

## MEADOWLARK

Borftein halted and stood upright and erect before the desk. "Whatever you thought was mistaken. I am still the Supreme Military Commander of this Mission, and you obey my orders before any others. Stand aside." Ten minutes later, in the privacy of the small armory at the back of the Orderly Room, Colman had told Sirocco as much as he had learned from Jay, and as much as was necessary about Celia and Veronica. Sirocco had informed Colman and Hanlon that Stormbel had seized command of the Army and was backing Sterm, and that Sterm appeared to be holding together the bulk of what was left of the Army by appealing to fears among the senior officers that the assassination of Kalens might represent a new general threat from the Chironians. Chapter 13. part misery and part fury, as she jabbed the lance hard at the coiled target. "we're proud of them." "Oh, I dunno---some of the things you said, maybe." Jay jumped up and ran to a closet for a jacket. He looked at Jean as he pulled it on. "Yes, Mother, I'll be careful." Bernard looked at Lechat. Lechat frowned and seemed about to object. Then he thought some more about it and, in the end, sighed, showed his empty palms, and nodded. Bernard turned back to Jay. "Okay, see what you can do. If you do find him, ask him to get over here as soon as he can make it." without muscle definition? immense, smooth, pink. As if to provide the illusion of height and to balance. "Listen, kid, you can't come around here, doing your dangerous-young-mutant act, worming your. wouldn't buck up their spirits and send them to bed with a smile." "Aunt Gen always cheats," Micky confirmed. bricks on this road, and here, now, in the lingering sour scent of warm beer, in this small kitchen where Sterm allowed a few seconds for her admission to settle. 'Because they would become jailers of the prison that Howard is turning that world into. You are here because you know that I would take the world which he thought would give itself to him, because I represent the strength that he does not, and with me you could survive.' Celia looked up again, but Sterm's eyes had taken on a faraway light. "Chiron has made fools of the weak, who deluded themselves that it would play by their civilized rules, and now that the weak have fallen, the way is left clear for those who understand that nothing imposes Earth's rules here. It is the strong who will survive, and survival knows nothing of scruples." He has a way with dogs, and this one is no exception. It nuzzles him and then, panting happily, leads him. For a while after listening to Lechat, she had entertained a brief hope that his announcement might precipitate a landslide of opinion that would force a more enlightened official policy, but the hope had faded a mere two hours later when Eve and Jerry stopped by for a brief farewell before moving out to take up the Chironian way of living. Apparently many people were doing the same thing, and there were even rumors of desertions from the Army; Jean had been unable to avoid feeling that Eve and Jerry were somehow deserting her too, but she had managed to keep a pleasant face and wish them well. It was as if Chiron were conspiring against her personally to tear down her, world and destroy every facet of the life she had known. This auto carrier is their third rolling refuge since dawn, three rides during a day in which they have. Colman went through the motions of having to think back. "Yes . . . I think so. But I don't remember Swyley being around." "Just wondering how I ever took pleasure in this line of work." problems, a pleasing face wasn't just about looking good; it was about survival. but fear for her one good hand caused her to choose the nether end. along the hallway to another door that stands ajar. proceed westward across open terrain, paralleling but bypassing the halted traffic on the highway. the interstate before fleeing north into the wildland. "In the Orderly Room. Hanlon got him up earlier. Fallows stood up and stepped aside, and Waiters eased himself into the 'subcenter supervisor's chair. "You're off. Who can say?" Sirocco answered, picking up the more serious tone. "After what we saw today, I wouldn't be surprised if either side ends up going for him." In this deep quiet, Micky gradually became aware of the whispery sputter-sizzle of burning candle. while positively thinking herself into a C-cup instead of brooding about all the many problems in her life. The tubular-steel rod was hollow, two inches in diameter. The snake, not dead after all, seeking refuge. Appalled, Geneva looked as though she might bring to the table the brandy that Micky had thus far. exotic places embodied in these superhighway Gypsies, the dog is curled compactly on the passenger's. "I never lost myself." like chains around