"It was one of our people," the major said..As though it were the most natural thing to do, the girl picked up Micky's fresh can of Budweiser and..Although they're riding the Hannibal Lecter band bus and running from a pack of terminators who have..What had surprised him even more was the quality of everything they had provided. The closets, drawers, and vanity that formed one wall of the room by the entrance to the bathroom were old-fashioned in style, but built from real, fine-grained wood, expertly carved. The doors 'and drawers fitted perfectly and moved to the touch of a finger. The fabrics and drapes were soft and intricately woven rather than having been patterned by laser impregnation; the carpets were of an organic self-cleaning, self regenerating fiber that felt like twentieth-century Wilton or Axminster; the bathroom fittings were molded from a metallic glazed crystal that glowed with a faint internal fluorescence; the heating and environmental system were noiseless. On Earth the place would have cost a hundred thousand at least, he reflected. He wasn't sure if the Chironians still owned the complex and had leased it to the Mission for some' period, or what, but the letter from Merrick assigning him to quarters allocated on the surface hadn't mentioned rental payments. In his eagerness to get down from the Mayflower II, Fallows, after some moments of hesitation, had decided not to ask.."We lived in San Francisco then.."shoulder straps and bodice, as well as on the deep flounce that hemmed the skirt. The garment appeared."There's also beer. Your uncle Vernon liked two icy beers more evenings than not.."Celia managed a smile. Sirocco had seen no reason to mention to the troops her part in the Howard Kalens affair and had told them simply that the object of the exercise was to broadcast some new facts which would be enough to put an end to Sterm. "Fm not sure what Fm supposed to say," she told Hanlon. "I'll never be able to thank you both enough. I think I'm beginning to see a whole new world of people that I never imagined existed.."So that was it! Merrick's blue-eyed boy had let him down, and he needed a replacement. Merrick didn't give a damn about Bernard's qualities as an engineer; he was interested only in extricating himself from what was no 'doubt an embarrassing predicament, As Bernard thought back over the deviousness that he had listened to since he sat down, his memory of Kath's frankness and openness, even to a stranger, came back like a breath of fresh air. "You can stuff it," he heard himself say even before he realized that he was speaking..Continuing to snarl soundlessly at the mirror, the stranger employs a fingernail to pick between two teeth..bones..know why you can't, too, and that's all right.."At any moment, however, one of them might retreat here to the bedroom. She might have imagined the thin hiss as the thwarted snake sailed."Are you all right?" Micky asked, moving along the fence toward the collapsed section of pickets..and red checkered shirt. If her breasts weren't real, the nation was facing a serious silicone shortage..The Chironian, by contrast, saw a rich, bright, vibrant universe manifesting at every level of structure and scale of magnitude. The same irresistible force of self-ordering, self-organizing evolution that had built atoms from plasma, molecules from atoms, then life itself, and from there produced the supreme phenomenon of mind and all that could be created by mind. The feeble ripples that ran counter to the evolutionary current were as incapable of checking it as was a breeze of reversing the flow of a river; the promise of the future was new horizons opening up endlessly toward an ever-expanding vista of greater knowledge, undreamed-of resources, and prospects without limit. Far from having probed the beginnings of all there was to know, the Chironian had barely begun to learn.."So would you want to go on record as advocating a disloyal and subversive act?" Merrick challenged..has been his companion for the past hour, as he's traveled twisting trails through exotic underbrush,..fate, to chance, to dangerous men, as helpless as she had been throughout a childhood lived under the..Howard brought a hand up to his chin sad rubbed it dubiously for a few seconds. "Mmm . . . Sterm. I can~ make him out. I get the feeling that he could be a force to be reckoned with before it's all over, but I don't know where he stands." He thought for a moment longer and at last shook his head. "There are some confidential matters that I'll want to bring up. Sterm could turn out to be an adversary. It wouldn't be wise to show too much of our hand this early on. You'd better leave him out of it. Later on it might change... but let's keep him at a distance for the time being.."Just . . . what are you getting at?" Bernard asked, sounding disbelieving of his own ears and suspicious at the same time..pickled slugs, and crushed-insect protein. The earthworm pie sort