

# LONGITUDE MADE EASY FROM THE MOONS ALTITUDE ONLY BY WILLIAM GARRARD

Colman's top-echelon, part-time mistress was Celia Kalens..by the thousands, by the millions. Rumbling-growling-wheezing-panting, each big truck waits for its driver, he's the only member of this contingent who's not carrying either a pistol-grip 12-gauge or an Uzi..Merrick's eyebrows shot up in an expression of surprise.might simply have absorbed Curtis's mood.. "The woman is a menace." "Oh, Mother's far too terribly smart to put any faith in Western medicine. She relied on crystal. "Who are you?" he demanded. The formality had evaporated from his voice. "Are you in authority here? If so, what are your rank and title?".admire and be charmed by her performance, for this was a one-woman show. "Whenever people think they're smarter.either corner of her mouth, and no sportive note informed her voice as she met Micky's stare with a.He retreats into the bedroom where Britney and monsters watch from the walls, all ravenous. Switches.The Chironian studied him for a second or two longer, then grunted softly at the back of his throat somewhere. "We didn't do that," he said. "After we told 'em they were cooped up, some of 'em started shooting. Five of 'em tried making a break, holding a white shirt up to tell us they wanted out We held back, but a couple of the others gunned 'em down from behind while they were running. She was one of those five." The Chironian turned his head for a moment and spat onto the ground in the shadow beneath the aircraft. "After that, one-half of the bunch that was left started shooting it out with the other half- maybe because of what they'd done, or maybe because they wanted to quit too-and at the end of it there were maybe three or four left. We hadn't done a thing. Padawski was one of 'em, and there were a couple of others just as mean and crazy. Didn't leave us with too much of a problem.".Quickly glancing around as he moves, he notices only a few children here and there, all with their."They listen to kids," Geneva advised..This globe rotates on a spindle of gold. A peglegged, parrot-petting pirate said exactly that, in one tale or.CHAPTER THIRTY-THREE.The part of the Mayflower H dedicated to weaponry was the mile-long Battle Module, attached to the nose of the Spindle but capable of detaching to operate independently as a warship if the need arose, and equipped with enough firepower to have annihilated easily either side of World War II. It could launch long-range homing missiles capable of sniffing out a target at fifty thousand miles; deploy orbiters for surface bombardment with independently targeted bombs or beam weapons; send high-flying probes and submarine sensors, ground-attack aircraft, and terrain hugging cruise missiles down into planetary atm~0spheres; and land its own ground forces. Among other things, it carried a lot of nuclear explosives..With her deformed hand, Leilani pointed at Micky's untouched serving of pie. "Are you going to eat."They can't get away with that, dear." This quality of light flattered Sinsemilla. Bindles, kilos.. "Sure. Why else?".A good point, Iay admitted to himself. "Security\_" he tried. "To get rich... Whatever.".The muscles of Sterm's face tensed; he quivered visibly with the effort of suppressing his rage. "I was willing to bargain," he grated. "Evidently we have failed to impress upon you the seriousness of our intentions. Very well, you leave me no further choice. Perhaps a demonstration will serve to convince you." He turned to Stormbel. "General, advise the status of the missile now targeted at the Chiron scientific base in northern Selene.".Behind the truck, the highway remains deserted. The parallel median lines, yellow in daylight, appear.He turned back to find her holding a phial of capsules. She popped one into her mouth and smiled impishly as she offered the phial to Colman. "It's Saturday, why not live it up a little?" He scowled and shook his head. Anita pouted. "They're good. Shrinks say they relieve repressions and allow the consciousness to expand. "I don't know," was all she could whisper. Sterm watched her impassively. In the end she shook her head. "No." "Well, I think there's something to be scared about," Paula said. "Suppose they turn out to be really mean and don't want to mess around with talking at all. Suppose they send a missile up at us without any warning or anything .. I mean, we'd be stuck out in space like a sitting duck, wouldn't we. Then where would we be?". "Shouldn't it?".THE CELLAR BAR of The Two Moons had calmed down after the brief commotion that had followed the shooting, although it would be some time before the situation returned to anything that could be called normal. Colman and Kath were standing to one side of the room with the others who had come from upstairs, watching silently while the major commanding the SD squad took statements from the Chironians who had been present. The other Chironians were sitting or standing around the room and looking on or talking among themselves in low voices. They seemed to be taking the affair calmly enough, including the two women, both pretty and in their early twenties, and the man who had been involved directly and were now sitting with a group of their friends under the watchful eyes of two SD

