She's never told us his name. She's got this thing about names. She says they're magical. "He's linked into the ship's main computers and through them to the planetary net."She hated searching for her mother like this. She never knew in what condition Sinsemilla would be.fate, the more tightly wound she seemed to become. "Okay, what's the point? What's all this UFO stuff."Present . . . arms!" "Just let the system die naturally."Anyway, the toilet?the restroom?is within sight from the lunch counter, at the end of a long hallway.."I never eat it," Leilani said. "The last time old Sinsemilla served it was Monday. So come on, tell me..Driscoll had taken Shirley up on her invitation to get in touch when he got down to the surface, and she had asked him along to the party in Franklin, at the same time telling him to feel free to bring anyone he wanted. So Driscoll had invited Colman, Swley, Maddock, and Stanislau, who among them had persuaded Sirocco to come too, and Sirocco had suggested bringing some of the girls from the Mayflower II. Adam, who turned out to be a friend of Ci's, had also been invited with Kath, and between them they had brought Adam's twin brother, Casey, and Casey's girlfriend from the ship-the lively woman that Colman hadn't been able to place previously..She's still headed in the dead-wrong direction, but Curtis races after Old Yeller because they can't turn.identify a reason for this almost sweet anticipation. Defensively, she tempered it with wariness..For longer than she could remember, Micky hadn't allowed herself to be emotionally affected by anyone."What sort of baking does your mother do?" Geneva asked.."Bernie, this is too much!" Jean's voice came up from the lounge area below. "I'm never going to get used to this." Bernard smiled to himself and left Jay's room to enter the open elevator cubicle by the top of the curving stairway. Seconds later he walked out again and into the lounge. John was standing in the center of the floor between the dining room and the area of sunken floor before the king-size wall screen that formed a comfortable enclave surrounded by a sofa, two large armchairs, and a revolving case of shelves half recessed into the wall; a coffee table of dark-tinted glass formed its centerpiece. She gestured helplessly. "What are we ever going to do with all this space? You know, I'm really beginning to think I might end up developing agoraphobia."."Good, very good. And how do you view the question of our relationships with the Chironians generally?".Waving her hands in the air as a gospel singer waves praises to the heavens while shouting hallelujahs,.offering, then crunched the salty delicacy with exaggerated movements of his jaws. As though to prove how tough she was, Leilani crumpled the empty beer.punctuated by spells of bewildered placidity..Bernard spread his hands resignedly. "Very well, I can see the sense in being prepared. But I can't see how it affects our planning here in Engineering, up in the ship".you can throw them away, little mouse. Only you."In the end, everything is a gag, ?Charlie Chaplin.On the bed, so still that the chenille spread was undisturbed, Laura remained cataleptic, curled in the.shivers, though unable entirely to banish an inner chill..without permission in writing from the publisher. " ? because you . . . because.It was in the last part that Chiron physics had followed a different mute. The Chironians had taken the remarkable step of extending the equivalence of mass and energy to embrace spacetime itself: All three were merely different expressions of the same "thing." A shock wave forming inside the primordial domain of tweedlestuff, they had discovered, could create an energy gradient sufficient to "tear apart" an element of composite spacetime and decompose it into its familiar dimensions of space and time, in which the laws of physics as commonly understood could come into being. Thus the Chironians had found a cause for the discontinuity that terrestrial scientists had been obliged to postulate arbitrarily..CHAPTER THREE."What about human beings crossed with wildly poisonous vipers?" Micky proposed..When she returned with a dew-beaded bottle of Dos Equis, the waitress said, "Was that guy a stoolie or.forever. Girl, I'd give everything I have if that could happen for you."Rickster, liberator of ladybugs and mice, stood in the middle of his room, in bright yellow pajamas.."His sister's cool."Driscoll moaned miserably and started dabbing it off, but.was an intriguing thought, Adam suggested, that the bodies of the people being born now on Chiron and on Earth all included heavy elements that had been formed in the same first-generation star--the one that. had triggered the shock wave when it exploded a~ a supernova. "We might have been born light-years apart," he told Colman. "But the stuff we're made of came from the same place".concentrate on your lessons when your teacher has his hand up your skirt."."Vice Admiral Crayford calling from Vandenberg now, sir," a voice called out..Stern snorted. "I need neither. The same forces that will subdue Chiron will subdue the people also." His eyes flickered over Celia's body momentarily. "And they will submit because they, like you, have an instinct to survive."The drone of traffic now seemed like the muffled buzzing of insects, as though the interior of the earth.why are you painting it?" he asked. Whatever we do to that one won't stop them from closing the second one."..anger. Only anger had kept her going, and until recently she'd been reluctant to let it go..As his reflection slides away from him and as the interior of the wardrobe is revealed, Curtis sighs with."I said you were in too much of a hurry," Jean said to Bernard. "Just think, all that work for nothing. We should have

