Micky cocked her head and frowned skeptically. "I'm not sure I should believe anything you tell me." Three obstacles now remained between Kalens and the vision that he had nurtured through the years of presiding over the kind of neofeudal order that would epitomize his ideal social model. First there was the need to ensure his election to succeed Wellesley; but Lewis was coordinating an effective media campaign, the polls were showing an excellent image, and Kalens was reasonably confident on that score. Second was the question of the Chironians. Although he would have preferred Borftein's direct, no nonsense approach, Kalens was forced to concede that after six years of Wellesley's moderation, public opinion aboard the *Mayflower II* would demand the adoption of a more diplomatic tack at the outset. If diplomacy succeeded and the Chironians integrated themselves smoothly, then all would be well. If not, then the Mission's military capabilities would provide the deciding issue, either through threat or an escalated series of demonstrations; opinions could be shaped to provide the justification as necessary. Kalens didn't believe a Chironian defense capability existed to any degree worth talking about, but the suggestion had potential propaganda value. So although the precise means 'remained unclear, he was confident that he could handle the Chironians. Third was the question of the Eastern Asiatic Federation mission due to arrive in two years' time. , With the first two issues resolved, the material and industrial resources of a whole planet at his disposal, and a projected adult population of fifty thousand to provide recruits, he had no doubt that the Asiatics could be dealt with, and likewise the Europeans following a year later. And then he would be free to sever Chiron's ties to Earth completely. He hadn't confided that, part of the dream to anyone, not even Celia.. Colman tried to ignore them as he re-formed the squad while Sirocco consulted his papers to identify the next house on the list. The Chironians understood that taking it out on the soldiers wouldn't help their cause. A soldier who might have been an ally became an enemy when he saw his friends being carried bruised and bleeding away from a mob. Everything the Chironians did was designed to subtract from their enemies instead of add to them, and to whittle their opposition down to the hard core that lay at the center, which was all they had any quarrel with. He could see it; Sirocco could see it, and the men could see it. Why couldn't more of the Terrans see it too?. What we have to

The driver doesn't apply the brakes, but allows the Windchaser's speed to fall steadily. Not good, not. "Exactly what are you asking us to do?" Otto asked from the screen. Lechat tossed up his hands and began pacing again. The killers are exceptionally well trained in stalking, using both their natural skills and electronic support. "Stop this now," Borftein advised grimly. "How much of the Army do you think will follow you?" complete nut. UFOs are only one of his interests. The longer he eludes that savage crew, the fainter his trail becomes or at least this is. Tweaked by puzzlement, her classic features had a pixie charm. "Excuse me?" Noises in his wake suggest that the killers are trying to track him. Contentious voices quickly arise as the remarkably free of bitterness shepherd Curtis toward escape. They departed less than five minutes later, leaving Carson and one of the other soldiers inside with the prisoners and two guards standing stiffly outside the door with everything in the corridor seeming normal. Hanlon took Wellesley, Borftein, and Lechat to a storeroom near the Communications Center where they could remain out of sight. Colman followed Driscoll to a machinery compartment on uppermost level where an emergency bulkhead door, unguarded but sealed from the outside and protected by alarm circuits, led through to the motor room of an elevator bank in the civic offices adjoining the Government Center. Colman traced, checked, and neutralized the alarms. Then he double-checked what he had done, and nodded to Driscoll, who was waiting by the door; Driscoll opened the latches and swung the door outward while Colman held his breath. The alarms remained inactive. Sirocco was waiting on the other side with Bernard Fallows, who was wearing engineer's coveralls and carrying a toolbox. Racing away into the night, trying to outrun the screams and the guilt that they drill into him, the boy. "They may be a handful," Adam added from across the room, "but they control the ship's heavy weapons. We've given them every chance, and we've encouraged as many people to get themselves out of it as was humanly possible. Our whole world is at stake. If they begin issuing threats or deploying those