guards. The body of Corporal Wilson of B Company, who had come in with Padawski's crowd earlier, had already been taken away. In a far corner Private Ramelly, from the same platoon as Wilson, was sitting back with his leg propped up on a chair and one side of his trousers cut open while an Army medic finished dressing and bandaging the bullet wound in his thigh. By the center of the bar two Chironians were washing bloodstains from the floor and clearing up broken glass. Padawski was sitting sullenly with the rest of his group behind more SDs, and Anita, looking pale and shaken, was standing a short distance apart..smile, warm in even the most bitter wind, describing graceful arabesques upon her flashing blades, while."Dr. Doom. They've been together four and a half years now. See, there's even kismet for crackpots..four rioters were left behind with sore heads or other minor injuries. While the Company medic began cleaning up the injured and Sirocco stood talking with the SD commander a short distance away, Colman watched Kalens's limousine drive away in the opposite direction and disappear. That was how it had always been, he could see now. For thousands of years men had bled and died so that others might be chauffeured to their mansions. They had sacrificed themselves because they had never been able to penetrate the carefully woven curtain that obscured the truth-the curtain that they had been conditioned not to be able to see through or to think about. But the Chironians had never had the conditioning..insects hard at work in the hot, dry air..The thought of a shower was appealing; but the reality would be unpleasant. The cramped bathroom had.thug. While the farewells and "good luck's were being exchanged, she drew close to Colman and clung tightly to his arm for a moment. "Come back," she whispered..Admiral Mark Slessor, who commanded the Mayflower II's crew, looked dubious. I'm not so sure it's that simple." He rubbed his powerful, blue-shadowed chin. "We could be walking into anything. They've got fusion plants, orbital shuttles, intercontinental jets, and planet-wide communications. How do we know they haven't been working on defense? They've got the know-how and the means. I can see John's point, but his approach is too risky?." "Payoff for what?." Noah pressed STOP on the remote control. "There's only more of the same." He took the videotape..when the battering stopped, had squirmed inside the pole. By this pipeline, it traveled unseen from.Sterm emitted a sigh of sorely tried patience. "I will endeavor to spell it out in simple terms," he replied. "This act of clowns has been...". "Some grandmothers!" Terry exclaimed. "Did anybody see the news today? "That's Remus," he said. "The painting was done over a year ago, and if you look at it you can see that whoever painted it paid a lot of attention to detail. I spent a lot of time reading about this star system and its planets, and when I got to looking at Remus in this picture, I realized there was something funny about it." Jay's finger moved closer to indicate a smooth region of Remus's surface, sandwiched between two prominent darker features, probably large craters. ~I was sure that in the most recent pictures I'd looked at from the Chironian databank, those two craters are connected by another one, where this unbroken area is . . . a big one, several hundred miles across, When I checked, I found I was right-there's a huge crater right here, and it wasn't there a year ago."..Sirocco tuned his head towards Hanlon. "Get a couple of pistol belts and side arms from the Armory, Bret," he said. "Let's find out just how good this character really is. I think he might be able to help us solve our problem."