violent colors and rich perfumes, past the pink marble fountains where the black butterflies glistened. It was hot, he was dripping with perspiration, and his head was in agony. The image that so held his attention was transmitted from an eighteen-inch-long, infantry reconnaissance that they had managed to slip in a thousand feet above the floor of the gorge and almost over the enemy's forward positions and was supplemented by additional data collected from satellite and other ELINT network sources. The display showed the target command bunker at the bottom of the gorge, known enemy weapons emplacements as computed from backplots of radar-tracked shell trajectories, and the locations of observation and fire command posts from source analysis triangulations of stray reflections from control lasers. On it the cool water of the stream and its tributaries stood out as black lines forking like twigs; the rock crags and boulders were shades of blue; living vegetation varied from rust brown on the hills to deep red where it crowded together along the lower slopes of the gorge; and shell and bomb scars glowed from dull orange to yellow depending on how recently the explosions had occurred. half to pick up my final check, some subordinate I've never seen before gives me the envelope. The last step took the thin grey man right into the open trunk. He cried out, stumbled, the trunk. "I don't even like to think about it," said Jack. "Once he asked me to unzip the leather flap at the end of the trunk and stick my head in to see how his nearest and dearest friend was getting along. But I would not because I had seen him catch a beautiful blue bird with red feathers round its neck and stick it through the same zipper, and all there was was an uncomfortable sound from the trunk, something like: Orulmhf." It wasn't much in the way of a home; they were crowded against each other on rough pads made of insulating material. The toilet facilities were behind a flimsy barrier against one wall, and smelled. But none of them would have wanted to sleep outside in the dome, even if Lang had allowed it. How Swyley did what only he did so well was something nobody was quite sure of, least of all Swyley himself. Whatever the reason, Swyley's ability to pick out significant details from a hopeless mess of background garbage and to distinguish consistently between valid information and decoys was justly famed and uncanny. But since Swyley himself didn't understand how he did it, he was unable to explain it to the systems programmers, who had hoped to duplicate his feats with their image-analysis programs. That had been when the "-sits" and the "-zoologists" began their endless batteries of fruitless tests. Eventually Swyley made up plausible-sounding explanations for the benefit of the specialists, but these were exposed when the programs written to their specifications failed to work. Then Swyley began claiming that his mysterious gift had suddenly deserted him completely. pushbuttons, most of which you don't understand, but you know they are for special purposes and don't. recollections of his criminal behavior of the night before to the depths of his subconscious and was back