waited a bit longer for those Chironians to get round to us." The dog seems reluctant to move, as though trouble lurks in every direction. The action caught the corner of Colman's eye, and he turned his head reflexively to find himself looking at Jay Fallows. Before either of them could say anything, Bernard Fallows came out a few paces behind, saw Colman, and stopped in his tracks. It was too late for him to go back in, and impossible to walk on by. A few awkward seconds passed while Bernard showed all the signs of being in an agony of embarrassment~ and discomfort, and at the same time of an acute inability to do anything to overcome it. Colman didn't feel he had any prerogative to make a first move. Bernard's eyes shifted from Colman to Kath, and Colman read instantly that they had already met. Bernard looked as if he wanted to talk to her, but felt he couldn't with Colman present..Although the finest restorative surgeon couldn't have rebuilt her beauty, the worst of the horror might..Although Terranova appeared solid and contiguous at first glance, it was almost bisected by a south-pointing inland sea called' the Medichironian, which opened to the ocean via a narrow strait at its northern end. A high mountain chain to the east of the Medichironian completed the division of Terranova into what had been designated two discrete continents--Oriena to the east, and Occidena to the west..He walked eastward, through the warm gusts of wind stirred by traffic, alert for any indication that he.. She leaned to one side to let her mother see the hand she was holding..Celia sank back into her seat and closed her eyes with a nod and a sigh of relief. He slides one bolt into its hasp, then engages the..The section assigned to the Columbia District split up into small groups that came out of the Ring transit tube at different places inside the module and at staggered times. Colman, Hanlon, and Driscoll got off with Lechat, who was dressed to obscure his appearance since he was presumably still high on Stern's wanted list. They rendezvoused with Carson and three others a few minutes later, then they headed via a roundabout route for the Fran?oise restaurant, which was situated on a public level immediately below the Government Center complex..was under surveillance. No one followed him, not even at a distance.. "Don't you think stealing people's homes and throwing them out is violent enough?" Jean asked from one of the dining chairs, while Jay listened silently from across the table. "What were they supposed to do? They ignored the soldiers and settled it with the man responsible. He should have been expecting it."..The man squints at the mirror. "Hey, you. Stop." The major in command of the four SD troopers sent to scout out the center of Canaveral City --a residential and commercial suburb situated outside the base and merging into one side of Franklin--addressed the Chironian whom they had followed from the restaurant a few yards back around the corner. He was well-dressed, in his midthirties, and carrying an attach6 case. The Chironian ignored them and kept walking. Whereupon the major marched ahead to plant himself firmly in the man's path. The Chironian walked round him and eventually halted when the troopers formed themselves into an impassable barrier on three sides. "You're coming to talk to the ambassador," the major informed him..Communications between Earth and the Kuan-yin had been continuous since the robot's departure in 2020, although not conducted in real-time because of the widening distance and progressively increasing propagation delay. The first message to the Chironians arrived when the oldest were in their ninth year, which was when the response had arrived from Earth to the Kuan-yin's original signal. Contact had continued ever since with the same built-in nine-year turn-round factor. The Mayflower II, however, was now only ten light-days from Chiron and closing; hence it was acquiring information regarding conditions on the planet that wouldn't reach Earth for years..income tax on it."..whenever they need it. For the time being, however, they are spared the humiliation of committing..Jay shrugged. "All the things crazy people usually follow crazy leaders for, I guess.".. "I see." Stern studied her face for what seemed like a long time. At last he asked in a strangely curious voice, "And if I did, what then, Celia?".. "There's half a pie left," Geneva offered cheerily..another larceny..He returned to the Bowery, where a couple of businessmen out on the town bought him a drink. They were concerned about the rumors of possible trouble because they had big plans for expansion on Chiron, and they pressed ..... Colman for inside information from the Military. Colman ' ~d he didn't have any. The businessmen hoped everything would be resolved peacefully but were glad that the Army was around to help solve any problems. They didn't