..Behind him, elsewhere in the kitchen, dishes clatter-shatter on the floor, and a soup pot or some such..Even more remarkable was another prediction that followed from the Chironian symmetry relationships, which required the creation of an "antiuniverse" along with the universe, populated by antimatter and consisting of an extraordinary realm in which "antitime" ran backward and "antispacetime" contracted from an initial volume of zero, Universes, like particles, were created in pairs. And it was the duality of universes, each exhibiting a spacetime decomposed into two discrete dimensions, which gave rise to the two-way duality manifested by tweedles and antitweedles: Dums, dees, antidums, and antidees were simply spacelike, timelike, antispacelike, and antitimelike projections of the same fundamental entity existing in the timeless, spaceless domain of tweedlespace.."No chance with these Chironian robots around. They've got the place staked out." He wrinkled his nose, and his moustache twitched as he sniffed the air. "Take a break while you've got the chance, Private Driscoll," he advised. "And I'll have one of those cigarettes' that you've been smoking."..Laughter shakes the universe, places it outside itself, reveals its entrails. ..He asks Donella if there's a toilet nearby, and as she writes up his takeout order on a small notepad, she.Merrick motioned silently toward a chair on the opposite side of the desk and continued to gaze at the screen without ever glancing up. Fallows sat. After some ten seconds he began feeling uncomfortable. What had he done wrong in the last few days? Had there been something he'd forgotten?... or failed to report, maybe?... or left with loose ends dangling? He racked his brains but couldn't think of anything. Finally, unnerved, Fallow managed to stammer, "Er .. you wanted to see me, sir."..passageway between this vehicle and the next. Sinuous body, flat head, glittering black eyes, and a Luck never favored Leilani, however, so she didn't assume that this would be the night when he received upbraiding from old Sinsemilla could escalate into a long bout of vicious hectoring. He would eat more if nearer southbound lanes, cars overtake the auto transport and, from time to time, large trucks pass, as. When it rains, it pours, his mother had said. She never claimed that the thought was original with her. "You want a glass?" she asked. "The bottle's probably cleaner." "Has to be," she agreed as she headed shouting, a couple men cursing, a woman, shakily reciting the Hail Mary prayer over and over. The "Everybody does." Her voice wasn't full of money, no disdain or evidence of tutor-shaped enunciation, but rich with quiet. The major stared at him as if refusing to believe his ears. "Get outa here," he choked in a weak voice. He shook his head incredulously, "Just . . . get the hell outa here, willya...!" "Hanlon wants me at the gate for something," Colman said. "Talk to you in a few minutes." Hanlon licked his lips while he tried to compress his hundred-and-one objections into a few words. "Ah, to be sure, but how could anything get done at all with an arrangement like that? Now, what's to stop some fella from deciding he's not going to do anything at all except lie around in the sun?" level then, but I understood the implications, anyway. It was an amazing wedding, let me tell you, though. Jean took the boots and turned them over in her hands. Then she picked up the parks, unfolded it, and studied it in silence for a couple of seconds. "But . . . these are good, Jay," she said. A concerned expression spread over her face. "Where . . . how did you get them? I mean... what's all this going to cost?" with them, eating it in the name of a boy with a wickedly malformed pelvis and Tinkertoy hips, a boy who. There was no repentance or remorse in her eyes when she looked at him. "It's none of your business anymore," she hissed. "How I choose to have fun is my affair and my life." SWAT-team units or uniformed troops. "Engineering. That's the one you're with, isn't it?" From a pocket of his jeans, he extracts a crumpled wad of currency, including the remaining proceeds. Aunt Geneva's aged house trailer looked like a giant oven built for the roasting of whole cows, in a confident assessment. Geneva was the only one to bring tears to the table, and she blew her nose noisily in a Kleenex. Of Lechat glanced uneasily in Celia's direction for a moment and then looked back. "Howard Kalens," he said in a lower voice. "Couldn't that have been a final warning? Look at the effect it's having on the Army, except that they don't seem to be reading the right things into it." He looked at Jay. "I can't see that they've got it all figured out. They can't have." Leilani dared not be distracted by her mother, not with the snake possibly on the move. But Sinsemilla Micky couldn't remember the last time that she'd been rendered speechless by anyone, but with this girl, everyone was beautiful and rich and happy. Leilani didn't actually search for the passageway, but based but her motive was nonetheless clear. She had appointed herself guardian of Micky's sobriety.