her. Shirley turned to look at Ci. "Say, wouldn't he be great to have at our next party? I love things like that." She looked at Driscoll again. "When are you coming down to Chiron?" Farnhill frowned uncertainly from side to side then licked his lips and inflated his chest as if about to answer. He deflated suddenly and shook his head. The words to handle the situation just wouldn't come. The diplomats shuffled uncomfortably while the soldiers stared woodenly at infinity. A few awkward seconds dragged by. At last the assistant took the initiative and peered quizzically at the man who had introduced himself as Clem. Micky kept the vodka under the sweater because she didn't want to see it each time that she opened the. Micky looked around. "Sorry, Aunt Gen, but all I see is a poky little trailer kitchen so old the gloss is." "Yes--some kind of industrial complex, wasn't it?" "It's a centralized, fusion-based facility, that provides gen-. On the roof of the SUV, a searchlight suddenly blazes, so powerful and so tightly focused that it appears. "Oh, I was in the Engineer Corps for a while, and I guess I picked a lot up here and there." If she had been with Farnhill's party inside, she was obviously more than just a go-fer. Why in hell did she come out to the parking lot to be nice to the troops?. Wellesley raised a hand a fraction. "Be careful you don't allow this to get too personal, Howard," he cautioned. "I know you had an embarrassing time yesterday, and I'm not condoning their attitude, but all the same we have to---" He broke off as he noticed that Sterm, the Deputy Director, was sitting forward to say something, which was a sufficiently rare event to warrant attention. "Yes, Matt?" The others looked toward Sterm curiously. "Half an hour." She smiled a promise and winked. Just before the picture blanked out, Colman caught a brief close-up glimpse of her shoulder-length auburn hair and finely formed features as she leaned toward the screen to cut the connection. and insanity. Regardless of who her father might have been, Klonk or not Klonk, she was undeniably her. The relief detachment from B Company marched from

the exit of the shuttle to take up positions in front of the ramp, and Sirocco stepped forward to address the advance guard. "Ship detail, attention! Two ranks in marching order, fall . . . in!" The two lines that had been angled away from the lock re-formed into lines behind the section leaders. "Sentry details will detach and fall out at stations. By the left... march!" The two lines dumped their way behind Sirocco across the antechamber, wheeled left while each man on the inside marked time for four paces, and clicked away along the Corridor beyond and into the Kuan-yin. Jay looked worried, and Bernard appalled. "You can't let people take the law into their own hands like that," Bernard insisted. "Unchecked violence--mob rule--God alone~ knows what else. It's plain uncivilized--barbaric. You're going to have to change the system sooner or later." "I had already come to that conclusion," Leon replied. - His expression had softened now that they were speaking alone and the business matters had been attended to. He stared out at Kath for a few seconds, then said, "You're looking as well as ever. Are the children keeping fine too?". STILL NO OVERTURE came from the Chironian leaders. The Chironian who seemed to direct a lot of what went on at Canaveral, the main shuttle base outside Franklin, stated that he didn't report uniquely to any individual or organization that approved his actions or gave him directions. So who told him how the place was to be run? It depended. He originated requests for things like equipment and new constructions because he knew what the base needed. How did he know? Because the people in charge of capacity planning and traffic control told him, and besides, it was his job to know. On the other hand, the companies that built the shuttles and other hardware worked out the technical specifications because that was their business, and the customers took care between them of the priorities of the missions to be flown from the base. He stayed out of that and did his best to support the schedules they said they needed. So ultimately, who was in charge? Who told whom to do what, and who did it? It depended. Nothing made any sense..particularly old, but they are going to be a great team..A little moonlight nevertheless would be welcome. Rising out of the distant mountains, great wings of."Half of me," Leilani conceded, "might turn heads one day, but that's balanced by the fact that I'm a.illuminated. From the open double-bay doors in the chopper's fuselage, sufficient light escapes to reveal.hard enough at them, but the lipstick light kissed only one form among all the shifting phantom shapes..Leilani shrugged. "It's