of put an end to all that. I'm absolutely."If you say so," Stanislaw said.."D Company's resident miracle worker," Colman answered, but his voice was distant as he fitted the new piece~ into the picture in his head. He made a sign to Sirocco to get Swyley up to the front of the room, and to a chorus of groans! Sirocco turned back and suspended the briefing once again..Curtis, he examines his face in the mirror..toward the sky as though the lunar light inspired joy. Face tilted to bask in the silvery rays, she turned..Then, slowly, she realized what her mind had responded to unconsciously in the faces of the three children in the Chironian sculpture. The artist had been not merely an expert, but a master. For fear was there too, not in any way that was consciously perceptible, but in a way that slipped subliminally into the mind of the beholder and gripped it by its deepest roots. That was why she

had felt disturbed all the way back from Franklin. But there was still something else. She could feel it tugging at the fringes of awareness-something deeper that she hadn't grasped even yet. She turned her eyes to the sculpture again..Otto smiled humorlessly. "Take a look at the other lunatics around you," he suggested. "What happened to all the people? Where did your army go? They're all Chironians now. And you have nothing to offer them but protection from the fear that you would manufacture in their minds. But they have Chironian minds. They see that the fear is your fear, not theirs; and it is you who are in need of protection, not they."..about his stowaways.."When we were discussing the Continuity of Office clause," Kalens prompted..touch any more than she had reacted to Micky's questions. Tremors quaked through her.."You don't sound like a guy who wants to be friends.".."Thank you, and my compliments to you, sir." Hoover acknowledged in a suddenly more agreeable voice. "I hope you all enjoyed your visit and that we'll see you here again soon." The cart rolled away to deliver its load to the handling machine. Hoover escorted the group back to the entrance. "Now, next week we're expecting a consignment of absolutely first-class--".But Celia seemed for the moment to be on the verge of collapse from nervous exhaustion. He sighed to himself, decided answers could wait for a little longer, and settled into his seat..This particular pooch, panting now that panting is safe, still basks in the two words of praise. He is a.Celia took a quick breath, held it for a moment, and then lifted her face toward him. "Very well. I've seen what happened to the corporal and to Padawski. The Chironians retaliate against whomever they perceive as the cause of hostility directed against them. If the evictions are enforced."lie's hysterical." Noah shoved the bag into a pants pocket..A serving robot arrived at the table and commenced dispensing its load, at the same time chatting about the quality of the steaks and the choices for dessert. Bernard turned to stare out of the window and think. A knot of figures, all clad in olive drab and standing not far from the main entrance in the parking area below, caught his eye and caused him to stiffen in surprise. They were wearing uniforms---U.S. Army uniforms. Some kind of delegation from the Mayflower II was visiting the place, he concluded. The thought immediately occurred to him that they could be the visitors whom Kath had gone to talk to. After a few seconds he turned his face back again and asked Nanook, "Do you know anything about other people from the ship being here today?".Bernard, now a little calmer with the change of subject, picked up his glass again, took a sip, and shook his head. "Aren't you overreacting just a little bit, Jerry? Exactly what kind of trouble are you talking about? What have we seen?" He looked from side to side as if to invite support, "One idiot who should never have been allowed out of a cage got what he asked for. Fm sorry if that sounds like a callous way of putting it, but it's what I think. And that's all we've seen."..to your future. Now he proved that he himself could not.Ordinarily, nothing made Micky bristle with anger or triggered her stubbornness more quickly than being.From his hiding place in the Explorer on the lower deck of the car transport, he watches as purposeful.Leilani shrugged. "It's the truth. I couldn't make up anything as weird as what is. In fact, they blasted her.Just then, two Chironian girls strolled around the corner from the narrow corridor. They looked fresh and pretty in loose blouses worn over snug-fitting slacks, and had lightweight stretch-boots of some silvery, lustrous material. One of them had brown, wavy hair with a reddish tint to it, and looked as if she were in her mid-thirties; the other was a blonde of perhaps twenty-two. For a split second, Driscoll felt an instinctive twinge of apprehension at the thought of looking ridiculous, but the girls showed no surprise. Instead they paused and looked at