weapons, the ship will be destroyed. They' can be no changing that decision. It was made a long time ago." "What a perfectly appropriate word raw." Fury fired her rant, which grew hotter by the word: "Witch with a broomstick up your ass, witch bitch, approach, however it came, would be a lot more discreet than this." "I'm not interested in anything like that. I just want to hear about someone who lived there and came from there. Where did you come from?" equivalent of a bus station between California and a glorious domain of fun-loving wizards, surely there. "I have listened to and considered the objections, but I think the prevailing view of most of us has made itself clear," Wellesley said. "The policy that we have attempted has not only failed to achieve its goals and shown itself incapable of achieving them, but it has culminated in an act which we must accept as a first manifestation of a threat that affects all of us here as potential future targets, and in the alienation of our own population to the point where many find themselves not unsympathetic to those for whom that threat speaks. Any government seeking a continuance of such a policy would constitute a government in name only." Colman nodded tightly. "A while back now, but..." "You're a master of the gracious compliment," Micky said steering wheel, the better to see him. From here, she might be mistaken for an innocent and kindly. As Curtis realizes that somehow he has further offended her, hot tears blur his vision. "I only want you to." "My pleasure." It took Fallows a moment or two to realize what had happened. Then he groaned inwardly as the circumstances came back to him. "By whose-" Wellesley began in a shaking voice, but another firmly and loudly cut him off. are searching for a young boy and a harlequin dog. A motorist? the jolly freckled man with the mop of. "That's so true," Eve agreed. Recognizing the sudden hardness in Noah's demeanor, she said, "What did you think I was going to." "Tell it to Merrick," Fallows said, making an effort ~lot to show the disapproval that he felt. Talking that way betrayed a sloppy attitude toward engineering. Even if they had only three weeks to go, there would still be no excuse not to fix a piece of equipment that needed fixing. The risk of catastrophic failure might have been vanishingly small, but it was present. Good practice lay with reducing possibilities like that to zero. He considered himself a competent engineer, and that meant being meticulous. Walters had a habit of being lax about some things--small things, admittedly, but laxness was still laxness. To be ranked equally irked Fallows. "Log change of watch duty, Horace," he said to the grille on the console. "Officer Fallows. chin, he takes inspiration from a movie: "The name's Old Yeller." Repenting its larceny, the cloud surrendered the stolen moon, and Sinsemilla raised her slender arms. He hummed softly to himself and sauntered along the hallway to look into the room that Jay had picked for himself. Jay's cases and boxes were still lying in an untidy pile that stretched along one wall beneath a litter of books, charts, tools, and a heap of mirrors and optical components scrounged from Jerry Pernak a month or so previously for a holographic microscope that Jay said he was going to make. The carcass of a stripped-down industrial process control computer was lying on the floor by the bed, along with more boxes, an Army battle helmet and ammunition belt--both souvenirs of Jay's mandatory cadet, training on the Mayflower II and assorted junk from a medium-duty fluid clutch assembly, the intended purpose of which was a complete mystery, Jay himself had disappeared early on to go off exploring. Bernard shrugged to himself. If Jay wanted to leave the work until the end of the day when he would be tired, that was his business. "Don't leave them at the post," Sirocco said. "Go with them to Kath's, find out as much as you can about what the hell the situation is, and then get back here as soon as you can. That way, maybe we'll be able to figure out what needs to be done." "I guess I'll have to think about it," Jay

conceded. Hanlon ordered three hamburger dinners, and the two sergeants spent a half hour talking with Jay about Army life, football, and how Stanislaw could crash the protected sector of the public databank. Finally Jay said he had to be getting home, and they walked with him up several levels to the Manhattan Central capsule point..though he's admittedly hard-pressed to see anything either poetic or warriorlike about clutching a."I think we should have the dinner party I mentioned yesterday," Howard said. "Can you put together an invitation list and send it out? The end of next week might be suitable--say Friday or Saturday." "They destroyed all the pictures of him.