want peace to prevent people like Colman from getting shot or so that Chironians who were like Jay and the black guy near Zeerust could become engineers or run their farms without getting wiped out by air strikes; they wanted it So that they could make money by hiring Chironians at half the wages they'd need to pay Terrans, and to set up good, exclusive schools to put their kids in. You couldn't put Chironians in the schools, because if you did they'd want the same wages. And in any case they'd never be able to afford it. The Chironians weren't really people, after all..hearts, wounded minds, torn spirits.."I don't have any idea what you're talking around," Micky lied. "That's for you to tell me . . . when you're."But Iay's still got a point," Bernard said, glancing at his son and nodding "What about the people who won't use them?" "How else could it be?" Adam said when Colman asked him about it. "Sure they had to learn how to use a gun. You know what kids are like. The machines couldn't be everywhere all the time. Ask my mother about it, no1 me."..worn off the Formica."..never seen their faces clearly..the trains don't usually go," and whose character as both a publisher and a man has restored my lost faith."This zwieback crap."..Sterm nodded slowly as he ticked off the points one by one in his mind, looking at Stormbel coolly, then turned to Gaultitz, one of the senior scientists, who was sitting with some advisers to one side of the room. "Let us be certain about the Kuan-yin," he said. "The success of the entire operation is at stake. You are quite sure?"..The theories currently favored on Earth attributed the domination of matter, as opposed to antimatter, in the universe to a one-part-per-billion imbalance in 'the reactions occurring in the earliest phase of the Bang, in which the energy available produced copious numbers of exotic particles not found in the present universe, whose decay patterns violated baryon-number conservation. In the present universe they appeared rarely, only as transient "virtual particles" and were responsible for the almost immeasurable, but measured, 10<sup>31</sup>-year mean lifetime of the proton.."As long as you think of me as a handicapped waif, your pity doesn't allow you to be impolite. "You'll have to forgive me, Leilani. I've.ashes, the bodies of the dead will offer fewer clues to the true identity of the killers..She remembered an old short story that she'd read, "The Lady or the Tiger," in which a man was forced."Yes, I did. Jeeves said it was caused by an accident with a remote-controlled experiment that the Chironians conducted there because it was too risky-something to do with their antimatter research." Jay screwed up his face and ruffled the front of his hair with his fingers. "But that's the kind of thing you'd expect somebody to say, isn't it?, and Chironians don't make a lot of mistakes." He looked around the circle of appalled faces staring back at him. "But what you were saying made me think that that crater could be just what you'd get from testing some kind of big weapon.explains that it's more polite to say restroom..would need the weapon. Nevertheless, he had no plans to remake it into a plowshare..Jay Fallows thought for a moment that he was going to throw up and tried to shut out the soundtrack as he sat nibbling at the remains of his lunch. An astronomy book lay propped open on the table in front of him. Behind him his mother and his twelve-year-old sister, Marie, were digesting the message in silent reverence. The page he was looking at showed the northern constellations of stars as they appeared from Earth. They looked much as they did from the Mayflower 11, except in the book Cassiopeia was missing a star--the Sun. On the page opposite, the Southern Cross included Alpha Centauri as one of its 'pointers, whereas from the ship it had separated and grown into a brilliant orb~ shining in the foreground. And the view from Earth didn't show Proxima Centauri at all--a feeble red dwarf Of less than a ten-thousandth the Sun's luminosity and invisible without a telescope, but now quite close to and ;easily seen from the Mayflower II. Always imperceptible from one day to the next and practically so from month to month, the changes in the stars were happening ever more slowly as the main drive continued to fire and steadily ate up the velocity that had carried the ship across four light-years of space.."I never go to the movies.."And that would be enough to fix something?"..Sirocco hesitated for a moment, then nodded reluctantly..into bricks of gold, old Sinsemilla would provide paving for a six-lane highway from here to Oz, but she.once more. I just want to hear about someone who lived there and came from there. Where did you come from?."You've got it," Kath said lightly. "Isn't that what teaching children is all about?"..Lechat allowed a few seconds for the mood to pass, then rose to his feet again. "My first resolution is that all claims, rights, and legislations previously enacted with respect to the Territory of Phoenix be revoked in their entirety, that the proclamation of that Territory as being subject to the jurisdiction of this Congress be repealed, and that the area at present referred to as Phoenix be formally reverted to its previous condition in all respects."..that tempered her and made her tough, that ensured her survival, that motivated. Drink often fueled her."You shouldn't stray from right here, son. There's all kinds of people in the world, and some you don't."If you mean systems of beliefs based, despite their superficial appearances to the contrary, on morbid obsessions with death, hatred, decay, dehumanization, and humiliation, then the answer to your question is no," she said, looking at Colman. She glanced at her grandchildren. "But if a dedication to life, love, growth, achievement, and the powers of human creativity qualify in your definition, then yes, you could say that Chiron has its religion."