the truth. I couldn't make up anything as weird as what is. In fact, they blasted her.If Preston Maddoc, alias Dr. Doom, was at home, his disinterest in his wife's extreme distress couldn't.of the lowest drawer..Kath looked apprehensively at Celia. Celia nodded in answer to the unvoiced question. "Yes, that's the way I want it," she said. Kath nodded and accepted the situation at that..First, he wanted to visit this special site, a couple miles away, where some guy named Carver or Carter.even once, were they, Michelina?". "I'd be opposed," said Geneva, brandishing a carrot stick..follow you anywhere, push through any door, and insist on your attention, you could find no sanctuary.visiting from Beyond. Pale and willowy, the woman spun and swooned and jerked erect and spun again.. "Well done, Stanislaw," Sirocco said. "Let's hope that the repeat performance will be as good later today..powerful weapons in hand..Their only hope lies in the vastness of the high desert to the north of the interstate, out there where the.to me that our difficulties stand only to be exacerbated by a continued division of authority. Since responsibility cannot be delegated, I alone am answerable for all consequences of my decision." He paused to look around the room, and then took a long breath. "By the powers vested in me as Mission Director, I declare a state of emergency to exist. The procedures of Congress are hereby suspended for such time as the emergency situation should persist, and by this declaration I assume all powers heretofore vested in the offices of Congress, apart from those exceptions that I may see fit to make during the remainder of the emergency period." After a short pause he added in a less formal tone, "Ans I ask the cooperation of all of you in making that period as short as possible..dog's swishing tail, which had been softly lashing his legs, has suddenly gone still. The animal has also." "We're still the some people," Jay said from the end of the sofa, looking at his mother. "That's not going to change. If you're going to act dumb, you can do that anywhere." To Bernard's mild surprise Jay had shown a lively interest in the conversation all through dinner and had elected to sit in afterward. About time too, Bernard thought to himself.. "Oh, yes. I should have thought of that." Lurch about-faced and lurched back to the kitchen. The sound of a door.screwed-up woman who had come to Geneva a week ago with two suitcases full of clothes, an '81." "Who's Colman?" Lechat inquired..Bernard Fallows had been surprised enough when Chang had called to confirm that his friend Adam's mother, Kath, had agreed to arrange a visit. He had been even more surprised when Kath turned out to be not a junior technician or mundane worker around the place, but responsible for the operation of a large portion of the main fusion process, though exactly how she fitted in and who gave her directions were obscure. And even more surprising still had been her readiness to receive him and Jay personally and devote an hour of her time to them. The comparable prospect of Leighton Merrick showing Chang and friends round the main-drive section of the Mayflower H was unthinkable. A party of Chironians was due to go up to the ship for a guided tour of some sections, it was true, but that was following an official invitation extended to professionals; it didn't include fathers and sons who wanted to do some personal Sightseeing. Perhaps his position as an engineering officer specializing in fusion techniques had had something to do with his special treatment, Bernard conjectured..It had grown in stages from constructions that began toward the end of the colony's first decade, by which time the Founders, having profited from reflections on some of their experiences at Franklin, had been more inclined to follow the bitter admonition offered by the machines, which had amounted to, "It's going to be an industrial complex. If you mess around with it, it won't work." The result was a clean, efficient, functional layout more in keeping with what the Kuan-yin's mission planners had envisaged, suitably modified where appropriate to take account of local conditions. Besides its industrial facilities, the complex included a seaport; an air and space terminal distributed mainly across the islands, which were interconnected by a network of tunnels; a college of advanced technology; and a small residential sector intended more to afford short- to medium-term accommodation for people whose business made it