him not unpleasantly, but with a hint of reserve as if they wanted to smile but weren't quite sure if they should..Ten minutes later, in the privacy of the small armory at the back of the Orderly Room, Colman had told Sirocco as much as he had learned from Jay, and as much as was necessary about Celia and Veronica. Sirocco had informed Colman and Hanlon that Stormbel had seized command of the Army and was backing Sterm, and that Sterm appeared to be holding together the bulk of what Was left of the Army by appealing to fears among the senior officers that the assassination of Kalens might represent a new general threat from the Chironians..About all he was good with outside things like that was cards. He couldn't remember exactly when his fascination with them had started, but it had been soon after Swyley, then a fellow private, had taught him to shuffle four aces to the top of a deck and feed them into a deal from the pall. Finding to his surprise that he seemed to have an aptitude, Driscoll had borrowed a leaf from Colman's book and started reading up about the subject. For many long off duty hours he had practiced top-pass palms and one-handed side-cuts until he could materialize three full fans from an.Perhaps he had been hasty, and maybe just a little naive, when he and Eve had talked with Lechat, he admitted to himself. He still believed, as he had believed then, that the Terrans would melt quietly into the Chironian scheme in their own time if they were left alone to do so, but it was becoming apparent that not everybody was going to let them alone. He still couldn't see permanent Separatism as the answer either, but for the immediate future he would feel more comfortable at seeing somebody with a level-headed grasp of the situation in control-such as Lechat. On reflection, Pernak regretted his response to Lechat's plea for support. But it was far from too late for him to be able to change that. He didn't know exactly what he could do to help, but he was getting to know many Chironians and to understand a lot about their ways. Surely that knowledge could be put to some useful purpose.."That's true," Bernard agreed. "But the risk of Sterm trying anything with those weapons has to be greater if he thinks he can blackmail a defenseless planet, If he knew what he was up against-you don't have to give him every detail-it might be enough to persuade him to give it up. That's all we're asking. For the sake of those people up there, you owe it to spell out a warning, clearly and unambiguously.".."If anyone could, they could," Veronica said from across the room. "That bunch could clean out Fort Knox without anyone knowing."..remains optimistic about his chances of escape. The sight of his canine companion, happily drinking..Because of the problem of both words having the same initial letter, the dum came to be designated by U and the dee by E. The dum carried a one-third charge,

and the dee carried none. Two dums and a dee made the up quark, its three possible color charges being represented by the three possible pennutations, UUE, UEU, and EEU. Similarly two dees and a dum yielded the down antiquark in its three possible colon as UEE, EUE, and EEU; in the same way two "antidums" and an "antidee" gave the up antiquark; and two antidees and an antidum, the down quark. Three dums together carried unit charge but no color and resulted in the positron, designated UUU, and three antidums, each one-third "anticharge," i.e., negative, made up the normal electron, UUU. Three dees together carried no charge and formed the electron-type neutrino, and three antidees in partnership completed the ground-state generation as the electron-type antineutrino. It followed that "antitweedles" didn't necessarily give an antiparticle, and tweedles didn't always make a particle. Tweedles predominated over antitweedles, however, in the constitution of normal matter; the proton, for example, comprising two up quarks and a down quark, was represented by a trio of "tweeplets" such as UUE; UEU; UEU, depending on the color charges assigned to the three constituent quarks..ahead was the room that her mother shared with Preston..dog's swishing tail, which had been softly lashing his legs, has suddenly gone still. That was really what I wanted to talk to you about." Merrick was speaking casually in a way that seemed to assume the subject to be common knowledge although Bernard still hadn't been told anything else about it officially; but at the same lime he was eyeing Bernard curiously, as if unable to suppress completely an anticipation of an objection that he knew would come..could have charmed the snake of Eden into a mood of benign companionship. Hanlon ordered three hamburger dinners, and the two sergeants spent a half hour talking with Jay about Army life, football, and how Stanislaw could crash the protected sector of the public databank. Finally Jay said he had to be getting home, and they walked with him up several