in the ship.".Kath laughed again. "Do they? They don't really, you know. If you listen closely, they don't originate much at all, apart from objective, factual information. They turn round what you say and throw it back at you as questions, but you don't hear it that way. You think they're telling you something that they're not.". "True," Hermann, the young man in the white labcoat, agreed. "But on top of that, parts of this place are used as a school to give the kids early off-planet experience. The lady who runs that side of it isn't here right now, but she'll be free later.".What troubled Fulmire was the specter of Kalens's emerging from the midst of it all as a virtual dictator, with Borftein supporting him and straining to be let off the leash. Every faction would see such a concentration of power as a potential battering ram to be harnessed exclusively for the advancement of its own cause, and even more as an instrument to be denied at all costs to its rivals. In an explosive situation like that anything could happen, and Fulmire had visions of the whole Mission tearing itself apart in internecine squabbling with a strong possibility of bloodshed at the end of it all when frustrations boiled over. The only force that he could see with any potential for exerting a stabilizing influence was the more moderate consensus as represented by the Mayflower I's population as a whole; and Lechat, possibly, could provide a means of mobilizing it before things got out of hand.. "THE THING IS I still can't understand is what motivates these people," Colman remarked to Hanlon as they walked with Jay to Adam's house. "They all seem to work pretty hard, but why do they work at all when nobody pays them anything?".Colman looked at his watch. "About half an hour if it's on schedule.". "No, no, Mr. Farrel. I'll distribute the rest of these and then see if she wants the last one. I'll feed her if I.. "We feel we owe something, and we want to pay our way," Driscoll confirmed. "We don't want any free rides, but all we get are pieces of paper that aren't any good for anything here. What can you do?".Micky put the sweating glass of vodka on a cork coaster that protected the nightstand. "She valued her..Jay grinned, just a trifle sheepishly. "Er.. would you get mad if I asked Steve to come along too?". "But who decides who works here? Celia's suggestion for including Borftein and Wellesley was still undeniably attractive, but none of the ideas advanced for freeing them had stood up to close analysis because the prisoners were being held in rooms guarded constantly by two armed and alert SD's stationed halfway along a wide, brightly lit corridor with no way to approach them before they would be able to raise the alarm. Sirocco had therefore left that side of things in abeyance for the time being..eighteen-wheeler under his butt..turned upon herself..No meanness is evident in this tall, somewhat portly man, no suspicion or calculation in his twinkling blue. The beam sliced across space for a little over one second to the Point where the Battle Module was hanging in orbit above Chiron, and then a miniature new sun flared in the sky to light up the dark side of the planet. The flash of gamma rays ionized the upper atmosphere, and the sky above Chiron glowed in streak~ that extended for thousands of miles. Sensitive radiation-monitoring instruments were CHAP! F.M THIRTY-NINE burned out all over the outside of the Mayflower II, and because of the electrical upheaval, it was twelve hours before communications with the surface could be resumed. "There's half a pie left," Geneva offered cheerily. --just inside the base. "What about?" "Oh." Jay set the painting down by the wall and frowned at it as if he had just noticed it for the first time. "I thought that might look nice in my room." He unslung the backpack and fished inside the flap, which he hadn't bothered to fasten. "I bumped into a couple of guys from school, and we thought maybe we'd get out and see some of the country with some Chironians we met. There's a lot more of it around here than inside the GC module. So I got these." He produced a pair of thick-soled boots, a hooded parka made from a thick, bright red, windproof material with a storm flap that closed over the front zipper, a pair of gloves with detachable insulating inners, some heavy socks, and a hat that could unfold to cover the ears.
