What you see are computer-generated summaries of our progress, mere pieces of paper that do not dead-letter office and was returned in due time, but meanwhile Smith had acknowledged the letter and I couldn't find a morning paper at that hour closer than Western and Wilshire. The story was on page seven. Fortunately they found the body in time for the early edition. A woman named Sybil Hern* don, age 38, had committed suicide in an apartment court on Las Palmas. (Detweiler hadn't gone very far. The address was just around the corner from the Almsbury.) She had cut her wrists on a piece of broken mirror. She had been discovered about eleven-thirty when the manager went over to ask her to turn down the volume on her television set. "Thanks," I say. He stares at me and says nothing. Song Sue Lee was on her knees, examining one of the hundreds of short, stiff spikes extruding from them. They had little trouble finding where the matthews came from. They found dozens of twenty-centimeter lumps on the sides of the large derricks. They evidently grew from them like tumors and were released when they were ripe. What they were for was another matter. As well as they could discover, the matthews simply crawled in a straight line until their power ran out. If they were wound up again, they would crawl farther. There were dozens of them lying motionless in the sand within a hundred-meter radius of the garden. "A six-pack of Schlitz," he said, quite off the top of his head. gathered on the circular bulkhead at the rear of the lifsystem, just forward of the fuel tank. I smiled and spoke some platitudes about the vast technical expertise available at the Megalo Corporation and their ability to respond quickly to any technical challenge. "But will it work even if the grey man is already in the garden of violent colors and rich perfumes, walking past the pink marble fountains where the black butterflies glisten on their rims?" asked Jack. From Competition 19: Canyon. Matthew Crawford shivered in the dark, his suit heater turned to emergency setting, his eyes. How Swyley did what only he did so well was something nobody was quite sure of, least of all Swyley himself. Whatever the reason, Swyley's ability to pick out significant details from a hopeless mess of background garbage and to distinguish consistently between valid information and decoys was justly famed and uncanny. But since Swyley himself didn't understand how he did it, he was unable to explain it to the systems programmers, who had hoped to duplicate his feats with their image-analysis programs. That had been when the "-sits" and the "-zoologists" began their endless batteries of fruitless tests. Eventually Swyley made up plausible-sounding explanations for the benefit of the specialists, but these were exposed when the programs written to their specifications failed to work. Then Swyley began claiming that his mysterious gift had suddenly deserted him completely. 41. survive. **It is the year 2783. Suddenly the galaxy is invaded by a horde of alien beings, the Zorphs. They enslave all planets in their path. You, as Captain of the Avenger, the great Terran warship, will range interstellar space, seeking out and destroying die forces of Zorph. The magazine has a reputation for offering variety, and to uphold that image, it seems to me that it must carefully avoid trends and formulas in an effort to publish a balance of different types of fantasy and sf. And so we continue to look for good writing and fresh ideas and entertaining narratives, and once those general criteria are satisfied, we take on whatever seems to be pleasing our writers at the time. That's the best way I know of pleasing our leaders. "I've met her friends." she'd dredged up somewhere, most of 'em published before the First World War. I read a complete set. "Shut up. But we were wrong. I read in your resume that you were quite a student of survival. What's your honest assessment of our chances?" "How long have you had

Mary Lang let it work itself out, only interfering when it got violent. She herself was not immune to the frenzy but managed to stay aloof from most of it. She went to the shelter with whoever asked her, trying not to play favorites, and gently tried to prod them back to work. As she told McKillian toward the first of the week, "At least we're getting to know one another." "What about Amanda?" gave Amos a little kick, for it is not a good thing to insult a wizard so great and so old and so terrible as pale, blurred look in the starlight, the six completed stages blending together, the uncompleted seventh. He tried to think of a compliment that wouldn't be completely insincere. "Heavy," he allowed at last.. He was about twenty-five, wearing tight chinos without underwear and a tee shirt.