levels to the Manhattan Central capsule point..isn't it. It's just a phase. She'll get over it. "It's not exactly that kind of trouble Fm bothered about. But if this goes further than that . . . if the Army starts cracking down, and especially if it starts wheeling out the weapons up in the ship, if things like that start getting thrown around, we won't be counting the bodies in ones and twos." "What's the target for the missile strike?" Colman asked hoarsely..Judging by the sound of it, the chopper is heading southwest, following the interstate. This is not good..Micky was left speechless not by the child's acute perception but by hearing the truth put so bluntly..entirely to down-to-earth stuff like TV wrestling, video games, dinosaurs, and serial-flushing public.What had impressed him the most was the way the kids seemed to be involved in everything that was going on just as much as the grown-ups. They didn't come across like kids at all, but more like small people who were busy finding out how things were done. In a room two posts back, he had glimpsed a couple of kids who couldn't have been more than twelve probing carefully and with deep frowns of concentration inside the electronics of a piece of equipment that must have

cost millions. The older Chironian with them just watched over their shoulders and offered occasional suggestions. It made sense, Driscoll thought. Treat them as if they're responsible, and they act responsibly; give them bits of cheap plastic to throw around, and they act like it's cheap plastic. Or maybe the Chironians just had good insurance on their equipment..Wendy sighed. "We all have our plights and pickles." The plosive squeal of air brakes, recklessly applied so late, reveals the driver not as a man at the mercy of a million disguised as a research grant. Her own nonprofit corporation holds title to the property." "I'm not sure.., maybe fifty. We've left most of them back down the ramp covering the lock out of the cupola." "It's all very nice," Veronica agreed, getting up from her chair in the large living room of the Kalenses' Columbia District home. "I'm sure you'll find somewhere wonderful." Veronica had been one of Celia's closest friends since the earliest days of the voyage. She had earned herself something of a dubious reputation in some circles by not only joining the ranks of the few women to have been divorced, but by staying that way, which for some reason that Celia had never quite fathomed endeared Veronica to her all the more as a companion and confidante..Bernard Fallows had been surprised enough when Chang had called to confirm that his friend Adam's mother, Kath, had agreed to arrange a visit. He had been even more surprised when Kath turned out to be not a junior technician or mundane worker around the place, but responsible for the operation of a large portion of the main fusion process, though exactly how she fitted in and who gave her directions were obscure. And even more surprising still had been her readiness to receive him and Jay personally and devote an hour of her time to them. The comparable prospect of Leighton Merrick showing Chang and friends round the main-drive section of the Mayflower H was unthinkable. A party of Chironians was due to go up to the ship for a guided tour of some sections, it was true, but that was following an official invitation extended to professionals; it didn't include fathers and sons who wanted to do some personal Sightseeing. Perhaps his position as an engineering officer specializing in fusion techniques had had something to do with his special treatment, Bernard conjectured..crosslight of the moon and the fading purple dusk, but that probably matched Leilani's shade of blond..even any response whatsoever.."Where do you get this stuff?" "There's half a pie left," Geneva offered cheerily.."We have to do something," Marcia Quatrey insisted. "Even if it means putting the whole town under martial I law, some form of official recognition is imperative. This has gone on far too long as it is." "You got it wrong," Colman told them. "It's not the little ones at all." He widened his eyes in a parody of lewd anticipation and grinned. "Think of all those grandmothers." Terry and Paula laughed..Leilani winced. "Unfair. You know that's one of my sore points." "No sore points. No points at all,".She brightened. "Hey, you probably got something there." Then her sigh vented volumes of..arrive. They're in the Columbia District-not far from the Communications Center. If there was some way of getting Borftein out and taking him in on our plan, it would stand a much better chance of having the effect you want on the Army." Then as an afterthought she added, "And if Wellesley could be included as well as Borftein, it might help to make up for some of the things we can't prove." She shifted her gaze around the room and eventually allowed it to settle on Colman. "But I don't know if something like that would be possible."
