

MAKE ME WANT

"Judge Fulmire." Lechat frowned and tapped in a code to reconnect. The unit returned a "number unobtainable" mnemonic. He rattled in another code to alert a communications operator. The same thing happened. "The regular." "I want to see this place. Is there any reason why you couldn't take me back there right now?".she'd been through, she wasn't screwed up yet; she was tough, smart; she had a chance, a future, even if. THE CELLAR BAR of The Two Moons had calmed down after the brief commotion that had followed the shooting, although it would be some time before the situation returned to anything that could be called normal. Colman and Kath were standing to one side of the room with the others who had come from upstairs, watching silently while the major commanding the SD squad took statements from the Chironians who had been present. The other Chironians were sitting or standing around the room and looking on or talking among themselves in low voices. They seemed to be taking the affair calmly enough, including the two women, both pretty and in their early twenties, and the man who had been involved directly and were now sitting with a group of their friends under the watchful eyes of two SD guards. The body of Corporal Wilson of B Company, who had come in with Padawski's crowd earlier, had already been taken away. In a far corner Private Ramelly, from the same platoon as Wilson, was sitting back with his leg propped up on a chair and one side of his trousers cut open while an Army medic finished dressing and bandaging the bullet wound in his thigh. By the center of the bar two Chironians were washing bloodstains from the floor and clearing up broken glass. Padawski was sitting sullenly with the rest of his group behind more SDs, and Anita, looking pale and shaken, was standing a short distance apart. By midmorning Terran newscasters were interpreting the development as a Chironian backlash to the Padawski outrages and as a warning to the Terrans of what to expect if Kalens was elected to head the next administration after his latest public pledge to impose Terran law on Franklin as a first step toward "restabilizing" the planet. Interviews in which Chironians denied, dispassionately and without embellishment, that they had had anything to do with the incidents were given scant coverage. Reactions among the Terrans were mixed. At one extreme were the protest meetings and anti-Chironian demonstrations, which in some cases got out of hand and led to mob attacks on Chironians and Chironian property. At the other, a group of two hundred Terrans who believed the bombings to have been the work of the Terran anti-Chironian extremists announced that they were leaving en masse and had to be stopped by a cordon of troops. Before they could disperse they were attacked by an inflamed group of anti-Chironians, and in the ensuing brawl the Chironians looked on as impassive spectators while Terrans battled Terrans, and Terran troops in riot gear tried to separate them..swivels on his stool, putting his back to Curtis, and struggles to master his emotions. In the forty-nine years since, Franklin had grown to become a sizable town, in and around which the greater part of the Chironian population was still concentrated. Other settlements had also appeared, most of them along the Medichironian or not far away from it..Lesley accepted automatically and found himself looking at the features of Colonel Oordsen, one of Stormbel's staff, looking grim faced and determined, but visibly shaken. "Activate the intruder defenses, close the inner and outer locks, and have the guard stand to, Major," he ordered. "Any attempted entry from the Spindle before the locks are closed is to be opposed with maximum force. Report back to me as soon as the bulkhead has been secured, and in any case not later than in five minutes. Is that understood?".Celia sank back into her seat and closed her eyes with a nod and a sigh of relief. "It was one glorious flick-up from start to finish," Sirocco declared, tugging at his moustache as he and Colman discussed the events late that evening. "Too many things went wrong that shouldn't have been able to go wrong- Nobody guarding the planes, nobody guarding the power room, several units ordered to one place and no units at all in others . . . "Eight minutes," Stormbel replied. "But its reaction dish is still aimed away from us. We are now ready to detach.". That was why Colman had no doubt in his mind that the Chironians had had nothing to do with the bombings. He had talked to Kath, and she had assured him no Chironians would have been involved. It was an act of faith, he conceded, but he believed that she knew the truth and had spoken it. The Chironians had reacted to Padawski in the way that Colman had known instinctively that they would- specifically, with economy of effort, and with a surgical precision that had not involved the innocent..package of frankfurters to his chest, scampering like a monkey, and retreating pell-mell from the battle. "A while back now, but. . ." . . . In the week following Lechat's brief term as Director, the laser link from Earth had brought news of the holocaust engulfing the whole planet. Then the signals had ceased, and for five years there had been nothing. No doubt many pockets of humanity had managed to survive, but mankind's first attempt to establish an advanced civilization had ended in failure - or almost in failure, for it had served its purpose; it had lifted humankind from its primitive, animal beginnings to a level where human, not animal, values could evolve, and it had hurled a seed of itself outward to take root, grow, and blossom at a distant star. She got the feeling that Veronica had not raised the subject merely through idle curiosity. She was right. Bernard shook his head in protest and tore his eyes away to look at the screen still showing Kath. "You can't let this happen," he implored. "Those are your own people up there in Selene. This will just be the first example. Then it'll get worse." . . . Getting the dog through the window won't be easy, if it comes to that, so it better not come to that. . . "Chironian genes were dealt from the same deck as all the rest. So the codes were turned into electronics for a while, and then back into DNA. So what? A book that gets stored in the databank is still the same book when it comes out." . . . As the snake slithered along the wall and under the tall chest of drawers, Sinsemilla bounced on the bed: . . . sunshine, the heat, the rumble of the distant freeway traffic, the fragrances of cut grass and sweat-soured.