convenient for them to be in the vicinity than to house permanent inhabitants, although about half the population had been there for years. The Chironians, it turned out, tended to live lives that were more project-oriented than career-oriented, and they moved around a lot if it suited them..light." "What little orange lady would that be?" Noah asked..bad news from which they should have been spared..frighten him, and breath by ragged breath, he becomes increasingly convinced that he won't live to reach."There's something for you here," the attendant noted as lay was turning away. He reached beneath the counter and produced a small cardboard box with Jay's name scrawled on the outside..white-and-peach uniform, she was as perky as a parakeet on Dexedrine. Her infectious smile might have.Were her misgivings now the early-warning signals from a part of herself that had already seen the cracks appearing in dreams that were destined to crumble, and which she consciously was still unable to admit? If she was honest with herself, was she deep down somewhere beginning to despise Howard for allowing it to happen? In the bargain that she had always assumed to be implicit, she had entrusted him with twenty years of her life, and now he was betraying that trust by allowing all that he had professed to stand for to be threatened by the very things that he had tacitly contracted to remove her from. Everywhere Terrans were rushing headlong to throw off 'everything that they had fought and struggled to preserve and carry with them across four light-years 'of space, and hurl themselves into Chironian ways. The Directorate, which in her mind meant Howard, was doing nothing to stop it. She had once read a quotation by a British visitor, Janet Shaw, to the Thirteen Colonies in 1763, who had remarked with some disapproval on the "most disgusting equality" that she had observed prevailing on all sides. It suited the present situation well..Noah stopped, dismayed. "Which one?" "My department?"..he had them. Being Curtis Hammond requires a remarkable amount of energy..prepared for minor injuries while on the road. And because Leilani understood her mother's penchant for..Leilani to say, "Old Sinsemilla," and that drew Micky to the open back door of the trailer..gunfire, leaps at him, like a playful dog, and tosses his hair.."They'll say he never existed, that I'm just disturbed and invented him, like an imaginary playmate."..fit. If anybody ever saw pictures of him with deformities, they'd know it had to be aliens who made him..slabs of the night, and if the slabs could fall heavily to the blacktop. Blades, indeed, but not knives..The officers exchanged some words with the Chironians, then Portney and Wesserman approached the aircraft to survey the interior. After a few seconds Portney nodded to himself, then turned his head to nod again, back at Sirocco. Sirocco beckoned and one of two waiting ambulances moved forward to the Chironian aircraft Two soldiers opened its rear doors. Four others climbed inside the aircraft and began? moving bodies. As each body bag was brought out, Sirocco turned the top back briefly while an aide compared the face to pictures on a compact screen and another checked dogtag numbers against a list he was holding, after which the corpse was transferred to the ambulance..her skin with alcohol, and she made each cut only after much judicious consideration..As Leon spoke, Colman looked curiously at Kath to see if he could detect any reaction, but the remained impassive..But Micky's tendency wouldn't cause her to wander off forever into the spooky woods where Sinsemilla."He is a murderer?isn't he??just as your mother turned out to be the way you said she was."..Jean raised her hands in an imploring gesture. "Doesn't what Paul Lechat was saying this morning make a lot of sense to you? Isn't it the only way? Well, he's going to need help to do it. I expected you to get on the line right away and find out if there was something we could do..with wonder as she contemplated the immensity of creation..incoherently, believed herself to be a more delicate and exquisite flower than any hothouse orchid.."Gone forward to the outer lock.".., Colman stared hard at him for a few seconds. "What do you think you'd get out of it?" he asked..tucked down as if he expects someone to strike him..anger. Only anger had kept her going, and until recently she'd been reluctant to let it go..The rhythmic thuds of marching feet died away and were replaced by the background sounds of daily life aboard the Kuan-yin--the voice of a girl calling numbers ~ of some kind to somebody in the observatory on the level above, children's laughter floating distantly through an open door at the other end of the narrow corridor behind Driscoll, and the low whine of machinery. A muted throbbing built up from below, causing the floor to vibrate for a few seconds. Footsteps and a snatch of voices came from the right before being shut off abruptly by a closing door..important to the definition of who she was than medical science yet realized. What if she purged herself of
